THE CENTENNIAL

GAZETTEER

OF THE

UNITED STATES.

A

GEOGRAPHICAL AND STATISTICAL

ENCYCLOPÆDIA

OF THE STATES, TERRITORIES, COUNTIES, TOWNSHIPS, VILLAGES, POST-OFFICES, MOUNTAINS, RIVERS, LAKES, ETC., IN THE

AMERICAN UNION,

SHOWING THE EXTENT OF ITS GROWTH, THE VASTNESS OF ITS WEALTH AND RESOURCES, AND ITS EDUCATIONAL, INDUSTRIAL AND POLITICAL STATUS AT THE END OF THE FIRST CENTURY OF THE REPUBLIC, EMBRACING THE DATA FURNISHED BY THE CENSUS OF 1870, AND THE MOST RECENT OFFICIAL REPORTS.

Wilhelm August BY Friedrich, Baron

A. VON STEINWEHR, A. M.,

(Author of Eclectic Series of School Geographies, and Topographical Map of the United States.)

LIBRARY OF CONGRESS No. 13163 WASHINGTON.

ZIEGLER & McCURDY,

PHILADELPHIA, PA.; CINCINNATI, OHIO; CHICAGO, ILL.; ST. LOUIS, MO.; SPRINGFIELD, MASS.

[1873]

Entered according to Act of Congress, in the year 1873,
By ZIEGLER & McCURDY,
In the Office of the Librarian of Congress, at Washington.

PREFACE.

In preparing the Centennial Gazetteer, the author has endeavored to present to his readers the latest geographical and statistical information relating to the United States, in a compact and convenient form.

The book contains descriptive articles on the states and territories; the counties and townships; the cities, villages and post-offices, and the principal mountains, rivers and lakes. As these articles are alphabetically arranged, reference to any of them is easy, and the reader can readily obtain the information he may be in search of.

The sources from which the materials of the Gazetteer have been drawn were numerous and ample, and have been furnished by the various authorities (the chiefs of bureaus of the general government and the secretaries of the different states) with great liberality, for which the author would herewith tender his sincere thanks. To enumerate all the documents, reports and other works which have been consulted and used, would far exceed the limits of this preface. The most important only can be indicated here. Such are the *State Geological Reports* and the reports of *explorations* west of the Mississippi River. These documents furnished the materials necessary for the description of the *surface structure* and the *soil* of the states, territories and counties.

The remarks on the *climate* of the United States and the several states have been drawn chiefly from the large meteorological publications of the Smithsonian Institution, and the excellent charts inserted in the third volume of the Ninth Census Report.

Particular attention has been given to the subject of *statistics*. These have been derived from the Report of the Ninth Census, the reports of the Chief of the Bureau of Statistics, in Washington, and numerous other sources. Where not otherwise indicated, the figures are mostly those of the census. Older statistics have been largely introduced for the purpose of enabling the reader to institute comparisons and to trace the more or less rapid progress of a state, city or county.

The *railroad statistics* have been taken from H. V. Poor's Railroad Manual, and the American Railway Manual by Edward Vernon.

Several of the state and territorial governments (as Washington, Utah, Arkansas, South Carolina, etc.,) have published treatises on their natural resources, etc., designed to guide emigrants in the selection of new homes. These have been made use of as far as the information given appeared reliable.

The *location* of cities and villages has been described from the large postal maps published by the Post-office Department at Washington, from railroad guides and all

other available sources, and, it is hoped, will be found correct, so that the GAZETTEER may serve as a shipping guide for all places of the slightest importance. It will be found a complete post-office directory at the time of its publication.

The author deems the present a very favorable time for the publication of a new gazetteer. The books of this description heretofore published were compiled previous to the civil war, since which period the country has undergone very great political and social changes, aside from its normal progress in wealth, population and industrial activity. Hence they are antiquated and of historical rather than practical value.

The ninth census, taken in 1870, and published a short time ago, proves to be far superior to and more reliable than any of its predecessors—thanks to the labors and critical discussions of its able chief, General Francis A. Walker—and in all probability will be the last that will be taken before the close of the first century of our national existence. It seemed desirable that the results of this great work should be rendered more accessible than is possible through the distribution of the official volumes alone.

It is the opinion of many that we live in a period of transition, and that a new historic era is at hand, well into the midst of which we may find ourselves with the successful solution of such problems as now press the statesman and economist on all sides. With reorganized social, political and industrial conditions in the southern states, with the return of capital from speculative enterprise, with a more elastic and equally distributed currency, and with a rejuvenation of our general political life, we shall have already entered the new historic period. It is more than probable therefore that the CENTENNIAL GAZETTEER will be the very last work of its kind issued during this period of transition, or required for years to come; and it is hoped that, as it will be found to fairly represent the country in its material development, past and present, it will have both historic and practical value.

In conclusion, the author would render thanks to James P. Boyd, Esq., of Philadelphia, for his able assistance and thoughtful co-operation, through which many an error of statement or omission of fact has been corrected.

A. VON STEINWEHR.

ABBREVIATIONS USED IN THE GAZETTEER.

Pk.—Peak.

THE

UNITED STATES OF AMERICA.

THE UNITED STATES OF AMERICA includes within its boundaries the central portion of the North American continent, less than two hundred years ago a comparative wilderness, and covers an area extending from the British Possessions on the north to the Gulf and the Republic of Mexico on the south, being situated between 25° 7′ and 49° North latitude, and between 66° 58½′ and 124° 43′ longitude West of Greenwich. The eastern coast, 2,163 miles long, is washed by the Atlantic Ocean; the western coast, 1,343 miles long, by the Pacific Ocean; and the southern coast, 1,764 miles long, by the Gulf of Mexico.

The greatest breadth of this area, from the mouth of the St. Croix River in Maine to Cape Flattery in Oregon, is 4,316,166 meters, or 2,744 miles, and the greatest length, from the 49th parallel to the mouth of the Rio Grande, is 2,556,219 meters, or 1,588 miles.

The total area, excluding Alaska territory, is 3,026,494 square miles, and including Alaska 3,603,884 square miles; a surface extent surpassed only by that of three great states, the British Empire with all its dependencies and colonies, the Chinese Empire, and the Russian Empire.

1. BOUNDARIES.

The northern boundary begins at the mouth of the St. Croix river, in Passamaquoddy Bay, follows this river through Grand Lake to its source, and thence goes due north till it strikes the St. John river. It then follows the St. John and the St. Francis rivers to the outlet of Lake Pohenagamook, whence it strikes S. W. to a point on the North Branch of the St. John, 10 miles from the main branch. From this point it extends S. 10° W. to the intersection of the S. W Branch of the St. John river and the parallel of 46° 25′ N. latitude, follows this river to its source, thence the Height of Land dividing the affluents of the St. Lawrence river from those of the Atlantic ocean, to the source of Hall's Stream, a tributary of the Connecticut, following this stream to the 45th parallel, which becomes the boundary until it strikes the St. Lawrence river near the village of St. Regis. Thence it passes through the middle of the St. Lawrence, Lake Ontario, Niagara River, Lake Erie, Detroit River, St. Clair Lake and River, Lake Huron, and Lake Superior, to the mouth of Pigeon River. It ascends Pigeon River, crosses the Fowl Lakes and the Lake of the Woods to its north-western extremity in 49° 23′ 55″ N. latitude and 95° 14′ 38″ W. longitude, where it turns due south to the 49th parallel, and follows this parallel to the Canal de Haro, which separates Vancouver Island from the continent and the San Juan Islands.

The southern boundary follows the deepest channel of the Rio Grande del Norte to 32° N. latitude, thence runs due west to 108° 30′ W. longitude, thence south to 31° 30′ N. latitude, thence again west to 111° W. longitude, thence W. N. W. to the Colorado river, below the mouth of the Gila river. From this point it runs to the Pacific coast, opposite the Coronados Island.

The western, or Pacific coast, forms a simple curve and extends from the Straits of Juan de Fuca to Lower California. It is mostly high and rocky and has but one indentation of considerable magnitude, the Bay of San Francisco.

The eastern, or the Atlantic coast, trends from N. E. to S. W., and consists of three shallow curves. The first of these extends from Passamaquoddy Bay to Cape Cod, and is indented by Massachusetts Bay; the second extending from Cape Cod to Cape Hatteras, by New York, Delaware, and Chesapeake bays; and the third, extending from Cape Hatteras to Florida, by numerous sounds or inlets, separating low alluvial islands from the main lands.

The southern, or Gulf coast, extends from Cape Sable, the extremity of Florida, to the mouth of the Rio Grande, and in character resembles the Atlantic coast, being low and level. It is indented by a series of extensive lagoons and bays, as the Laguna Madre, Corpus Christi, Matagorda and Galveston bays, in Texas; Vermilion, Atchafalaya, Terrebonne, and Timbalier bays, in Louisiana, the Bay of Mobile in Alabama, and Pensacola, Tampa, and other bays in Florida.

II. SURFACE.

The surface structure of the United States, the great central portion of the North American continent, is in the general arrangement of its prominent features comparatively simple. It consists of three distinct, well-defined regions or belts, which may be designated as the Eastern Central and Western Divisions.

1. The Eastern Division comprises the broad mountain belt of the Appalachian system, together with the low plain which extends along the sea-coast and gently ascends to the base of the mountains. This plain varies greatly in width. In New England it measures on an average about 50 miles, is much narrower in New York and New Jersey, but farther south expands till it attains a width of over 200 miles in North and South Carolina. South of New Jersey and Pennsylvania it consists of two portions. The eastern is low, level, and in the main sandy; while the western is undulating, or broken, and in some parts considerably diversified by chains of hills. The former is called the Tide Water Section; the latter may be termed the Piedmont District, a name in common use in Virginia. The Appalachian Mountains form a belt about 100 miles wide and 1,300 miles long, and cover an area of nearly 125,000 square miles. They extend from the Canadian Province of New Brunswick to Northern Georgia and Alabama, where the last chains sink down to the nearly horizontal plain. They are composed of a large number of nearly parallel chains, remarkably uniform over long distances in direction and height. The valleys inclosed within these numerous chains, and the gently sloping mountain sides, offer to the settler every possible advantage of soil, water, and vegetation. The western base of the Appalachians is bordered by a broad, slightly elevated table-land, intersected by the numerous water-courses which rise among the mountains and finally join the Mississippi. This table-land extends over western New York, Pennsylvania, West Virginia, the largest portion of Ohio, the south-eastern counties of Indiana, nearly all of Kentucky and Tennessee, and a large part of Alabama.

2. The Western Division comprises the larger portion of that great mass of mountain ranges and table-lands known as the North American Cordilleras, which accompany the Pacific coast of the continent from the Isthmus of Panama to the shores of the Arctic Ocean. Within the United States the Cordilleras occupy the space between the 105th meridian W. of Greenwich, and the western coast. Their eastern border is formed by the Rocky Mountains, their western by the lofty chain of the Sierra Nevada and the Cascade mountains; while the Coast Ranges of California, Oregon and Washington are the outlying spurs and projections of the vast system, and abut with bold promontories and ridges upon the Pacific coast. Numerous broken and detached ranges occupy the wide space between the lofty border chains, and receive distinctive names as they become known to the explorer and the settler.

The Rocky Mountains do not form a single continuous ridge, as the common maps of Colton, Mitchell, and others invariably represent them; but consist of two or more ranges, which inclose the highest portion of the continental plateau, and are connected by traverse ridges at irregular distances. These latter cut up the plateau into a succession of isolated plateaus, or "Parks," shut in on all sides by elevated mountains. Secondary ranges radiate from the principal chains, and jut out into the plains which form the base of the Rocky Mountains along their whole extent. The southern terminus of the Rocky Mountains is between the Rio Grande and Pecos rivers, in western Texas, in about 30° N. lat. From this point they trend N. W. to 32° N. lat., then change their general direction to due N., traversing New Mexico, Colorado, and southern Wyoming, and sink down into that remarkable gap, through which the Sweet Water and the North Platte rivers flow from W. to E., and the western portion of which is called the South Pass. North of this depression the Rocky Mountains trend N. W. through Wyoming, Idaho, and Montana. Their western chain forms the boundary between the two last named territories. For a more detailed description of the different sections of this mountain system, see the articles on New Mexico, Colorado, Wyoming, Idaho, and Montana.

The Rocky Mountains form the great divide between the western tributaries of the Mississippi and the large streams that empty into the Pacific Ocean. They are the culminating region, or apex—so to speak—of the continent, and have a mean elevation of more than 10,000 feet, while their highest peaks exceed 14,000 feet. Of these the following are the best known: Fremont's Peak in Wyoming (13,570 feet); Long's Peak in Colorado (14,050 feet); Mt. Audubon, W. of Long's Peak and near it (13,456 feet); Parry's Peak, 8 or 9 miles S. of the 40th parallel (13,133 feet); Gray's Peak, 6 miles W. of Denver (14,145 feet); Mt. Guyot, 25 miles N. of the 39th parallel (13,223 feet); Mt. Silverheels, S. W. of Mt. Guyot (13,650 feet); Mt. Lincoln, a few miles N. W. of Mt. Silverheels (14,123 feet); Horseshoe Mount, about 8 miles S. E. of Mt. Lincoln (13,806 feet); Pike's Peak (14,218 feet); Mt. Yale, 12 to 14 miles S. of the 39th parallel and W. of the Arkansas river, (14,078 feet); Mt. Harvard, 5 miles N. W. of Mt. Yale (14,270 feet).

The great mountain range which forms the western edge of the Cordilleras is called in California the Sierra Nevada or Snowy Range; in Oregon and Washington, the Cascade Mountains. This range conforms very nearly to the general direction of the coast, from which its crest varies

in distance from 150 to 170 miles. The Sierra Nevada extends from the Tejon Pass in the S., to Mt. Shasta in the N. W., a distance of 550 miles. The eastern slope, which does not exceed 10 miles in width, is bold and abrupt; its western, about 60 miles wide, sinks gently down to the broad valley of the San Joaquin and Sacramento rivers. The southern portion consists of three high crests, which inclose between them the valleys of the two branches of Kern River. From lat. 36° to Lassen's Peak in 40° 30′, the Sierra has but one crest, and from Lassen's Peak to Mt. Shasta it expands into an elevated volcanic plateau, the eastern edge of which is known as Warner's Range. The average height of the Sierra is nearly the same as that of the Rocky Mountains, but it is not so uniform. The southern portion is by far the loftiest, and from 36° 30′ lat. the height of the dominating peaks, as of the passes, decreases as we go northward; the former from 15,000 feet to 8,400 feet; and the latter, from 12,000 feet to 5,400 feet. Mt. Whitney, situated near the head-waters of Kern River, is the loftiest peak thus far known, and is estimated at from 15,000 to 15,300 feet above the sea-level; Mt. Tyndall is 13,386 feet; Mt. Brewer, 13,886 feet; Mt. Lyell, 13,217 feet; Mt. Dana, 13,227 feet; Mt. Hoffman, 10,872 feet; Silver Mountain, 10,935 feet; Pyramid Peak about 10,600 feet; the Downieville Buttes, 8,400 feet; Mt. Onjumi, 8,378 feet; and Mt. Shasta, 14,440 feet. The Cascade Mountains trend due N. from Mt. Shasta through Oregon and Washington, and form the prolongation of the Sierra Nevada, which they resemble in general character, although their average elevation is considerably less. They are cut through by the transverse valley of Columbia River. The highest peaks are Diamond Peak, Mt. Hood (11,225 feet; Mt. St. Helens and Mt. Adams (both from 9,000 to 10,000 feet); Mt. Reinier (14,444 feet); and Mt. Baker (10,719 feet).

The vast region which separates the Sierra Nevada and the Cascade Mountains from the Rocky Mountains is a high table-land with numerous broken and partially detached superincumbent mountains separated by plains and valleys. "The traveler," says J. D. Whitney, "crossing this plateau will thread his way through narrow defiles, wind around innumerable spurs and ridges, traverse narrow valleys and occasional broad plains; the former sometimes green and attractive; the latter always arid and repulsive to the last degree; he will never descend below 4,000 feet above the sea-level, and will never be out of sight of mountains; these will always environ him with thinly wooded flanks and sterile and craggy summits, often glistening with great patches of snow which gradually lessen as the summer advances. In the distance these mountain ranges behind their atmosphere of purple haze will seem massive and uniform in character; as he approaches one he will find it presenting some new charm of hidden valley or canyon, deeply countersunk into the mountain side. As he rises still higher he will quench his thirst at the refreshing spring of pure water, fed by the melting snow above, while the grandeur of the rocky masses, the purity of the air, the solitariness of the almost infinite extent of the panorama opened before him when he fairly reaches the summit, will leave upon his mind an ineffaceable impression of the peculiar features of our western mountain scenery."

The most important of these ranges is that of the Wahsatch Mountains, which passes through central Utah, from N. to S., as a broad belt of highlands of nearly the elevation of the Rocky Mountains, and terminates near the banks of the Colorado river, in the N. W. corner of Arizona. The Uintah Mountains branch off from the Wahsatch toward the E., and are separated from the spurs of the Rocky Mountains by the narrow defile of the Colorado. To the N. of the Uintah Mountains, and bordered by the Rocky and Wahsatch mountains, is the high basin of the Upper Colorado, which the Union Pacific railroad traverses from E. to W. A lower terrace, the basin of the middle Colorado, lies south of the Uintahs and extends to the table-land of the White Mesa, which stretches from the Rocky Mountains westward to the southern extremity of the Wahsatch range. The Colorado breaks through the Mesa, forming those famous canyons which in their stupendous grandeur rank with the most impressive features of the earth. Still farther S. are the massive Mogollon Mountains, and the numerous other chains of Arizona, which all trend N. W. and S. E.

The region which is bordered on the E. by the Wahsatch Mountains and the northern portion of the Rocky Mountains, and on the W. by the Sierra Nevada and the Cascade Mountains, is properly termed the "Great Basin." It varies in width from 200 to 450 miles. The numerous isolated mountains which occupy it have a general north and south trend, and are usually very narrow, not often exceeding 8 or 10 miles in width. The most important of these are the East Humboldt Mountains, 75 miles from the Utah line; the West Humboldt Mountains, 100 miles east of California; and the Toyabe Mountains, nearly intermediate between the two, and flanking the Reese River Valley on the east. Several peaks of the Toyabe and the East Humboldt ranges have an altitude of from 10,000 to 12,000 feet. North of the Humboldt river, which intersects the central part of the Great Basin from E. to W., the mountains assume a different character from those heretofore described, and are not arranged in parallel ridges, but radiate in various directions from central nuclei. Such are the Salmon River Mountains of Idaho, and the Blue Mountains of eastern Oregon, separated from each other by the middle course of Snake River. Eastern Washington consists chiefly of the Columbia River Plain, which in elevation hardly exceeds 2,000 feet. There are three main depressions within this region; one at the base

of the Sierra, at a level of about 3,850 feet above the sea, receiving the drainage of northern Nevada and the eastern slope of the Sierra; the second, the "Great Salt Lake Basin," about 4,250 feet high near the western basis of the Wahsatch Mountains; and the third, "Dead Valley," in south-eastern California, which is several hundred feet below the level of the sea.

3. The Central Division is commonly called the Mississippi Valley, and extends from the Appalachian Mountain system in the E. to the Rocky Mountains in the W. It is an immense plain, comprising an area of 2,455,000 square miles, and extending through 30 degrees of longitude and 23 degrees of latitude. On the N. it is bounded by the Height of Land, a broad table-land less than 2,000 feet above the sea, which separates it from the valley of the Red river of the North, an affluent of Lake Winnepeg, in British America. The lowest portion of the Mississippi Valley is the alluvial bottom or flood-ground of the great river, which extends from the mouth of the Ohio river to the Gulf of Mexico. This bottom varies in width from 30 to 70 miles, and is liable to inundation. Large portions of it are covered with swamps and nearly impenetrable forests. On both sides it is bounded by "bluffs," which are the margins of the higher ground, and often rise 150 or 200 feet above high-water level. In a few instances they approach the river, as at the Iron Banks, near Columbus, and the Chalk Banks, near Hickman, Ky.; at Fulton, Randolph, and Memphis Tenn.; at Vicksburg, Grand and Petit Gulf, Natchez and Fort Adams, Miss.; and at Francisville and Baton Rouge, La. From the bluffs the country rises imperceptibly toward the east and west forming gently inclined planes, through which the tributaries of the parent stream have cut deep valleys. A belt of hills and uplands—the Ozark Mountains, about 2,000 feet high—rises on the western plain and occupies portions of the Indian Territory, Arkansas, and Missouri. The higher portions of this plane, extending along the eastern base of the Rocky Mountains, are known as the Great Plains.

III. RIVERS AND LAKES.

The rivers of the United States belong to three systems, corresponding to the three great physical divisions we have just described. The first embraces the rivers which empty into the Atlantic; the second those which empty into the Pacific; and the third those which empty into the Gulf of Mexico.

1. The largest stream entering the Atlantic is the *St. Lawrence*. Its course intersects the Dominion of Canada; but it also belongs to the United States, for it forms the boundary of the state of New York, and drains the Great Lakes, which receive numerous affluents from the north-central states. The *St. Lawrence*, although not the longest, is the greatest river of the world, surpassing all others in the volume of water which it discharges into the ocean. Its head stream is *St. Louis River*, which rises in the Height of Land, flows through north-eastern Minnesota, and empties into the western extremity of Lake Superior. This lake, as well as the others of the series —Michigan, Huron, St. Clair, Erie, and Ontario—must be regarded as expansions of the *St Lawrence;* and viewed in this light, the *Sainte Marie*, *St. Clair*, *Detroit*, and *Niagara* rivers are but different portions of the same great stream. The entire length, from the source of the *St. Louis* to the *Gulf of St. Lawrence*, is upward of 2,000 miles, and the general direction of its course to the head of Lake Erie is S. E.; thence to the mouth, N. E. The principal tributaries are: *Fox River*, which rises in Southern Wisconsin, flows N. E., and empties into Green Bay; the *Oconto*, *Peshtigo*, and *Menomonce* rivers, also emptying into Green Bay; the *Manistee*, *Notepseacon*, *Muskeegon*, *Grand*, *Kalamazoo*, and *St. Joseph* rivers, which empty into Lake Michigan; the *Au Sable* and *Saginaw* rivers, which empty into Lake Huron; the *Maumee*, which is formed by the confluence of the *St. Joseph* and *St. Mary* at Fort Wayne, and empties into Lake Erie. This lake further receives the *Sandusky*, *Rock*, *Cuyahoga*, and *Grand* rivers, which traverse Northern Ohio. Lake Ontario receives the *Genesee* and the *Oswego*, which is the outlet of the lakes in Central New York; the *Crooked*, *Seneca*, *Cayuga*, *Owasco*, *Skeneateles*, and *Oneida*. The *Black River* rises in the Adirondack Mountains, and empties into the eastern extremity of Lake Ontario. The *St. Lawrence* proper receives the *Oswegatchie*, *Racket*, and *Richelieu* rivers, the last-named being the outlet of Lakes Champlain and George.

The principal New England rivers are: the *St. Croix*, which, forming the eastern boundary of Maine, rises in Grand Lake, 382½ feet above the sea, and empties into Passamaquoddy Bay; the *Penobscot*, which drains the *Chesuncook* and *Pamadumcook Lakes*, receives the *Seboois* and the *Mattawamkeag*, and empties into Penobscot Bay; the *Kennebec*, which drains *Moosehead Lake*, and receives the *Androscoggin*; the *Merrimac*, which is formed by the confluence of the *Pemigewasset* with the *Winnipiseogee*, the outlet of the lake of the same name; and the *Connecticut*, which rises in the Height of Land, near the boundary of Vermont, in two branches (the western of which is called *Hall's Stream*), flows nearly due south as far as Middletown, Conn., where it turns S. E., and empties into Long Island Sound. Owing to the configuration of the country, the rivers of New England are not navigable far inland.

The *Hudson*, the largest river of New York, rises in the Adirondacks, receives the *Sacondago* and the *Mohawk* rivers, and empties into New York Bay. It is a magnificent stream, approach-

ing, if not surpassing, in picturesque scenery, the celebrated Rhine. The *Delaware* rises in two branches in New York, and flowing south forms the boundary between Pennsylvania and New Jersey. Its principal tributaries are the *Lehigh* and *Schuylkill* rivers. The *Susquehanna* is formed by the confluence of the West and East branches, flows through Pennsylvania, receives the *Juniata*, and empties into the head of Chesapeake Bay. This bay also receives the *Potomac*, the *Rappahannock*, and the *James*, the largest stream of Virginia. The *Roanoke River* is formed by the *Staunton* and the *Dan*, which unite near the southern boundary of Virginia. It empties into Albemarle Sound. The *Neuse River* empties into Pamlico Sound. *Cape Fear River* is formed by the *Deep* and *Haw* rivers, flows through southern North Carolina, and empties near Cape Fear. The *Yadkin River* and the *Santee River*, which is formed by the *Wateree* and the *Congaree* rivers. are the principal streams of South Carolina. *Savannah River*, which marks the boundary between South Carolina and Georgia, is formed by the *Tugaloo* and *Kiowa* rivers, and empties below the city of Savannah. Steamboats ascend as far as Augusta, Ga. The *Altamaha River* is formed by the *Oconee* and *Ocmulgee* rivers. The *St. John's River*, of Florida, rises in one of the vast swamps so common in that region, flows north, and turning east, empties into the ocean. The principal rivers enumerated are navigable throughout the tide-water portion.

2. The largest river that empties into the Pacific Ocean is the *Columbia*. It rises in a small lake near the western base of the Rocky Mountains, and at first flows N. N. W. along this range, as far as the foot of Mount Hooker, where it turns W. and then S. In this northerly portion of its course it forms the Upper, Middle, and Lower Arrow lakes. Shortly after crossing the southern boundary of British Columbia and entering Washington Territory, it is joined by the *Clark Fork*, continues its southerly direction, and in about 48° N. lat. turns westward, sweeping in a wide but tortuous curve around the great Columbia Plain. In 46° N. lat and 117° long. W. of Greenwich, it receives its largest tributary, *Snake River*, and assumes a westward course to the ocean, forming the boundary between Washington Territory and Oregon. In passing through a gap of the Cascade Mountains it forms a series of rapids or cascades, which are separated from each other by quiet stretches of water from 25 to 30 miles long. The mouth of the Columbia is an estuary 30 miles long and 6 miles wide, and opens into the ocean between Cape Disappointment and Point Adams. Steamers ply on the lower river to the foot of the lowest cascade, a distance of 140 miles; and above the highest cascade, to Old Fort Walla Walla. A railroad around the cascades connects the lower and upper parts of stream navigation. The distance from the source to the mouth is about 670 miles, the length of the river, 1,150 miles, and the territory drained by it, 338,880 square miles. The Columbia receives numerous, and some very large tributaries. The *Flat Bow Fork* rises in the Rocky Mountains of British Columbia and flows S. into Montana, then returns W. N. W. into Columbia, and joins the parent stream near the southern extremity of the Lower Arrow lake. *Clark's Fork* is formed by *Flat Head River* and *Bitter Root River*. The former rises in the Rocky Mountains south of Kootanie Pass, flows south through Flat Head Lake, and then turns W. *Bitter Root River* rises in the Big Hole Mountains, and pursues a northerly course through a magnificent valley between the Bitter Root Mountains and the Rocky Mountains. It receives *Blackfoot River* and *Big Hole River* from the east. From the junction of the Flat Head and Bitter Root rivers Clark's Fork flows to the N. W. along the base of the Cœur d'Allene Mountains, passes through Lake Pend d'Oreille, and joins the Columbia near the 49th parallel. The *Spokane River* rises in the Bitter Root Mountains, flows westward through Cœur d'Allene Lake, and joins the Columbia in 47° 40′ N. lat.

The *Snake River* or *Lewis's Fork*, rises in the Wind River Mountains, flows to the south along the eastern base of the Teton Range, and then passes through a mountain gap between this range and the Bear River Mountains. After its junction with Henry's Fork it flows south-west through the extensive Camas prairie, and is deflected to the west by the rocky plateau in southern Idaho, which separates it from Humboldt River. In 116° 45′ W. long. it turns north, forms the boundary between Oregon and Idaho, and passing through south-eastern Washington, empties into the Columbia about 10 miles north of the Old Fort Walla Walla. The Snake is a magnificent stream, marked in many parts of its course by the most impressive mountain scenery. It forms several falls of great dimensions, hardly, if at all, inferior to those of Niagara. The largest affluents are *Godin's River*, *McArthur River*, *Salmon River*, and *Clear Water River*, all in Idaho; *Paloose River*, in south-eastern Washington; and *Owyhee River*, *Malheur River*, and *Grande Ronde River*, in Oregon. Below the junction with *Snake River*, the *Columbia* receives the *John Day's river*, which rises in the Blue Mountains, the *Des Chutes* or *Falls*, which flows along the eastern base of the Cascade Mountains; and *Willamette River*, which traverses a very productive valley in western Oregon, between the Cascade Mountains and the Coast Ranges. The two largest rivers of California, the *Sacramento* and *San Joaquin*, empty into the Bay of San Francisco. (See article California.)

The *Colorado River of the West*, which empties into the Gulf of California, is formed by the confluence of the *Greene* and *Grand* rivers. The former rises in the Wind River Mountains, the loftiest of the Rocky Mountain ranges of Wyoming, and flows south across the elevated

plateau over which passes the Union Pacific R. R. The Uintah Mountains deflect it to the E. Turning their eastern base it flows again S., through an extensive basin between the Wahsatch and the Rocky mountains. Near the 38th parallel it joins *Grand River*. This large stream rises in the Middle Park of Colorado, breaks through the western range of the Rocky Mountains, and flows south-west, between the Book and the Elk mountains. From the junction of the *Green* and the *Grand* rivers, the *Colorado* pursues its south-westerly course and enters those stupendous chasms in the White Mesa, known as the Great Canyon. At Collville, in south-eastern Nevada, it emerges from this canyon, and flows due south, passing through valleys and other canyons, until it crosses the low Colorado Desert, and at last mingles its waters with those of the Gulf of California. The length of the *Colorado* from the source of *Green River* to the Gulf is over 1,000 miles, and it drains a territory of 227,000 square miles. Its western tributaries are small, but the eastern are large streams. The *Rio San Juan*, or *Rio Blanco*, rises in the Sierra Mimbres, and has a westerly course. The *Little Colorado*, or *Flax River*, rises in the Zuni Mountains, and flows along the southern margin of the White Mesa, passing, like the parent stream, through deep canyons. *Gila River* rises in the mountains of south-western New Mexico, and with a tortuous westerly course passes numerous mountain chains and joins the *Colorado* near the south-western corner of Arizona.

3. The rivers which empty into the Gulf of Mexico drain the great central plain of the United States. The water-shed which divides this region from the drainage systems of the Pacific and Atlantic oceans, may be described as follows: Beginning in southern New Mexico, it trends northward along the mountain ranges which border the valley of the Rio Grande and the South Park on the west. It then crosses to the east, and sweeping around the Middle Park, again follows the western chain of the Rocky Mountains, as far north as the 45th parallel, where it turns east around the head-waters of Missouri River. From the 46th parallel it trends north-west along the crest of the eastern chain of the Rocky Mountains. The northern water-shed which divides the affluents of the Mississippi from those of Lake Winnepeg and the Great Lakes, trends through Dakotah, passes between Lake Traverse and Big Stone Lake, follows the Height of Land in northern Minnesota, and then passes through Wisconsin, Illinois, Indiana, Ohio, and Pennsylvania, not far distant from the southern shores of Lakes Michigan and Erie. The eastern water-shed passes through the undulating plateau of western Pennsylvania, then follows the Alleghany Mountains to Great Kanawha River, where it crosses over to the Blue Ridge. It follows this range through Virginia and North Carolina, and leaving it near the head-waters of Savannah River, it trends South through Georgia and Florida.

This immense territory, the limits of which are indicated by the lines thus sketched, exceeds the area of western Europe, and comprises the most favored and productive region of the United States. The great streams which traverse it are navigable for immense distances, and afford the most extensive network of water communication on the globe.

The largest of these rivers is the *Mississippi*, which, rising near the northern boundary of the United States, intersects this area from north to south, in such a manner that two-thirds is west and one-third east of its channel. Its source lies in northern Minnesota, on the Height of Land, at an elevation of 1,680 feet, and at a distance in a straight line of 1,295 miles from its mouth, while the length of the river is 2,616 miles. It drains an area of 1,244,000 square miles. Several of its tributaries are rivers of the first class in point of magnitude, and discharge the drainage from the Appalachian Mountains in the east, and the Rocky Mountains in the west, into the parent stream. The principal tributaries from the east are the *Wisconsin River*, the *Illinois River*, the *Ohio River*, which is formed by the junction of the *Monongahela* and *Alleghany* rivers, at Pittsburgh, and receives numerous large affluents, as the *Muskingum*, *Scioto*, *Miami*, *Wabash*, the *Great Kenawha*, *Kentucky Cumberland*, and *Tennessee Rivers;* the *Yazoo River* and the *Big Black River*. The principal western tributaries of the Mississippi are the *Minnesota River*, the *Des Moines River*, which intersects Iowa; the *Missouri River*, which rises in the Rocky Mountains of Montana and greatly exceeds in length the Mississippi River above its junction, being 2,908 miles long, and which receives such large streams as the *Yellow Stone*, the *Platte*, the *Kansas* and the *Osage;* the *Arkansas River*, rising among the Rocky Mountains of Colorado; and the *Red River*, rising on the Llano Estacado.

The streams emptying into the Gulf west of the Mississippi are those which intersect Texas, as the *Sabine*, *Trinity*, *Brazos*, *Colorado*, *Neuces;* and the *Rio Grande*, which forms the boundary between Texas and Mexico. The latter rises in the San Juan Mountains, flows through the San Luis Park, in New Mexico, and pursues a southerly course to the 33d parallel. Thence it turns south-east, and empties into the Gulf south of the Laguna Madre and near the small village of Bagdad. Its largest tributary is the *Pecos River*.

To the east of the Mississippi the following rivers empty into the Gulf of Mexico: the *Mobile River*, formed by the junction of the *Alabama* and *Tombigbee* rivers; the *Alabama*, formed by the *Cahawba* and *Coosa* rivers, which unite above Montgomery; the *Appalachicola River*, formed by the junction of the *Chattahoochee* and *Flint* rivers, the *Suwanee River*, which rises in southern Georgia and intersects northern Florida.

IV. CLIMATE AND VEGETATION.

The region occupied by the United States has a highly favorable climatic situation, being within the warm belt of the temperate zone. Its northern boundary is 17½° of latitude from the southern limit of the frigid zone, and its southern approaches within 1½° of the tropic of Cancer. Thus it is equally exempt from extremes of heat and cold, and with the exception of the Arctic territory of Alaska, and the highest regions of the Cordilleras, the temperature of the United States throughout is such as is most conducive to the development and growth of civilized communities. Rain and moisture, sufficient for vegetation, prevail over the greater portion of the land.

In studying the climate of any country we must ascertain two facts: 1, its mean annual temperature; and 2, the distribution of the temperature throughout the seasons of the year. By mean annual temperature is understood the arithmetical mean or average of all observations made during the year. Thus, when a place is said to have a mean annual temperature of 40°, the amount of heat it receives during the year is such, that if equally distributed, it would make the temperature of that place all the time 40°, and the thermometer would be stationary at that height. Under the auspices of the Smithsonian Institution and the Medical Department of the Army, observations on temperature, rain-fall, direction of winds, etc., have been and are being made at numerous localities, and the published results furnish ample material to the inquirer. A brief summary only can here be given of the climatic facts. The reader is also referred to Lorin Blodget's "*Climatology of the United States*," which contains, besides meteorological tables, a number of charts graphically exhibiting the lines of equal mean temperature, "*isothermal lines*" (for the seasons and for the year), and the distribution of rain.

As regards climate and vegetation, the United States may be divided into two portions. The first embraces the eastern part of the country (nearly ⅔ of its area) and extends from the Atlantic coast to the Great Plains; the second embraces the Great Plains and the Cordilleras, and extends to the Pacific coast.

1. Eastern Portion.—The characteristic feature of this portion is the comparative uniformity in the distribution of temperature. Localities of the same latitude do not greatly differ in mean annual temperature, and the isothermal lines cross the country in a general east and west direction. The coldest parts of this portion are northern Minnesota and northern Maine, which have a mean annual temperature of 36° and 40° respectively. From these localities the mean annual temperature steadily increases toward the south, until the highest limit (75°) is reached in southern Florida and at the mouth of the Rio Grande.

In the distribution of temperature throughout the months and seasons, the country east of the Appalachian Mountains differs materially from the Mississippi Valley, the latter being characterized by far greater extremes. Cambridge, Mass., and Dubuque, Iowa, lie in about the same latitude, and have nearly the same mean annual temperature. The coldest month in Cambridge has a mean temperature of 25½ degrees, and in Dubuque, 17½ degrees, while the hottest month in the former place is 69 5-6 degrees, and in the latter, 75 degrees. Thus the difference between the coldest and warmest month of the year is nearly 14 degrees greater in Dubuque than in Cambridge.

The following two tables further illustrate this important fact:

PLACES IN THE MISSISSIPPI VALLEY.	Mean annual temperature.	Mean temperature of coldest month....	Mean temperature of warmest mo.	Difference between coldest and warmest month.
	Degrees.	*Degrees.*	*Degrees.*	*Degrees.*
Beaver Bay, Minn., 47° 12′ lat.....	36.16	6.55 (Dec.)	60.23 (Aug.)	53.68
Dubuque, Iowa, 42° 30′ lat.....	48.03	17.41 "	75. 2 (July.)	57.61
Peoria, Ill., 40° 36′ lat.....	52.22	19.71 "	79.16 "	59.45
Cincinnati, Ohio, 39° 6′ lat.....	56.70	27.45 "	80.39 "	52.94
St. Louis, Mo., 38° 37′ lat.....	55.45	25.01 "	80.03 "	55.02
Washington, Ark., 33° 43′ lat.....	63.62	38.43 "	80.87 "	42.44
New Orleans, La., 29° 57′ lat.....	72.84	52.65 "	87.23 "	34.58
PLACES NEAR THE ATLANTIC COAST.				
Portland, Me., 43° 39′ lat.....	43.37	19.28 (Dec.)	67. 8 (July.)	47.80
Cambridge, Mass., 42° 22′ lat	47.15	25.62 "	69.52 "	43.90
Providence, R. I., 41° 49′ lat.....	48.65	28.49 "	69.20 (Aug.)	40.71
New York, N. Y., 40° 43′ lat.....	50.43	28.07 (Jan.)	78.39 (July.)	50.32
Philadelphia, Pa., 39° 57′ lat.....	54.21	30.79 "	74.53 (Aug.)	43.74
Washington, D. C., 38° 53′ lat.....	55.41	33.81 (Dec.)	76.13 (July.)	42.32
Portsmouth, Va., 36° 50′ lat.....	58.73	41.99 "	75.17 "	33.08
Charleston, S. C., 32° 46′ lat.....	66.07	50.77 (Jan.)	79.92 "	29.15
St. Augustine, Fla., 29° 48′ lat.....	71.61	58.67 "	81.30 "	23.63

The mean annual temperature of this portion is much lower than that of western Europe. New York, in 41° north latitude, has about the same mean annual temperature as Brussels, in Belgium, although it is 10 degrees farther south; and other places on both sides of the Atlantic exhibit similar differences.

This is mainly owing to the influence of the oceanic currents, in connection with the prevailing winds. The summers in this portion, however, are as warm as, or even warmer than, those of Europe under the same latitudes, while the winters are colder. This relation is more strongly pronounced in the northern parts than in the southern. The summers in the northern parts are as warm as those of Italy, while the winters are as cold as those of Norway and Sweden. This renders possible the cultivation of the cereals in the United States in much higher latitudes than the mean annual temperature would seem to permit.

The area of the United States is almost entirely within the zone of variable winds. In this zone the wind blows successively from all points of the compass, veering round, according to the law pointed out by Dove, from west to south, then to east and north. The changes are produced by two primary atmospheric currents, the one tending from the north toward the equator, and the other in the opposite direction, which alternately displace each other. Westerly winds, however, predominate over all others. Out of 1,073 to 1,095 observations made during 1859, nearly 500 indicated westerly winds at Portland, Me.; 638 at Atlanta, Ga.; and 456 at Dubuque, Iowa. The remaining observations indicated northerly, easterly and southerly winds, or calms.

During the summer months, when the zone of the trade winds extends to the 39th parallel, the southern part of the United States is within this zone and should experience the north-east trades. But this is not the case; the prevailing winds, on the contrary, blow quite regularly from the south and the south-west (that is from the Gulf of Mexico), and their influence is felt as far as Cincinnati and St. Louis. They are the trade winds, deflected from the sea toward the land, by the greater heat of the latter, and in cause and effect resemble the summer monsoons of the East Indies. At St. Louis, according to Englemann, the south and south-east winds are the prevailing ones from April to October, in the other months the west and north-west winds. Humphreys and Abbott remark, that near the mouth of the Mississippi the wind veers round toward the south and continues to blow from that quarter and from the east during the summer and early part of the autumn.

These deflected trades give to the Mississippi Valley its moist and semi-tropical summer climate. The region immediately north of Mobile and Mississippi Sound has an annual rain-fall of 63 inches, while Louisiana and Mississippi near the great river receive 60 inches. Thence north-east and west the amount steadily decreases. It is but 39 inches in Minnesota, Wisconsin, and Michigan; 45 inches in Illinois; and 36 inches near the western ranges of the Appalachians, in Kentucky, Tennessee, and eastern Ohio. The western limit of the deflected trades coincides with the eastern limit of those arid plains, stretching several hundred miles in breadth along the eastern base of the Rocky Mountains.

The sea-board is also well supplied with moisture. The rain-fall in southern Florida is 63 inches; in Georgia, 50 inches; in the Carolinas, 48 inches; in Virginia, 45 inches; and in Pennsylvania, New York, and New England, from 40 to 42 inches per annum.

The indigenous vegetation of the east is that of forests and prairies. The forest region extends from the Atlantic sea-coast to a line drawn from southern Michigan to the mouth of Sabine River, thus including the southern part of the Mississippi Valley, but excluding the northern. West of this boundary line the country is covered chiefly by fertile prairies, which gradually merge into the arid plains.

The forests are composed of a great variety of trees. In the north, the evergreens, pine, spruce, and hemlock predominate, and among these the white pine (Pinus strobus) and the Canadian pine (P. canadensis) are representative forms. Deciduous trees, oak, elm, ash, maple, etc., gradually replace the evergreens as we progress southward. In the latitude of Pennsylvania and Indiana the predominating trees are several species of oak, the chestnut, the black walnut (Juglans nigra), the hickory, the beech (Fagus ferruginea), the tulip tree (Liriodendron), and the sassafras. In the Southern states (below Tennessee and North Carolina) evergreen trees of another type appear, and influence the character of the woods. Such are the live oak (Quercus virens), the gordonia, the magnolia, which forms extensive groves in the vicinity of the Gulf coast; and the palmetto, growing on the sea-board from South Carolina to Florida. The Spanish moss (Tillandsia usnoides), an epiphyte bromeliacea, covers with its long, gray festoons extensive tracts of the southern forests, imparting to them a peculiarly somber character; and the coasts of Florida are lined with the mangrove (Rhizophora mangle).

The prairies, which occupy so large a portion of the United States, extend westward from the forest-belt, and are covered with grasses and various herbaceous plants. Trees grow in this wide region only on the bottom lands of the rivers, many of which flow in deeply eroded valleys. The absence of forests on the prairies is caused chiefly by the scarcity of rain during the summer months, when trees require moisture more than at any other time.

2. The Western Portion embraces a smaller area than the eastern. Its great elevation above the sea-level, and the presence of many lofty mountain chains, render its climate on the whole colder and more subject to extremes than the eastern portion. The South Pass, in Wyoming has a mean annual temperature of 40 degrees, while localities in the same latitude in the east have 50 degrees. The isothermal line of 50 degrees coincides, in the Rocky Mountains, with the 35th parallel, which in Arkansas and North Carolina has over 60 degrees. The chief peculiarity of this region is the great range of temperature in the daily changes. At sunrise the ther-

mometer may indicate 30 degrees, or even 24 degrees, and yet rise to 80 degrees and more by noon.

The Great Plains and elevated plateaus of the Cordilleras differ from other parts of the United States in possessing a very dry atmosphere, with the consequent rarity in the precipitation of rain. The prevalent westerly winds, depositing in the western slopes of the Sierra Nevada the moisture gathered in their passage over the Pacific ocean, thence traverse the Great Basin nearly vaporless. The little moisture still left is arrested by the lofty crests of the Rocky Mountains, supplying them with a thin covering of snow. The small amount of rain which falls on the Great Plains is probably brought there by northerly and easterly winds. This arid region nourishes only a very scanty vegetation. The growth of trees is limited to the flanks and recesses of the more elevated mountains. The table-lands are covered with the wild sage (Artemisia), or with an efflorescence of alkali, which prevents vegetation. Their aspect is extremely dreary. The Great Plains east of the Rocky Mountains offer a vast pasture to the bison, deer, and antelope, in their buffalo or "grama" grasses, which, as the summer advances, dry up without losing their nutritive qualities.

The region which extends from the 40th to the 50th parallel, and which comprises Idaho, Montana, and Washington, is timbered more or less heavily with several varieties of firs and pines. The loftier mountain ranges, from 6,000 to 8,000 feet in altitude, are clothed with a thick growth of tall black pines. West of the Bitter Root river, which washes the eastern base of the lofty range, called in one locality the Bitter Root, and in another the Cœur d' Alene Mountains, the character of the country changes. The streams which flow through the gorges and defiles of this region are confined to narrow beds between mountain spurs, and the entire country is covered with almost impenetrable forests. West of this densely wooded mountain range extends the great plain of the Columbia river, on which no trees are seen, and which presents the appearance of a rolling ocean tossed by contending billows. Crossing this plain, and ascending the Cascade Mountains nearly to their crests, we again enter into timber which stretches thence in an almost unbroken forest to the Pacific. This forest consists of gigantic pines and firs. Pinus douglassi, P. menziesii, P. mertensiana, and the Oregon Cedar (Thuya gigantea). A height of 200, and even 250, feet is with the Douglass pine by no means exceptional. Washington territory is famous for the best spar and ship timber in the United States, if not in the world.

The comparatively narrow belt of country lying west of the summit line of the Sierra Nevada and the Cascade Mountains, and extending from the Columbia river to the southern extremity of California, differs essentially from the arid regions of the Cordilleras, and has a climate and vegetation quite distinct and peculiar. It is greatly favored by mild, short, and rainy winters, and resembles the Mediterranean countries of Europe (particularly Italy) in its rainless summers. The temperature is very equable, as will be seen from the following table:

	Mean Annual Temperature	Mean Temperature of Coldest Month.	Mean Temperature of the warmest Month.	Difference between Coldest and Warmest Months.
	Degrees.	*Degrees.*	*Degrees.*	*Degrees.*
San Diego, Cal.	62	51½ (Dec.)	73 (July.)	21½
San Francisco, Cal.	55	51 (Dec.)	59 (Oct.)	8
Sacramento, Cal.	58.7	43.5 (Dec.)	74.8 (July.)	31.3
Puget Sound, Wash.	51	39.8 (Feb.)	66.7 (June.)	26.9

Places on or near the sea-shore have a more uniform temperature than those farther inland. The cause of this must be sought in the cold ocean current washing the coast from north to south the influence of which does not extend beyond the Coast Ranges.

From November to April north-westerly winds prevail uninteruptedly, and as they reach the overheated valleys they rather absorb than precipitate moisture. The rainy season is characterized by southerly and south-easterly winds, whose moisture is condensed in their passage over the land, as this is at that season of the year colder than the sea. The low plains and the Coast Ranges of California and Oregon are destitute of forests. In the vicinity of the ocean, where the moisture is not too rapidly evaporated, pines and oaks are found, as the Pinus coulteri, P. sabiniana (the digger or silver pine), the Monterey pine and others; but the heavy forests occur only in the higher portions of the Sierra Nevada and the Cascade Mountains, which are exposed to the sea winds and condense their moisture. These forests are chiefly composed of pines, of which twenty-eight species are known. From 2,800 feet to 4,700 feet above the sea evergreen oaks are mixed with the pines, but the higher forest region presents almost exclusively coniferous trees; and here grow those gigantic mammoth pines (Sequoia gigantea), the redwood, etc., which are so famous for their extraordinary dimensions.

V. POPULATION.

The total population of the United States, according to the ninth census (1870), is 38,853,217, and leaving out the Indian tribes, 38,555,983. There are but four of the great empires of the world exceeding this in number of inhabitants, to wit: 1. The Chinese Empire, 477,500,000 inhabitants. 2. The British Empire, 174,200,000 inhabitants. 3. The Russian Empire, 76,500,000.

inhabitants. 4. The German Empire, 40,200,000 inhabitants. France and Austria have each about 36,000,000 inhabitants, and are next to the United States in population. But in rapid increase of population our country surpasses all others, and must hold for many decades the foremost rank, as there is none that approaches it in natural wealth and resources. The following table is based upon the official reports of the decennial census:

Year.	Population.	Increase in 10 years. per cent.
1790	3,929,214	
1800	5,308,483	35.02
1810	7,238,881	36.45
1820	9,633,822	33.13
1830	12,866,020	33.49
1840	17,069,453	32.67
1850	23,191,876	35.87
1860	31,443,321	35.59
1870	38,555,983	22.64

According to the tables submitted to the Statistical Congress at Berlin, in 1863, by Samuel B. Ruggles:

The United States increased in	60	years	(1800–1860)	593	per cent.
England and Wales	60	"	(1801–1861)	121	"
Russia	45	"	(1816–1861)	79	"
France	60	"	(1801–1861)	37	"

The efficient causes of progress of population are annexation, immigration, and natural increase (the excess of births over deaths). The first of these factors has contributed but little. Louisiana, when purchased, had 77,000 inhabitants; Florida, about 10,000; California and New Mexico, about 60,000; Texas and Oregon mainly brought back into the Union citizens who had emigrated thither but a short time before. Of far greater importance has been and will certainly be hereafter, the second factor, *Immigration*, which, though partially arrested by the civil war, has expanded to the largest dimensions since the return of peace. Moreover, the character of the immigrants has materially improved, as the intelligent and moneyed classes of Europe have become more interested in our extraordinary resources. America is no longer looked upon in foreign countries as a refuge for oppressed labor, but rather as a field for commercial and industrial enterprise, promising greater results than the combination of capital and labor can realize elsewhere.

Nearly 10,000,000 of our population are foreigners or descendants of foreigners. It has been estimated that the population in 1850 would have been about 22,000,000 if all immigration had been arrested at the time of the Declaration of Independence. The population of the colonies at the commencement of the Revolutionary war was probably not far from 3,000,000; and the arrival of immigrants, previous to the enactment of the passenger act of March 2, 1819, amounted to about 250,000. Since that period the stream of immigration has steadily increased. The total number of immigrants who arrived between October 1, 1819, and December 31, 1870, was 7,553,865. Including the 250,000 already here before October, 1819, the total number of aliens permanently added to our population by direct immigration since the establishment of the government will reach 7,803,865.

It is obvious that this large influx of labor, partly skilled, partly unskilled, adds a large amount to the total wealth of the nation, however difficult it may be to estimate this value in dollars and cents. Mr. Fr. Kapp, member of the German Parliament, assumes the average value of each immigrant to be $1,125. Mr. Edward Young, the able chief of the Bureau of Statistics, deems $1,000 as somewhat too large. The question is yet unanswered; but if we accept $800 as being about the value of an immigrant, inclusive of the average amount in cash he brings with him, then the addition to the wealth of the country by immigration to 1871 reaches the stupendous sum of $6,243,092 000.

The following table by countries exhibits the total number of alien passengers arrived in the United States to December 31, 1870:

England	516,192	Portugal	4,695
Ireland	2,700,493	Italy, including Sardinia and Sicily	26,786
Scotland	84,623	Russia	4,045
Wales	12,435	Poland	4,038
Great Britain (not specified)	544,107	British America	284,491
		Mexico	20,152
Total from British Isles	3,857,850	Central America	1,064
Germany, including Prussia	2,368,183	West Indies	50,250
Austria	9,398	South America	7,644
Sweden and Norway	153,928	Azores	6,885
Denmark	23,425	China	109,502
Holland	31,118	All other countries not specified	492,245
Switzerland	61,572		
Belgium	17,278	Aggregate	7,803,865
France	245,812		
Spain	23,214		

The population is distributed among the states and territories as follows:

States and Territories.	Area in sq. miles.	Population 1870.	Population 1860.	Increase in ten years.	Increase in per cent.	No. of inhabitants to the sq. mile.
Alabama	50,722	996,992	964,201	32,791	3	19.66
Arkansas	52,198	484,471	435,450	49,021	11	9.30
California	188,981	560,244	379,994	180,253	47	2.29
Connecticut	4,750	537,454	460,147	77,307	17	113.15
Delaware	2,120	125,015	112,216	12,799	11	58.97
Florida	50,268	187,748	140,424	47,324	34	3.17
Georgia	58,000	1,184,109	1,057,286	126,823	12	20.42
Illinois	55,410	2,539,891	1,711,951	827,940	48	45.84
Indiana	33,809	1,686,637	988,416	692,221	24	49.71
Iowa	55,045	1,191,702	674,913	516,789	77	21.69

The table shows how very unequal has been the increase in the different divisions of the country. It has exceeded 100 per cent. in some of the new states and territories—Nevada, Nebraska, Kansas, Minnesota, Dakota, Utah, and Washington. It has been less than 100 per cent., and more than 50, in Iowa, Michigan, Oregon, and the District of Columbia. The increase has been still less in those older states which have attained a comparatively high degree of development, and possess a dense population, *i. e.*, a large number of inhabitants to each square mile of area, as Maryland, New Jersey, New York, Pennsylvania, Ohio, Virginia, and others. The increase in the former slave states has been small, averaging but 17 per cent. Only four of them—Florida, Louisiana, Missouri and Texas—have grown more than 30 per cent., as they offered extraordinary inducements to immigrants, in the richness of their natural resources and the sparsity of their populations. The rate of increase of the New England states has been less than that of the United States at large. Maine and New Hampshire have slightly fallen off in population, although they have only eighteen and thirty-five inhabitants respectively to the square mile. Massachusetts, Connecticut and Rhode Island are the most densely inhabited portions of the country, having respectively 182,114, and 167 inhabitants to the square mile; but their increase has been small, averaging but 18 per cent.

Four of the five races into which the human family is ordinarily divided are represented in the population of the United States—the Indian, the Ethiopian, the Mongolian, and the Caucasian races; or, classified by color—the Red, the Black, the Yellow, and the White races. The total number of *Indians* was, according to the last census, 383,712. Of these 25,731 were living as broken bands in many of the states, sustaining no tribal relations; 96,366 were upon government reservations and under agencies; and 234,740 roamed as nomads over the thinly settled parts of the West. The *Ethiopians* or *Negroes* were imported into the colonies as slaves, previous to the Declaration of Independence. In 1790 they numbered 757,343 souls, 59,446 of whom were then free. In 1850 they had increased to 3,638,762, inclusive of the various shades of colored persons, and ten years later, to 4,441,756, of whom 487,996 were free and 3,953,760 slaves. The last census gives their number as 4,868,387. The rate of increase from 1850 to 1860 was 22.35 per cent. but from 1860 to 1870, only 9.6 per cent., while the population of the country at large increased during the same decades, 35.39 and 22.64 per cent. respectively.

In 1870 the proportion of the colored to the whole population was 14½ to 100, a ratio by no means alarming in a political point of view. But it greatly varies in the different states: in South Carolina and Mississippi the number of the colored people considerably exceeds that of the whites; in all others the whites predominate.

The following table exhibits the proportion of colored inhabitants to the whole population:

States and Territories.	Col. Inh. in proportion to the whole population.	States and Territories.	Col. Inh. in proportion to the whole population.
	Per cent.		Per cent.
Alabama	47.7	New York	1.2

New Jersey	3.3	Wyoming	1.5

The *Mongolian* race is represented by Chinese and a few Japanese. The number of the latter is indeed so small, that they are not separately enumerated in the census. In 1860 there were 35,565 Chinese in California only. At present they are found in twenty-three states. Asiatic immigration, says Mr. Edward Young, has not yet reached such proportions as to excite alarm in the most apprehensive, and falls far short of what has been represented, never having reached in any single year the number of 15,000; forming only four per cent. of our total immigration. A peculiarity of the Chinese immigration is the small number of females, not exceeding seven per cent. of the whole, a fact which seems to preclude a large increase of the pure race.

The bulk of our population is of the Caucasian or white race, numbering 33,589,857, or 86.45 per cent. of the grand total of inhabitants, and belongs to that race-branch which ethnologists have called the Aryan, Indo-European, or Indo-Germanic.

The *Hebrews* or *Jews* constitute the only Semitic element in our population, but their number cannot be ascertained, as they are not enumerated in any official count or report. If, however, their number is to the entire population of the country as is the number of seats in the synagogues to the total of church accommodations in the country, then the Jews may be estimated to exceed 75,000 and to fall below 100,000.

Of the Aryan race-branch the Germanic and Celtic nationalities have almost alone contributed to the making of the American nation.

The *English* or *Anglo-Saxons* were the first settlers on our shores, and if not now the most numerous, have planted imperishably their language, institutions, and laws upon our soil. The

new nation which is being formed out of the various elements will always exhibit the impress of their peculiar social and political characteristics.

Germans came over and settled in this country at a very early day, and their influx has, with unimportant intermissions, (*i. e.*, for instance, during the Napoleonic wars) steadily continued, a large proportion going to the rural districts and developing the agricultural resources. In Pennsylvania and the Shenandoah Valley of Virginia there are districts whose inhabitants are mainly descendants of the early German settlers from the Palatinate, and still speak a German dialect. The *Swedes* colonized the western shore of Delaware River, and the *Dutch* or *Hollanders* the southern part of the state of New York.

The *Irish* represent the Celtic element in our population. From 1691 to 1745 the influx of this element amounted to 263,000 souls (according to Thomas Newenham's "Statistical and Historical Inquiry into the Progress and Magnitude of Ireland"). The 165,000 persons who immigrated from 1790 to 1814 were mainly Irish (probably nine-tenths). They settle in the large cities and towns or in the manufacturing districts. The majority of laborers in the industrial establishments of New England, and on railroads and canals, are Irish, and not many go into the rural districts.

The *Romanic* nations of Europe have also sent their quota across the Atlantic, although a small one. French Huguenots, persecuted at home for their religion, settled in South Carolina. Missouri and Louisiana, when ceded to the United States, were mostly inhabited by Frenchmen; and the annexation of Florida, Texas, California, and New Mexico, added a few thousand Spaniards and Spanish half-breeds to our population.

The *Slavonic* nations have contributed to our increase still less than the Romanic. The few Russians, Poles, and others, who land on our shores are soon lost in the great mass.

The question as to the proportion in which the nationalities above mentioned are represented to-day among the American people is one of considerable ethnographic interest. From the nature of the inquiry a rough estimate only can be given. We take as the basis the census for 1820, previous to which the nationality of immigrants was not specified. The white population in that year was 7,862,166. Since then the direct white immigration has been about 7,300,000. In 1870 the white population had increased to 33,586,989.

If the sum of the first two numbers is deducted from the last, the remainder (about 17,930,000), is that part of the increase which is owing to the excess of births over deaths. If we then distribute the white population of 1820, and the direct white immigration since 1820, among the nationalties above mentioned, and add to each its proportionate share of the increase due to the excess of births over deaths (17,930,000), we shall obtain approximately the numerical strength of each nationality in the American people.

The following results in round numbers are based upon this estimate and calculation, and though not claiming for them a great degree of accuracy, we think that they are not very far from the truth:

1. Anglo-Saxons	8,340,000	inhabitants
2. Germans, including Prussians, Austrians and Swiss	8,930,000	"
3. Other Germanic nations, as Dutch and Scandinavians	728,000	"
Germanic nations	17,998,000	"
4. Celts, principally Irish	10,255,000	"
5. Romanic nations, as French, Spaniards, Portuguese, and Italians	1,016,000	"
6. All other nationalities	4,326,000	"
Total white inhabitants in 1870	33,595,000	

The number of natives descended purely from one or the other stock is still large. Intermarriages between persons of different nationalities are, however, quite common. Were the fusion of these diverse elements complete, then, of 100 drops of American blood, 25 would be Anglo-Saxon, 27 German, 2 Dutch or Scandinavian, 30½ Celtic, 3 Romanic, and 12½ uncertain.

The following table shows the distribution of the four races in the states and territories, according to the last census:

States and Territories.	White Pop.	Colored Pop.	Indians.	Chinese.
Alabama	521,384	474,510	98	....

VI. CITIES.

The last census report contains the names of 374 incorporated cities, which vary in population from 1,214 (Tuscumbia, Ala.,) to 942,292 (New York). There are but fifty-one cities with a population exceeding 25,000; and of these twenty-seven have from 25,000 to 50,000 inhabitants; eleven from 50,000 to 100,000; seven, from 100,000 to 250,000; and six, over 250,000.

The subjoined table shows the distribution of the cities in the different states. It will be noticed that New York and Massachusetts have the greatest number of large cities. The principal cities of the central states lie either upon the lakes, as Cleveland, Toledo, Detroit, Chicago, and Milwaukee; or upon the Mississippi and Ohio rivers, as St. Louis, Memphis, New Orleans, Louisville, and Cincinnati.

Name of State.	Cities of 1st Class over 200,000 inhabitants.	Cities of 2d Class from 100,000 to 200,000 inhabitants.	Cities of 3d Class from 50,000 to 100,000 inhabitants.	Cities of 4th Class from 25,000 to 50,000 inhabitants.	Cities of 5th Class below 25,000 inhabitants.

No. of Cities.....	8	6	11	27	323

The growth of the cities has been far more rapid than that of the open country. Thus the city of New York increased during the last decade 19 per cent.; New Haven, Conn., 29 per cent.; Boston, 41 per cent.; Portland, Me., 19 per cent.; Baltimore, 26 per cent.; Richmond, Va., 34 per cent.; ratios which are far in advance of their respective states. Philadelphia, with 19 per cent., alone shows a smaller growth than its state with 21 per cent. Jersey City has made a progress (183 per cent.) even more rapid than the most prosperous cities west of the Alleghanies. Pittsburgh increased 75 per cent.; Buffalo, 45; Cleveland, 114; Detroit, 74; Chicago, 166; Milwaukee, 58; St. Louis, 93; Cincinnati, 35; Indianapolis, 159; Louisville, 48; and San Francisco, 163. The Southern cities advance less rapidly. New Orleans shows an increase of 39 per cent. and Mobile of only 9. The most remarkable growth apparently was that of Scranton, Pa., which increased 261 per cent.

VII. OCCUPATIONS AND BRANCHES OF INDUSTRY.

The total number of persons employed in gainful and reputable occupations, for which they receive compensation in the shape of wages or salary, or from which they derive products of a merchantable character, was, in 1870, 12,505,923, of which 10,669,635 were males, and 1,836,288 females. In a majority of the states the number of those who had no recognized occupations was quite large; but of the 10,429,150 males between the ages of 16 and 59 inclusive, 9,486,734 were accounted for in the tables of the census, while of 989,516 above the age of 60, 634,837 were accounted for. The difference in the former period (*i. e.*, 16 to 59) is substantially made up, first, by the number of students pursuing courses of instruction; second, by the number of persons afflicted with bodily or mental infirmities disqualifying them from participating in the industry of the country; third, by the members of the pauper and criminal classes.

The total number of females above the age of 16, not accounted for in the census, was in the neighborhood of 9,100,000. But of these probably 7,400,000 were occupied in "keeping house," others attended school, and the remainder was made up of various classes, such as grown-up daughters living at home, widowed mothers supported by their children, ladies living upon the income of accumulated property, as well as paupers, vagrants, and criminals.

The census report classifies all the various occupations under four heads:

1. *Agriculture*, in which were employed a grand total of 5,922,471 persons. Of these 2,977,711 were farmers and planters, 2,885,996 agricultural laborers, 31,435 gardeners and nurserymen, 6,588 stock raisers, and 5,590 stock herders.

2. Under the head of *Professional and Personal Services*, the census enumerates 72 distinct occupations, with 2,684,793 persons. Laborers, not specified, greatly predominated, numbering 1,031,666. Of the 975,734 domestic servants, 108,380 were males, and 867,354 females. Thus only 1 out of every 8.7 of the 7,579,863 families enjoyed the assistance of female help. The majority of the servants were natives of the United States, viz.: 728,180; 145,956 were natives of Ireland; 42,866, of Germany, 14,878, of British America; 12,531, of England; and 5,420, of China. Barbers and hair dressers numbered 23,935; boarding and lodging-house keepers, 12,785; hotel keepers, 26,394; restaurant keepers, 35,185; clerks in hotels and restaurants, 5,245; other employees in these establishments, 23,438; clerks and employees in government offices, 23,079; launderers and laundresses, 60,906. The learned professions were thus represented: authors and lecturers, 458; chemists, 608; metallurgists, 164; clergymen, 43,874; dentists, 7,839; civil engineers, 4,703; journalists, 5,286; land surveyors, 2,671; lawyers, 40,736; naturalists, 287; physicians and surgeons, 62,383; and veterinary surgeons, 1,169. The different branches of the fine arts included 2,017 architects, 934 designers and draftsmen, 775 painters, 250 sculptors, and 2,948 artists not specified. There were 136,570 teachers, 9,491 of whom taught music, 108 drawing and painting, and 149 dancing.

3. The title *Trade and Transportation* includes the commercial classes, numbering 1,191,238 persons, of whom 14,362 were bankers and brokers, employing 10,265 officials, clerks, and others; the railroads absorbed the activity and services of 163,303 persons; the telegraphs of 8,579; and the express companies, of 9,396. The traders and dealers of all classes numbered 1,262,268, who employed 222,504 clerks, 31,177 book-keepers and accountants, 7,262 commercial travelers, and 14,203 salesmen or saleswomen. The sailors numbered 56,663; the boatmen and watermen, 21,332; the canalmen, 7,338; steamboatmen and women, 7,975; and the shippers and freighters, 3,567.

4. In the *Manufactures, and Mechanical and Mining Industries*, there were engaged 2,707,421 persons, of whom 344,596 were carpenters, 171,127 boot and shoemakers, 161,820 tailors and seamstresses, 152,107 miners, 141,774 blacksmiths, 111,606 cotton-mill operatives, 58,836 woolen-mill operatives, 41,619 mill and factory operatives not specified, 80,710 masons, 85,123 painters and varnishers, 39,860 printers, and 42,877 manufacturers.

VIII. AGRICULTURE.

The great majority of the people of the United States are engaged in agriculture, which here as elsewhere forms the basis of national wealth. With happy peculiarities of climate, extent of territory through so many degrees of latitude or isothermal belts, and an immense area of most fertile soil, we enjoy extraordinary advantages for producing agricultural staples in great variety and abundance.

The importance of the agricultural interest is fully recognized by the government and the people. In 1862 the *Department of Agriculture* was established by act of Congress, for the purpose of collecting statistics, introducing from foreign lands seeds of new plants, testing their adaptability to our soil and climate, and disseminating information to the farmers. Agricultural colleges have been established in many of the states, and agricultural periodicals are published in nearly all parts of the country.

But farming is, as yet, a business rather than a profession. Too much land is superficially cultivated and soon exhausted. The very perfection of the labor-saving machines and implements, in which this country surpasses all others, promotes the process of wearing out the surface soil. In all the older states there are large tracts which formerly produced twice as much corn or wheat to the acre as they produce now. It has become doubtful whether farming pays in New England; and the country population there is gradually decreasing. The older tobacco plantations of Maryland and Virginia have been in many instances abandoned, and a large proportion of the southern cotton-lands have ceased to yield profitable returns. The yield of wheat fifty years ago in Ohio was 30 bushels to the acre; to-day it is not quite 15. An English traveler was surprised by the extraordinary productiveness of the wheat fields near Albany, N. Y., in 1775, which yielded from 30 to 40 bushels per acre, with inferior cultivation. In 1855 winter wheat yielded 7½ bushels, and spring wheat but 5. The present method of farming will probably prevail as long as farmers can go West and obtain fresh land for a comparatively low price. But when the vast amount of virgin soil yet awaiting the arrival of the husbandman shall have been all taken up and made to yield its dormant treasures, lands will necessarily increase in value, thoroughly scientific cultivation will become profitable, and agriculture will rise to the dignity of a learned profession.

According to the last census report, the aggregate area of the farms of the United States comprised 407,735,041 acres, or about 21 per cent. of the entire surface. Of this amount 189,000,000, or somewhat over 9 per cent., were "improved," *i. e.*, cleared land, used for grazing, grass, or tillage, or lying fallow. These figures show what an immense amount of land is yet open to the settler. In 1860 the improved lands comprised 163,000,000 of acres, and in 1850, 113,000,000. The rate of progress will hereafter, probably, not fall short of 4,000,000 of acres per annum. At this rate it will still take about two hundred and fifty years before the cultivable portion of the United States (somewhat more than one-half of the entire area) will be improved.

The total area in woodland was 159,310,177 acres, or 39 per cent. of the aggregate of acres in farms. The Southern states are remarkably well wooded; the twelve states from Maryland to Tennessee averaging in woods 52 per cent. of their farm area; the New England states have 32 per cent. of woods; the Middle states 28 per cent.; and the Central states, from West Virginia to Nebraska, 32 per cent. The territories are not rich in woods, except Washington, which has 44 per cent. California has but 4 per cent. of its farm area in woodland; Nebraska, 10; Kansas, 11; Iowa, 16; Illinois, 19; Indiana, 39; Ohio, 31; Kentucky, 48; and West Virginia, 51.

The cash value of farms in 1870 was $9,262,803,861 (against $6,645,045,007, in 1860); and of farm implements, $336,878,429. The wages paid during the year amounted to $310,286,285, and the value of all farm products, including betterments and increase of stock, reached the large sum of $2,447,538,658; in addition to which the orchards produced $47,335,189, and the market gardens, $20,719,229. New York, Illinois, Ohio, Pennsylvania, Indiana, Iowa, and Missouri, rank first in the value of farm products.

The value of animals slaughtered or sold was $398,956,376; of home manufactures, $23,423,332; and of forest products, $36,808,277. If these sums are added to those of the farm, orchard, and garden products, the grand total of agricultural activity amounts to $2,974,781,059, or about $80 for each inhabitant of the country.

The live stock comprised 7,145,370 horses, 1,125,415 asses and mules, 8,935,332 milch cows, 1,319,271 working oxen, 13,566,605 other cattle, 28,477,951 sheep, and 25,134,569 swine. The total value of all live stock was $1,525,276,475.

The census returns of domestic animals include only those on farms. No provision is made for enumeration of horses, cattle, and other animals, kept for work, milk, and fattening, in cities, or those *in transitu* to the feeder and butcher. The statistician of the Department of Agriculture estimates the number of cattle not on farms, in 1870, 4,273,973, or 15 per cent. of the aggregate returned; and the number of horses, 1,547,370, or 18 per cent.

Illinois had the largest number of horses, 853,738, or 34 horses to every 100 inhabitants; then follow Ohio with 609,722, or 23 horses to 100 inhabitants; New York, with 536,861, or 12 horses to 100 inhabitants; and Indiana with 497,883, or 30 horses to 100 inhabitants.

Missouri, Tennessee, Kentucky, Georgia, and Alabama, had the largest number of mules and asses. The Northern states had but few.

The principal sheep-raising states are Ohio (about five million sheep), California (two and two-third millions), New York (over two millions), Illinois, Indiana, Michigan, Missouri, Pennsylvania, and Wisconsin (from one to two millions each).

The subjoined table shows to what extent each state and territory participates in the grand sums above given.

STATES AND TERRITORIES.	Improved farm lands, in acres...	Proportion of improved lands to the total area, in per cent.....	Cash value of farms, in thousands of dollars.	Cash value of live stock, in thousands of dollars.	Estimated value of farm productions, in thousands of dollars.....	Value of animals slaughtered and sold for slaughter, in thousands of dollars.....
Alabama	5,062,204	15.6	$ 67,739	$ 26,690	$ 67,522	$4,670

Wyoming	338	0.0	18	442	43	12

In 1870 there were in the United States 2,659,985 farms, which had an average extent of about 150 acres. Over one-half of the farms covered from 20 to 100 acres. According to the classification of the census report, 0.3 per cent of all the farms were below 3 acres; 6.4 per cent. had from 3 to 10 acres; 11.1 per cent., from 10 to 20 acres; 31.9 per cent., from 20 to 50 acres; 28.3 per cent., from 50 to 100 acres; 21.2 per cent., from 100 to 500 acres; 0.6 per cent., from 500 to 1,000 acres; and but 0.2 per cent. more than 1,000 acres.

The average size of farms has considerably decreased since 1860; except in Wisconsin, where no change has taken place; in Massachusetts, where it has increased from 94 to 103 acres; and in California, where it has risen from 466 to 482 acres. In North Carolina it has decreased from 316 to 212 acres; in South Carolina, from 488 to 233; in Mississippi, from 370 to 193; in Texas, from 591 to 301. In the central states the decrease is less marked; and was from 146 to 128, in Illinois; from 114 to 111, in Ohio; from 211 to 158, in Kentucky; and from 165 to 134, in Iowa.

Irrigation.—That portion of the United States which includes the Cordilleras and the Great Plains, suffers, as has been stated, from either scarcity or absence of moisture. Agriculture there will always be impossible, except in favored spots, which admit of irrigation from the rivers and creeks. But even in the most favored states of the Mississippi valley irrigation would be exceedingly profitable. The yield of meadows would thereby be doubled and trebled, and that of the grain fields at least greatly increased.

The great staples of the United States are the cereals—corn, wheat, rye, oats, and barley; potatoes, rice, tobacco, cotton, wool, and dairy products.

Indian Corn, or Maize, is the only cereal indigenous to the American continent, and is the most extensively cultivated food-plant of the United States. It requires great summer heat, and hence our climate is peculiarly adapted to its culture. The northern limit may be represented by the summer isotherm of 65°, which excludes northern Maine, Minnesota, and Wisconsin, the valley of the St. Lawrence, and the larger portion of the Pacific coast. Its yield varies from 30 to 80 bushels to the acre. The total product amounted in 1870 to 760,944,549 bushels. Illinois produced over one-sixth of the whole amount; Iowa, Missouri, and Ohio, each a little over one-twelfth; and then followed Indiana, Kentucky, and Tennessee.

Wheat requires a cooler climate than corn, and its range extends farther north, but not as far south. It is, on the east of the Rocky Mountains, a reliable crop as far as the Saskatchawan valley, in 54° lat., and on the Pacific coast as high as 60° lat. The average yield, with careful cultivation and good soil, is about 30 bushels to the acre. Forty bushels is considered an extraordinary crop, but in the irrigated region of Utah and Colorado a yield of 60 bushels is not exceptional. In 1870 there were produced in the United States 112,549,733 bushels of spring wheat, and 175,195,893 of winter wheat; together, about 288,000,000 bushels. Iowa, Wisconsin, Minnesota, California, and Illinois produced the largest quantities of spring wheat; Ohio, Indiana, Pennsylvania, Illinois, Michigan, Missouri, and New York, of winter wheat.

Rye is a much hardier plant than wheat, and is cultivated mostly in the extreme northern or the more elevated parts of the country. Its cultivation is much less profitable than that of wheat. The total yield in 1870 was 16,918,795 bushels, of which Pennsylvania, New York, Illinois, Wisconsin, and Kentucky produced the largest amount.

The cereal, *Oats*, is so well adapted to either cold or warm climates, that it may be cultivated in nearly every portion of our country. It produces from 30 to 80 bushels to the acre. The yield in 1870 was 282,107,157 bushels, which were raised chiefly in the Northern and Middle states, as Illinois, Pennsylvania, New York, Ohio, Iowa, Missouri, and Minnesota.

Barley also is a product of the north, and is almost exclusively used for the manufacture of malt beer. It yielded in 1870, 29,961,305 bushels, the greater portion of which was produced in California and New York.

The product of the cereals, from 1850 to 1870, was as follows:

	1850.	1860.	1867.	1870.
Corn	592,071,104	838,792,742	768,520,000	760,944,549
Wheat	100,425,944	173,104,924	212,441,400	187,745,626
Rye	14,188,813	21,101,380	23,184,000	16,918,795
Barley	5,162,015	13,826,098	25,727,000	29,761,305
Oats	146,584,179	172,643,185	278,798,000	282,107,157
Buckwheat	8,956,912	17,571,818	21,359,000	9,821,721
Aggregates	867,388,967	1,237,040,147	1,330 029,400	1,287,299,153

The money value of the 1,330,029,400 bushels of cereals produced in 1867 is officially stated by the Department of Agriculture to be $1,248,037,000.

The area of cereals, in acres, is reported by the same department as follows:

1867.		1870.	
Corn	32,520,249	Corn	34,091,137
Wheat	18,321,561	Wheat	19,943,893
Rye	1,689,275	Rye	1 069,531
Barley	1,131,217	Barley	1,177,666
Oats	10,746,416	Oats	8,365 809
Buckwheat	1,327,826	Buckwheat	413 915

The large crops of 1870 were produced by the farming population of over thirty-eight millions of inhabitants, being at the rate of 33 bushels a head for the whole population. If it is correct to assume that eight bushels of cereals are sufficient to support one person for one year, the United States had a surplus of 25 bushels per inhabitant for exportation or an aggregate of 1,000 millions of bushels. A very large portion of this surplus, however, was fed to swine and other animals, and reappeared in the form of animal food, while a not inconsiderable quantity was distilled into whisky and other spirituous liquors, or converted into starch, etc.

The total production of cereals is on an average more than twice as large for each inhabitant of the United States, as it is in Europe. This enormous production is in great measure owing to the numerous machines for sowing, planting, reaping, threshing, and preparing the grain for market, which are the result of the inventive genius of the American people, saving the labor and taking the place of millions of men; and that, too, at seasons of the year when men in sufficient numbers could not be obtained. The number of reaping machines actively employed in 1866 was estimated by Mr. John Stanton Gould at 210,000, a number which since then must have greatly increased.

Rice is pre-eminently the grain of the subtropical zone. It requires a great deal of moisture,

and can be cultivated only on fields which are subject to inundation, either natural or artificial. Rice culture is described thus: "A sluice is cut through the river banks, and the fields, being first inclosed in a levee, are flooded. The land is plowed and flooded in March, and as soon as the young plants appear, they are submerged in water, so regulated as to keep their heads just above the surface. When the grain has matured, the fields are laid dry, and the crop is gathered. The yield is from 30 to 60 bushels per acre, but under favorable conditions rises as high as 90 bushels." Rice was introduced into Virginia early in the seventeenth century, and fifty years later into the Carolinas. It is also cultivated now along the coasts of Georgia, Florida, Louisiana, and Texas. The total crop in the United States was 80,841,422 pounds, in 1840; 215,312,710, in 1850, 187,167,032, in 1860; and 73,635,021, in 1870. The great decrease in its production for the last decade is owing to the civil war. During this war labor was entirely disorganized; flood-gates, drains, canals and barns were destroyed, and when peace returned rice culture had well nigh ceased. In 1860 rice to the value of $2,567 399 was exported; in 1870 the export had fallen to $127,655.

Tobacco is indigenous in America, and was first introduced into Europe by Sir Walter Raleigh. Since then the consumption has enormously increased, so that its culture has extended to every part of the civilized world where the conditions of soil and climate are favorable to its growth. The tobacco crop in the United States for 1840 was 219,163,319 pounds; for 1850, 199,752,646 pounds; for 1860, 434,209,641 pounds; and for 1870, 262,735,341 pounds. Over forty per cent. of this quantity was raised in Kentucky (viz.: 105,305,869 pounds). Virginia, Tennessee, Ohio, Maryland, Missouri, and North Carolina produced 44 per cent.; while the remainder was produced chiefly in Connecticut, Indiana, Iowa, Massachusetts, New York, Pennsylvania, and West Virginia.

Sugar-cane (Saccharum officinarum) is a tropical plant, and its cultivation in the United States is almost entirely confined to the Mississippi delta in Louisiana. It is very sensitive to frost, so that, if the juice becomes frozen, the sacharine matter contained therein will not crystallize into sugar. In the West Indies the cane is a perennial plant; in Louisiana the crops are gathered from one planting. The quantity of sugar produced on an acre varies greatly, according to the quality of soil and care of cultivation. The crop of 1860 in the United States yielded 230,982 hogsheads of sugar, of 1,000 pounds each, and 14,963,996 gallons of molasses; in 1870, 87,043 hogsheads of sugar and 6,593,323 gallons of molasses. During the latter year sugar and molasses were imported to the amount of nearly $72,000,000, being little less than the total value of exports during the same year, of corn, wheat, and flour. It is not likely that the limited area fit for cane culture will ever produce more than a small portion of the amount annually consumed in our country, and hence the introduction of the beet-sugar industry would be of great advantage to our prosperity. That this can be done is shown by actual experiments successfully made in various places.

Sorghum (Sorghum saccharatum) is raised in the Mississippi valley, and yielded in 1870, 16,050,059 gallons of molasses; but only twenty-four hogsheads of sugar. The product of maple trees was 28,443,645 pounds of sugar and 921,057 gallons of molasses.

Cotton is the great staple of the Southern states. Two varieties are cultivated—the upland and the sea island cotton. The former grows under favorable conditions as far north as the 40th parallel, but as a commercial crop it is limited by a line which coincides with the northern boundary of Mississippi, sweeps around the base of the Appalachians through Alabama, Georgia, and South Carolina, and then turns north to Raleigh and south-eastern Virginia. Beyond the Mississippi its culture extends up the lower valleys of the Red, Arkansas, and White rivers. The sea-island variety is raised on the low fertile islands of the South Atlantic and Gulf coasts. Its value is five or six times as great as that of the upland.

In 1792 the question was seriously discussed in England, whether the United States would ever produce one hundred bales of cotton. Subsequently the inventive genius of Eli Whitney conquered for this plant a place among the principal staples of the world, second only to the cereal grasses. His cotton gin, which separates the fiber from the seed, rendered it possible to prepare even the largest crops for the loom.

In 1800 the whole product amounted to 100,000 bales of 400 pounds each; in 1824, to 509,158 bales; in 1830, to 976,845 bales; in 1840, to 2,128,880 bales; in 1850, to 2,445,793 and in 1860, to 5,196,940. The war brought this branch of industry almost to a standstill; nor has the recovery been very rapid since. In 1866 the crop was almost 2,000,000 bales; in 1867, 2,500,000 bales; and in 1870, 3,011,990 bales, which were produced chiefly in Mississippi, Georgia, Alabama, Louisiana, Texas, Arkansas, the Carolinas, and Tennesee. For years to come the production will not, in the opinion of the Commissioner of Agriculture, reach the quantity before the war, and the average value will not exceed 300,000.000 dollars.

The *Potato* is hardly of less importance than corn or wheat. It is a native of America, and has been found growing wild in Chili and Ecuador, but is now cultivated in nearly all parts of the temperate zone. Its climatic range is very wide, as it is successfully grown from Alabama and Georgia to the shores of the Great Lakes, and even of Hudson Bay. The average yield is below two hundred bushels to the acre, though crops of four hundred bushels are not rare under favorable conditions of soil and season. In 1870 the United States produced 143,337,473 bushels, chiefly in New York, Pennsylvania, Ohio, Michigan, Illinois, and Wisconsin.

The *Sweet Potato* is a native of the East Indies and tropical America; and is in the United States chiefly cultivated in the Carolinas, Georgia, Alabama, Arkansas, and Texas. The crop in 1870 was 21,709,824 bushels.

Flax and Hemp were cultivated in the United States at an early date; but they are now in great measure superseded by cotton. The hemp crop yielded, in 1870, 12,576 tons, eleven-twelfths of which were produced in Kentucky and Missouri. Flax yielded in the same year 27,133,003 pounds, two-thirds of which were produced in New York.

The *Hay* crop of the country is of great value; but from its weight and bulk it does not form an important item in the list of exports. In 1850 there were produced 23,838,642 tons; in 1860 19,083,896 tons, and in 1870, 27,316,048 tons. The following states produced from one to between five and six millions of tons each: New York, Pennsylvania, Illinois, Ohio, Iowa, Indiana, Michigan, Wisconsin, Maine, and Vermont. The Southern states receive from the Northern large quantities of hay in the form of compressed bales.

Butter, Cheese, and Milk are produced chiefly in the Northern states, and of these New York is far in advance of all others. The subjoined table shows the increase of dairy produce during the three last decades:

	1850.	1860.	1870.
Butter	313,345,306	459,681,372	514,092,683 pounds.
Cheese	105,535,893	103,663,927	53,492,153 pounds.
Milk (sold)	.....	.....	235,500,599 gals.

The production of *Wool* has progressed remarkably both as regards quantity and quality. In 1850 the aggregate product was about 52,000 000 pounds; in 1860, 60,000,000, and in 1870, 100,000,000. Ohio, with twenty and a half millions, surpasses all the other states; California follows with eleven millions; New York, with ten millions; Michigan, with eight millions. Vermont excels in producing wool of the very finest quality.

The production of *Silk* is still in its infancy in the United States. The census for 1870 reports 3,937 pounds of silk cocoons, which were produced almost entirely in California. Here the mulberry (Morus alba, and M. moretti) grows well in proper situations; but whether the raising of silk-worms can be successfully carried on with the high price of labor is doubtful.

IX. MANUFACTURES.

The manufacturing industry of the United States progresses at the most extraordinary rate, and keeps pace with the development of the natural resources of the country. New branches are constantly added to those already in successful operation, and nearly all the commodities that enter into the consumption of a civilized nation are produced within our borders.

In 1870 there were 252,148 manufacturing establishments, employing 1,215,711 horse-power of steam engines, 1,130,431 horse-power of water wheels, and 2,053,996 hands, of whom 1,615,598 were males above 16 years of age, and 323,770 females above 15 years of age. The capital invested was $2,118,208,769; the raw material consumed had a value of $2,488,427,242; the wages paid amounted to $775,584,343; and the value of the products was $4,232,325,442. Deducting from this enormous amount the cost of raw materials, the profit realized by the manufacturing industry during the year was $1,743,898,200, or $45.25 per head to the population. The increase of this great branch of industry during the last decade has been unprecedented.

The subjoined table exhibits the industrial statistics; the states being arranged in the order of the value of the annual products:

STATES.	Capital invested.	Value of annual products.
New York	$366,994,320	$785,194,651
Pennsylvania	406,821,845	711,894,344
Massachusetts	231,677,862	553,912,568
Ohio	141,923,964	269,713,610
Missouri	80,257,244	206,213,429
Illinois	94,368,057	205,620,672
New Jersey	79,606,719	169,237,732
Connecticut	95,281,278	161,065,474
Michigan	71,712,283	118,394,676
Rhode Island	66,557,322	111,418,354
Indiana	52,052,425	108,617,278
Maine	39,795,190	79,497,521
Wisconsin	41,981,872	77,214,326
Maryland	36,438,729	76,593,613
New Hampshire	36,023,743	71,038,249
California	39,728,202	66,594,556
Kentucky	29,277,809	54,625,809
Iowa	22,420,183	46,534,322
Virginia	18,455,400	38,364,322
Tennessee	15,599,295	34,362,636
Vermont	20,329,637	32,184,606
Georgia	13,930,125	31,196,115
Louisiana	18,313,974	24,161,905
West Virginia	11,084,520	24,102,201

STATES.	Capital invested.	Value of annual product.
Minnesota	$11,993,729	$23,110,700
North Carolina	8,140,473	19,021,327
Delaware	10,839,093	16,206,397
Nevada	5,127,790	15,870,539
Alabama	5,714,032	13,040,644
Kansas	4,314,060	11,775,833
Texas	5,284,110	11,517,302
South Carolina	5,400,418	9,858,981
Dist. of Columbia	5,021,925	9,292,173
Mississippi	4,501,714	8,154,758
Oregon	4,376,849	6,419,756
Nebraska	2,169,963	5,738,512
Florida	1,679,930	4 685,403
Arkansas	1,782,913	4,629,234
Colorado	2,835,605	2,852,820
Washington	1,893,674	2,851,052
Montana	1,794,300	2,494,511
Utah	1,391,898	2,343,019
New Mexico	1,450,695	1,489,868
Idaho	742,300	1,047,624
Wyoming	889,400	765,424
Arizona	150,700	185,410
Dakota	79,200	178,570

The manufacture of *Cotton Goods* is one of the oldest branches of industry in the United States. It properly began with the erection of the first water frame for spinning, in Rhode Island, in 1790; but since then it has increased even more rapidly than the production of the raw material. In 1850 there were employed 3,633,693 spindles; and the total product had a value of $65,501,687. Ten years later the number of spindles in operation was 5,235,727, and the value of products, $115,681,774. By 1870 the spindles had increased to 7,132,415, and the value of products to $177,489,739; of which Massachusetts produced one-third, or $59,493,153. The states next in rank, as regards the production of cotton goods, were Rhode Island, Pennsylvania, New Hampshire, Connecticut, Maine, and New Jersey. The *Printed Cotton and Woollen Goods* had a value of $54,446,044.

The value of *Woolen Goods* in 1870 was $155,405,358, against $61,894,986 in 1860, and $43,207,545 in 1850. The leading states in this branch of industry were Massachusetts, Pennsylvania, Rhode Island, New Hampshire, and Maine. The census report enumerates fifteen different articles manufactured in this country, among which flannels, cloths, cassimeres, blankets, tweeds, and twills occupied the first places.

The manufacture of *Silk Goods* has doubled during the last decade. The census for 1860 returned for the total value of products, $6,607,771; and the census of 1870, $12,210,662. In the former year the production was limited to sewing silk and twist: in the latter there were manufactured 1,026,422 yards of silk goods, 3,224,264 yards of silk ribbon, 370,031 pounds of machine silk, and 127,590 pounds of spool silk.

The value of *Hosiery* produced in 1850 was but $1,028,102; in 1860 $7,280,606; and in 1870, $18,411,564. The manufacture of *Carpets* shows also a remarkable increase, producing the following values: in 1850, $5,401,234; in 1860, $7,857,636; and in 1870, $21,761,573.

Ready-made Clothing is manufactured principally in New England, New York, and Pennsylvania. The value in 1850 was $40,678,802; in 1860, $64,002,975; and in 1870, $147,650,378. In the production of *Cast Iron* were invested in 1870, $67,578,961, and the raw materials consumed, as pig-iron, scrap-iron, and coal, had a value of $48,222,550; while the value of products amounted to $99,843,218, against $36,132,033 in 1860, and $25,108,155 in 1850. New York, Pennsylvania, Ohio, and Massachusetts are the leading states in this branch of industry.

Boots and Shoes were manufactured to the amount of $181,644,090 in 1870, against $91,889,298 in 1860.

The manufacture of *Machinery* has more than doubled within the last decade. In 1870 the products had a value of $138,519,248, and in 1860, $51,887,266. Pennsylvania, New York, Ohio, and Massachusetts are the foremost machine-producing states.

Sawed Lumber, including shingles, staves, etc., was produced in 1860 to the value of $96,715,854, and in 1870, of $210,159,327, chiefly in Pennsylvania, New York, Michigan, and Maine.

The *Tanned Leather* manufacture in 1870 had a value of $86,169,883, and the *Curried Leather*, of $54,192,017.

The production of *Brick and Tile* increased from $11,263,147 in 1860 to $29,302,016 in 1860, and is most extensively carried on in New York and Pennsylvania. The *Carpenters and Builders* trade added to the national wealth the large sum of $132,901,432, and the value of *Furniture* was $68,522,221, and of *Glass*, $19,235,862.

No branch of manufacture grows more rapidly than that of *Agricultural Implements*. The products in 1850 had a value of $6,842,611: in 1860, of $17,487,960; and in 1870, of $52,066,875. The census report for the last year enumerates 21,790 corn-planters, 88,740 cultivators, 19,772 fanning mills, 103,646 grain cradles, 207,310 dozen of hand rakes, 9,150 harrows, 3,566 harvesters, 1,298,260 hay forks, 80,619 horse rakes, 39,486 mowers, 60,388 reapers, 59,645 mowers and reapers combined, 864,947 plows, 2,931 thrashers, 881,244 scythes, 6,900 seed sowers, and 1,031 separators.

Chewing, Smoking, and Snuffing Tobacco was manufactured of $38,388,356 in value in 1870; and $21,820,535 in value in 1860; and the number of *Cigars* was 935,868 boxes (of one thousand each), which had a value of $28,299,067.

The value of *Carriages and Wagons* was $65,362,837.

The *Sugar Refineries* turned out products to the amount of $108,941,911, and the *Distilleries of Liquor, Beer Breweries* and *Wine Manufactories* of $94,133,014.

Paper of all descriptions was produced in 1870 to the value of $48,676,935, against $23,447,302 in 1860, and the value of *printed publications* was in both years respectively $32,674,037 and $31,936,433.

Flour and Meal had increased from $248,580,365 in 1860, to $444,985,143 in 1870.

The *Iron* industry of our country has attained colossal proportions, and is second only to that of England. In 1870 our products were: pig-iron, $30,640,498, iron castings, $76,453,553; iron blooms, $23,389,625; forged and rolled iron, $128,062,627, and nails and spikes, $24,823,996.

X. MINING.

The United States is probably the richest country in the world, as regards the useful and precious minerals. The Appalachian ranges and the Mississippi valley have immense coal fields, inexhaustible deposits of iron, copper, lead, etc.; while the treasure of precious metals in the region of the Cordilleras is practically without limit. For many years to come the yield of our mines will increase, and mining continue to be a great legitimate branch of industry.

Gold and Silver were formerly obtained to a limited extent in Virginia, the Carolinas, and Georgia; and the value of the gold annually mined averaged about $1,000,000. But with the gold discoveries in California in 1848 the United States took the first rank in the production of this metal, and has maintained it ever since. Mining has been followed in the West by several different methods. Placer mining was the first; an inexpensive process by which the loose gold is washed out of the alluvial soil. Hydraulic mining is placer mining on a gigantic scale; and this is still a profitable pursuit in California. The chief process now is quartz mining, by which the gold is obtained from the hard rocks (mostly quartz) of the auriferous veins. This has become and will remain for many years a legitimate industry, which, if skillfully conducted, will yield regular returns, but no sudden fortunes. Hydraulic and quartz mining require large investments of capital, and hence are mostly carried on by chartered companies, whose shares are bought and sold in the market. The history of this commerce in shares began with the discovery of the rich Washoe mines in Nevada, in 1858; particularly the Comstock Lode. The first reports of these discoveries were considered in San Francisco as greatly exaggerated; but when some of the ores on their reduction yielded $3,500 per ton, the value of the deposits became apparent. With great difficulties, and at an enormous expense, machines, crushing works, and food were transported across the Sierra Nevada to Washoe. Several companies were incorporated, and their shares alternately rose and fell.

From 1860 to 1862 many mines were in successful operation, and at the same time explorations were made in various parts of the Great Basin, and new districts were discovered, as Esmeralda, Silver Mountain, Humboldt, Owen River, and others. In 1862 the deposits on the Colorado and Reese rivers were found; and as the news of these discoveries reached San Francisco, the excitement rose and in the spring of 1863 attained its climax. All classes of persons rushed into the wildest speculation. Merchants, physicians, and lawyers hastened to invest their savings in mining shares. Even women participated in the general mania. Then followed a general reaction. It became known that many mines were worthless. All mining shares fell greatly in price, and many lost their value altogether. The shares of the Wide West, Sheba, and Darsey (three of the better mines), for example, which during the excitement had risen to $580, $500, and $800 respectively, fell to $65, $70, and $90. This was a reduction of from $3,500,000 to $393,000 for the aggregate value of the three mines named. The reaction had a favorable influence on the mining industry of the West. Capitalists became more cautious, and before making investments, had the mines thoroughly examined. Those wild speculations which so greatly impaired confidence in this interest are now rare, and fluctuations in stock have gradually narrowed down to a limited range.

The total value of the gold and silver products of the western mines was estimated by J. Ross Browne, in his report to the Secretary of the Treasury, as follows:

	For 20 years, from 1848 to 1868.	For the year ending Jan. 1, 1868.
California	$900,000,000	$25,000,000
Nevada	90,000,000	20,000,000
Montana	65,000,000	12,000,000
Idaho	45,000,000	6,500,000
Washington	10,000,000	1,000 000
Oregon	20,000,000	2,000,000
Colorado	25,000,000	2,000,000
New Mexico and Arizona	5,000,000	1,000,000
Bullion, of which no account was taken	50,000,000	5,000,000
Aggregate	$1,210,000,000	$74,500,000

Estimates for the years 1869 and 1872 give the following figures:

	Gold.	Silver.	Total for 1869.	Total for 1872.
California	$20,000,000	$.....	$20,000,000	$19,049,089
Nevada	1,500,000	12,500,000	14,000,000	25,584,871
Oregon and Washington	4,000,000	.....	4,000,000	2,131,089
Idaho	6,850,000	150,000	7,000,000	2,514,090
Montana	11,850,000	150,000	12,000,000	4,442,135
Arizona	1,000,000	.....	1,000,000	143.777
New Mexico	500,000	.....	500,000	500,000
Colorado	3,500,000	500,000	4,000,000	3,001,751
Utah	.....	.....	.....	3,521,020
All other sources	1,000,000	.....	1,000,000	.....
	$50,200,000	$13,300,000	$63,500,000	$60,887,822

Quicksilver is found only in the coast ranges of California. The New Almaden Mine produced from January to August, 1867, 31,061 flasks, of 75 Spanish pounds each; the New Idria Mine yielded for the first six months of the same year 5,014 flasks, and the Reddington Mine, 55 miles N. W. of Napa, yielded up to January, 1867, 9,009 flasks, selling for a total of $344,594. The export of quicksilver increased from 9,000 flasks, in 1860, to 42,000 flasks, in 1865.

Copper is mined chiefly in Michigan and Wisconsin, near the coast of Lake Superior. The production in 1860 was 14,432 tons, which were worth $3,316,516. The most productive *Lead* mines are

in Missouri, Illinois and Iowa. Those of Missouri yield nearly half of the entire product of the country, which was in 1860 about 9,000 tons, of $977,281 in value. *Zinc* and *Nickel* are found only in Pennsylvania, which produced, in 1860, 11,800 tons of zinc, of $72,600 in value.

Coal. The total extent of all productive coal fields thus far known in the United States is 125,000 square miles, and embraces the following areas:

1. The Appalachian coal field, covering parts of Pennsylvania, Ohio, Virginia, Eastern Kentucky, Eastern Tennessee, and Alabama. The workable area is estimated at 60,000 square miles. In the center of Pennsylvania, between Pottsville and Wyoming, are the famous anthracite beds, divided into many distinct patches; and in the western part commences the great bituminous coal field, which spreads westward into Ohio and southward to Alabama.

2. The Illinois and Missouri coal fields, covering a very considerable part of Illinois, Indiana, and Kentucky, and west of the Mississippi river, portions of Iowa, Missouri, Kansas, and Arkansas. Their estimated area is also about 60,000 sq. mls.

3. The Michigan coal fields, situated about the center of the lower peninsula, and embracing an area of about 5,000 sq. mls.

4. The Texas coal field, covering the northern and north-western counties.

5. The Wyoming coal field, of unknown area, which supplies, to a large extent, the Union Pacific railroad.

6. A small coal field of about 1,000 sq. mls. in Rhode Island and Massachusetts, between Providence and Worcester.

The amount of anthracite and semi-anthracite coal sent to market in 1870 was, according to the *Miners' Journal*, 15,368,437 tons, an increase over 1869 of 1,716,690 tons. In addition to this there were consumed in the collieries 3,842,876 tons.

The total product of bituminous coal for 1870 was 34,179,778 tons.

Petroleum or coal oil first attracted attention about 15 years ago. In 1857 the first well was sunk near Titusville, on Oil Creek, in Pennsylvania; and at a depth of 70 feet the oil was struck, which yielded a steady flow of 400 gallons per day. In 1860 the number of wells in this region was upward of 2,000, 72 of which yielded a daily product of 1,165 barrels, of 33 gallons each. From that time petroleum became one of the great staple articles of commerce, immense quantities being consumed at home or exported to Europe.

The total shipments have been for the last 10 years as follows:

In 1861	1,500,000 gallons.	In 1866	67,430,451 gallons.
In 1862	10,887,701 "	In 1867	67,052,020 "
In 1863	28,250,721 "	In 1868	99,281,750 "
In 1864	31,872,927 "	In 1869	102,748,604 "
In 1865	29,805,523 "	In 1870	141,208,155 "
Total export in 10 years			580,037,852 gallons.

At an average of 25 cts. per gallon, including crude and refined, for the whole period, this would give a total valuation of $145,009,474, or at 20 cts. per gallon, $116,007,579, which has been added to the exports of the country from an article unknown to commerce 12 years ago.

The Valley of Oil Creek, a tributary of the Alleghany river, is the principal oil region of the country. It produced in 1869 the enormous number of 398,186 barrels, and in 1870, 471,657 barrels.

XI. COMMERCE.

The commerce of the United States has grown at the most extraordinary rate during the last decade, keeping fully abreast with the increase of population, manufactures, and general wealth of the country.

In the year 1700 the exports of the colonies amounted to £395,000, and the imports to £344,000. In 1792 these values had risen respectively to $20,753,098 and $31,500,000, and in 1807, to $108,343,150 and $138,500,000. Then followed a period of commercial depression, brought about by the "Decrees of Berlin and Milan," and the "Embargo," and up to the year 1830 the exports and imports averaged about $78,000,000. The crisis of 1837 was succeeded by a decline which reached its lowest point in 1842. Here the figures rise again, slowly at first, more rapidly afterward, with but a brief interruption in consequence of the crisis of 1857.

In 1860	the exports amounted to	$400,122,296;	the imports to	$362,163,440.
" 1862	" "	229,938,975;	"	205,819,823.
" 1864	" "	340,665,580;	"	328,514,559.
" 1866	" "	437,641,357;	"	565,426,394.

In the year ending June 30, 1870, the United States imported goods to the value of $541,493,708 and exported goods to the value of $590,978,550. Of this amount the value of domestic exports was $562,518,651, and of foreign exports, $28,459,899. The principal ports of the country participated in the foreign commerce of the same year, as follows:

	Imports.	Domestic Exports.	Foreign Exports.
New York	$357,909,770	$285,530,775	$20,087,211
Boston	53,652,225	12,961,291	1,450,398
Baltimore	24,672,871	15,037,855	86,373
San Francisco	20,384,907	20,857,902	79,140
New Orleans	19,427,238	93,953,081	1,293,710
Philadelphia	17,728,006	17,903,027	17,256
Vermont District	8,135,633	2,465,792	150
Oswego, N. Y.	6,703,924	1,005,250	9,899
Niagara, N. Y.	3,872,603	55,371	
Buffalo, N. Y.	3,110,894	264,664	3,034
Charleston, S. C.	2,271,298	465,225	150 294
Portland, Me.	2,130,138	2,972,401	274 855
Mobile, Ala.	1,579,806	21,873,703	1,631
Savannah, Ga.	1,090,717	32,857,902	79,140
Texas District (including Galveston)	1,255,003	13,764,384	22,866

New York absorbs 56.8 per cent of the total foreign commerce of the country. Its pre-eminence is owing to the geographical position of the city, her magnificent harbor and her excellent connections with the interior by rail and canal. The Erie Canal, which connects New York with the Great Lakes, is the only water communication which intersects the whole breadth of the Appalachian System from east to west.

The subjoined table exhibits the quantities and values of the more prominent articles of importation, and the countries from which they were chiefly imported:

Article.	Quantity.	Value.	Countries from which Imported.
Cochineal	1,849,842 pounds.	$ 1,184,225	Mexico, U. S. of Columbia and England.
Guano	104,725 tons.	3,322,328	Peru.
India Rubber and Gutta Percha	6,155,331 pounds.	2,307,233	Brazil and Columbia.
Indigo	1,894,172 "	2,052,222	British East India and U. S. of Columbia.
Rags of cotton or linen for the manufacture of paper	103,520,482 "	3,748,984	England, Mexico, Germany, and Russia.
Raw Silk	1,100,281 pounds.	5,739,592	China, England, Japan, and France.
Wool unmanufactured		909,330	Brazil, Mexico, and others.
Barley	4,866,700 bushels.	3,678,810	Canada.
Rice	64,655,827 pounds.	1,876,786	England and China.
Books, Maps, and Engravings		1,868,228	England, Germany, and France.
Buttons		1,444,577	England, Germany, and France.
Clothing (except when of silk and hosiery)		1,670,422	England and Germany.
Cocoa	3,445,453 pounds.	388,579	Columbia, Venezuela, Guiana.
Coffee	317,992,048 "	30,992,869	Brazil (four-fifths) Venezuela, Java, Central America.
Cotton manufacture, bleached and unbleach'd	36,938,026 sq. yds.	4,883,622	England, Germany, and France.
Cotton manufacture, printed or colored	28,975,876 "	3,634,315	England, Scotl'd, France, and Germany.
Hosiery (cotton)		5,085,993	Germany and England.
Jeans, drillings, etc.	5,386,146 "	737,251	England, Scotland, Germany, and France.
Cotton manufactures, not specified		15,535,429	England, Scotland, Germany, and France.
Chemicals, drugs, medicines, dyes, etc.		6,480,414	England, France, Germany, Scotland, Italy.
Earthen and china ware		4,681,376	England, France, and Germany.
Fancy goods		4,693,822	England, Germany, and France.
Fish, fresh, and cured		2,503,924	Engl'd, Canada, France, and Germany.
Flax, manufactures of		13,560,702	England and Canada.
Fruits and nuts		9,602,630	Italy, Spain, and England.
Glass, cylinder, crown and common window	36,986,083 pounds.	1,447,292	Belgium and England.
Cast polished plate glass	1,850,288 sq. feet.	919,435	England and Belgium.
Cast polished plate glass, silvered	2,518,552 "	651,487	Germany and England.

Article.	Quantity.	Value.	Countries from which imported.
Hemp, raw	20,805 tons.	$ 3,918,129	Spanish Possessions and Russia.
Hides and skins		14,892,987	Argentine Republic, Uruguay, England, British, E. Indies, Brazil.
India Rubber and Gutta Percha, not manufactured	4,875,608 pounds.	2,083,543	Brazil, Columbia, and England.
Pig-iron	399,031,453 "	3,106,490	England, Scotland, and Canada.
Bar-iron	203,503,170 "	4,058,126	England.
Railroad bars or rails	1,026,045,340 "	17,360,297	England.
Old and scrap iron	155,805 tons.	3,782,526	England, Canada, and Belgium.
Steel ingots		3,750,702	England.
Cutlery		1,956,351	England.
Files, saws, and tools.		1,118,499	England.
Iron and steel manufactures, not specified		4,883,075	England.
Jewelry		1,109,040	England, Germany, and France.
Jute and other grasses, etc., rare	26,450 tons.	2,131,056	British E. Indies, Mexico.
Jute manufactures (gunny bags, etc.)		3,231,932	British E. Indies, England.
Leather and leather goods		10,400,034	England, France, and Germany.
Oils—whale, olive, fixed, and essential		2,352,401	Canada and England.
Opium	315,121 pounds.	1,926,915	England and China.
Paper and paper manufactures		1,600,117	England, Germany, and Belgium.
Precious stones		2,346,732	England France, and Germany.
Provisions, including vegetables		3,650,487	Canada and England.
Salt	637,752,646 "	1,254,001	England, British West Indies.
Silk, manufacture of		32,323,001	England, France, and Germany.
Soda and Salts of	244,019,371 "	4,568,996	England, Hayti, and Peru.
Spices of all kinds	23,393,398 "	2,165,557	China, England, East Indies.
Sugar and molasses		74,827,043	Cuba, Porto Rico, Br. West Indies, and South America.
Tea	51,364,919 "	17,254,617	China and Japan.
Tin and manufacture of tin		12,757,215	England, China, and Holland.
Tobacco and manufacture of tobacco	9,268,590 "	6,047,285	Cuba.
Watches, watch movements, and materials.		3,328,448	England, France, and Germany.
Wines, spirits, and cordials		8,638,441	France, Spain, England, and Germany.
Boards, deal, plank, joist and scantling	725,994,000 feet.	6,863,684	Canada.
Raw and fleece wool	68,058,028 pounds.	9,780,443	England, Argentine Republic, Canada, Cape Colony, and Uruguay.
Woolen shawls		2,160,037	England, France, and Germany.
Carpets		4,691,061	England.
Woolen manufacture not specified		6,844,420	England, France, and Germany.
Zinc, spelter, etc	18,553,572 "	849,441	Belgium, Spanish Possessions, and Germany.

The entries from Great Britain and the British Possessions exceeded in value 52 per cent. of all our importations. Those from Spain and her Colonies (chiefly Cuba) occupy the next place, with 14 per cent.; then follow those from Brazil and France, with more than 5½ per cent. each; those from Germany, with 4.6 per cent.; from China, with 3.6 per cent.; and from Mexico, with 3 per cent. The entries from Italy, Argentine Republic, Columbia, Holland, and Japan, exceeded

one per cent.; and those from all other countries were less than one per cent. The subjoined table contains the declared value of import entries.

From Great Britain and all British Possessions	$282,370,860
From Cuba, Spain and Spanish Possessions	67,521,282
From Brazil	30,560,648
From France and French Possessions	29,990,028
From Germany	25,063,635
From China	20,066,315
From Mexico	17,511,163
From Italy	7 443,754
From Argentine Republic	7,040,575
From United States of Columbia	6,434,776
From Holland and Dutch Possessions	6,155,150
From Japan	5 387,991
From Peru	4,731,430
From Belgium	4,178,714
From Venezuela	2,975,629
From Uruguay	2,570,385
From Sweden and Norway	1,839,024
From the Central American States	1,528,399
From Russia	1,462,901
From Sandwich Islands	1,153,154
From Hayti and San Domingo	1,055,675
From Austria	944,028
From Chili	716,544
From Denmark and Danish Possessions	673,775
From Turkey	527,493
From Portugal and Portuguese Possessions	411,496
From Greece	.....
From Liberia	73,964
All other countries not specified	774,085
Total	$541,493,702

If we deduct $28,459,899, the value of re-exportation, from the total value of imports, there remain for consumption in this country articles of foreign production to the value of $513,033,809, or $13.32 per head to the population. In 1865 the consumption per head was $9.28; in 1860, $9.04; and in 1850 $7.53. In Great Britain it was, in 1869, $46.40; in 1865, $45.40; and in 1860, $36.00.

The exports of the United States consist chiefly of agricultural and mining products and manufactures. In the year ended June 30, 1871, they exported:

Raw Cotton to the value of	$218,327,109
Cotton manufactures to the value of	3,558,136
Gold and Silver (bullion and manufactures of) to the value of	84,452,039
Bread and Breadstuff to the value of	79,481,189
Coal Oil and Petroleum to the value of	36,110,583
Muskets, pistols, rifles, and sporting guns, to the value of	13,463,916
Cartridges and fuses to the value of	3,201,043
Bacon and hams to the value of	8,126,683
Beef to the value of	3,825,666
Cheese to the value of	8,752,990
Cured Fish to the value of	10,563,000
Pork to the value of	4,302,322

The mercantile fleet of the United States had, in 1871, 4,282,607 tons new admeasurement, of which 1,087,637 tons were employed in steam navigation.

Vessels which are engaged in foreign commerce and the whale fishery are registered, those which are employed in the coasting trade, mackerel fisheries, etc., are merely enrolled and licensed. On the 30th of June, 1871, the tonnage was employed, as follows:

In foreign trade	1,363,652 tons.	
" whale fisheries	61,490 "	
Total registered tonnage		1,425,142
Enrolled vessels in the coasting trade	2,722,372	
Licensed vessels " " " " (under 20 tons)	42,228	
In the cod and mackerel fisheries	92,865	
Total registered and licensed tonnage		2,857,465
Total tonnage of U. S		4,282,607

The subjoined table exhibits the number and tonnage of vessels, on the 30th of June, 1871:

	Sailing Vessels.		Steam Vessels.		Barges.		Canal Boats.		Total.	
	No.	Tonn.	No.	Tonn.	No.	Tonn.	No.	Tonn.	No.	Tonn.
Atlantic and Gulf Coasts	14,604	1,918,675	1,672	604,518	636	100,672	4,069	372,558	20,981	2,996,425
Pacific Coast	805	98,137	196	60,856	71	8,443			1,072	167,436
Northern Lakes	1,662	267,153	682	149,467	132	31,208	3,037	264,198	5,513	712,028
Western Rivers	227	2,190	1,017	272,795	633	120,019	208	11,715	2,085	406,719
Total United States	17,298	2,286,156	3,567	1,687,637	1,472	260,343	7,314	648,471	29,651	4,282,607

The tonnage of our merchant fleet was 1,042,404 in 1804; 1,232,502 in 1810; 1,298,958 in 1820, and 1,267,847 in 1830. During the next fifteen years it doubled; numbering 2,562,084 tons in 1845. In 1850 it reached 3,535,454 tons; in 1855, 5,212,001; and attained its greatest development in 1861, when it numbered 5,539,813 tons. The southern insurrection, the British recognition of the Southern states as belligerents, and the depredations of Southern cruisers, bore with crushing weight on the shipping interests of the United States. Many ships were captured and destroyed, and many more passed into foreign hands. Official returns show that our ocean commerce is being carried more and more in foreign bottoms. In 1860 nearly 71 per cent. of our foreign commerce was in American ships; in 1864 it had decreased to 46 per cent.; in 1868, to 44 per cent.; and in 1871, to 38 per cent. There is no valid reason why our shipping interest should not rise from its pres-

ent depression and again take the prominent rank it held before the war. The United States produce an abundance of iron and of the best ship timber in the world. American skill and ingenuity have produced the best ship models known. Though the high price of labor and materials render competition with the older countries of Europe very difficult, yet with the wisest congressional enactments, and the most intelligent adjustment of taxes on ship-building materials, we may hope soon to re-assume our former position as a maritime nation.

The number of vessels which entered into the ports of the United States during the year ending June 30, 1871, was 30,102, with an aggregate tonnage of 10,009,184. Of these there were 19,406 foreign vessels, with a tonnage of 6,266,444 or 62½ per cent.

During the same year 20,861 vessels of 9,898,482 tons burden cleared from our ports, of which 19,288 vessels of 6,151,537 tons were foreign.

The subjoined table exhibits the number of vessels, and their tonnage, which during the above named year entered, or cleared from, the principal ports of the United States:

	ENTERED.		CLEARED.	
	Number of vessels.	Tonnage.	Number of vessels.	Tonnage.
Portland and Falmouth	419	161,177	637	210,876
Boston	3,514	836,014	3,289	602,553
New York	5,062	3,413,436	4,527	3,252,539
Philadelphia	954	369,616	828	330,743
Baltimore	832	315,734	686	264,880
Charleston	157	48,104	184	74,539
Savannah	228	142,902	305	201,997
Pensacola	165	103,149	167	100,910
Mobile	147	103,822	159	120,013
New Orleans	908	566,797	953	622,826
San Francisco	406	353,493	474	410,252

It has recently been estimated, that there are on the Great Lakes no less than 5,424 steamers, sailing vessels and barges having an aggregate capacity of 717,299 tons, and total value of $53,343,000. In 1800 there were only 1,640 vessels of all kinds on those lakes, valued at $23,229,000, and having a total capacity of 412,127 tons.

The domestic commerce of the United States far exceeds the foreign commerce in the amount and value of the goods bought or sold. But as there is no bureau, official or unofficial, in which the movements of goods are registered, it is impossible to obtain statistics embracing the whole field. Our ocean coasts measure 33,633 miles (exclusive of Alaska); the lake shores, 3,620 miles; and the Mississippi, with its tributaries, has a network of navigable waters extending over 35,650 miles, to which the other navigable streams add nearly 50,000 miles. The combined length of our canals is over 6,000 miles, and of railroads, 65,000 miles. Thus our country possesses an aggregate of great commercial highways, open to steam communication, exceeding 190,000 miles in length. And all these roads and water ways carry vast quantities of goods and effect the interchange of commodities between the different parts of the country. The Southern states send their cotton to the factories of the North, and receive in return northern manufactures; the surplus of the western grain moves to the Atlantic seaboard, to be consumed in the densely populated states of the east, or to be shipped to foreign lands; the Pennsylvania coal fields furnish the households and steam engines of the New England and Middle states with fuel; and the forests of Maine, Wisconsin, and Michigan supply the great lumber markets of Portland, Albany, Chicago, and other cities.

XII. RAILROADS, TELEGRAPHS, AND CANALS.

The wonderful progress of the United States is clearly shown by the development of the railroad system. In 1830 the first 23 miles were opened for use; during the decade ending 1840, 3,513 miles were added; in that ending 1850, 5,508; in that ending 1860, 21,614; and in that ending 1870, 22,761 (notwithstanding the civil war, which occupied a part of this decade). At present the mileage probably exceeds 68,000, the construction of which cost in round numbers about $3,250,000,000, or $50,000 per mile. The mileage of all European railroads in 1871 was 66,135; of which Great Britain had 15,144; Germany, 12,304; France, 10,635; Russia, 6,989; Austria, 6.325; and Italy, 3,648. Thus the time is near at hand when our railroads will exceed in length those of all Europe combined.

In 1872 there were 346 incorporated railroad companies, the most important of which are enumerated in the subjoined table:

Corporate titles of companies.	Length of main line and branches.	Cost of R. R. and equipments.	Passengers carried.	Freight moved.
1. Boston and Albany	249	$ 22,888,797	4,744,904	2,209,332
2. N. Y. Central and Hudson River (from New York to Buffalo).	740	60,413,657		4,741,120
3. Erie R. R. (from Jersey City to Dunkirk, N. Y.)	914	59,842,740	3,509,462	4,844,203
4. United New Jersey R. R. and Canal Cos. (from New York to Philadelphia)	165	37,276,372		

Corporate titles of companies.	Length of main line and branches.	Cost of R. R. and equipments	Passengers carried.	Freight moved.
5. Pennsylvania (from Philadelphia to Pittsburg)	423	$ 34,610,160	4,699,985	6,575,843
6. Baltimore and Ohio (from Baltimore to Wheeling, W. Va)	620	35,131,615		
7. Columbus, Chicago, and Indiana Central	587	36,230,174		
8. Lake Shore and Michigan Southern (from Buffalo to Chicago)	1,074	58,741,536	1,943,162	3,725,425
9. Pittsburgh, Ft. Wayne, and Chicago	369	33,394,515	1,985,732	2,047,114
10. Toledo, Wabash, and Western (from Toledo, O., to E. St. Louis, Ill.)	606	33,683,000	633,166	
11. Chicago and North-western (from Chicago, Ill., to Ft. Howard, Wis. and several other lines)	1,224	52,000,659	2,239,494	2,298,170
12. Illinois Central (from Chicago to Cairo and other lines)	707	33,611,806	1,286,994	1,831,942
13. Milwaukee and St. Paul	1,018	39,700,789		1,463,155
14. Kansas Pacific (from Kansas City to Denver)	972	33,409,606	201,592	277,168
15. Union Pacific (from Omaha to Ogden)	1,032		130,561	
16. Central Pacific (from Ogden to San Francisco)	881	120,432,717		

The following table exhibits the distribution of railroad mileage in the different states, and also the proportion of the mileage to the area and the population of each:

	Miles of Railroad in			No. of sq. miles of area to 1 mile of R. R.	No. of Inhabitants to 1 mile of R. R.
	1852	1862	1873

The *Telegraph* service in the United States is performed by seven separate associations, which were estimated on the 1st of January, 1873, to have a total length of lines of 80,000 miles; of wires

180,000 miles; 6,300 stations; and an aggregate nominal capital of $60,000,000. The most important of these associations is the "Western Union Telegraph Company," which is a consolidation of most of the telegraph interests of the country prior to 1866. This company, on the 1st of July, 1872, controlled and operated 62,032 miles of line, 137,190 miles of wire, and 5,237 stations. Of this aggregate 1,212 miles of line were in New Brunswick and Nova Scotia, and 512 miles of line in British Columbia; leaving 60,308 miles of line, and 133,936 miles of wire, in the United States. There is probably no village of any importance in the country which is not within easy reach of telegraphic communication; and yet the construction of new lines is progressing uninterruptedly.

The *Canals* of national importance are those which connect the seaboard with the great central region of the St. Lawrence and Mississippi valleys. Foremost amongst these is the *Erie Canal*, which was constructed from 1817 to 1822, under the direction of DeWitt Clinton, Governor of New York. It connects Albany at the head of navigation of the Hudson river, with Buffalo on the eastern extremity of Lake Erie, following the direction of the Mohawk valley, and thus in connection with Hudson River forms an uninterrupted water communication between New York city and the Great Lakes. The total length of the canal is about 370 miles, which is, however, greatly increased by the numerous branches, extending in various directions. One of these connects Rochester with the Alleghany river. New York city owes its pre-eminence as the commercial metropolis of our country chiefly to this canal.

The *Pennsylvania Canal* consists of the central division, which connects Columbia on the Susquehanna river, with Hollidaysburg at the foot of the Alleghany Mountains; and the western division, which connects Pittsburgh with Johnstown. The distance of 37 miles intervening between Johnstown and Hollidaysburg is traversed by a portion of the Pennsylvania railroad. A branch canal extends from Wrightsville, opposite Columbia, along the lower course of Susquehanna River to Havre de Grace, on Chesapeake Bay; and other lines follow the upper Susquehanna, terminating at Bellefonte and West Nanticoke. The commerce in coal and other mineral products of Pennsylvania has been greatly facilitated by this extensive canal system. The *Chesapeake and Ohio Canal* is designed to connect Chesapeake Bay with the Ohio river, and has thus far been completed from Alexandria and Georgetown along the Potomac river to Cumberland. The *James River and Kanawha Canal* connects Richmond with Buchanan, Va., and follows the James River valley. The numerous other canals in the United States are chiefly of local importance, and their description will be found in the articles on the states in which they are situated.

XIII. EDUCATION.

The people of the United States have always recognized the paramount importance of education and mental culture. Twenty years after the first tree was felled and the first block-house built in New England, the settlers of Massachusetts, though neither numerous nor wealthy, founded Harvard University. This glorious example was soon followed in other colonies, and the spirit thus early manifested pervades the entire nation. In no country in the world is there a larger amount of money expended for purposes of education by communities or private citizens; and certainly the excellence of our school buildings and other appurtenances is unequaled. In 1871 benefactions and donations from private citizens to educational establishments amounted to the large sum of $8,592,000.

The general system of education originated in New England, where as early as 1628 provision was made for the education of every child in the settlements. In 1637 a school was ordered to be provided for every neighborhood of 50 families, and another of a higher grade of instruction for every 100 families. These schools were maintained by taxes raised in each district. The New England system of public schools has been adopted with but slight modifications by nearly all the states of the Union. The Federal Government has no voice in the management or establishment of schools, and there is consequently in the cabinet no Minister or Secretary of Public Instruction, as in nearly all European governments; but Congress has aided the cause of education by reserving for the school fund of each state one section of land (of 640 acres) out of every township of the public domain. The amount of land thus appropriated or reserved for school purposes approaches nearly 12,000,000 acres. The older states have besides large permanent school funds; but the maintenance of the schools is secured chiefly by direct taxation, which is voted in all the states with great liberality.

The instruction given in the common schools is elementary and comprises reading, writing, arithmetic, geography, and an outline of the history of the United States. There are, however, numerous public and private schools of a higher grade in the cities and many country districts, such as grammar schools, high schools, and institutions of secondary instruction, where, in addition to the elementary branches, Latin, German, French, mathematics, and the rudiments of the natural sciences are taught. In nearly all the states there are normal schools for the purpose of training competent teachers.

The subjoined table contains the statistics as given in the report of the Commissioner of Education, for the year 1871:

	Common Schools.				Institutions of Secondary Instruction.		Normal Schools.	
	No. of Schools.	No. of Teachers.	Average attendance of Pupils.	Annual expenditures for 1871.	No. of Schools.	No. of Pupils.	No. of Schools.	No. of Pupils.

Colleges and Universities in which the classical and scientific or professional branches of learning are taught, abound in the United States to an extraordinary extent. The report of the Commissioner of Education for 1871 enumerates 372 collegiate institutions which are authorized to confer academic degrees; 56 agricultural and scientific schools; 117 theological seminaries; 40 law schools; 94 medical, dental and pharmaceutical schools; 136 female colleges; and 84 commercial and business colleges; and this enumeration is probably not complete. Many of these institutions are necessarily limited in means and performance, and yet await a fuller development and a wider scope; but there are also many with ample endowments and generous aims, which have greatly raised the standard of literary and scientific excellence. Such institutions as Yale, Harvard, and Princeton universities, the state University of Michigan, Columbia College in New York, and some others, are subjects of just pride to every American, and enjoy a well-deserved fame throughout the civilized world. A real university requires vast sums of money for its organization and management, and in those countries where the true idea of a university is best comprehended, the available means and forces are concentrated upon a few large institutions. The recognition of this fact is rapidly gaining ground in the United States, and instead of multiplying the already too large number of small colleges, it is becoming more and more the policy to unite and combine those existing.

Harvard College is the oldest institution of learning in the country. It was founded in 1636 and embraces, 1, an academical department, including regular courses of religion, philosophy, rhetoric and oratory, history, modern languages, Latin, Greek, Hebrew, natural history, physiology, chemistry and mineralogy, physics and mathematics; 2, a divinity school; 3, a law school; 4, a medical school; 5, the Lawrence Scientific School and school of mining and practical geology; 6, a school of astronomy; and 7, a dental school. It is situated in Cambridge, near Boston, nas 76 professors, and was attended in 1871 by 643 students. The library contains 176,000 volumes and is one of the richest in the country. Yale College, in New Haven, Conn., was established 62 years later than Harvard, and embraces, 1, an academical department; 2, the Sheffield Scientific School; 3, a theological department; 4, a law department; 5, a medical department, and 6, a school of the Fine Arts. The number of professors and instructors in 1871 was 68, and of students

840. The college possesses libraries with a total of near 100,000 volumes, valuable mineralogical, geological, botanical and zoological collections, an astronomical observatory, and an excellent chemical laboratory.

Columbia College, in New York, was chartered in 1754, and is a wealthy institution. It embraces, 1, a school of letters and science; 2, a school of mines, and 3, a law school; and has 34 professors and about 300 students. The College of Physicians and Surgeons of the city of New York, with 28 professors and 326 students, is connected with Columbia College.

The subjoined table contains a list of those colleges which, according to the report of the Commissioner of Education, had over ten teachers during the year 1871:

	Name of Institution.	Where Situated.	Teachers.	Students.
1	University of California	Oakland, California	18	247
2	St. Ignatius College	San Francisco, California	19	559
3	Santa Clara College	Santa Clara, California	17	225
4	Trinity College	Hartford, Connecticut	16	163
5	Wesleyan University	Middletown, Connecticut	10	163

110	University of Deseret	Salt Lake City, Utah	13	580
111	Franklin and Marshall College	Lancaster, Pa	12	130

The report of the Commissioner of Education enumerates 68 agricultural and scientific schools, the more important of which are associated with and form parts of older colleges and universities. Many of them, however, have been founded on an independent basis. Those scientific institutions which received government aid by land grants number twenty-four, with 180 professors and over 2,000 students.

The only schools maintained by the Federal Government are the United States Military Academy and the United States Naval Academy. The former is situated at West Point, on the Hudson river, in the midst of scenery unsurpassed for picturesque beauty. It was established in 1802, and nearly all the officers of the regular army have there received their education and training. The superintendent is usually an army officer of high rank. His military staff consists of an adjutant, quartermaster, treasurer, surgeon, and two assistant surgeons. The academic staff consists of the commandant of the cadets, who is also instructor of tactics, eight professors, and thirty-one assistant professors and instructors. The number of pupils is 227. The discipline is strict, and the instruction very thorough, including the following branches: Military tactics, engineering, natural and experimental philosophy, mathematics, drawing, chemistry, mineralogy and geology, ethics and law, the French and Spanish languages, ordnance and gunnery. Candidates for admission to the Academy must be over 17 and under 22 years of age, and pass an examination in reading, writing, the elements of arithmetic, English grammar, geography, and the history of the United States.

The Naval Academy, situated at Annapolis, Md., is under the charge of a superintendent, assisted by eight naval officers. The academic staff includes 67 professors and assistant professors who teach seamanship, mathematics, steam-engineering, astronomy and navigation, natural philosophy, ethics and English studies, the French and Spanish languages, and drawing. The number of pupils is 253. Candidates for admission must be between 14 and 18 years of age, and must pass an examination similar to that which is required for admission into the military academy.

Notwithstanding the great efforts of communities, associations, and individuals, to promote the cause of education in the United States, the number of adults who cannot read and write is still very large. According to the census for 1870 there are in the U. S. 5,658,144 illiterates over 10 years of age who cannot read or write; that is, between 14 and 15 per cent. of the entire population. This proportion places our country, in regard to the dissemination of elementary education, far in advance of England, France, Italy; but it is sufficiently unfavorable to arrest the attention of every intelligent American citizen. The largest contingents to this army of illiterates are furnished by the colored people of the Southern states, formerly held in bondage, and those immigrants who come from countries where popular education is notoriously neglected. Yet the remainder of native whites who cannot read and write is much larger than the number of

elementary schools in the country would seem to warrant. In some places the school accommodations are as yet inadequate, notably in the Southern states and the more sparsely inhabited districts of the new territories. In others, however, educational facilities are abundant, but regular school attendance is not sufficiently enforced by those having the care of children. To remedy the evils consequent upon such neglect, legislation to compel attendance is recommended, and has been carried out in some localities.

The distribution of illiterates is, however, very unequal in the various sections of the country. In northern New England, central New York, northern Pennsylvania, Ohio, Indiana, and Illinois, southern Michigan, and the larger portion of Iowa, the percentage of illiterates to the whole population is less than 5 per cent.; and varies in the remainder of the states north of the Missouri and Ohio rivers, from 5 to 20. The broad belt of country extending from Chesapeake Bay through the Carolinas, Georgia, Florida, Alabama, Mississippi, Louisiana, southern Arkansas, and Texas, has a percentage of illiterates varying from 20 to 60; but includes extensive tracts, where it rises to over 60 per cent.

Libraries.—The Americans are a nation of readers. In the northern and western states books are found in almost every household, and works of a religious or popular character are issued in immense editions and sold all over the country. The sales of some works have reached the enormous number of 200,000 copies and over. The census for 1870 gives the number of libraries in the United States as 164,815, containing 45,528,938 volumes. Of these libraries 108,800, with 26,072,420 volumes, are private; and 56,015, with 19,459,518 volumes, are public. Large as these numbers may appear, they are far below the truth. The Commissioner of the Census remarks, that in respect to certain states, the figures returned by the marshals were ludicrously disproportionate. Thus, for example, for the state of Connecticut, no returns of private libraries were made at all, the deputy marshal reporting that no extra information could be obtained. The Congressional Library in Washington, probably the largest collection of books in the country, contained, in 1870, 190,000 volumes. The number of volumes in the libraries, both public and private, was, in Pennsylvania, 6,477,840; in New York, 6,310,302; in Ohio, 3,687,363; in Illinois, 3,323,914; in Massachusetts, 3,017,813; in Michigan, 2,174,744; in Kentucky, 1,909,230; in Maryland, 1,713,483; in Indiana, 1,125,553; in Virginia, 1,107,313; and in Missouri, 1,065,638. The libraries of the following states contained from 500,000 to 1,000,000 volumes: Alabama, District of Columbia, Iowa, Louisiana, Maine, New Hampshire, New Jersey, North Carolina, Rhode Island, Tennessee, Vermont, and Wisconsin. Wyoming and Arizona contain the least number of books, barely exceeding 2,000 in all libraries.

The Press.—The aggregate of the newspapers and periodicals published in the United States, in 1870, was 5,871, issuing the enormous number of 1,508,548,250 copies per annum, and having a total circulation of 20,842,475. The average of copies issued during the year was 40 single numbers for every head of the population, and one newspaper and periodical was published for every 6,800 inhabitants. Of the aggregate number (5,871) there were 574 dailies, 107 tri-weeklies, 115 semi-weeklies, 4295 weeklies, 96 semi-monthlies, 622 monthlies, 13 bi-monthlies, and 49 quarterlies. Of the various interests represented, politics engrossed by far the largest number, viz.: 4,333. The remainder comprised 93 agricultural journals; 81 devoted to benevolent or secret societies; 142 commercial and financial journals; 503 illustrated, literary, and miscellaneous; 407 religious; 6 sporting; 207 technical and professional; while 79 contained only advertisements.

XIV. GOVERNMENT.

The United States is a federation of republican commonwealths, resting upon the broad basis of democratic institutions. The government of the United States was erected by the joint will of the people of the original thirteen colonies. In May, 1775, a congress assembled in Philadelphia, and on the 4th of July of the following year issued the memorable Declaration of Independence, followed by a war with Great Britain, at the end of which the colonies were absolved from all allegiance to the British crown and became free and independent states. After protracted deliberations, Congress on the 15th of November, 1777, agreed to the articles of confederation, but it was not until the 1st of March 1781, that these articles received the unanimous approval of all the states. The fundamental defect in this confederation was, that the decrees of the federal council were held subject to the states in their sovereign capacity. The council framed laws for political communities and not for private individuals, and was clothed with no power to enforce its laws upon these political communities or states. The only coercion for disobedience was military force, instead of the decree and the arm of the civil magistrate. In May, 1787, delegates of all the states, except Rhode Island, assembled in general convention at Philadelphia for the purpose of revising and amending the articles of confederation; and after several months of peaceful deliberation agreed upon the plan of government which now forms the Constitution of the United States. It was submitted in each state to a convention of delegates chosen for the purpose, but over a year elapsed before it received the ratification of a sufficient number of states to give it a political existence, and nearly three years before it received the unanimous ratification of all the states and thus became the supreme law of the land.

The Constitution as originally framed consists of seven articles. It determines the legal relations between the federal government, on the one hand, and the state governments, on the other, and makes but little reference to the rights or duties of individual citizens. With the progress of time fifteen supplementary articles or "amendments" have been added, and nearly all of these define personal rights of individuals.

The government, according to the Constitution, is composed of three distinct branches: the legislative, the judicial, and the executive.

The Legislative power is vested in *Congress*. The Constitution defines it to be "the power to make all laws necessary and proper for carrying into execution all powers vested in the government or in any department or officer thereof."

The principal powers of Congress are: to lay and collect taxes and duties uniformly throughout the United States; to borrow money on the credit of the United States; to regulate commerce with foreign nations and between the several states; to establish a uniform rule of naturalization and uniform laws of bankruptcy; to coin money and fix the standard of weights and measures; to establish post-offices and post-roads; to declare war and grant letters of marque; to raise and maintain armies and a navy, and to make rules for their government; to provide for organizing, arming and disciplining the militia, and to govern such as may be employed in the service of the United States; to exercise exclusive legislation over the district in which is placed the seat of government of the United States, and over all places purchased for the erection of forts, arsenals and dock-yards.

The Constitution prescribes the following restrictions upon the power of Congress: The privilege of the writ of *habeas corpus* shall not be suspended, unless when, in cases of rebellion or invasion, the public safety may require it; no bill of attainder or *ex post facto* law shall be passed; no capitation or other direct tax shall be laid, unless in proportion to the official census enumeration; no preference shall be given by any regulation of commerce or revenue to the ports of one state over those of another, nor shall vessels bound to or from one state pay duties in another; no money shall be drawn from the treasury except in consequence of appropriations made by law; nor shall any law be enacted respecting an establishment of religion, or prohibiting the exercise thereof, or abridging the freedom of speech or of the press, or the right of the people peaceably to assemble and petition the government for redress of grievances; nor shall the validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties, be questioned; and neither the United States nor any state shall pay any debt incurred in aid of insurrection or rebellion against the United States, or any claim for the loss or emancipation of any slave.

Congress consists of two branches: the Senate and the House of Representatives.

The *Senate* is composed of two Senators from each state, chosen by the legislature thereof, for a term of six years. No person can be elected Senator who is under thirty years of age, and who has not been a citizen of the United States for nine years, and who is not, when elected, a citizen of the state for which he is chosen. The Senate has sole power to try impeachments, and when sitting for that purpose is under oath like courts of justice. If the President be tried, the Chief Justice of the United States is to preside. The Senate has power to ratify or reject treaties with foreign powers, and it requires the concurrence of two-thirds of the senators present to authorize the President to make a treaty. The advice and consent of the Senate is necessary to confirm appointments made by the President. The Senate cannot originate any bill for raising revenue, but may propose amendments or concur in such bill. The Vice-president of the United States is *ex officio* president of the Senate. In his absence the Senate elects a president *pro tempore*. It further elects a secretary to record its proceedings, a sergeant-at-arms to attend and to arrest offenders, and a door-keeper to guard the entrance to the Senate Chamber.

The *House of Representatives* is composed of members chosen every second year by the people of the several states.* A representative must have attained the age of 25 years, and must be a citizen and an inhabitant of the state for which he is chosen. The House chooses its own speaker, clerk, sergeant-at-arms, door-keeper, and other officers. It has exclusive power to originate bills for raising revenue.

In ordinary legislative matters the powers and duties of both houses of Congress are legislative and advisory, but not judicial and executive.

---

*The representatives are apportioned among the several states according to their respective number of inhabitants. After each decennial census, Congress re-adjusts the proportion of population entitled to a representative, and fixes anew the whole number of representatives, leaving the manner and time of state apportionment to the states themselves. Under the apportionment fixed subsequent to the census of 1870 the states became entitled to the following number of representatives respectively: Ala. 8; Ark. 4; Cal. 4; Conn. 4; Del. 1; Fla. 2; Ga. 9; Ill. 19; Ind. 13; Iowa, 9; Kan. 3; Ky. 10; La. 6; Me. 5; Md. 6; Mass. 11; Mich. 9; Min. 3; Miss. 6; Mo. 13; Neb. 1; Nev. 1; N. H. 3; N. J. 7; N. Y. 33; N. C. 8; Ohio 20; Oreg. 1; Pa. 27; R. I. 2; S. C. 5; Tenn. 10; Texas 6; Vt. 3; Va. 9; W. Va. 3; Wis. 8. Total, 292.

The Judicial Power of the United States is vested in one Supreme Court, and in such inferior courts as Congress may from time to time ordain and establish. The judicial power extends over all cases in law and equity arising under the Constitution, the laws of the United States, and treaties made under their authority; to all cases affecting ambassadors, other public ministers and consuls; to all cases of admiralty and maritime jurisdiction; to controversies to which the United States may be a party; to controversies between two or more states, between citizens of different states, between citizens of the same state claiming lands under grants of different states, and between a state and a citizen thereof, or of a foreign state.

In all cases affecting ambassadors, other public ministers and consuls, and those in which a state may be a party, the Supreme Court has original jurisdiction. In all other cases before mentioned, the Supreme Court has appellate jurisdiction, both as to law and fact, with such exceptions as Congress may make.

The Supreme Court is the highest judicial tribunal in the United States. It is composed of a chief justice and eight associate justices. The former presides in the court, regulates the order of business, controls the docket, and assigns to his associates the cases in which they are to prepare opinions. The chief justice and the associates hold their places for life, or during good behavior.

The United States is divided into nine judicial circuits, in each of which a circuit court is held twice every year, for each state within the circuit, by a justice of the Supreme Court assigned to the circuit, and by the district judge of the state or district in which the court sits.

The circuit courts have both original and appellate jurisdiction. They have concurrent jurisdiction with the state courts, where the matter in dispute exceeds the sum of $500, and the United States are plaintiffs or where an alien is a party, or where the controversy is between citizens of different states. They have exclusive jurisdiction in all cases of crimes against the laws of the United States, except where the law especially confers the power upon other courts. The district courts have original jurisdiction in all admiralty cases, and in most of the cases arising in custom-houses, and those growing out of bankruptcies.

The *Court of Claims* was established in 1856. Before this time, persons who had claims against the government, which the departments refused to pay, had no remedy except by petition to Congress. This remedy, however, was in many cases unavailing or altogether delusive. Since the establishment of this court, a citizen may enforce his claims against the government as against another citizen, by legal process. The court consists of five judges, who are appointed by the President, and hold their places during good behavior. In all matters and suits the government is represented by the Attorney-General, the Solicitor-General, and two Assistant Attorneys-General. The court has jurisdiction of claims founded upon a law of Congress, the regulation of an executive department, or of contracts express or implied, and of counter claims by the government.

The Executive Power is vested in the President, who is chosen by electors, each state being entitled to as many as it has senators and representatives in Congress. His term of office is four years. The Vice-president, who is *ex officio* president of the Senate, is chosen at the same time and in the same manner as the President. The Constitution requires that both these officers shall be native-born citizens of the United States, and that they shall have attained the age of 35 years, and have been 14 years residents of the United States.

The President is commander-in-chief of the army and navy, and of the militia of the several states when called into the service of the United States. He has power to grant reprieves and pardons for offenses against the United States, except in cases of impeachment. He has also the power, by and with the advice of the Senate, to make treaties, provided two-thirds of the senators present concur. The President nominates, and with the advice and consent of the Senate, appoints the officers of government; as ambassadors or public ministers and consuls, judges of the Supreme Court, and all executive officers of the government, except those whose appointment is otherwise provided for by the Constitution. The President receives foreign ministers and grants the *exequatur* to foreign consuls. He communicates to Congress by message at the opening of every session the condition of the country, and recommends such measures as he deems expedient.

Every order, vote, or bill which requires the action of both Houses (except the resolution to adjourn) must be presented to the President for his signature and approval. It becomes a law if he appends his signature. The President has the power to *veto* any bill or resolution passed by both Houses. He does this by returning it to the House where it originated, with a written message, stating his objections or reasons why he believes it ought not to become a law. If however, Congress then passes the bill by a majority of two-thirds of the members, it becomes a law notwithstanding the President's *veto*. The Constitution directs that the President shall take care that the laws be faithfully executed. In the discharge of his duties he is assisted by the highest executive officers, each of whom presides over one of the departments of government. These are collectively called the *Cabinet*, consisting of: 1, the Secretary of State; 2,

the Secretary of the Treasury; 3, the Secretary of War; 4, the Secretary of the Navy; 5, the Secretary of the Interior; 6, the Postmaster-General, and 7, the Attorney-General. They are the President's constitutional advisers, and twice a week attend a meeting at his office for consultation upon the executive duties of the Federal Government, or upon questions of policy.

The Department of State was created by a law passed in July, 1789, and is presided over by the Secretary of State, who is, next to the President, the highest executive officer of the government. This department corresponds to the foreign office in European states, and the office of Secretary of State, to that of their ministers for foreign affairs. The duties of the Secretary are the following: He holds intercourse with the ambassadors and ministers of foreign governments accredited to ours, and conducts correspondence with them; he prepares and issues instructions to our ministers and consuls abroad, and prescribes regulations for keeping their books and records, and receives their reports. He also collects and communicates to Congress all commercial information obtained through our ministers and consuls abroad, or from other sources. He receives the enrolled acts passed by Congress, that have become laws, and promulgates them. He causes the seal of the United States to be affixed to all civil commissions after they have been signed by the President. He has two Assistant Secretaries who perform such duties as may be prescribed by him or provided for by law. The other officers of the department are the Disbursing Agent, who has charge of its funds and accounts; the Translator, who furnishes translations of documents as required by the department; the Clerk of Appointments and Commissions, who makes out and records commissions, nominations to the Senate, *exequaturs*, etc., and has charge of the department library; the Clerk of Rolls and Archives, who has charge of the enrolled acts of Congress as they are received from the President, prepares copies thereof, superintends their publication and that of treaties, and has charge of all Indian treaties; and the Clerk of Authentications, who has charge of the seals of the United States and of the department, certifies to and authenticates documents, receives and accounts for fees, and records all letters other than the diplomatic and consular.

The diplomatic agents representing our government abroad receive their instructions from and report to the Secretary of State. The highest in rank are the Envoys Extraordinary and Ministers Plenipotentiary to England, Germany, France, Russia, Spain, Austria, Italy, China, Mexico, Brazil, Chili, and Peru. Ministers Resident represent the United States in Denmark, Sweden and Norway, Netherland, Belgium, Portugal, Switzerland, Hawaiian Islands, Hayti, Turkey, Greece, Japan, Nicaragua, Costa Rica, Guatemala, Honduras, Salvador, New Granada, Venezuela, Ecuador, the Argentine Republic, Bolivia, Paraguay, Uruguay, and Liberia. Secretaries of Legation are authorized in each country where there is a Minister Plenipotentiary or a Minister Resident. Assistant secretaries are authorized for London and Paris.

Consuls are public agents, residing in foreign countries, usually at important commercial cities and seaports, to watch over the commercial interests of our citizens. The United States maintains about 75 consuls in the various parts of the world.

The Treasury Department is presided over by the Secretary, who is charged with supervision of the fiscal transactions and finances of the government, and execution of laws concerning commerce and navigation, the survey of the coast, the light-house establishment, the marine hospitals of the United States, and the construction of public buildings for custom-houses and other purposes. The business of the department is distributed among several bureaus, each of which has its specific duties and is under the direction of a responsible chief.

The *First Controller* prescribes the mode of keeping and rendering accounts for the civil and diplomatic service, and the public lands.

The *Second Controller* keeps and renders accounts for the army and navy departments and the Indian bureau.

There are six auditors in the department, who examine and adjust the accounts of the United States with individuals.

The *First Auditor* adjusts the accounts of the customs, the revenue, and the appropriations and expenditures of the civil list, and reports the balances to the First Controller and the Commissioner of Customs.

The *Second Auditor* adjusts all accounts relating to the pay, clothing, and recruiting of the army, and those relating to the Indian Department, and reports the balances to the Second Controller.

The *Third Auditor* adjusts all accounts for subsistence of the army, for fortifications, the military academy, military roads, the quarter-master's department, pensions, claims arising from military services prior to 1861, for horses and other property lost in the military service, and reports the balances to the Second Controller.

The *Fourth Auditor* adjusts all accounts for the service of the Navy Department, and reports the balances to the Second Controller.

The *Fifth Auditor* adjusts all accounts for the diplomatic and consular services under the direction of the State Department, and reports the balances to the First Controller.

The *Sixth Auditor* adjusts all accounts arising from the service of the Post-office Department. His decisions are final, unless an appeal is taken within 12 months to the First Controller. He also directs writs and legal proceedings to enforce the prompt payment of moneys due to the department. He has charge of all lands and property assigned to the United States in payment of debts to the Post-office Department.

The *Commissioner of Customs* prescribes the mode of keeping and rendering the accounts of customs, revenue, and disbursement, and for the building and repairing of custom-houses.

The *Treasurer* receives and keeps the moneys of the United States in his office, and disburses the same upon warrants drawn by the Secretary of the Treasury, countersigned by the First Controller, and upon warrants drawn by the Postmaster-General, countersigned by the Sixth Auditor.

The *Register* keeps the accounts of public receipts and expenditures; receives the returns of commerce and navigation; and receives from the First Controller and Commissioner of Customs all accounts and vouchers adjusted by them.

The *Solicitor* superintends all civil writs commenced by the United States (except those arising in the Post Office Department). He receives returns from each term of the United States courts, showing the progress of such suits, has charge of all land and property assigned to the United States in payment of debts (except those assigned for debts due the Post-office Department), and has power to sell and dispose of the same for the benefit of the United States.

The *Commissioner of Internal Revenue* has charge of all matters connected with the tax laws and the collection of the direct taxes. The number of officers of the Treasury Department employed in Washington exceeds three thousand.

The *Light-House Board* is under the direction of the Secretary of the Treasury, who is *ex-officio* president thereof. This Board directs the building and repairing of light-houses, light-vessels, buoys, and beacons. The coast is divided into thirteen light-house districts.

The *United States Coast Survey* is under the administration of the Treasury Department. It was established in 1832, for the purpose of surveying the coasts and harbors, and preparing accurate maps and charts thereof. The scientific work and operations are carried on by a superintendent and a corps of assistants, consisting of civilians and officers of the army and navy.

Collectors.—The seaboard frontiers of the United States are divided into 62 collection districts, for each of which there is a collector of customs appointed by the President, with the consent of the Senate. The collectors issue clearances, or permits to leave, to all vessels sailing from the United States; certify to the correctness of manifests or bills of lading; keep account of vessels built within their districts, and make returns to the Register of the Treasury of imports and exports. Vessels arriving from foreign ports hand to the collector manifests of their cargoes, on which the duties are computed, and before the goods can be landed these duties must be paid. The collectors are aided in the performance of their various duties by a number of clerks, appraisers, weighers, gaugers, and inspectors. The importance of these officers will be understood when it is known that during the fiscal year ending June 30, 1872, there were collected $216,370,286 in import duties, which passed through the hands of the collectors.

For the larger ports, so-called naval officers are appointed, who countersign all permits, clearances, certificates, and other documents to be granted by the collectors; they also examine the collectors' accounts of receipts and expenditures, and certify to them. The surveyors are stationed at the larger ports only, and superintend the inspectors, weighers, and gaugers, and report to the collectors those who fail in the performance of their duties.

The United States is divided into a large number of internal revenue districts, in each of which there is a collector, making assessments and collecting the direct taxes.

The Mint and Coinage.—The principal mint is at Philadelphia, and branches are at San Francisco and Denver City. In the city of New York there is an assay-office, where gold and silver bullion, gold dust, and foreign coins are refined and assayed. The coining of all moneys is performed under regulations prepared by the Secretary of the Treasury. Fifteen pounds of silver are declared to be equal to one pound of gold. In coining, one-tenth of alloy is added to the gold and silver bullion (silver and copper in equal proportions to the former, copper alone to the latter).

The coins of the United States are as follows:

GOLD COINS.

	Value.	Weight.
Double Eagle	$20	516 grains.
Eagle	10	258 do.
Half Eagle	5	129 do.
Quarter Eagle	2.50	64½ do.
Dollar	1	25 4-5 do.

SILVER COINS.

	Value.	Weight.
Dollar	$1.00	412½ grains.
Half Dollar	0.50	206¼ do.
Quarter Dollar	0.25	103⅛ do.
Dime	0.10	41¼ do.
Half Dime	0.05	20⅝ do.
Three Cent Piece	0.03	12⅜ do.

NICKEL COINS.

	Value.	Weight.
Five Cent Piece	$ 0.05	77.16 grains.
Three Cent Piece	0.03	30 do.

COPPER COINS.

	Value	Weight.
Two Cent Piece	$ 0.02	96 grains
One Cent Piece	0.01	48 do.

The Superintendent of the Coast Survey is *ex officio* Superintendent of *Weights and Measures.* Avoirdupois weight is used in weighing all articles except gold, silver, and precious stones. The pound of this weight is divided into 16 ounces, and one ounce into 16 drachms. One hundred pounds constitute a hundred-weight, and 20 hundred-weight, or 2,000 pounds, a ton. Troy weight is used in weighing gold, silver, and precious stones. One pound troy weight is divided into 12 ounces; one ounce into 20 pennyweights, and one pennyweight into 24 grains.

The unit of liquid measure is the gallon. One gallon consists of 4 quarts; one quart, of 2 pints; and one pint, of 4 gills. The unit of dry measure is the bushel, which is 18½ inches in diameter by 8 inches deep, and contains 2,150 2-5 cubic inches. One bushel dry measure contains 4 pecks; one peck, 8 quarts; one quart, 2 pints.

A brass scale of 82 inches length, made by Troughton, of London, and sent to the Coast Survey office in Washington, where it is still preserved, was made the United States standard for long measure. This scale, although intended to be identical with the English Imperial standard, was found, upon careful comparison with eleven carefully made meter-etalons, to differ slightly from the English scale. One meter was found to be equal to 39.36850535 United States inches, or 3.28070878 American feet; while it is, according to comparisons made in England, equal to 3.2808992 English Imperial feet.

This difference is so slight that it becomes perceptible only in measurements of considerable length; yet it is large enough to justify the use of the term American measure, as distinct from English measure.

The following table gives the values adopted in the United States Coast Survey:

American Measure.	English Measure.
1 Foot=0.30481218 meters.	0.304794494 meters.
1 Yard=3 feet=0.91443654 meters.	0.91438348 "
1 Fathom=6 feet=1.82887308 meters.	1.82876696 "
1 Pole, Perch, or Rod=5½ yards=5.0294055 meters.	5.029109 "
1 Furlong=220 yards=201.1760388 meters.	201.164366 "
1 Statute mile=8 furlongs=1,760 yards=1609.4083 met.	1609.3149 "

One square mile contains 640 acres, or one section of land; and 36 sections make one township.

Since 1865 Congress has authorized the use of the French metric system.

The *Finances* of the United States are in a prosperous condition. The moneys received into the Treasury during the fiscal year ending June 30, 1872, were:

From customs	$216,370,286 77
Sales of public lands	2,575,714 19
Internal Revenue	130,642,177 72
Tax on national bank circulation, etc	6,523,396 39
Re-payment of interest by Pacific Railroad companies	747,861 87
Customs, fines, etc	1,136,442 34
Fees—Consular, patent, land, etc	2,284,095 92
Miscellaneous sources	4,412,254 71
Total ordinary receipts	$364,692,229 91
Premium on sales of coin	9,412,637 65
Total net receipts	$374,104,867 56
Balance in Treasury, June 30, 1871, including $18,228.35 received from "unavailable"	109,935,705 59
Total available cash	$484,040,573 15

The net expenditures by warrants during the same period, were:

For civil expenses	$ 16,187,059 20
Foreign intercourse	1,839,369 14
Indians	7,601,728 89
Pensions	28,533,402 76
Military establishment, including fortifications, river and harbor improvements, and arsenals	35,372,157 28
Naval establishment, including vessels and machinery and improvement at navy-yards	21,249,809 02
Miscellaneous civil, including public buildings, light-houses, and collecting revenue	42,958,329 00
Interest on the public debt	117,357,839 72
Total, exclusive of principal and premium on the public debt	$271,099,695 01
Premium on bonds purchased	6,958,266 76
Redemption of the public debt	99,960,253 54
Total	$106,918,520 30
Total net disbursements	$378,018,215 31
Balance in Treasury June 30, 1872	106,022,357 84
Total	$484,040,573 15

The receipts exceeded the expenditures by over 94 millions of dollars, and while the balance remaining in the Treasury was more than 106 millions, nearly 107 millions were applied to the

reduction of the national debt. The expenditures have considerably decreased during the last three years. They amounted to 310 millions in the fiscal year ending June 30, 1870, and to 292 millions in the following year. The reduction of import duties has produced a considerable increase in the revenue derived from this source, which amounted to 194 millions, 206 millions, and 216 millions respectively for the last three fiscal years. The revenues from internal taxation have decreased for the same years from 185 millions to 143 millions and to 131 millions.

The *National Debt.*—When, after the war for independence, the charge of the national finances was confided to Alexander Hamilton, the consolidated debt of the United States amounted to $125,000,000; a very heavy burden, considering the sparse population and small wealth of the country. But the interest on this large amount was regularly paid, and in 1812 the principal was reduced to $45,000,000, when the war with Great Britain raised it to an aggregate of $75,000,000. The protective tariff of 1816, 1824, and 1828 increased the revenues of the government, so that in 1836 every dollar of this debt was paid, and a surplus of $36,000,000 was accumulated in the treasury. At the breaking out of the Mexican war the national debt was $16,750,000; but from that time it rose until it reached, in 1853, $67,341,000. The following year it was reduced to $47,000,000, and in 1857 it was but $29,000,000. During Mr. Buchanan's administration the income fell off, and the debt again increased to $64,769,703 on the 1st of July 1860. The enormous expenditures for the prosecution of the civil war raised the national debt to unprecedented figures. It was:

On July 1st 1861	$ 90,867,829	On July 1st 1867	$2,692,199,215
" " 1862	514,211,372	" " 1868	2,636,320,964
" " 1863	1,098,793,181	" " 1869	2,489,002,480
" " 1864	1,740,690,489	" " 1870	2,386,358,599
" " 1865	2,682,593,026	" " 1871	2,292,030,835
" " 1866	2,783,425,879	" " 1872	2,191,486,343

On the first of October, 1872, the debt had been further reduced to $2,166,994,677, showing a decrease during the administration of President Grant of $358,468,582.

The national debt on the last named date consists of the following items:

Debt bearing interest in coin. Bonds at 6 per cent	$1,357,013,000
" " " " Bonds at 5 per cent	414,567,300
Debt bearing interest in currency	21,263,000
Debt on which interest has ceased since maturity	5,480,549
Debt bearing no interest, legal tender notes, gold certificates, fractional currency, etc.	437,986,346
Interest due	33,221,901
Total Debt	$2,269,532,096
Debt, less cash in treasury	2,166,994,677

The Department of the Interior was established in 1849. To the secretary of this department is assigned the general supervision and management of the following bureaus, or branches of the public service: the General Land Office; the Pension Bureau; the Indian Office; the Bureau of Education; the Patent Office; and the Department of Agriculture. The Secretary has, besides, the supervision of the United States marshals and attorneys, and of the clerks of the United States courts. He has also the duty of taking and returning the census of the United States.

The *General Land Office* is under the management of a Commissioner, who is charged with the surveys and the sale of the public domain. During the fiscal year ending June 30, 1872, public lands were disposed of as follows:

Cash sales	1,370,320 acres.	Grants to railroads	3,554,887 acres.
Located with military land warrants	389,460 "	Grants to wagon roads	465,347 "
Taken for homesteads	4,671,332 "	Approved to states as swamps,	714,215 "
Located with college scrip	693,613 "	Indian scrip locations	5,760 "
Total			11,864,934 acres.

This amount is greater by 1,099,270 acres than was disposed of during the preceding year. The cash receipts under the various heads amounted to $3,218,100. There were surveyed during the same period 22,016,608 acres, which, added to the quantity surveyed before this year, amounted to 583,364,780 acres; leaving unsurveyed an area of 1,251,633,620 acres.

There are eighty-two land districts in the states and territories, in which there are still public lands for sale, viz.: In Ohio, Indiana, and Illinois, one in each; in Missouri, three; in Alabama, three; in Mississippi, one; in Louisiana, two; in Michigan, five; in Arkansas, four; in Florida, one; in Iowa, four; in Montana, Arizona, and Utah, one in each; in Wisconsin, six; in California, nine; in Nevada, four; in Minnesota, seven; in Oregon, three, in Kansas, five; in Washington Territory, three; in Nebraska, five; in New Mexico, one; in Dakota, three; in Colorado, four; in Idaho, two; and in Wyoming, one.

The *Commissioner of Pensions* is charged with the examination and adjudication of all claims arising under the various laws of Congress, granting bounty land or pensions for military and naval services in the revolutionary and subsequent wars. There were on the rolls (on June 30, 1872), the names of 95,405 military invalid pensioners, and of 113,518 widows, orphans, and dependent relatives of soldiers, who received a total of annual pensions of $23,142,633. On the same day there were on the rolls the names of 3,179 naval pensioners, and widows, orphans, and relatives, who received annually $405,537.

The *Commissioner of the Indian Office* superintends and directs all the public business relating to the Indians. He represents the government in the treaties made with them, causes to be distributed the annuities and presents, and carries out the policy adopted toward them by the government. He is aided by fourteen superintendents stationed in different places at the West. A number of agents are appointed by the President, who reside among the Indians and look after their interests and rights.

The *Patent Office* is under the direction of a commissioner, who is charged with the performance of "all acts toughing the granting and issuing of letters patent for new inventions, discoveries, and improvements." He is assisted by a corps of examiners and assistant examiners, who ascertain whether an invention, for which a patent is applied for, is new and useful or not, and report to him their opinion in writing. The Commissioner issues the Patent Office Official Gazette, a monthly publication, which contains his decisions, the decisions of the Supreme Court, and the Circuit Courts, in patent cases, all changes in the rules of practice in the office, notices of all applications for extension of patents, a brief of the specifications, and the full claim of all patents issued, together with illustrations. The number of applications for patents, re-issues, and designs for the year ending June 30, 1872, was 19,587; the number of applications for extension of patents was 284; the number of applications for the registering of trade-marks was 589. During the same year there were granted 13,626 patents; 233 extensions; 556 certificates of registry for trade-marks; and there were filed 3,100 caveats. The fees were $700,954.86, and the expenditures $323,556.90.

The *Department of Agriculture* is under the direction of a commissioner, whose general duties are to obtain and diffuse among the people of the United States useful information on subjects connected with agriculture, and to procure, propagate, and distribute new and valuable seeds and plants. He employs botanists, entomologists, and other persons to assist him in the performance of his various duties.

The *Bureau of Education* consists of a commissioner and three clerks. His duties are to collect such statistics and facts as shall show the condition and progress of education in the states and territories, and to diffuse such information respecting the organization and management of schools and respecting school systems and methods of teaching as shall aid the people of the United States in the establishment and maintenance of efficient school systems, and otherwise promote the cause of education throughout the country.

The Department of War was created in 1789, Aug. 7, in order to enable the President to carry out the provisions of the Constitution relating to military affairs, and is in charge of the Secretary of War, who issues commissions, directs the movement of troops, superintends their payment, stores, clothing, arms, equipments, and ordnance, and conducts the works of military engineering. The bureaus among which these multifarious duties are distributed are under the direction of army officers.

The office of the *Commanding General* is ordinarily called the *Headquarters of the Army*, and is situated in Washington. The General has charge of the discipline of the army, the distribution of troops, and the superintendence of recruiting.

In the *Office of the Adjutant-General* are kept all the records relating to the *personnel* of the army, the muster rolls of the troops, and the correspondence with the administrative departments. All orders emanating from either the Secretary of War or the Commanding General are transmitted and published through this office, and the annual returns of the army are received by it.

The *Quartermaster-General's Office* provides quarters and transportation for the troops, storage and transportation for all army supplies, army clothing, cavalry and artillery horses, forage, etc. It has charge of the barracks and the national cemeteries.

The *Commissary-General's Office* provides subsistence stores, constituting the rations for the troops and garrison.

The *Paymaster-General's Office* has charge of the disbursement of the pay to officers, men, and employees in the army. It receives and examines the accounts of the paymasters connected with the various commands.

The *Ordnance Bureau* has charge of the ordnance stores and the numerous armories and arsenals situated in different parts of the country.

The *Engineer's Office* has charge of the military defenses of the country, the forts along the seaboard, the improvements of rivers and harbors, and the care of the Military Academy at West Point. This office is under the direction of the Chief of Engineers, who commands the engineer corps of the army.

The *Surgeon-General's Office* has control of all sanitary affairs of the army, the management of the sick and wounded, and the military hospitals. The surgeons of the army receive their orders and assignments from, and report to, the Surgeon-General.

The *Bureau of Military Justice* was established in 1864, and consists of one judge advocate-general, holding the rank and pay of a brigadier-general, and an assistant judge advocate, with the rank and pay of a colonel of cavalry. The bureau receives, revises, and records the proceedings of courts-martial and courts of inquiry.

The *Signal Office*, under the direction of the commander of the signal corps, receives from the numerous signal stations established in various localities, reports on the meteoric state of the atmosphere, as temperature, winds, moisture, and pressure of the atmosphere. From these reports, tri-daily forecasts, or "probabilities," are deduced and telegraphed throughout the country. Over seventy-eight per cent. of the probabilities issued during the past year have been verified, and no great storm has occurred within the United States, or along the seaboard without due premonition being given to the points thereby threatened. The labors of this office have been highly successful, and very frequently have been instrumental in the preservation of life and property.

Army.—By act of Congress the army of the United States is limited to 30,000 enlisted men. The term of service is three years. The army, as now organized, is composed of 16 regiments of cavalry, each of 12 companies; 25 regiments of infantry, each of 10 companies; 5 regiments of artillery, and one engineer battalion, besides the cadets at the Military Academy at West Point. In June, 1871, the army was commanded by 1 general, 1 lieutenant-general, 4 major-generals, 16 brigadier-generals, 68 colonels, 83 lieutenant-colonels, 270 majors, 533 captains, and 1,137 first and second-lieutenants.

The Navy Department is in charge of a secretary, whose duties are: to procure naval stores and materials, to direct the construction, arrangement, and equipment of vessels of war, and to execute all orders of the President relating to the naval establishment. The Secretary issues the orders to commanders of squadrons or vessels, and to the officers of the navy and marine corps. Under his authority are performed the duties of the different bureaus of the department, and their orders are considered as emanating from him. He is aided by an Assistant Secretary, whose duties are not specified by statute, but are assigned by the Secretary.

The *Bureau of Navy Yards and Docks* has charge of everything connected with the various navy yards, docks, wharves, and naval buildings, and also of the Naval Asylum.

The *Bureau of Navigation* has charge of the Astronomical Observatory, situated near Washington, and also of the Hydrographic Office. It furnishes vessels of war with charts, maps, books, and chronometers, and has the general superintendence of the Naval Academy and the publication of the Nautical Almanac.

The *Bureau of Ordnance* has charge of all ordnance and ordnance stores, the manufacture or purchase of cannon, guns, powder and shot, and everything connected with the armament of ships.

The *Bureau of Equipment and Recruiting* is charged with providing vessels of war with sails, anchors, and other articles of equipment, and also with the enlistment of sailors and the recruiting service.

The *Bureau of Construction and Repair* has charge of the building and repairs of all vessels of war, and the purchase of the necessary materials.

The *Bureau of Steam Engineering* is under the direction of the chief engineer, who superintends the construction of the marine steam-engines and decides upon plans of construction.

The *Bureau of Provisions and Clothing* contracts for and purchases all provisions and clothing used in the naval service.

The *Bureau of Medicine and Surgery* directs the purchase and distribution of medical stores, and has charge of the treatment of the sick and wounded and the marine hospitals.

In November, 1872, the navy numbered 178 vessels carrying 1,378 guns; which included 68 steamers, with 929 guns; 31 sailing vessels, with 322 guns; 51 iron-clads, with 127 guns; and 28 tugs. There were forty-five vessels in commission for sea service, carrying 462 guns, which were distributed at different cruising stations, as follows:

North Atlantic Station.—Eleven vessels, 77 guns.
South Atlantic Station.—Three vessels, 33 guns.
European Station.—Six vessels, 110 guns.
Asiatic Station.—Eleven vessels, 116 guns.
North Pacific Station.—Five vessels, 65 guns.
South Pacific Station.—Five vessels, 51 guns.
Special Service.—One vessel with 10 guns, and two store ships.

The Post-office Department is under the direction of the Postmaster-General, who is aided by three assistant postmasters.

The *First Assistant Postmaster-General* is at the head of the *Appointment Office.* He attends to the establishment or discontinuance of post-offices, the changes of sites and names of such offices, the appointment and removal of postmasters and local agents, and to the instruction given to

postmasters. This office further provides for the marking and rating stamps and letter balance for postmasters, and blanks and stationery for the use of the department, and has the supervision of the ocean mail-steamship lines, and the international postal arrangement with foreign governments.

There were, in 1872, 31,863 post-offices in the country, 2,452 of which were money-order post-offices, or 1818 more offices than in the preceding year; and there were issued 655,380,820 letter and newspaper postage stamps, which number may be assumed to be nearly identical with the number of letters and parcels sent through the mails. The handling of this immense amount of mail matter required, besides the 31,863 postmasters, 5,544 contractors, 3,754 clerks, 1,442 carriers, 764 route agents, 642 railway postal clerks, 146 mail-route messengers, 95 local agents, and 59 special agents. There were thus in the employ of the Post-office Department, 44,635 officials, including the Postmaster-General and his 345 assistants and clerks, in the General Post-office in Washington. During the same year 12,774,064 letters were sent to foreign countries, and 11,588,436 letters were received from foreign countries.

The *Second Assistant Postmaster-General* is at the head of the Contract Office. It is his duty to arrange the mail service, to enter into contracts for carrying the mails, to fix the departures and arrivals on all the routes, the points of distribution, and to make regulations for the government of the domestic mail service. This office reports weekly to the Auditor all contracts executed, and all orders affecting accounts for mail transportation. To the Inspection Division of the Contract Office is assigned the duty of receiving and examining the registers of the arrivals and departures of the mails, and reports of mail failures; of noting the delinquencies of contractors, and reporting thereon to the Postmaster-General; of providing mail bags, and of securing the mail against depredations.

During the year 1872 the country had 7,259 mail routes, representing a total of 251,398 miles; of which 57,911 miles were by railroad, 18,860 by steamboat, and 174,627 by horse power. The annual mail transportation passed over 664,984,322 miles, *i. e.*, a distance 4,600 times as large as the circumference of the globe.

The *Third Assistant Postmaster-General* is at the head of the Finance Office, and supervises the financial business of the department not assigned by law to the Auditor, embracing accounts with the draft offices and other depositories of the department, the issuing of warrants and drafts in payment of balances reported by the Auditor to be due to mail contractors and other persons. He has supervision of the accounts of officers under order to deposit their quarterly balances at designated points, and also of the rendering by postmasters of their quarterly returns of postage. He has also charge of the dead-letter office and of the issuing of postage stamps.

The Postmaster-General estimates the total expenditures for the mail service of the year ending June 30, 1873, to be $30,863,167, and the revenue from the sale of postage stamps, the money order business, etc., to be $24,552,505, leaving a deficit to be supplied by congressional appropriation, of $6,310,592.

The Attorney-General's Office. The duty of the Attorney-General is to prosecute and conduct all suits in the Supreme Court, in which the United States is a party, and to give his advice and opinion upon questions of law, when required by the President, or when requested by the head of any department. He is also charged with the general superintendence and direction of all United States attorneys and marshals, as to the manner of discharging their respective duties. He is aided in the performance of his duties by a solicitor-general and two assistant attorneys-general. He further examines the titles of all land to be purchased by the United States as the sites of arsenals, light-houses, custom-houses, and other public works; receives all applications for the appointment of judges, district attorneys, and marshals, and prepares statements to the President on applications for pardons, and the remission of imprisonment of public debtors.

XV. HISTORY OF THE UNITED STATES.

The history of the United States as a nation may be said to begin with the session of the First Colonial Congress. This body met at New York city on the 7th of October, 1765, Timothy Ruggles, of Massachusetts, being President. Nine colonies were represented by twenty-eight delegates.

The causes which had led to the appointment of these delegates were the oppressive laws enacted for the colonies by the British Parliament. As early as 1651 the "Navigation Act" had prohibited exports except in English vessels; in 1733 an onerous duty was imposed on imports of sugar and molasses; in 1764 this act was re-enacted and resulted in the complete destruction of the West India trade to the colonial ports; and finally, in 1765, the Stamp Act passed the Houses of Parliament, ordaining that all legal instruments, newspapers, almanacs, etc., should be stamped and pay duty. Oppressive restrictions on the freedom of the press had always existed, and while the struggling colonies were thus laden with unfair burdens, they were allowed no repre-

sentatives in Parliament. The settlers had left England, for the most part, to seek that freedom of conscience, equality of rights before the law, and control of their own property, which had been denied them in the mother country. Hence they determined that such abuses should not be perpetuated in the New World, and the First Colonial Congress met to prepare a Declaration of Rights and a statement of grievances, declaring that the colonies should be taxed only by their own representatives.

In consequence of this action, the Stamp Act was repealed, but the policy of England was not altered. Other injurious and obnoxious laws were passed, the charter of Massachusetts subverted for resisting them, troops sent for their enforcement, and the feeling of bitterness constantly increased.

The Second Colonial Congress accordingly met at Philadelphia, September, 1774, under the name of the Continental Congress. It recommended that intercourse between the colonies and mother country should cease, and endorsed the spirit of opposition shown in Virginia and Massachusetts. Thus supported, these colonies began to equip troops and accumulate supplies; while the home government hastened to dispatch to America several ships of the line and ten thousand troops to reduce the "rebels."

The Revolutionary War.—The long-foreseen conflict began by an engagement at Lexington and Concord, Mass., April 19, 1775, in which the British lost 280 men. This was the signal for a general uprising of the provincial troops. The forts Ticonderoga and Crown Point on Lake Champlain were seized, and an army of nearly 20,000 men assembled around Boston. On June 17, a detachment of these troops under Col. Prescott entrenched themselves on Breed's (now Bunker) Hill, which commanded the city. Generals Howe and Clinton, at the head of about 3,000 British soldiers, attacked them promptly, and after a hotly contested struggle forced the provincials to retire. But this success cost the victors more than a thousand men.

Meanwhile the Continental Congress had reassembled at Philadelphia, and organized the higher departments of the army, appointing General George Washington Commander-in-chief, and voting to raise and support 20,000 troops. With the assistance of General Gates, General Washington immediately devoted himself to organizing and equipping his men. The only other military operation of the year was an expedition against Quebec and Montreal, under General Montgomery, which resulted in his death and in the capture of most of his troops.

Early in the spring of 1776, Washington, by a masterly movement, obtained possession of a position commanding the city of Boston and compelled its immediate evacuation by the British troops under Sir William Howe. They embarked in their fleet and sailed southerly. Penetrating their design to land at New York, Washington prevented it by the promptness of his movements. Thus forced to abandon his plans, General Howe attempted to capture Charleston, but was driven off with severe loss.

On the first of July the Declaration of Independence, prepared by a committee consisting of Thomas Jefferson, John Adams, Benjamin Franklin, Roger Sherman, and Robert R. Livingstone was submitted to the Continental Congress, and on the fourth was ratified by the delegates. Thus was the allegiance of the colonies to the British crown dissolved, and their freedom declared under the name of the UNITED STATES OF AMERICA.

At this very time (July 2) the British troops, largely reinforced, had taken possession of Staten Island, and were preparing to drive Washington and his army from New York. After several severe engagements and numerous strategic movements, they accomplished their design, and forced the Continental army to evacuate the city in November and take refuge in New Jersey. Promptly following up this advantage, Lord Cornwallis actively pursued the retreating enemy until they were driven beyond the Delaware river.

This was the gloomiest moment of the war. Death, disease, and desertion had reduced the Continental army to less than 3,000 men, and these were but half-clothed, poorly equipped, and often nearly starved. In this desperate strait Washington determined on a daring movement as his only resource. Recrossing the Delaware amid floating ice and a driving snow storm, on Christmas night, he attacked Trenton, at that time occupied by a regiment of Hessians, and captured it with little loss. The British troops fell back in haste, and by a series of rapid movements were forced to positions near New York Harbor.

In the summer of 1777 the British forces at New York embarked in the fleet, sailed up Chesapeake Bay, and landed at the head of Elk river, Maryland. Washington hastened to meet them with an army better equipped than in the previous year, and numbering among his officers the gallant Marquis de Lafayette and Kosciusko. The opposing troops met on the banks of the Brandywine, Sept. 11, 1777, when a severe engagement resulted in the defeat of the provincial troops. They retired to the Schuylkill, and shortly after the British occupied Philadelphia.

This disaster was, however, more than counterbalanced by the capture of a British army under General Burgoyne, in New York. This officer, at the head of about 10,000 troops, had moved down from Canada and captured Ticonderoga, but was checked by the defeat of one of his detachments near Bennington, Vt., Aug, 16. After two severe engagements with the Continental troops under

General Gates, he was surrounded at Saratoga, his supplies cut off, and on the 17th of October he was forced to surrender his army prisoners of war. This success greatly inspirited the Americans and supplied them with much needed means to continue the struggle. Several minor engagements ensued, after which the main army went into winter quarters at Valley Forge.

Early in 1778 a treaty of alliance was concluded between the United States and France, in consequence of which the latter power sent a fleet and a number of troops to aid the Americans. The British during the summer deemed it prudent to concentrate at New York, and therefore evacuated Philadelphia. In their retreat across New Jersey the indecisive battle of Monmouth was fought. Subsequently they captured Savannah, Georgia, this being the only advantage they gained during the campaign.

In spite of the French allies, the year 1779 did not prove favorable to the American arms. The British forces overran and plundered Georgia, the Carolinas, Virginia, and the shores of Connecticut. They incited the Indians to incursions upon the defenseless frontier settlements, and the Continental Congress had exhausted both its resources and its credit, apparently in vain.

Nor was the campaign of 1780 more reassuring. In April of that year Charleston was assaulted and captured by Sir Henry Clinton, and South Carolina subjected to his arms. A strong force from the North under General Gates was defeated at Sandy Creek (Aug. 16); and a body of patriots under Col. Sumter was dispersed. In the North, the traitor, Benedict Arnold, covered his name with everlasting obloquy by his treacherous attempt to surrender West Point to the British Commander for a sum of money. Indeed, such was the discouragement and suffering which at the close of this year prevailed in the American army, that there was imminent danger that it would disband. This was prevented by the energetic action of Congress, and especially by the efficient labors of Robert Morris, superintendent of the treasury.

In 1781 General Greene took command of the southern army, and without gaining any decisive victory, succeeded by a number of well-planned movements and attacks in confining the English forces at the close of the campaign to the cities of Savannah and Charleston. The Marquis de Lafayette, commanding in Virginia, manœuvered in opposition to the British troops under Lord Cornwallis, until in August they had retired to Yorktown. When this had been achieved, General Washington with the main army at once hastened south, and the French fleet proceeded to block up the York and James rivers. Cornwallis, seeing escape impossible, surrendered on the 19th of October, with 7,000 troops and his munitions of war.

This was the last important action of the war. Tired of the ineffectual struggle, the British nation clamored for a termination of hostilities. Neither the king nor the ministry was willing to acknowledge defeat, but they were at last obliged to yield. Not, however, until the last day of November, 1782, were the preliminary articles of peace signed.

The war over, the next important step was to decide upon the relation to each other of the several states which had shared in the conflict. As early as the summer of 1775 Benjamin Franklin had proposed to Congress articles of confederation; but at that time the step was deemed by the majority premature. In November, 1777, however, a plan of federation was adopted, and gradually ratified by all the states. Experience soon showed how defective it was, and in 1787 delegates from all the states, except Rhode Island, met at Philadelphia to prepare a new constitution. In the following year this was adopted by majorities of the people in eleven of the states, though not without strenuous opposition.

As the new government made provision for the election of officers, George Washington was chosen President of the United States, and John Adams, Vice-president.

Washington's Administration (April 30, 1789, to March 4, 1797).—During the administration of Washington the attention of Congress was chiefly devoted to organizing the government on a firm basis. A national judiciary was established; the departments of state, of the treasury and of war were constituted; provisions for levying duties and for internal taxation were framed; a United States Bank was organized; and a Federal loan was negotiated in Europe. These measures were not all received with equal approval by the people. Especially that levying a duty on domestic distilled spirits was unpopular with the inhabitants of western Pennsylvania, with whom whisky was a staple manufacture. They opposed the collection of the tax with arms in their hands, and not until a large military force was sent against them did they submit. This is known as the "Whisky Insurrection" (1791). It was not the only service the military were called upon to perform under this administration. The Indians of the Ohio valley attacked the frontier settlements in 1790, and defeated the regular troops under both General Harmar, in 1790, and General St. Clair, in 1791. At length, in 1793, in a decisive battle on the Maumee river, General Wayne completely routed them and broke their power. During this period the country constantly increased in prosperity, and the states of North Carolina, Vermont, Tennessee, and Kentucky were admitted to the Union.

John Adams's Administration (1797 to 1801).—Washington had been elected by the unanimous voice of the people. But when he retired from office, the two great parties, the Federalists, who were conservative, attached to the views of Washington, and opposed to the sentiments of

the French Revolution, and the Anti-federalists, radical Democrats, each struggled for the mastery. John Adams, the Federal candidate, was elected President, and Thomas Jefferson, Vice-president. Early in this administration war with France was threatened. Provoked because they could not embroil the United States in a war with England, the French Directory insulted the American Envoy at Paris, authorized the capture of American vessels by French cruisers, and sent vessels of war to the American coast. Congress took active measures of defense. An army and navy were organized, but fortunately, before actual hostilities broke out, the French Directory made overtures of peace. Washington, who had been appointed as commander of the small standing army which had been raised, did not live to witness the restoration of peace. On the 14th of December, 1799, he died at his residence at Mt. Vernon, Va., after a short illness, at the age of sixty-eight years. During the following summer the seat of government was removed from Philadelphia to the city which had been named after him, and the site of which he had assisted in choosing. His death, together with the unpopularity of the "alien and sedition laws," aimed at rebel aliens and government libelers, prepared the way for the defeat of the Federalists at the next presidential campaign.

Jefferson's Administration (1801 to 1809).—After a close contest Thomas Jefferson was elected President, Aaron Burr Vice-president, both belonging to the Anti-Federal or Democratic party. The internal revenue system was at once abolished, and other laws distasteful to the party now in power abolished. In 1802 Ohio was admitted as a state, and in the next year Louisiana was purchased from France, for $15,000,000. The same year Commodore Preble was sent against the pirates of the Barbary coast. After two years of desultory conflict, favorable terms of peace were offered by the bashaw and accepted by the United States. In 1807 the celebrated trial of Aaron Burr, Vice-president under the previous administration, took place. He was arrested on the charge of treason, but not convicted.

The wars of France and England, and especially the unjust claims put forward by the latter, constantly increased the resentment felt toward the latter power by the Americans. An unprovoked attack on the American frigate Chesapeake, in 1807; the seizure of American sailors by press-gangs; the injustice of the British "orders in council," which exposed neutral vessels trading with France to capture; and the inciting of the western Indians by British emissaries, combined to convince the people that their only mode of redress was a declaration of war. This alternative, however, was postponed to the last, and was not adopted until

Madison's Administration (1809 to 1817).—James Madison belonged to the same party as his predecessor, and continued his policy. After an ineffectual attempt to obtain justice from Great Britain, the President, in accordance with the action of Congress, issued a proclamation of war, June 19, 1812.

The War of 1812—1814.—In the fall of the previous year (Nov., 1811), Gen. William Henry Harrison succeeded in crushing the power of the hostile Indians of the west, at the bloody and obstinately-contested battle of Tippecanoe, in Indiana. But the campaign of 1812 did not continue such success. The Americans lost the posts of Mackinaw and Detroit, and were defeated at Queenstown, on the Niagara river. Fortunately the navy more than counterbalanced these reverses. Within seven months from the declaration of war, five hundred British vessels and three frigates were captured by the Americans, with an average loss of but one sailor to eight of the enemy. Captain Isaac Hull, and Commodores Decatur and Bainbridge especially distinguished themselves in these engagements; but the large majority of prizes were taken by "privateers," fitted out by citizens.

In the beginning of 1813, the American forces were ranged in three divisions, one under General Harrison, on Lake Erie, the second under General Dearborn, on Lake Ontario, the third under General Wade, on Lake Champlain. Commodore Perry commanded the American squadron on Lake Erie, which distinguished itself on Sep. 10th by a brilliant victory over the British fleet. The troops of Harrison immediately embarked, crossed the lake, and gained a complete victory over the English soldiery, under General Proctor, at the battle of the Thames (Oct. 5). In this engagement the renowned Indian warrior, Tecumseh, was slain. His death destroyed the power of the Indians of the north, while in the decisive battle of Horse Shoe Bend, in Georgia, the following March, General Jackson humbled the southern tribes.

Gen. Dearborn, in the meanwhile, attacked and captured York in Canada, and the English in return made a descent on Sackett's Harbor. Several other engagements occurred on the northern frontier, but none of a decisive character.

At sea, the fortunes of the war were not so much in favor of the Americans as previously. In February the Hornet, under Captain Lawrence, destroyed the British brig Peacock, but in the following June that brave officer was killed, and his ship captured in an engagement with the frigate Shannon. His last words were: "Don't give up the ship," which has become the motto of our navy. The British commerce, however, suffered severely by the numerous privateers which scoured the seas capturing British merchantmen.

In the following year, 1814, Generals Winfield Scott and Ripley crossed Niagara River at

the head of about 3,000 men, seized Fort Erie, and on the 25th of July engaged the British forces under General Drummond at Lundy's Lane. This was the most obstinate battle of the war. It resulted favorably for the American forces, but at a loss of nearly one-third their number. Still more disastrous to the British was the battle of Plattsburg, on Lake Champlain, which took place Sept. 11, 1814. Their land forces attacked the United States troops under General Macomb, while their fleet engaged that of Commodore MacDonough, lying in the harbor. They signally failed in both attempts, losing most of their vessels and about 2,500 men.

Meanwhile the British fleet on the Atlantic coast carried on a series of depredations on the defenseless seaport towns. Hampton, on the Chesapeake, was burned; a force of 5,000 marines proceeded to Washington, and having burned the Capitol, President's House, and other public buildings, hastily retreated (Aug. 24). Alexandria was plundered, and Baltimore attacked, but unsuccessfully.

General Andrew Jackson, commanding at the south, having driven the English troops from Pensacola, repaired to New Orleans to repel a large force under General Packenham. This he did most victoriously at the Battle of New Orleans, Jan. 8, 1815, in which 12,000 British troops were repulsed, with a loss of nearly 2,000 dead and wounded, by 6,000 American militia, whose dead and wounded amounted to only *thirteen*. This was the last important action of the war. Indeed, before it took place a treaty of peace had been signed at Ghent by commissioners of the two powers (Dec. 24, 1814). The objects for which the United States had been fighting were virtually conceded.

In the following year (1815) Commodore Decatur still further established the reputation of the American navy by the reduction of Tunis and Tripoli, whose piratical inhabitants had been plundering our merchantmen.

The war left the country in debt $75,000,000, and to aid in restoring the finances, early in 1816 a second national bank was established, with a capital of $35,000,000, and a charter to continue in force 20 years.

Administration of James Monroe (1817 to 1825).—The next administration shared the political views of that which preceded it, but was marked by less bitterness and more general good feeling. The only warlike event was an invasion of Florida, then a Spanish colony, by General Jackson, in pursuit of hostile Indians. This might have given rise to serious trouble, but in 1821 Spain ceded east and west Florida to the United States, for $5,000,000. The slavery question at this time began to assume threatening proportions. In Aug., 1821, the "Missouri Compromise" was passed, by which slavery was to be excluded from all territory west of the Mississippi, north of 36° 30′, except in Missouri. This pacified the opposing parties for a time. President Monroe is, perhaps, best remembered for his maintenance of the "Monroe doctrine." This is expressed in his message of Dec. 2, 1823, and is as follows: "We owe it to candor and to the amicable relations existing between the United States and European powers, to declare that we should consider any attempt on their part to extend their system of government to any portion of this hemisphere as dangerous to our peace and safety."

John Q. Adams's Administration (1825 to 1829).—Freed from external foes, and not yet divided by party strife, the country now enjoyed remarkable prosperity. Internal improvements on a large scale commenced, and the first railroad (at Quincy, Mass.,) was constructed. The Erie Canal was finished by the state of New York, and the commerce and manufactures of the country rapidly increased. The President pursued the same policy as his father, John Adams, which was "Whig" or "Republican." It is mentioned as a remarkable coincidence that on the fiftieth anniversary of American Independence, which occurred July 4, 1826, John Adams and Thomas Jefferson, so long the heads of the opposing political parties, both died.

Jackson's Administration (1829 to 1837).—After an exciting political campaign General Andrew Jackson was elected president by the Democratic party. His first action was to remove numerous office-holders and appoint in their place his political friends. In 1832 John C. Calhoun, who had been elected Vice-president, resigned that office, and representing South Carolina in the Senate, declared the protective tariff (originally introduced by the south, but grown unpalatable to it) null and void, and threatened secession if the general government attempted to execute it in South Carolina. The President at once ordered a vessel of war and troops to Charleston to collect the revenue by force, if necessary. Fortunately this resort was avoided, and Henry Clay introduced a compromise measure by which the strife was adjusted. In the same year the President vetoed the extension of the charter of the United States Bank, which he termed "the scourge of the people," and in 1833 removed the government funds deposited in that institution—actions which excited the bitterest animadversion.

Hostilities with the Indians constantly occupied the regular troops. On the western frontier, in Illinois and Wisconsin, the tribes assembled under the chief, Black Hawk, in 1832, but were dispersed and their leader captured. In 1835 and 1838 the Cherokees were after some difficulty removed west of the Mississippi; while the Creeks and Seminoles, in Florida, refusing to emigrate, collected under Osceola, and for seven years successfully resisted the troops sent against them. At length Colonel Zachary Taylor compelled their submission.

Van Buren's Administration (1837 to 1841).—The successor of Jackson was Martin Van Buren, of New York, also a Democrat. Early in his administration (1837) the country was overwhelmed by a disastrous and general mercantile failure, amounting to hundreds of millions of dollars. This was the direct consequence of land speculations and long credits. All the banks suspended specie payment, and Mississippi and Florida repudiated the debts of their commonwealths. An independent United States treasury, with sub-treasury offices in New York and other ports of collection, was organized in 1839. Treasury notes to the amount of $10,000,000 were authorized to be issued. These measures, however, did not succeed in restoring health to trade: and as the disasters of the country were attributed to the action of the Democratic party, the result in the next presidential election was the success of the Whigs by a majority much larger than was expected by any one.

Harrison and Tyler's Administrations (1841 to 1845).—General Harrison, the "hero of the Thames and Tippecanoe," lived but a month after his inauguration, and Mr. Tyler, the Vice-president, became acting President. The sub-treasury bill was repealed, and a general bankrupt act declared, but as Mr. Tyler vetoed two separate bills chartering a U. S. bank, he was denounced in the strongest terms by the party which had elected him, and his entire cabinet resigned except Daniel Webster, Secretary of State. Nevertheless the finances of the country rapidly improved. In 1842 a treaty was negotiated with Great Britain, relating to the N. W. boundary of the United States, or the Oregon line. Late in this administration, Texas, a province of Mexico, settled chiefly by emigrants from the United States, which had declared its independence, applied for admission into the Union. This was strongly resisted by the Whig party, but early in 1845 Congress authorized the President to negotiate with Texas terms of annexation.

Polk's Administration (1845 to 1849).—The contest of 1844 was between Henry Clay, the Whig candidate, and James K. Polk, who was elected by the Democrats. The action of Congress with reference to Texas necessarily led to a rupture with Mexico, and that her troops might not move upon that state in an unprepared condition, General Taylor was ordered to lead his forces to the Rio Grande, and a naval squadron was dispatched to the Gulf of Mexico to support him.

The Mexican War.—Hostilities began by an attack on a body of United States dragoons, April 27, 1846, on the east bank of the Rio Grande, above Matamoras. On the 8th and 9th of May General Taylor fought the successful battles of Palo Alto and Resaca de la Palma, which drove the Mexicans beyond the river. When the news of these engagements reached Washington, the President was authorized to call out 50,000 volunteers, and a warlike enthusiasm was displayed in all the states. The army was not ready for action until the fall of 1846. It was then divided into three columns, the main body under General Taylor to march upon Monterey, while a second division under General Wool was to attack Chihuahua, and the third, under General Kearney, was to direct its course to Santa Fe. These objects were promptly accomplished, Monterey surrendering on the 24th Sept., Santa Fe shortly previous, and Chihuahua on the 28th of Feb., 1847. Meanwhile Captain J. C. Fremont, of the topographical engineers, with several other officers, had possessed himself of San Francisco, and gained the entire control of Upper California.

As in Feb., 1847, General Taylor's forces had become reduced to less than 5,000 men by detachments sent elsewhere, the Mexican General Santa Anna considered this a favorable moment to attack him, and on the 23d of that month assaulted his works on the heights of Buena Vista, three miles south of Saltillo, with an army of 20,000 men. In spite of this numerical superiority he was driven in disorder from the field, with a loss of more than 1,500 men. A few days after this event, General Scott at the head of 12,000 men landed near Vera Cruz (March 9, 1847), and began to invest the city. It yielded after a vigorous resistance on the 29th, and shortly afterward the troops were put in motion for the Mexican capital. Santa Anna resisted them on the heights of Cerro Gordo, but was routed with heavy loss (April 18). The cities of Jalapa and Puebla fell, and on the 18th of August the entire army, numbering 9,000 men, reached a position ten miles from the city of Mexico. Here they were opposed by over 30,000 Mexicans under Santa Anna. With desperate bravery they carried by assault the batteries on the heights of Contreras, the fortified post of Cherubusco, and the fortress of Chapultapec, which had been deemed impregnable. Terrified by these losses, Santa Anna and the civil officers of the government fled from the city by night, the army dissolved, and on the 14th of September the American flag floated over the national palace of Mexico. This ended the war, and on February 22, 1848, a treaty of peace was concluded between the two powers. The United States obtained New Mexico and California, and agreed to pay to and for Mexico about $18,000,000.

Taylor and Fillmore's Administrations (1849 to 1853).—The next presidential canvass resulted in the election of General Zachary Taylor, the Whig nominee, but of moderate views. The central political question of the day was whether slavery should be carried into the new territories. This was strenuously opposed by the majority in the north, and as earnestly advocated by the south. The "compromise" measures, finally passed by Congress, which excluded slavery from California, left it optional with the people of Utah and New Mexico, and allowed owners to capture fugitive slaves in free states, were equally disliked by each party. Secession conventions were held in South Carolina and Mississippi, and armed resistance to the Fugitive Slave Law advocated in the north.

Pending this discussion, President Taylor died, July 9, 1850, and the Vice-president, Millard Fillmore, was installed as acting President.

The discovery of the rich gold deposits of California at this time attracted general attention throughout the world, and led to a vast emigration to that territory.

Pierce's Administration (1853 to 1857).—In 1852 Franklin Pierce of New Hampshire, the Democratic candidate for President, was elected over General Winfield Scott, the candidate of the Whig party. The Missouri Compromise was abrogated in 1854. Violent collisions occurred in Kansas between the Free-Soil and Pro-Slavery parties. In March of same year a commercial treaty was effected with Japan. The discussions which sought to give new efficacy to the Fugitive Slave Law, and which culminated on March 6th, 1857, in the famous Dred Scott decision, delivered by Chief Justice Taney, greatly increased party excitement, and intensified the struggle between the friends and opponents of slavery. Under such circumstances the campaign of 1856 took place, the Democratic candidate being James Buchanan and the Free-Soil candidate General John C. Fremont. The former was elected.

Buchanan's Administration (1857 to 1861).—Party lines became more closely drawn upon the right of extending slavery into the territories, and the capture of fugitives on free soil. In Kansas and Nebraska bloody collisions between the exponents of free and slave ideas were not infrequent. Mr. Buchanan had great trouble with his territorial governors, especially of Kansas. August 24, 1857, began the great commercial panic, which, by December 25, of same year, resulted in 5,123 failures, with an aggregate loss of $291,757,000. The Utah expedition was the only army movement of importance during 1857–58. On October 17, 1859, occurred the affair at Harper's Ferry, which resulted in the hanging of John Brown. The presidential canvass of 1860 found the Democratic party divided, one faction claiming that slavery existed by constitutional right in all the territories, the other that the question of its existence depended on the will of the people thereof. Of the former, John C. Breckinridge became the candidate for the presidency; of the latter, Stephen A. Douglas, while Abraham Lincoln became the candidate of the new Republican party, and John Bell of the conservative or compromise elements of both parties. Mr. Lincoln was chosen (November 6, 1860) by a large majority. His election was the signal for a movement on the part of the southern states in favor of a separate government.

On November 7, on receipt of the news of the election, the "Palmetto Flag" was hoisted on the shipping in Charleston Harbor. November 10, the Legislature of South Carolina introduced a bill to raise and equip 10,000 men, and one ordering a convention to consider the question of secession. Her Senators both resigned. November 18, the Georgia Legislature appropriated $1,000,000 to arm the state. Major Anderson was sent to Fort Moultrie to relieve Colonel Gardner. December 1, Florida Legislature ordered a secession convention. December 3, Congress met, and Mr. Buchanan, in his message, announced the doctrine that while no state had the right to secede, the Federal government was powerless to prevent secession. December 10, Howell Cobb, Secretary of the Treasury, and Senator Clay, of Alabama, resigned. December 13, the President refused to reinforce the forts in Charleston Harbor. December 14, General Cass, Secretary of State, resigned. December 20, South Carolina seceded. December 22, the Crittenden compromise voted down in the Senate. December 24, South Carolina members of Congress resigned. December 26, Major Anderson took possession of Fort Sumter. The President refused to see the South Carolina commissioners. December 28, South Carolina seized the government property in Charleston, including Castle Pickney and Fort Moultrie. December 29, John B. Floyd, Secretary of War, resigned. January 2, 1861, Governor Ellis, of North Carolina, seized Fort Macon, and Georgia troops seized Forts Pulaski and Jackson and the United States Arsenal at Savannah. January 4, Governor Moore, of Alabama, seized Fort Morgan and the United States Arsenal at Mobile. January 8, Jacob Thompson, Secretary of the Interior, resigned. January 9, steamer Star of the West fired on by Confederates in Charleston Harbor. Mississippi seceded. January 10, Florida seceded. The state seized Fort McRae. January 11, Alabama seceded. January 13, Florida troops seized Pensacola Navy Yard and Fort Barancas. January 18, Virginia appropriated $1,000,000 for state defense. January 19, Georgia seceded. January 21, Alabama members of Congress resigned. January 23, Georgia members of Congress resigned. January 24, Confederates seized United States Arsenal at Augusta. January 26, Louisiana seceded. January 30, North Carolina Legislature submitted the secession question to the people, and on February 1 the Texas Convention passed an ordinance of secession, and submitted it to the people. The Mint and Custom House seized in New Orleans. February 4, delegates met at Montgomery, Alabama, to form a Confederate Government. Peace Congress met in Washington, and after a stormy session adjourned without results. February 9, Jefferson Davis and Alexander H. Stephens elected provisional President and Vice-president of Southern Confederacy. February 19, Confederates seized Fort Kearney, in Kansas. February 23, General Twiggs surrendered government property in Texas, valued at $1,200,000.

Lincoln's Administration—The War of the Rebellion.—March 4, 1861, Mr. Lincoln was inaugurated. Texas seceded, the people having so voted. 5th, Beauregard took command of the Confederate forces. April 12, Fort Sumter was bombarded. 15th, the President issued a proclamation commanding all persons in arms against the government to disperse in twenty days, and calling for 75,000 volunteers. 16th, the Governors of Kentucky, Virginia, Tennessee and Missouri refused to

furnish troops under the President's call. The Confederate government called for 32,000 men. 17th, Virginia seceded and sent troops to take Harper's Ferry and Gosport Navy Yard. Jefferson Davis offered letters of marque and reprisal to privateers. 18th, Colonel Cake, with 400 of Penna. 25th Regt., arrived in Washington. 19th, Mass. 6th Regt. attacked by a mob in Baltimore. The ports of the southern states declared in a state of blockade.

May 1st, Mr. Lincoln called for 42,000 three year volunteers; 22,000 troops for the regular army, and 18,000 seamen. May 4th, General McClellan placed in command of Department of Ohio, Indiana and Illinois. May 18th, Department of Virginia created and placed under command of General Butler. 20th, North Carolina seceded. 21st, Tennessee seceded. 24th, 13,000 Federal troops crossed the Potomac, occupying Arlington and Alexandria. Colonel Ellsworth killed. June 10th, battle of Big Bethel. 17th, West Virginia declared independent of eastern portion by Wheeling Convention. Defeat of the Confederates at Boonville, Missouri. 20th, McClellan assumed command in West Virginia. July 1st, First war loan of the United States government, $250,000,000. 5th, Battle of Carthage, Missouri; defeat of Federal troops under Col. Sigel. 6th, Fremont took charge of Western Department. 11th, Expulsion of southern Senators from United States Senate. 12th, Federal victory at Rich Mt., under Rosencrans. 13th, Confederates, under Gen. Garnett, defeated at Carrick's Ford, Virginia. 16th, President Lincoln authorized to call for 500,000 men. 18th, Gen. Dix took charge of Department of Maryland. 20th, Confederate Congress met at Richmond. 21st, Gen. McDowell defeated at Bull Run. 22d, McClellan took command of the Army of the Potomac. August 10th, Battle of Wilson Creek, Missouri; death of Gen. Lyon. 16th, All commercial relations with Confederate States interdicted. 29th, Forts Hatteras and Clark, North Carolina, captured by Federals. September 6th, Grant took possession of Paducah, Kentucky. 10th, Rosencrans defeated Floyd near Carnifax Ferry, Virginia. October 21st, Col. Baker defeated at Ball's Bluff and Gen. Zollicoffer at Camp Wild Cat, Kentucky. 25th, Defeat of Confederates at Romney, Virginia. November 1st, Resignation of Gen. Scott and appointment of Gen. McClellan. 2d, Gen. Hunter succeeded Fremont in the West. 11th, Halleck succeeded Hunter. 30th, England demanded the liberation of Mason and Slidell; Jefferson Davis elected President of Confederate States. December 17th, Drawn battle at Munfordsville, Kentucky. 18th, Capture of 1,300 Confederates at Milford, Missouri, by Gen. Pope. 20th, Confederate defeat at Drainsville, by Gen. McCall.

January 7th, 1862, Second Confederate defeat at Romney. 11th, Stanton appointed Secretary of War; defeat of Confederate gun-boats at Columbus. 19th, Defeat of Confederates at Mill Springs, Kentucky; Gen. Zollicoffer killed. 29th, French and English troops land at Vera Cruz and march toward Mexico. February 6th, Fort Henry, on Mississippi River, surrendered to Federal fleet under Com. Foote. 8th, Gen. Burnside captured six forts on Roanoke Island. 10th, Destruction of confederate gun-boats on Tennessee R. 15th, Fort Donelson attacked by 40,000 Federal troops under Gen. Grant. 16th, Fort Donelson surrendered 15,000 prisoners, 40 cannon, and munitions. 22d, Inauguration of President and Vice-president of Southern Confederacy. March 8th, Confederates defeated at Pea Ridge; destruction of Cumberland and Congress at Hampton Roads by confederate iron-clad Merrimac. 9th, Battle between Merrimac and Monitor; the former compelled to retire. The first contest between iron-clads; reaction against wooden vessels. 13th, Confederates evacuated New Madrid, Missouri. 14th, Federal victory at Newbern, North Carolina, under Burnside. 16th, Com. Foote began attack on Island No. 10; Confederates defeated at Cumberland Mountain, Kentucky. 18th, Confederates defeated at Salem, Arkansas. 23d, Battle of Winchester; Confederates defeated. April 6th, 7th, Battle of Pittsburgh Landing or Shiloh; Grant, assisted by Buell, drove Confederates to their fortifications at Corinth; Federal loss 13,100. Confederate Gen. Johnson killed. 8th, Com. Foote captured Island No. 10 with 5,000 prisoners, 100 siege guns, 24 field pieces and 5,000 small arms. 11th, Slavery abolished in District of Columbia. 28th, Com. Farragut took possession of New Orleans. May 5th, Gens. Hancock and Hooker defeated the Confederates at Williamsburgh, Virginia. 7th, Battle of West Point, Virginia, in which the Confederates under Lee suffered defeat at the hands of Gens. Franklin and Sedgwick. 9th, Confederates evacuated Pensacola. 10th, Federal forces took possession of Norfolk, Virginia. 11th, Iron-clad Merrimac blown up to prevent her capture. 12th, Natchez surrendered to Com. Farragut. 16th, Union gun-boats repulsed at Fort Darling. May 25th, Defeat of Gen. Banks at Winchester, Virginia. 31st, Union defeat at Fair Oaks. June 1st, Battle of Fair Oaks renewed; Confederates defeated. 6th, Memphis surrendered to Union troops. 8th, Stonewall Jackson defeated at Cross Keys, Virginia. 26th, Concentration of Federal troops about Richmond and commencement of six days' fight. Undecisive battle of Mechanicsville. Pope took command of Army of Virginia. 27th, Bombardment of Vicksburgh commenced. Fremont relieved of his command. Federal troops driven back at Richmond. White House evacuated. 28th, Confederates repulsed on the Chickahominy. Retreat of Federal troops at night. 29th, Confederates defeated at Peach Orchard; Federals defeated at Savage Station and retreated. 30th, Heavy battle of White Oak Swamp. July 1st, Battle of Malvern Hill. Last of the six days' fight. The President called for 300,000 volunteers. 11th, Gen. Halleck appointed commander of the United States forces. July 13th, 17th, Emancipation and confiscation acts sanctioned by the President. August 4th, A draft of 300,000 men ordered. 9th, Battle of Cedar Mountain. 16th, Gen. McClellan evacuated Harrison's Landing. 26th, Gen. Ewell drove Union

troops from Manassas. 30th, Union troops defeated at Richmond, Kentucky. Confederates defeated at Bolivar, Tennessee. Second battle of Bull Run. Union forces under Gen. Pope defeated. September 1st, Union victory at Chantilly, Virginia. 2d, Gen. McClellan took command of Army of Washington. 5th, Confederate army began to cross the Potomac into Maryland. September 14th, Battle of South Mountain. The Confederates retreated toward the Potomac. 15th, Surrender of Harper's Ferry to Confederates after two days' fighting. 17th, Battle of Antietam; retreat of Confederates with a loss of 14,000 men. 18th, Confederates re-crossed the Potomac into Virginia. 19th, Confederate defeat at Iuka, Mississippi. 22d, Emancipation Proclamation by the President. 25th, Suspension of Habeas Corpus. October 4th, Defeat of Confederates at Corinth, Mississippi. 8th, Battle of Perryville, Kentucky. Confederates retreated during the night. 30th, Gen. Rosencrans assumed command of the Army of the Cumberland. November 5th, Gen. McClellan succeeded in command of the Army of Potomac by Gen. Burnside. 28th, Defeat of Confederates at Cane Hill, Arkansas. December 13th, Battle of Fredericksburgh, Virginia, and repulse of Union troops under Sumner, Hooker and Franklin. 14th, Banks succeeded Butler in command of New Orleans. 28th, Second attack on Vicksburgh by army and gun-boats. Federal line established within 2½ mls. of the city. 31st, Heavy battle of Murfreesborough or Stone River. Federal troops driven back, but were reinforced and repulsed the Confederates.

January 1st, 1863, Re-publication of the emancipation proclamation. 3d, Confederate army retreated from Murfreesborough. Federal army withdrawn from Vicksburgh. 10th, Capture of Arkansas Post with 7,000 prisoners, by Union gun-boats and army. 22d, Third attack on Vicksburgh. 28th, Gen. Hooker succeeded Burnside in command of Army of Potomac. 31st, Repulse of Confederates at Blackwater, Virginia. April 7th, Attack upon Charleston and withdrawal of Federal fleet. 17th, Banks moved on his Red River expedition. May 3d, Second defeat of Federals at Fredericksburgh, and their retreat on the 5th. Stonewall Jackson mortally wounded. 13th, Defeat of Gen. Johnston at Jackson, Mississippi, by Grant, and capture of the place. 15th, Grant defeated Pemberton at Baker's Creek, Mississippi. 17th, Second defeat of same by same at Big Black River. 18th, Vicksburgh invested by Federal troops under Grant and Admiral Porter. June 17th, Ram Atlanta captured by Weehawken off South Carolina coast. 23d, Second defeat of Confederates at Big Black River, Mississippi. 29th, Gen. Meade succeeded Hooker in command of Army of Potomac. July 1st, 2d and 3d, Defeat of Confederates at Gettysburg, Pennsylvania, under Lee, by Gen. Meade. 4th, Surrender of Vicksburgh by Pemberton, with 27,000 prisoners, 132 cannon and 50,000 small arms. 8th, Surrender of Port Hudson to Gen. Banks, 7,000 men, 60 cannon and 10,000 arms. 17th, Johnston defeated at Jackson, Mississippi, by Sherman. Natchez captured by Gen. Ransom. Confederate troops driven back from Kentucky and Tennessee; concentrated at Chickamauga, where, under Bragg, they were attacked. September 19th, Union army repulsed and driven to Chattanooga. October 20th, Departments of Cumberland and Mississippi consolidated and placed under command of Gen. Grant. Thomas succeeded Rosencrans. November 25th, Confederate army under Bragg badly defeated at Chattanooga. 29th, Repulse of Confederates at Knoxville. December 4th, Longstreet compelled to retire from Siege of Knoxville.

February 1st, 1864, A draft for 500,000 men ordered. 15th, Gen. Sherman carried his raid to Meridian, Mississippi. March 8th, Gen. Grant commissioned Lieutenant-General. 12th, Assigned to command of United States army. 25th, Capture and destruction of Paducah by Forrest. April 12th, massacre at Fort Pillow by Confederate Gen. Forrest. May 6th, Grant crossed the Rapidan. Battle of the Wilderness. Retreat of Lee toward Richmond. 9th, Further defeat and retreat of Lee's forces. 12th, Union victory at Spottsylvania; capture of 4,000 prisoners and 25 cannon. 13th, Sheridan reached the rear of Confederate army at Hanover Junction and destroyed 1,000,000 rations. 15th, Johnston forced to evacuate Resaca. 23d, Confederate army flanked at Spottsylvania Court House and forced to evacuate. June 3d, Rout of Confederates at Coal Harbor. 5th, Sherman flanked Johnston and captured Ackworth. 28th, Grant's army took possession of Weldon Railroad and invested Richmond and Petersburgh. July 22d, Confederate defeat at Atlanta. September 2d, Federal troops took possession of Atlanta. 19th, Victory of Sheridan over Confederates in Shenandoah Valley. November 8th, The presidential election, Lincoln and Johnson received 212 and McClellan and Pendleton 21 electoral votes. McClellan resigned his army command. 16th, Sherman began his march to the Atlantic. December 16th, Thomas defeated the Confederate forces at Nashville, capturing a large number of guns and prisoners. 20th, Breckinridge defeated in West Virginia. 21st, Savannah captured by Sherman. 24th, Union troops and gun-boats make an unsuccessful attack on Fort Fisher. 29th, Hood's army crossed the Tennessee R., ending the campaign in Tennessee.

January 8th, 1865, Butler succeeded by Ord in command of Army of the James River. 16th, Fort Fisher captured by Federals. 20th, Corinth evacuated by Confederates. February 17th, Columbia, South Carolina, taken by Sherman. 18th, Charleston, South Carolina, occupied by Federal forces. 22d, Wilmington, North Carolina, taken by Gen. Schofield. March 2d, Early and forces captured by Sheridan, near Staunton, Virginia. 4th, Inauguration of Lincoln and Johnson. 17th, Confederate Congress adjourned sine die. April 2d, Lee's lines at Petersburgh carried. 3d, Richmond captured by Federal forces. 9th, Surrender of Confederate army at Appomattox and end of the war. 14th, President Lincoln shot by J. Wilkes Booth at Ford's Theater, Wash-

ington. 15th, Death of President Lincoln. Johnson sworn in as President. 26th, Surrender of Confederate Gen. Johnston. May 10th, Capture of Jefferson Davis at Irwinville, Georgia.

Johnson's Administration (1865—1869).—President Johnson developed a policy at variance with the wishes of those who had supported him for Vice-president. So unsatisfactory did his administration become to the majority, that proceedings in impeachment were begun, but they failed. His antagonism with Congress and the consequent failure to settle many of the pressing questions of state and finance evolved by the war, paved the way for an easy election of General Grant and Schuyler Colfax, the nominees of the Republican party.

Grant's First Administration (1869 to 1872).—All the departments of the government being now in harmony, this administration became effectual in applying the various laws looking to reconstruction, providing for the civil privileges of the colored race, giving fixity to the national currency, credit to the securities and for the reduction of the debt. The President's announcement to secure for the country rest and peace after the excitement and turmoil of war, was received on every hand with approbation. A partially successful attempt was made to convert the higher interest-bearing loans into bonds bearing a lower rate of interest. A new and humanized Indian policy was devised and put in practice. The Alabama claims were adjudicated and the vexatious question of the N. W. boundary settled. The country responded to the new condition of affairs and the guarantees of quiet, by a greatly increased development of natural resources, improved industries, large public improvements, and fresh commercial activity. Repetition of such an administration was deemed desirable by the majority, and President Grant was re-elected, with Henry Wilson for Vice-president, after a bitter and unique canvass against Horace Greeley, as the candidate of the opposition.

Grant's Second Administration (1873–).—The present administration, in the main, continues the policy of the former one, except in the particular of a desire to obtain for the government a footing in the West Indies, and for trans-continental and other railroad enterprises donations of public lands and government credit. The country was threatened for a time with serious complications with Spain, but these were averted by a wise statesmanship. The speculative idea which grew up under a redundant currency, and the daring activities subsequent to the war, resulted in financial disaster at the close of 1873. In addition to its usual labors the administration therefore found itself in the midst of problems for the restoration of credit, the adjustment of the currency to the wants of the people and the return of business to an economic and steadfast basis, whose successful solution will be numbered among its most worthy achievements.

Addison, co. in Vermont, W. part. Area, about 750 sq. miles. Pop. in 1860, 24,010; in 1870, 23,484. It borders on Lake Champlain. The E. part is occupied by the principal range of the Green Mts.; the W. part is level or gently undulating. The co. is drained by Otter Cr. and its affluents. Grazing is carried on in the mountainous and hilly districts. Wool of a superior quality is also produced. Agr. productions in 1870: Wheat, 57,725 bush.; rye, 13,201 bush.; Indian-corn, 144,257 bush.; oats, 334,446 bush.; Irish pot's, 317,043 bush.; wool, 495.771 lbs; butter, 1,723,437 lbs.; hay, 114,298 tons. Cash value of farms; $16,-001,518. Total, estimated, value of all farm productions, including additions to stock, etc., $3,055,768. Total value of manufactures, $1,950,725. Middlebury is the co. seat.

Adirondack, p. o. in Warren co., N. Y.
Adirondack Mountains, the name of an extensive mountain system in N. E. New York. They consist of a series of mountain groups and ranges, trending chiefly from N. E. to S. W, and included in Franklin, Clinton, Essex, Warren, Hamilton and Herkimer cos. The following are the most prominent ranges: The Kayaderosseras rge., extending along the W. shore of Lake George, and terminating abruptly on Lake Champlain; the Clinton rge., W. of it; the Au Sable rge. still further W., including the highest pk. of the system, Mt. Marcy (5,379 feet); the Chateaugay rge., and lastly the St. Lawrence rge. W. of the latter extends the Black River Plateau, which is in the mean 1,500 feet high. The Adirondacks are noted for their grand and picturesque scenery. Many clear blue lakes occupy the depressions, and the mountain slopes are covered with magnificent forests. Game and fish are abundant. Valuable iron ore abounds in several portions.

It lies upon the Erie & Ohio canal, which connects Cleveland with Portsmouth on the Ohio R. The Pennsylvania & Ohio canal joins the Erie & Ohio canal at Akron, and affords water communication with W. Pa. The Cuyahoga R. passes a few miles N. of the tn., and not only supplies both canals, but also yields abundant water-power. The principal manufacturing establishments include flouring mills, woolen factories, a blast-furnace, a steam-engine fac-

tory, etc. Large quantities of wheat and flour are shipped in Akron. Two branches of the Atlantic & Great Western R. R. intersect at the town. The distance to Cleveland is 38 mls., and to Cincinnati 245¾ mls. Pop., 10,006. Three newspapers.

Akron, p. v. in Lancaster co., Pa., on the Reading & Columbia R. R., 17¾ mls. S. W. of Reading.

ALABAMA.—The region occupied by the state of Alabama was first explored by the Spaniards and French. The name was taken from the Alibamons, an Indian tribe near the Gulf coast. Its signification is unknown. Until 1798 Alabama formed part of the State of Georgia. In that year it was organized as a territory, embracing also the country subsequently included in Mississippi. In 1819 it was admitted into the Union.

Alabama is bounded on the E by Georgia; on the S. by Florida and the Gulf of Mexico; on the W. by Mississippi, and on the N. by Tennessee. It extends from 30° 12′ N lat., to 35° N. lat., a distance of 331 mls., and from 84° 55′ W. long., to 85° 35′ W. long., a distance of 214 mls. The area is 50,722 sq. mls., or 32,462,080 acres.

Surface.—Alabama comprises, in regard to the formation of its surface and geological structure, two widely different sections, divided by a line commencing at Girard, on the Chattahoochee R., and running W. to Notasulga, Tallassee on the Tallapoosa R., Wetumpka on the Coosa R., Centreville on the Cahawba R., and Tuscaloosa on the Tombigbee R.

The section of the state S. of this line includes the post-tertiary, cretaceous and tertiary formations, and consists of level or undulating plains, which are often diversified by low ridges of drift. North of the line indicated, the character of the country greatly changes Tallapoosa, Chambers, Randolph, Coosa and Talladega cos, with part of Benton co., are occupied by the metamorphic formation, while the central part of this section embraces the productive coal-measures of the Black Warrior R. The surface of this region is broken and hilly, and gradually rises toward the N., where, in a ridge extending from E. to W., through Morgan, Lawrence and Franklin cos., it attains an average altitude above the level of the ocean of 1,100 and 1,160 feet. This region is traversed by numerous ranges, trending from the N. E. to the S. W.; the highest of which, known as the Lookout Mt., is the only elevation in the state that presents anything like the impressive grandeur of a mountain. It extends from the Tennessee R., near Chattanooga, through N. W. Georgia and enters De Kalb co., Alabama, forming the north-western barrier of the Coosa R. valley. The less elevated but broader range of the Raccoon Mt. lies W. of it, and extends along the Tennessee R., from Shelmount, Tenn., to the great bend, near Warrentown, in Marshall co. A long and narrow valley separates these two mountains, extending from Scottsville, near the Cahawba to the N. E. part of the state. The towns of Elyton, Jonesborough and Murphreesville are situated in this valley, which bears different local names.

The most northern section of the state is occupied by the fertile valley of the Tennessee R. Numerous prolongations of the Cumberland Mts. extend from Tennessee into this part of Alabama, and terminate at some distance from the river, inclosing narrow and often picturesque valleys, which have been excavated by the tributaries of the Tennessee.

Minerals and Mineral Springs.—The mineral treasures of Alabama, although not comparable to those of the western part of our country, are valuable and of considerable range. Gold is found in the E. central part of the state, but not in paying quantities Various iron ores, as magnetic iron, red and brown hematite, ochre, etc., are found in Bibb, Jefferson, Tuscaloosa, Shelby and Benton cos.; and as limestone and fuel are abundant, several furnaces are in active operation Manganese occurs in Talladega and Randolph cos. Variegated marbles, black, buff, or nearly white, abound in Talladega and Shelby cos. Bituminous coal, however, is the most valuable mineral. The coal measures cover an extensive area in the northern part of the state.

Alabama abounds in mineral springs, some of which are famous for their medicinal properties. In Lauderdale co. are Bailey's Springs, 9 mls. from Florence; Stewart Spring, one mle. from Florence, and others, which contain free carbonic acid, iron, soda, sulphur and potassa. Bladen Springs, in Clarke co., and Blounts Springs, in Blount co., are also much resorted to by persons in quest of health or pleasure.

Bays and Rivers.—The sea-shore of Alabama is indented by Mobile Bay, 35 mls. long, and 12 mls. wide. Its eastern extension is Bonsecour Bay. The entrance to Mobile Bay is between Dauphin Island and Mobile Point, the extremity of a long, sandy peninsula, on which Fort Morgan stands.

The largest portion of the state is drained by the Mobile R., which is formed by the confluence of the Alabama and Tombigbee rivers, 30 mls N. of Mobile Bay. The Alabama is formed by the junction of the Coosa and Tallapoosa rivers, which enter into the state from Georgia. It has a general south-westerly course, and is navigable for large steamers from Mobile to Montgomery. Smaller boats ascend the Coosa R., as far as Wetumpka and the Tallapoosa as far as Notasulga. The Tombigbee R. rises in Mississippi, and intersects the western part of Alabama. It receives the Black Warrior R., which drains the coal region of the state, and is navigable as far as Tuscaloosa.

The Chattahoochee R. forms about 150 mls. of the eastern boundary and steamboats ascend it to Girard, in Russell co. Numerous smaller streams drain the south-eastern portion of Alabama, and passing through western Florida, empty into the Gulf, as Choctawhatchee R., and its affluent, Pea R; the Yellow R., and the Escambia R., which receives the Conecuh and Sepulgah rivers. The Perdido R. separates Florida from Alabama.

The northern portion of the state is drained by the Tennessee R. This large stream, after flowing to the S. W., through a wide valley of the Appalachian System, turns abruptly W. near Warrenton, and then passes directly N. through Tennessee and Kentucky before it joins the Ohio. Its valley in Alabama is one of denudation, and lies 600 feet lower than the ridge which, on the S., separates it from the region drained by the headwaters of the Black Warrior. The Tennessee is navigable above and below the Muscle Shoals. These are a series of cascades, about 15 mls. long, formed by horizontal strata of cherty rock, which jut across the valley from S. to N. Their aggregate height is 85 feet. The Tennessee R. receives no tributary of importance in Alabama.

Climate.—Alabama has a warm, semi-tropical climate. The northern part is considerably colder than the southern, not only on account of its higher latitude, but also of its greater elevation. Observations made during 1857 in Auburn, which is situated in the central part of the state, about 60 mls. N. E. of Montgomery, gave the following results: Mean annual temperature, 62.37 deg.; highest temperature, 92 deg. (observed on June 9th, July 12th and Sept. 18th); lowest temp. 5 deg. (observed on Jan. 19th); difference between the highest and lowest temp, 87 deg. The mean annual temperature in the valley of the Tennessee R. is 60 deg., and in the extreme S. about 69 deg. Alabama lies within the zone of the trade winds, hence easterly winds prevail; but during the summer, when the interior of the great Mississippi basin

experiences excessive heat, southerly winds blow with much regularity from the Gulf far into the land. The rain-fall of the state is considerable. The greater part receives an average of 63 inches, which are distributed through the seasons with tolerable regularity. The summer is usually the wettest and the autumn the driest season.

Vegetation.—Alabama belongs to the great forest region of the continent. The northern part of the state was, and to a great extent is still, covered with forests of deciduous trees, comprising hickory, poplar, chestnut, oak, maple, mulberry, etc. In addition to these there occur in the southern parts various kinds of magnolia, live oak and other sub-tropical evergreen trees, while the extensive tracts of country, consisting of drift ridges and sandy plains, produce the pitch, and other southern pines. The river bottoms are lined with cottonwood trees and canebrakes.

Animals.—In the thinly settled portions of the state there still occur bears, deer, wolves, foxes, raccoons and opossums. The rivers abound with fish, water turtles, and, in the southern parts, alligators. The rattlesnake is frequently met with.

Population.—The number of inhabitants in 1870 was 996,992 (521,384 were white and 475,510 colored). The density of population was 19.6 inhabitants to the sq. mle. Of the aggregate population 987,030 were natives of the United States, and only 9,962 born in foreign countries. The natives included 38,825, one or both parents of whom were foreigners. Of the foreign inhabitants, there were born 183 in British America, 587 in France, 2,479 in Germany, 1,039 in England, 3,893 in Ireland, 458 in Scotland, 118 in Italy, 105 in Sweden and 33 in the West Indies. The population had steadily increased from 1820 to 1860, but from that time to 1866 there was a decrease of 3,632 whites and 14,325 colored persons, a total decrease of 17,957. The following table shows the increase of population from decade to decade:

1820	127,901	Increase per cent.
1830	309,527	142.01
1840	590,756	90.86
1850	771,623	30.62
1860	964,201	24.96
1870	996,992	3.40

Nearly one-half of the population, over 10 years of age, was engaged in the various occupations, viz.: 291,629 in agriculture: 42,125 in professional and personal services; 14,435 in trade or transportation, and 17,070 in manufactures and mechanical and mining industries.

Agriculture.—The land in farms amounted in 1870 to 14,951,178 acres, or 46 per cent. of the entire area of the state, showing a considerable decrease since 1860, when there were over 19,000,000 acres in farms. But the number of farms has increased during the same period from 55,128 to 67,383. Large farms of more than 500 acres have decreased in number about 50 per cent; farms of from 50 to 100 acres have slightly increased, while farms below 50 acres have nearly doubled in number. The cash value of farms was $67,739,036, or but little over $4.50 per acre, and the estimated value of all farm productions, including additions to stock, was $57,522,335.

The great staple of the state is cotton, of which there was produced in 1860, 989,955 bales, and in 1870, 429,482 bales. The other farm products during the latter year were: 1,055,068 bush. of wheat; 18,977 bush. rye; 16,977,948 bush. corn; 770,866 bush. oats; 162,512 bush. Irish potatoes; 1,871,360 bush. sweet potatoes; 10,613 tons hay; 3,213,753 lbs of butter; 381,253 lbs. wool; 222,945 lbs. rice, and 152,742 lbs. tobacco. The value of all live stock was $26,690,095, and of agricultural implements, $3,286,924. There were in the State 80,770 horses; 76,675 asses and mules; 170,640 milch cows; 59,176 working oxen; 257,347 other cattle; 241,934 sheep and 719,757 swine. The value of slaughtered animals was $4,670,146.

Manufactures.—According to the last census there were 2,188 manufacturing establishments in the state, employing 8,248 hands, and 295 steam-engines, with 7,740 horse-power. The total value of manuf. products was $13,040,644, which consumed $7,592,837 of raw materials. The state had 13 cotton factories, producing goods to the value of $1,088,767. Fourteen establishments produced $89,998 worth of woolen goods. Fifty-eight establishments produced $172,949 worth of curried leather, and $239,386 worth of tanned leather. The total value of machinery was $571,365; of cast-iron, $326,890, and of agricultural implements, $10,050. Six hundred and thirteen flouring and grist mills turned out products to the value of $4,827,470, and 284 saw-mills sawed lumber to the value of $1,359,083. The value of cigars and manufactured tobacco amounted to $33,850, and of brick and tile $164,530.

Commerce and Internal Improvements.—Alabama has excellent facilities for foreign and domestic commerce. Her rivers are navigable for upward of 1,500 miles, and Mobile Bay affords a good outlet for her exports. Ships drawing 10½ feet of water can ascend the bay to the wharves of Mobile. The total declared value of commodities imported into Mobile, the only port of entry in the state, was, in 1871, $1,579,806; of domestic exports, $21,874,703, and of foreign exports, $1,631. The total number of vessels was 228, with 23,102 tons of burden. Of these 7 were registered, 133 enrolled and 68 licensed.

In 1862 Alabama had 805 mls. of railroad; in 1870, 1,393, and in 1872 1,671 mls. These roads were the following: Ala. Cen. R. R., 81 mls. long; Ala. & Chattanooga R. R., 24¼ mls.; E. Ala. & Cincinnati R. R., 25 mls.; Montgomery & Eupala R. R., 80 mls.; Memphis & Charlestown R. R., 155 1-5 mls.; Mobile & Girard R. R., 83 mls.; Mobile & Ohio R. R., 75 mls.; Nashville & Chattanooga R. R., 26½ mls.; New Orleans & Selma R. R., 20 4-5 mls.; Savannah & Memphis R. R., 28 mls.; Selma & Gulf R. R., 40 mls.; Selma, Rome & Dalton R. R., 171½ mls.; South & North R. R., 115 mls.; Southwestern R. R., of Ga., ¾ mle.; Western of Ala. R. R., 160½ mls.; Vicksburg & Brunswick R. R., 21 mls.

Charitable and Penal Institutions.—There is an insane hospital in Tuscaloosa, which was opened for the reception of patients in 1861. It has accommodations for at least 350 persons. The institution for the deaf and dumb at Talladega is also in successful operation, and at Mobile there is an asylum for the blind. The State Penitentiary at Wetumpka had in Nov., 1866, 200 convicts, three-fourths of whom were colored.

Government.—The Governor, Lieutenant-Governor, Secretary of State, Treasurer and Attorney-General are chosen for two years by the electors of the state. The Auditor is chosen for one year. The elections take place on the Tuesday after the first Monday in November. The House of Representatives must not exceed 100 members; the Senate must be not less than one-fourth and not more than one-third of the number of representatives. Senators must be at least 27 years old; but any elector is eligible as representative. The Constitution provides, that all male residents of the state, 21 years old, born in the United States or naturalized, who have resided in the state six months preceding an election, shall be citizens of Alabama. Temporary absence does not cause a forfeiture of citizenship. In 1870 there were in Alabama 202,182 male citizens not deprived of suffrage.

The Supreme Court consists of a Chief Justice and associate judges, and has appellate jurisdiction only. It meets twice a year at the seat of government. The state is divided into cir-

cuits of not less than three or more than eight counties. A judge is chosen for each circuit, who shall, after his election, reside therein. Circuit Courts are held twice a year in each county. The Court of Chancery is composed of four Chancellors. The judges of the Supreme Court receive a salary of $4,000; those of the Circuit Courts and the Chancellors, $3,000. All the judges of these courts and the Chancellors are chosen for terms of 6 years, during which they cannot hold non-judicial offices of profit or trust under the state or the United States. The clerk of the Supreme Court is appointed by the judges. The Attorney General resides at the seat of government, and a solicitor is appointed for each county.

Wealth and Finances.—The estimated value of real and personal estate of Alabama was, in 1850, $228,204,332; in 1860, $495,237,078; and in 1870, $201,855,841. Thus it will be seen that the wealth of the state more than doubled during the decade from 1850 to 1860; but fell off nearly three-fifths during the decade preceding the last census. This great decrease is mainly due to the emancipation of the slaves; for the assessed value of personal property fell from $277,164,673 in 1860 to $38,359,552. But the assessed value of real estate also decreased considerably, to wit: from $155,034,089 to $117,223,043.

The total amount of state debt at the close of the fiscal year, ending Sept. 30, 1870, was $5,382,800 exclusive of the indebtedness to the educational fund, of $3,095,210, making a total of $8,478,010, for which annual interest was to be provided. The total indebtedness of the counties was $1,702,173, and of the cities, towns, etc., $3,094,963. The amount of all indebtedness, both state and local, was therefore $13,277,146 or over six per cent. on the estimated value of the real and personal property of the state; and $13.32 to each inhabitant.

In the Auditor's Report for the fiscal year ending Sept. 30, 1872, the bonded debt amounted to $5,661,800; educational fund indebtedness, $2,801,533.84; outstanding state certificates, $396,600; outstanding Auditor's warrants, $197,507.71, and temporary loan, $6,000, making the aggregate indebtedness, $9,063 441. The contingent liabilities, in the form of state bonds for railroad purposes, amounted to $17,110,000; which sum is partly secured by lands and other securities within the control of the state in case of default. The Auditor estimates the direct indebtedness, arising from aid granted to railroads not to exceed $3,000,000. Should this entire amount become a burden to the people, the amount of interest on the total indebtedness would not exceed $902,788, which could be discharged by a tax-levy of 4-10 of one per cent. Add to this 4-10 of one per cent. for state expenses and schools, and ½ mill tax for sinking fund, then the annual tax would be 8½ mills or $1.85 per head of population.

Education.—The Constitution provides that a state Board of Education shall establish throughout the state, in each township or other school district, one or more schools, at which all the children between the ages of five and twenty one years may attend free of charge. Nearly 4,000 public schools were established under this proviso during the first scholastic year of 1868. The University of Alabama, located at Tuscaloosa, is also placed under the control of this board, who, in this respect, act as its "regents." The Medical College of Alabama, located in Mobile, and the Law School at Montgomery, which were chartered in 1860, are branches or departments of the University.

Besides the University, there are three collegiate institutions in Alabama, viz.: Spring Hill College (Roman Catholic), in St. Joseph; Howard College (Baptist), in Marion; and the Emerson Institute in Mobile.

The total number of children of school age in 1870 was estimated at 336,000; of whom about 160,000, or less than one-half, were in the public schools. There are no data which show to what extent the remaining half enjoy educational advantages, or whether they enjoy any. According to the census reports there were in 1850, 33,757 white adults in the state, who could neither read nor write. In 1860 the class of illiterates had increased to 37,605.

The census reports 89 newspapers, published in the state, which have a circulation of 91,165. Of these there were 9 dailies, 2 tri-weeklies, 2 semi-weeklies and 76 weeklies.

Counties.—Alabama is divided into the following 68 counties: Autauga, Baker, Baldwin, Barbour, Benton, Bibb, Blount, Bullock, Butler, Calhoun, Chambers, Cherokee, Choctaw, Clarke, Clay, Cleburne, Coffee, Colbert, Conecuh, Coosa, Covington, Crenshaw, Dale, Dallas, De Kalb Elmore, Escambia, Etowah, Fayette, Franklin, Geneva, Greene, Hale, Henry, Jackson, Jefferson, Lauderdale, Lawrence, Lee, Limestone, Lowndes, Macon, Madison, Marengo, Marion, Marshall, Mobile, Monroe, Montgomery, Morgan, Perry, Pickens, Pike Randolph, Russell, Sanford, Shelby, St. Clair, Sumter, Talladega, Tallapoosa, Tuscaloosa, Walker, Washington, Wilcox, Winston. The city of Montgomery, on the Alabama R., is the capital of the state.

Alamance, co. in N. C., N. central part. Area, about 500 sq. mls. Pop. in 1860, 11,852; in 1870, 11,874. It is drained by the Haw R. and its tributary Alamance Cr. The surface is undulating, the soil fertile. Graham is the co. seat. Agr. productions in 1870: Tobacco, 155,570 lbs.; wheat, 86,264 bush.; rye, 2,243 bush.; Indian-corn, 177,772 bush.; oats, 66,274 bush.; Irish pot's 13,444 bush.; sweet pot's, 11,451 bush.; butter, 84,308 lbs.; hay, 1,877 tons Cash value of farms, $772,999. Total, estimated, value of all farm productions, including additions to stock, etc., $809,915. Value of manufactures, $631,075.

Alamance Creek, a small tributary of the Haw R., in the above co.

Alameda, co. in Cal., W. part. Area, 820 sq. mls. Pop., 24,237; in 1860, 8,927. It extends from the shore of San Francisco Bay, in the W., to the crest of the Monte Diablo Range. The surface is nearly equally divided between mountains, valleys and plains. The Contra Costa Range traverses the co. parallel to the Monte Diablo. The principal streams are Alameda, San Leandro, San Antonio and Temescal

creeks, which empty into the Bay of San Francisco. The San Francisco & Alameda R. R. passes through the co. from its S. W. corner, at the mouth of San Leandro Cr. to Hayward, near the Contra Costa Range. The Oakland & San Francisco R. R. begins on a pier, extending 3,500 feet into the bay, runs S. E. and connects with the Alameda road. The soil of the valley is a deep, black loam, and is very rich, while the hilly sections are less fertile. The co. is well cultivated, particularly the W. part, which consists of continuous gardens, orchards and grain fields. An abundance of salt is collected on the land overflowed by the bay. San Leandro is the co. seat. Agr. productions in 1870: Wool, 138,965 lbs.; wheat, 854,888 bush.; Indian-corn, 27,288 bush.; oats, 69,080 bush.; Irish pot's, 114,053 bush.; sweet pot's, 2,205 bush.; butter, 198,910 lbs., hay, 23,464 tons. Cash value of farms, $16,747,770. Total, estimated, value of all farm productions, including additions to stock, etc., $2,310,062. Value of manufactures, $1,163,914.

ALASKA.—*Position.*—According to the treaty with Russia, concluded in 1867, Alaska may be said to extend from the Diomede islands in Behring Straits, in N. lat. 65°, W. long. 168° 50′ eastward along the shore of the Arctic Ocean to W. long. 143°, N. lat. 69° 30′; and from the Diomede islands southward to N. lat. 50°, W. long. 168°, thence eastward to the 143d meridian. It is a peninsula, occupying the extreme northwestern portion of North America, in area 577,390 sq. mls. The shore line is estimated to be 7,860 statute mls.

Surface.—The surface of Alaska is broken and mountainous. It is traversed by the most northern range of the Rocky Mts., and a large number of smaller chains intersect it in all directions. Most of the mountains do not rise above three thousand feet in height, but several greatly exceed this. Mount Fairweather rises to 14,768 feet in height, and the volcanoes, Mt. St. Elias, 14,968 feet and Illamano 12,066 feet, rank among the loftiest peaks of the continent. But little of the country offers land suitable for agriculture, the greater part being rocky and sterile, or else swampy.

Rivers.—The principal river of Alaska is the Yukon or Kwitchpak. It enters Behring Sea between 64° and 65°, and is navigable for steamboats for near a thousand miles from its mouth. Coppermine, R., also navigable, has its mouth about lat. 60°. It is not far from Mt. St. Elias. The Steekin or St. Francis falls into the sea about 56° N. lat. In the lower part of its course it is navigable for about 50 miles. At that distance from the sea it forms cataracts and rapids, above which it again becomes navigable.

Climate and Productions.—A warm ocean current flows along the south coast of Alaska, very materially modifying the climate from that in the same latitude on the eastern coast of the continent. At Sitka the thermometer rarely falls below zero, the mean temperature being about 44° Fah. The warm and moist sea air meeting with a cold current from the mountains causes frequent fogs and rains along the southern coast. The average rainfall is between 80 and 90 inches annually, the months of September and October being especially wet. It is said that about 250 days in the year are cloudy and rainy. In the northern part of the peninsula this influence is not felt, but as this portion lies within the Arctic circle, the climate is intensely cold, and the brief summer does not suffice to thaw the frozen soil.

A heavy growth of timber covers the soil on the southern sea-board, lofty trees clothing the mountains to a height of 2,500 or 3,000 feet. The forests consist of Sitka spruce, yellow cedar, fir, hemlock, larch, and kindred species. In the more northern districts the soil is barren. Owing to the constant moisture the cereals do not ripen, the potatoes are small and watery, and garden vegetables yield but moderately. Cranberries and salmon berries grow wild.

The wealth of Alaska is in its furs and fisheries. The latter include cod and mackerel, the former in great abundance. Seals, bear, deer, wolves, and other wild animals are numerous on the shores and in the interior. The seals afford a profitable source of revenue in their oil and skins, but the land animals are little hunted by the whites, owing to the impassable nature of the soil.

Population.—The Indians of Alaska include the Eskimo along the northern shore, and the Kolusch and Kenai along the southern. The white inhabitants, exclusive of the military, numbered, in 1870, 451 souls. They are principally engaged in the fisheries and fur trade. The natives are without ambition, and have been contaminated by the intemperate and depraved habits of many of the white residents. Sitka, on the island of New Archangel, is the principal settlement.

History.—Alaska was discovered by the navigator Vitus Behring in 1741, from whom are named Behring Straits and Behring Sea. He took possession of it for the Russian government, in whose employ he was at the time. In 1778 Captain Cook sailed along the western coast as far north as Icy Cape, in lat. 70° 20′ N. In the year 1799 the region was granted to the Russian-American Trading Company, who established posts at Sitka and elsewhere. Propositions for its sale to the U. S. were made in 1866, and the purchase was effected the following year for $7,200,000 in gold. Our government took formal possession in October, 1867, since which date it has been under the charge of our military authorities stationed at Sitka.

Albany, co. in N. Y., E. part. Area, 485 sq. mls. Pop., 133,052; in 1860, 113,917. It borders in the E. on the Hudson R., in the N. partly on the Mohawk R., and is drained by the Catskill and Normanskill, which empty into the Hudson. The surface is undulating in the E. part; but hilly and broken in the N. and W. The Helderberg Mts. trend from N. to S. near the W. border. The soil differs much in fertility. The more elevated parts are sandy, and often quite sterile; the valleys are productive. The

co. is traversed by the N. Y. Cen. R. R., the Rensselaer & Saratoga R. R., and the Albany & Susquehanna R. R. The Erie Canal and the Champlain Canal terminate in the N. E. part. The city of Albany is the co. seat. Agr. productions in 1870: wheat, 14,859 bush.; rye, 120,535 bush.; Indian-corn, 165,350 bush.; oats, 784,146 bush.; Irish pot's, 637,058 bush.; butter, 1,142,783 lbs.; hay, 115,655 tons. Cash value of farms, $22,382,731. Total, estimated, value of all farm productions, including additions to stock, etc., $4,104,540. Value of manufactures, $24,785,921.

Albany, co. in Wyo., E. part. Area, about 8,500 sq. mls. Pop., 2,021. The co. extends through the entire width of the territory from N. to S., and is intersected by the N. Platte R. and the Laramie R. The Black Hills and the Laramie Plains occupy the S. part of the co.; the N. part is hilly and includes the sources of the two forks of the Shyenne R. Several gold mines are worked in the valley of the Platte R. Laramie is the co. seat. Agr. productions in 1870: Hay, 2,970 tons. Cash value of farms, $8,567. Total, estimated, value of all farm productions, including additions to stock, etc., $29,700. Value of manufactures, $129,050.

***Albany,** p. v. in Dougherty co., Ga., on Flint R. and Atlantic & Gulf R. R., 144 mls. S. W. of Milledgeville, and on the Southwestern R. R., 23 mls. from Smithville. The Brunswick & Albany R. Albany, tn. in Carroll co., N. H. Pop., 339.

***Albany,** co. seat of Albany co., N. Y., and capital of the state, on the right bank of the Hudson river, 142 mls. from New York, is the eastern terminus of the Erie Canal, the N. Y. Cen. R. R., and the Albany & Susquehanna R. R.; the northern of the Hudson River R. R.; the western of the Boston & Albany R. R., and the southern of the Rensselaer & Saratoga R. R. These facilities give it an extensive commerce with the ports on the great lakes and the Atlantic. It is the third largest lumber market in the United States. The population in 1870 was 69,422, of whom 47,215 were natives of the U. S., and 22,207 natives of foreign countries, including 1,038 British-Americans, 149 Frenchmen, 5,168 Germans, 1,572 Englishmen, 13,276 Irish, 427 Scotch, and 378 Dutch. Nineteen papers are published in the city, of which eight are dailies The greater part of the city is built upon rapidly rising ground, many of the streets being from 200 to 300 feet above the level of the river. Of the public buildings the more prominent are the Capitol, State Normal School, Dudley Astronomical Observatory, Albany Medical College, the State Hall, the City Hall, and the Roman Catholic Cathedral, the latter being one of the finest in the U. S. The State Library has nearly 100,000 volumes, well selected and catalogued, and the State Agricultural rooms contain very complete collections of the natural history of the state. The origin of the city dates from 1623, when the Dutch first settled the site. It passed into the possession of the English in 1664, and was chartered in 1686. (*See* App. No 2.)

Allegan, co. in Mich., W. S. W. part. Area, 840 sq. mls. Pop., 32,105; in 1860, 16,087. The surface is undulating. A large part consists of sandy tracts, but the bottom lands, along the river courses, of a deep, black mould, which is of the greatest fertility. The co. is drained by the Kalamazoo R. and its tributaries. Extensive forests, consisting chiefly of pine trees, yield large quantities of lumber. Agr. productions in 1870: Wheat, 238,243 bush.; rye, 3,775 bush.; Indian-corn, 376,974 bush; oats, 205,219 bush.; wool, 129,223 lbs.; Irish pot's, 267,795 bush.; butter, 476,065 lbs. Cash value of farms, $8,734,527. Total, estimated, value of all farm productions, including additions to stock, $1,880,755. Value of manufactures, $2,264,451. Allegan is the co. seat.

Allegan, tn. in Allegan co., Mich. Pop., 3,642.

***Allegan,** p. v. in the above tn. and the co. seat, on the Kalamazoo R., 130 mls W. of Lansing. It has many saw-mills and exports large quantities of lumber. Small boats ascend the Kalamazoo to this place. It lies at junction of the Michigan & Lake Shore R. R. and the Kalmazoo Div. of the Michigan Southern R. R., 24½ mls. N. W. of Kalmazoo. Pop., 2,374. Two newspapers.

Allegany, co. in N. Y., S. W. part. Area, 1,050 sq. mls. Pop., 40,814; in 1860, 41,881. The co. borders on Pennsylvania, and consists chiefly of table-lands and hills. The mean height above the sea level exceeds 1,000 feet. The Genesee R., which drains it, flows through a wide and fertile valley. The co. is crossed by the Genesee Valley Canal and the Erie R. R. Angelica and Belmont are the co. seats. Agr. productions in 1870: Wool, 410,168 lbs.; wheat, 115,721 bush.; rye, 16,434 bush.; Indian-corn, 135,850 bush.; oats, 800,600 bush.; Irish pot's, 384,687 bush.; maple sugar, 492,568 lbs.; cheese, 220,880 lbs.; butter, 1,908,721 lbs.; hay, 134,797 tons. Cash value of farms, $18,232,213. Total, estimated, value of all farm productions, including additions to stock, etc., $4,319,981. Value of manufactures, $3,005,737.

Allegany, tn. in Cattaraugus co., N. Y. Pop., 2,485.

Allegany, p. v. in the above tn., on the Erie R. R., 3½ mls. from Orleans, and 397¾ mls. from N. Y. Pop., 746.

Allegany, tn. in Montgomery co., Va. Pop., 2,504.

Alleghany, co. in Md.; includes the W. extremity of the state. The N. Fork of the Potomac R. forms the S. boundary. W. Va. bounds this co. on the W., and Pa. on the N. Area, about 800 sq. mls. Pop., 38,536; in 1860, 28,348. The co. is traversed by several ranges of the Alleghany Mts., trending N. N. E. and S. S. W., which are separated by broad and fertile valleys or glades. The chief agricultural products are wheat, corn, oats, potatoes, hay and butter. Large quantities of coal and iron ore are mined. The Baltimore & Ohio R. R. passes through the county. The co. seat is Cumberland. Agr. productions in 1870: Wheat, 70,404 bush.; rye, 45,090 bush.; Indian-corn, 116,062 bush.; oats, 206,589 bush.; Irish pot's, 68,373 bush.; sweet pot's, 100 bush.; butter, 337,639 lbs.; hay, 17,263 tons. Cash value of farms, $4,930,239. Total, estimated, value of all farm productions, including additions to stock, etc., $1,141,418. Value of manufactures, $2,403,046.

Alleghany, co. in N. C., N. W. part. Pop., 3,691; in 1860, 3,590. It extends along the W. slope of the Blue Ridge, and is a part of the valley of the New R., which forms its W. boundary. The E. part is mountainous, the W. part hilly. The soil is of moderate fertility. Gap Civil is the co. seat. Agr. productions in 1870: Wheat, 7,988 bush.; rye, 21,002 bush.; Indian-corn, 43,369 bush.; oats, 21,496 bush.; Irish pot's, 8,779 bush.; sweet pot's, 78 bush.; butter, 65,726 lbs.; hay, 3,078 tons. Cash value of farms, $526,862. Total, estimated, value of all farm productions, including additions to stock, etc., $934,368. Value of manufactures, $40,909.

Alleghany, co. in Pa. Area, 755 sq. mls. Pop., 262,204; in 1860, 178,831. The surface is very hilly and broken; the water-courses flow in deeply cut valleys and ravines. The co. is drained by the Monongahela and Alleghany Rs., which unite at Pittsburgh, and form the Ohio. Youghiogheny, an affluent of the Monongahela R., flows through the S. part. The soil is fertile, and farming is one of the chief occupations. Wheat, rye, corn, oats, pota-

toes, and wool are the chief products. The co. forms part of the great Pennsylvania coal bed, and large quantities of bituminous coal are obtained from the mines, which are chiefly located in the neighborhood of Pittsburgh. This city, the co. seat, is the terminus of several railroads. Agr. productions in 1870: Wheat, 325,331 bush.; rye, 78,372 bush.; oats, 1,111,269 bush.; Indian-corn, 674,916 bush.; Irish pot's, 769,144 bush.; sweet pot's, 860 bush.; butter, 1,223,744 lbs.; hay, 64,730 tons. Cash value of farms, $56,448,818. Total, estimated, value of all farm productions, including additions to stock, etc., $4,443,043. Value of manufactures, $88,789,414.

Alleghany, co. in Va., W. part. Pop., 3,674; in 1860, 6,765. It borders in the W. on W. Va., from which it is separated by the principal chains of the Alleghany Mts. The E. boundary is formed by the Rich Patch Mts. and Potts Mt. The central parts are traversed by the Warm Spring Mts. in the N., and the Peters Mt. in the S. All these mountain ranges trend S. W. and N. E., and inclose broad and picturesque valleys, which have a fertile soil. The Jackson R. traverses the county first from N. to S., and then from W. to E. It receives Potts Creek and Dunlaps Creek from the S. The Cow Pasture R. flows through the E. part. Iron ore occurs in various parts. Covington is the co. seat. Agr. productions in 1870: Wheat, 24,843 bush.; rye, 4,784 bush.; Indian corn, 50,695 bush.; oats, 31,991 bush.; Irish pot's, 4,386 bush.; tobacco, 25,747 lbs.; butter, 40,690 lbs.; hay, 1,219 tons. Cash value of farms, $744,820. Total, estimated, value of all farm productions, including additions to stock, etc., $177,265. Value of manufactures, $75,730.

Alleghany, p. v. in Sierra co., Cal., 8 miles S. of Downieville. Pop., 240.

Alleghany, tn. in Craig co., Va. Pop., 938.

Alleghany Mountains (Allegheny or Alleghany), a series of chains belonging to the Appalachian Mountain System, in Pa., W. Md., and Va. The various ranges, comprised under this general appellation, are parallel to each other, and form a double curve or arc, which in Pa. is concave toward the S. E.; in Va. toward the N. W. The principal chains do not much exceed 3,000 feet in elevation. Between the Susquehanna and the Great Kanawah Rs. they constitute the water-shed which divides the tributaries of the Ohio from the rivers emptying into Chesapeake Bay. Part of the boundary between Va. and W. Va. follows the crest of the Alleghanies. (See Appalachian Mountain System.)

Alleghany River, a large stream which unites at Pittsburgh with the Monongahela R. to form the Ohio. It rises in Potter co., in the N. part of Pa., flows through Cattaraugus co., N. Y., and re-enters Pa., traversing this state in a southerly course. The region which it drains is a broken table-land, and its valley is inclosed between high and often precipitous hills. Connewango Cr., Oil Cr., Tionista Cr., Clarion R., Mahoning Cr., and Loyalhanna R. are its largest tributaries.

Allen, co. in Ky., S. part. Area, 300 sq. mls. Pop., 10,296; in 1860, 9,187. On the S. it is bounded by the Tennessee and on the N. E. by the big Barren R. Trammels Cr. rises in this co., and, with several small tributaries, drains it. The surface is level and the soil but moderately fertile. The co. seat is Scottsville. Agr. productions in 1870: Wheat, 55,844 bush.; rye, 151 bush.; Indian-corn, 390,883 bush.; oats, 96,647 bush.; tobacco, 747, 489 lbs.; Irish pot's, 1,599 bush.; sweet pot's, 1,219 bush.; butter, 133,487 lbs. Cash value of farms, $878,504 Total, estimated, value of all farm productions, including additions to stock, etc., $908,227. Value of manufactures, $81,898.

Allen, co. in Ind., E. N. E part. Area, 638 sq. mls. Pop., 43,494; in 1860, 29,328. It borders on Ohio. The surface is level and the soil of great fertility The St Mary and the St. Joseph Rs. join at Fort Wayne, and form the Maumee, which flows N. W. The larger part of the co. was formerly covered with fine forests, but much ground has been cleared and farming is now extensively carried on. Fort Wayne is the co. seat. Agr. productions in 1870: Wheat, 432,752 bush.; rye, 17,761 bush.; Indian-corn, 273,344 bush.; oats, 212,944 bush.; wool, 106,778 lbs.; Irish pot's, 100,931 bush.; butter, 543,322 lbs.; hay, 28,377 tons. Cash value of farms, $12,696,007. Total, estimated, value of all farm productions, including additions to stock, etc., $1,976,539. Value of manufactures, $6,457,895.

Allen, co. in Kans., S. E. part. Area, about 480 sq. mls. Pop., 7,022; in 1860, 3,082. The surface is rolling and consists mainly of open prairies, which have a fertile soil. The Neosho R. traverses the E. part in a southerly direction, and receives several affluents within the co. Agriculture and stock raising are the principal occupations of the inhabitants. Humboldt, on the Neosho R. is the co. seat. Agr. productions in 1870: Wheat, 27,734 bush.; rye, 290 bush.; Indian-corn, 187,225 bush.; oats, 115,708 bush.; Irish pot's, 23,333 bush.; sweet pot's, 446 bush.; butter, 90,588 lbs.; hay, 9,801 tons. Cash value of farms, $1,412,870. Total, estimated, value of all farm productions, including additions to stock, etc., $435,572. Value of manufactures, $78,573.

Allen, co. in Ohio, W. N. W. part. Area, 405 sq. mls Pop., 23,623; in 1860, 19,185. The surface is generally level. The soil is fertile. Parts of this co. are covered with fine deciduous forests. It is drained by the Auglaize R., its tributary, the Ottowa R., and a number of smaller creeks. The Cincinnati, Hamilton & Dayton R. R. intersects it from N. to S.; the Fort Wayne & Chicago R. R. from E. to W. Wheat, corn, oats, potatoes and hay are the chief products. Lima, on the Ottowa R., is the co. seat. Agr. productions in 1870: Wheat, 315,164 bush.; rye, 21,671 bush.; Indian-corn, 374,017 bush.; oats, 209,269 bush.; Irish pot's,

52,905 bush.; sweet pot's, 2,082 bush.; butter, 466,482 lbs.; hay, 21,173 tons. Cash value of farms, $8,117,216. Total, estimated, value of all farm productions, including additions to stock, etc., $1,565,908. Value of manufactures, $1,092,007.

Amador, co. in Cal., central part. Pop., 9,582. It lies W. of the Sierra Nevada. The Mokelumne R. bounds it on the S., the Cojumnes R. on the N. The eastern part is occupied by the outlying spurs of the Sierra Nevada, and hence is hilly and broken, attaining a mean altitude of from 4,000 to 5,000 feet. The western part is level. All except the lower portions of the co. are heavily timbered, and yield large quantities of valuable lumber. Among the lower foot-hills of the Sierra are some of the richest valleys of the state, which yield large crops of grains and fruits. Higher up in the Sierra are many little grassy savannahs, which afford excellent pasturage. There are several rich gold mines in this co. The metal is found embedded in quartz veins, and hence numerous stamping or crushing mills are constantly being worked. Jackson is the co. seat. Agr. productions in 1870: Wheat, 16,678 bush.; rye, 310 bush.; Indian-corn, 36,760 bush.; oats, 130 bush.; Irish pot's, 9,898 bush.; sweet pot's, 1,060 bush.; butter, 43,700 lbs.; wool, 73,010 lbs.; hay, 5,908 tons. Cash value of farms, $486,400. Total, estimated, value of all farm productions, including additions to stock, etc., $363,983. Value of manufactures, $1,588,494.

Andrew, co. in Mo., N. W. part. Area, 425 sq. mls. Pop., 15,137; in 1860, 11,850. It is bounded on the S. W. by the Missouri R., and on the W. by the Nodaway R. The little Platte R. traverses it from N. to S. The surface is rolling and the soil is fertile; particularly the bottom of the Missouri R. Savannah is the co. seat. Agr. productions for 1870: Wheat, 107,325 bush.; rye, 5,982 bush.; Indian-corn, 1,086,375 bush.; oats, 178,332 bush.; Irish pot's, 102,967 bush.; sweet pot's, 1,529 bush.; tobacco, 5,941 lbs.; butter, 187,663 lbs.; hay, 8,456 tons. Cash value of farms, $6,356,656. Total, estimated, value of all farm productions, including additions to stock, etc., $1,479,071. Value of manufactures, $300,964.

*__Andrew,__ p. v. and the co. seat of Jackson co., Iowa, N. of the Maquoketa R., about 12 mls. from the Mississippi, and 8 mls. N. E. of the village of Maquoketa. Pop., 352. One newspaper.

Andrew Chapel, p. o. in Madison co., Tenn.

Andrews, p. v. in Morrow co., Ohio, 6 mls. N. E. of Mt. Gilead, the co. seat.

Andrews', p. o. in Spottsylvania co., Va.

Andrew's Mills, v. in Stephenson co., Ill.

Androscoggin, co. in Me., S. W. part. Area, about 500 sq. mls. Pop., 35,855; in 1860, 29,726. The surface is rolling. The Androscoggin R. traverses the co. from N. to S. Its wide valley contains rich farm lands. The soil is generally very fertile. The co. is well provided with railroads. The Grand Trunk R. R. passes through the S. W. part; the Androscoggin R. R. through the E. part, and the Maine Central through the middle part from S. W. to N. E., connecting the two first-named lines. Wheat, rye, corn, oats, wool and potatoes are the principal products. Auburn, on the Androcroggin R., is the co. seat. Agr. productions in 1870: Wheat, 7,800 bush.; rye, 3,787 bush.; Indian-corn, 72,344 bush.; oats, 96,413 bush.; Irish pot's, 371,391 bush.; butter, 559,213 lbs.; hay, 50,787 tons. Cash value of farms, $6,558,570. Total, estimated, value of all farm productions, including additions to stock, etc., $1,587,089. Value of manufactures, $14,016,816.

Androscoggin River is the outlet of Lake Umbagog, on the boundary between Me. and N. H. It flows S. through Coos co., of the latter state, then turns E., flowing through Oxford and Androscoggin cos., Me., and in its lower course forms the boundary between Cumberland and Sagadahoc cos. It empties, in the last named co., into the Kennebec R., near its mouth. The Androscoggin is not navigable, nor does it receive important tributaries; but it affords an immense amount of water-power.

Appalachian Mountains, the great belt of highlands, occupying the eastern part of the United States, and extending from the shores of the Gulf of St. Lawrence to northern Alabama and Georgia. They are often called Alleghany Mts., but improperly, for this name applies only to some of the numerous mountain ranges of which the system is composed.

The Appalachian system determines the direction of the Atlantic coast line, which in general runs parallel to the inflections of its chains with remarkable regularity. It is composed of a series of uniform folds or chains, often presenting the appearance of continuous walls, and but seldom varied by any peaks or crags. The extreme northern and southern portions, however, are diversified and much complicated in their structure. On the E. it is bounded by the coast plain, which intervenes between its base and the shore line, varying in width from about 50 mls. in New England to 250 mls. in North and South Carolina. In the W. it expands into an undulating table-land, gently descending toward the great central plain of the Mississippi and St. Lawrence, and occupying large portions of Ohio, Kentucky, Tennessee and Alabama. Thus the traveler who traverses the Appalachians from the Atlantic to the Interior first encounters a low plain gradually ascending to the foot of the mountains, then a belt of chains and ridges with intervening valleys, and at last rolling plateaus slightly inclined toward the N. W., and cut with deep transverse valleys.

A conspicuous feature of the Appalachians is the large central valley, which passes through the entire system from N. to S., called by Mr. Rogers, formerly state geologist of Pa., the Great Appalachian Valley. In the N. it is occupied by Lake Champlain and the Hudson R.; in Pa. it bears the name of Cumberland Valley; in Va. it is the Shenandoah Valley, and still further S. it is the Valley of East Tennessee, which is drained by the upper course of the Tennessee R. The chain which borders this great valley on the E. extends without much interruption from Vermont to Alabama. In Vermont it bears the name of Green Mts.; in New York, that of the Highlands; in Pennsylvania and Maryland, that of the South Mts.; in Virginia, the Blue Ridge; and on the boundary of N. Carolina and Tennessee it is known by local names, as the Iron Mts., Smoky Mts., and Unaka Range. The highest ranges of the entire Appalachian system are outlying groups of this great chain. These are the White Mts. of N. H., situated E. of the Green Mts., and separated from them by the valley of the Connecticut R.; and the Blue Ridge of N. C., which inosculates with the Virginia Blue Ridge, and from which a series of spurs extend toward the Great Unaka Range, such as the lofty Black Mts. and others.

W. and N. W. of the great valley there extends a zone of chains, separated by narrow valleys, which zone greatly varies in width in the different parts of the system and the number of chains which compose it. To this zone belong the Adirondack Mts. of N. Y.; the numerous ranges of Central Pa., as the Blue Mts., Tuscarora Mts., Alleghany Mts., Laurel Ridge, Chestnut Ridge and many others of Pennsylvania; the Shenandoah Mts., Great North Mts., Alleghany Mts., Greenbrier Mts., Gauley Mts., etc., of Virginia; and lastly, the Cumberland Mts. or Plateau of Kentucky and Tennessee.

The following are the principal peaks of the Appalachians: 1. In the White Mts. of N. H.: Mt. Washington, 6,288 ft.; Mt. Adams, 5,794 ft.; Mt. Jefferson, 5,714 ft.; Mt. Clay, 5,553 ft., and Mt. Madison, 5,365 ft. 2. In the Green Mts. of Vt.: Equinox, Mt., 3,872 ft.; Shrewsbury Pk., 3,845 ft.; Killington Pk., 4,221 ft.; Mt. Mansfield, 4,430 ft.; Camel Hump, 4,088 ft.; Mt. Lincoln, 4,078 ft. 3. In the Adirondacks: Mt. Tahawus or Mt. Marcy, 5,379 ft. 4. In the Blue Ridge of Va.: Peaks of Otter, nearly 4,000 ft. 5. In the Blue Ridge of N. C.: High Pinnacle, 5,701 ft.; Rocky Knobs, 5,080 ft.; Gray Beard, 5,448 ft. 6. In the Black Mts. of N. C.: Mt. Mitchell, 6,582 ft.; Mt. Gibbs, 6,591 ft.; Sugarloaf, 6,403 ft.; Black Dome or Mitchell's Pk. or Clingman's Pk., 6,707 ft.; Balsam Cone or Mt. Guyot, 6,671 ft.; Mt. Sandoz, 6,619 ft.; Rocky Tail Pk., 6,488 ft.; Bowlin's Pyramid, 6,348 ft., and Blackstock Knob, 6,380 ft.

Notwithstanding the uniformity and continuity of the Appalachian chains, gaps and depressions are numerous and render the system on the whole easy of access, so that it was possible to construct several railroads across the different ridges without encountering very serious engineering difficulties. But there is only one valley which cuts through the entire system from the coast plain to the interior.

This is the valley of the Hudson R. with its two branches, the valley of Lake Champlain and of the Mohawk R. A rise of the ocean of but 140 ft. would join the Bay of New York with the St. Lawrence R., fill up the valley of the Hudson and Champlain and convert New England with New Brunswick into an island; and a further rise of 500 ft. would separate the whole vast system from the continent and transform it into three separate islands: the New England region, the Adirondacks, and the Southern region.

The mineral wealth of the Appalachians is very great. Productive beds of bituminous coal occupy the entire middle section of Pa., W. of the Alleghany Mts., and extend to central Ohio and the banks of the Tennessee R. in Alabama. Eastern Pennsylvania contains rich anthracite coal mines, and the mountain chain east of the Great Valley abounds in magnetic and other excellent iron ores. Zinc ores are mined in Sussex co., N. J., and Northampton co., Pa. Gold is found in Nova Scotia, Virginia, the Carolinas, Tennessee, Alabama and Georgia. Valuable copper deposits occur in the states of Virginia, Carolina, Georgia and Tennessee. Petroleum, the product of the decomposition of subterranean organic substances, seems to exist in inexhaustible quantities in Western Pennsylvania; and building materials, such as granite, different kinds of marble, sandstone, etc., are found everywhere.

Apalachicola Bay, an extension of the Gulf of Mexico on the S. coast of Florida, is bounded by the long and low island of St. George.

Apalachicola River, formed by the confluence of the Flint and Chattahoochie Rs., in Florida, flows in a S. direction between Jackson and Calhoun cos. on the W., and Gadsden, Liberty and Franklin cos. on the E. It is navigable throughout its whole length.

ARIZONA, a territory in the south-western part of the United States, is bounded on the N. by Utah and Nevada; on the E. by New Mexico; on the W. by California and Nevada, and on the S. by the republic of Mexico. It extends from 109° to 114° 47′ 6½″ long. W. of Greenwich, and from 31° 19′ 24″ to 37° N. lat. The Colorado R. forms part of the western boundary. Arizona has an area of 113,916 sq. mls., or 72,906,240 acres, being nearly three times as large as the state of New York.

The surface of Arizona consists of elevated table-lands, which are crossed by mountain ranges trending from N. W. to S. E. nearly parallel to each other. The northern part of the territory, being occupied by the White Mesa, has probably an average elevation above the sea of 8,000 feet. It is an arid region, cut up by deep canyons, and joins the Colorado Plateau further S., upon which rise the isolated and lofty peaks known as Mt. Kendrick, San Francisco Mt., Mt. Sitgreaves, and Bill Williams Mts. From this cluster of peaks extend the Mogollon Mts. in a south-easterly direction, and join the Sierra Blanca or White Mts. of New Mexico. The next range consists of the San Francisco Mts., lying W. of the river of the same name, which joins the Rio Salado, and the Pinaleño Mts., which are intersected by the valley of the Gila R. The north-western section of Arizona is traversed by the Aquarius Mts., the Cerbeat Range, the Black Mts., and the Mohave Mts. The Granite Mts., Eagle Tail Mts., and Dome Mts. occupy the region between the lower course of the Gila R. and the Bill Williams Fork. The Peloncello Mts. lie partly in New Mexico and partly in south-eastern Arizona. This is a fine range, abounding in passes. The most northerly is Doubtful Pass, and eight mls. S. is Stean's Pass. In leaving the Peloncello Mts. the traveler crosses the Valle de Sauz (or Willow Valley), which is traversed by the Rio San Domingo, and then encounters the Chiricahui Mts., which form a southerly prolongation of the Pinaleño Mts., and appear also to be continuous with the Sierra Madre proper of Mexico. The next two ranges he meets are the Sierra Calitro and the Sierra Santa Catarina, which are separated one from another by the Valley of the Rio San Pedro. The last range is succeeded by an extensive plateau, parts of which are covered with salt incrustations, and beyond this follow lower chains, as the Ajo Mts., Cabeza Prieta Mts., and Sierra de la Gila.

Rivers.—The principal river is the Colorado of the West, which traverses the northern part of the Territory, and then forms the western boundary, separating it from Nevada, California and the Mexican state of Lower California. This large stream flows within Arizona through the famous Grand Canyon, a stupendous fissure with perpendicular walls rising from 500 to 1,500 feet. The Black Canyon, below Callville, lies partly in Nevada and partly in Arizona. It resembles the Grand Canyon, though inferior in length as well as in depth. The other rivers of the Territory are tributaries of the Colorado. The Flax R., or Little Colorado, traverses the lofty plateau which occupies the north-eastern section, and flows parallel to the Mogollon Mts. It rises in the White Mts., near the boundary of New Mexico, and receives the Zuñi R., the Puerco of the West, the Cottonwood Fork, and numerous small streams, which drain the eastern slopes of the Mogollon Range. The lower course of the Flax R. passes through a deep canyon, which joins the Grand Canyon of the parent stream. The Bill Williams Fork, another affluent of the Colorado, rises in the Aquarious Mts., flows S. to the junction with the Santa Maria R., and then W. The Gila R. rises in New Mexico, and pursues a general westerly direction to its junction with the Colorado, near Arizona City. Its southern affluents are the Rio San Domingo, the Rio San Pedro, which receives the Aravaypa, and the Rio Santa Cruz. Its northern are the Rio Natroso, Rio Prieto, Rio Bonito, Rio San Carlos, and the Rio Salado, or Rio San Francisco. The last named is the largest of these streams, and with its numerous tributaries drains a large area of central Arizona west of the Mogollon Mts. Turkey Cr. and the Rio Hassava, which flow through valleys west of the San Francisco, terminate in the arid plains, and do not reach the Gila. None of these rivers are navigable, but they are important, as the country depends upon their waters for irrigation and mining.

Climate, Soil, and Vegetation.—The climate of Arizona is salubrious and pleasant, except in the lower sections near the Gila and Colorado rivers, where the summers are often excessively hot. The rain-falls occur in June, July, August and September. During the rest of the year the necessary supply of water for farming has to be drawn from the numerous streams, which are fed by never-failing springs and the melting snow in the mountains.

Extensive tracts, adapted to agriculture, are found in all the river valleys. Such are several sections of the valley of the Colorado. The

valley of the San Pedro, more than a hundred miles in length, is especially productive. Timber, though not abundant, is found in sufficient quantities for home consumption.

In the northern part of the territory extensive pine forests cover the principal mountain chains; and the river bottoms and valleys everywhere furnish mesquite, cottonwood, walnut, oak, elm, ash, etc. Many sections of the table-lands produce an abundance of nutritive grasses, and are well adapted to grazing.

Population.—Arizona was organized as a territory by act of Congress of February 24, 1863; and it had in 1870 a population of 9,658, of whom 3,849 were natives of the United States, and 5,809 born in foreign countries; mostly in Mexico (4,339). The males, 6,887 in number, greatly exceed the females, 2,771. The number of whites was 9,581; of colored persons, 26; of Chinese, 20; and of taxed Indians, 31. Those Indians who maintain tribal relations, and are not taxed, are estimated to number 32,052, of whom 27,700 lead the life of nomads, and 4,352 live on reservations and at agencies. The Maricopas, Yumas, Papagos and Pimas belong to the latter class and live in villages, producing large crops of wheat, corn, melons and beans. They are friendly and hospitable, whereas the nomadic Apaches are hostile, and refuse reconciliation with the whites. Their depredations have seriously retarded the growth of the settlements.

In agriculture there were engaged 1,285 persons; in professional and personal services, 3,115; in trade and transportation, 591; and in manufactures and mechanical and mining industries, 1,093. Thus the aggregate of persons following some useful occupation amounted to 6,030 persons, a very large proportion in the total number of inhabitants.

Agriculture is carried on to a very limited extent. There were in 1870 but 14,585 acres of improved land, and 7,222 acres of unimproved land in all the farms of the territory; and the cash value of farms amounted to $161,340, or $7.40 per acre. The estimated value of farm productions, including betterments, was $277,998. The productions included 27,052 bush. of spring wheat, 32,041 bush. of corn, 55,077 bush. of barley, 3,417 bush. of peas and beans, and 14,500 lbs. of cheese. The value of all live stock was $143,996. There were 335 horses, 401 mules and asses, 938 milch cows, 587 working oxen, 3,607 other cattle, 803 sheep and 720 swine.

Manufactures—The manufacturing industry of Arizona is inconsiderable. There were 18 manufacturing establishments, employing 84 hands and 5 steam-engines, with 80 horse-power, turning out products to the value of $185,410, which consisted chiefly of flour, feed, lumber and cheese.

Mining.—The mineral wealth of Arizona is unquestionably very great, and embraces gold, silver, copper, lead, iron, tin, nickel, platinum, cinnabar and coal. But the unsettled condition of the territory, Indian depredations, and difficulty of access, have thus far prevented the development of this branch of industry. The Hintzelman or Cerro Gordo mine, 24 mls. W. of Tubac, is the most important, and yields rich silver ore, assaying over $1,000 to the ton. The Mowry mine, near the Lanvita valley, within 10 mls. of the Mexican boundary, produces argentiferous galena, impregnated with arsenic. Other mines are the Santa Rita, Salero, Cahuabi, and San Pedro.

There are no railways in Arizona, and the roads in the wet season are very bad. The transportation is chiefly by pack-mules.

Wealth and Taxation.—The true value of real and personal estate was $3,440,791. The assessed value was but $1,410,295, which included $633,355, for real estate, and $871,940 for personal property. The taxation, not national, amounted to $31,323.

Education.—The number of children between 6 and 21 years of age was, in 1870, 1,923; yet there were no schools in the territory. The legislature of 1871 passed a law setting aside 10 cents on each $100 of taxable property, and gave authority to the several boards and supervisors to levy additional taxes sufficient to maintain a free school in each school district. The governor was made ex-officio superintendent of public instruction, and the judges of probate were made county superintendents.

One newspaper is published in each of the following towns: Tucson, Arizona city and Prescott.

Government.—The territory was organized February 24, 1863, and the executive branch consists of a Governor, Secretary of State, a Treasurer and Receiver-General, and an Auditor.

The judicial power is vested in a Supreme Court and Probate Courts. The Chief Justice and the two Associate Judges composing the Supreme Court are appointed by the President. This court holds one session annually at Tucson, commencing the fourth Monday of October.

Arizona is divided into the following five counties: Mohave, Pah Ute, Pima, Yavapai and Yuma. Tucson is the capital of the territory.

Arkansas, tn. in Arkansas co., Ark. Pop., 683.

ARKANSAS is bounded on the N. by Mo., on the W. by the Ind. Ter. and Tex., and on the S. by La. The E. boundary is formed by the Mississippi R., which separates it from Miss. and Tenn. It extends from 33° N. lat. to 36° 30′ N. lat., and from 89° 32′ W. long. to 94° 38′ W. long. The greatest width from N. to S. is 241 mls. and from E. to W. 285 mls. It has an area of 52,198 sq. mls. or 33,406,720 acres.

History.—Arkansas, so called from the Akansa tribe of Indians, was originally embraced in the territory of Louisiana, and was purchased in 1803 from the French government by Thomas Jefferson. In 1812 it was separated from the parent colony and organized under territorial government. It was admitted as a state in 1836.

Surface.—The E. part of the state, embracing a portion of the Mississippi Valley, consists chiefly of a rich alluvial plain, which is much cut up by "sloughs," lagoons, and swamps. About 100 mls. from the Mississippi R. the ground begins to rise, and toward the W. becomes hilly and broken. The Ozark Mts. occupy the N. W. part of the state. The various ranges of hills, which trend E. and W., N. of the Arkansas R. valley, are collectively called the Boston Mts. The Petit Jean range accompanies the southern bank of the Arkansas R. The Crowley Ridge enters the state from the N. and forms the water-shed between the affluents of the St. Francis R. and those of the Cache R. It terminates 4 mls. W. of Helena in Phillips co.

Minerals and Mineral Springs.—Arkansas possesses an abundance of mineral resources.

Zinc ores are found in Lawrence, Marion, and Arkansas cos., and iron in nearly all the hilly portions of the state. Lead is also abundant, and copper occurs in Carroll, Fulton, Independence, Izard, Lawrence, Marion and Pulaski cos. A ridge in Hot Springs co. is made up of the most beautiful variety of novaculite, or Arkansas whetstone. It is of very fine texture, consists mainly of pure silica, and is considered the best in the world. Porcelain earth or kaolin has been discovered in some wells in Pulaski co., 18 feet below the general surface of the country, and is believed to extend over a considerable area. Granite, marble, freestone and gypsum are abundant, and coal, both bituminous and anthracite, is found in many localities.

Arkansas abounds in mineral springs. Sulphur and chalybeate springs occur in Washington, Van Buren and Crawford cos. The celebrated Hot Springs in the county, which derives from them its name, are among the most remarkable phenomena of our country. They issue from a steep bank nearly 200 feet above the Hot Spring Cr., more than 100 in number, and of temperatures varying from 140° to 150°. A chemical analysis in D. D. Owen's report proves them to contain free carbonic acid, magnesia, soda, potash, chlorine and sulphuric acid. Their medical value, however, is chiefly attributed to their high temperature.

The mammoth spring in Fulton co. issues from a large cavernous opening, 40 yards in circumference, and boils up with a constant flow, at the rate of 8,000 barrels per minute. It affords valuable water-power. The water contains such a large amount of carbonic acid, that its surface is in a continuous state of effervescence or bubbling. The temperature is 60° Fahr.

Rivers.—The numerous streams of Arkansas belong to the system of the Mississippi R., which washes the eastern shore for a distance of more than 400 mls. The Arkansas R. intersects the state from W. to E. and empties into the Mississippi near Napoleon. It is navigable during the greater part of the year. It has been leveed on both banks from Pine Bluff, in Jefferson co., to its mouth; and the Mississippi has been leveed thence southward beyond the limits of the state. The soil thus reclaimed is exceedingly rich and has become very valuable. The affluents of the Arkansas in this state are, Mulberry R., Big Piney R., Illinois Bayou, Bayou Metoe and Fourche la Fave.

The White R. rises in the Ozark Mts. in Madison co., flows through southern Missouri, re-enters Arkansas in Carroll co., and then flows S. E. to Elizabeth in Jackson co. Here it turns to the S. and at last divides into two branches, sending one into the Arkansas and the other into the Mississippi. Its course is very crooked. The Buffalo Fork and Little Red R. enter into the White R. from the W., the Black R., Cache R. and Bayou Deview from the N. The St. Francis R. enters the state from the N., flows through the north-eastern counties and empties into the Mississippi, about a mile above the village of Sterling.

The Red R. flows through south-western Arkansas. The Washita R., its tributary, the Saline R., and the Bayou Bartholemew are the largest streams which drain the state S. of the Arkansas R. Nearly all the rivers mentioned above are navigable for considerable distances, except during the summer months, when they become greatly reduced by excessive evaporation.

Climate.—Arkansas has a mild climate. The mean annual temperature in the northern part is about 58°, in the middle 61° and in the southern 64°. Observations near Little Rock give the following results: Mean annual temperature, 62°, 66; mean temperature of winter, 45°, 82 and of summer, 79°, 66; highest temperature observed, 99°, and lowest temperature observed, 8°. The north-western part of the state being the most elevated part, has also the coolest climate, the south-eastern the hottest. The low alluvial bottom lands of the Mississippi have an unhealthy climate, while the far largest portion of the state is free from endemic diseases. The rainfall varies from 55 inches in the south-eastern parts, to 50 inches in the middle, and 40 inches in the north-western.

Vegetation.—Arkansas is mostly covered with pine forests, although there are some prairies of considerable extent. Grand Prairie, between the Arkansas and White Rs., is nearly 100 mls. long and 30 mls. broad. The forests of the hilly parts of the state consist of oak, maples, hickory and other species of deciduous trees, while the large rivers are fringed with broad belts of dense cotton-wood, cypress and gum trees. In the southern parts of the state pine forests predominate.

Animals.—Arkansas still abounds in wild animals. The bear, deer, wolf, wild cat, raccoon, etc., occur frequently in the forests. The buffalo, herds of which formerly roamed over the prairies, is now but rarely met with. The rattle-snake and the moccasin snake are quite common. The streams abound in fish.

Population.—In 1870 Arkansas had a population of 484,471. The density of population was, therefore, 9.28 inhabitants to the sq. mi. The following table gives the total population from decade to decade:

		Inc. in per cent.
1820	14,255	
1830	30,388	112.91
1840	97,574	221.09
1850	209,897	115.12
1860	435,450	107.46
1870	484,471	11.26

The greatest increase took place during the decade from 1830 to 1840; the smallest during the last decade, which includes the four years of the civil war.

Of the total population there were 362,115 whites, and 122,169 colored; or 74.74 per cent. of the former, and 25.26 per cent. of the latter. By far the largest part of the population was native born, to wit.: 479,445; and only 5,026 were foreign born, of whom 342 were born in British America; 98 in China; 55 in Denmark; 236 in France; 1,562 in Germany; 526 in England; 1,423 in Ireland; 156 in Scotland; 71 in Holland; 30 in Italy; 134 in Sweden, and 104 in Switzerland. The number of the blind was 333; of the deaf and dumb, 265; of the insane, 161, and of the idiotic, 289

Occupations.—The population over 10 years of age numbered 341,737, and 135,949 of these were engaged in the various useful occupations, to wit: in agriculture, 109,310; in professional and personal services, 14,877; in trade and transportation, 5,491, and in manufactures, and mechanical and mining pursuits, 6,271.

Agriculture.—Of the total area of the state (33,406,720 acres) only 7,597,295 acres, or 22.7 per cent., were in farms, showing a decrease since 1860 of 1,886,410 acres. The improved lands amounted to 1,859,821 acres, and the woodland and unimproved land in farms to 5,737,475 acres. The number of farms, however, has increased from 39,004 in 1860, to 49,424 in 1870, showing that the average size of farms is considerably less at present than it was before the emancipation of the slaves.

The cash value of farms in 1870 was $40,029,698, or $5.28 per acre, and the estimated value of all farm productions, including additions to stock, was $40,701,699.

The staple product of the state is cotton which yielded, in 1860, 367,393 bales, and in 1870 247,968 bales. The other agricultural products were: Indian-corn, 13,382,145 bush.; wheat, 741,736 bush.; rye, 27,645 bush.; oats, 528,777 bush.; Irish pot's, 422,196 bush.; sweet pot's, 890,631

bush.; rice, 73,021 lbs.; tobacco, 594,886 lbs.; wool, 214,784 lbs.; butter, 2,753,931 lbs.; hay, 6,839 tons, and cane sugar, 92 hhds.

The value of live stock was $17,222,566; and of agricultural implements, $2,237,409. There were in the state 92,013 horses; 36,202 mules and asses; 128,950 milch cows; 35,387 working oxen; 193,589 head of other cattle; 161,077 sheep, and 841,129 swine. The value of slaughtered animals was $3,843,923.

Mining.—The Spadra Coal and Iron Company own 1,585 acres of land on the Arkansas R., in Johnson co., underlaid by a bed of superior coal. The company design to erect works for the reduction of the iron ore on their property. The American Zinc Company are in successful operation on a tract of 2,000 acres in Sharp co. They have erected buildings and machinery, and begun to ship zinc and copper ore. The Ouita Coal Company are working a bed of coal in Pope co., 80 mls. from Little Rock. The coal fields of the state are as extensive as those of Pa., and will be a source of wealth, yet awaiting development.

Manufactures.—Arkansas has abundant water-power, cheap labor, and illimitable quantities of the raw material entering into the thousands of manufactured products consumed by a civilized people. But thus far this business pursuit is in its infancy. The census reports 1,079 establishments, which employed 3,206 hands, 256 steam-engines with 6,101 horse-power; and yielding products to the value of $4,629,234. The principal articles were: cotton goods, $22,562; woollen goods, $78,690; curried leather, $40,493; tanned leather, $42,528; machinery, $17,000; cast-iron, $10,000; agricultural implements, $12,000; flour and feed, $1,670,416; sawed lumber, $1,344,403; chewing tobacco, $5,800; cigars, $14,000; bricks and tiles, $41,000.

Internal Improvements and Commerce.—Arkansas has considerable river trade, exporting the surplus of agricultural productions chiefly to New Orleans, and importing the commodities required for home consumption. The large rivers of the state afford over 1,000 mls. of navigable water-ways.

In 1862 Arkansas had 88 mls. of railroads; in 1872, 258 mls. The roads are as follows: The Memphis & Little Rock R. R., from Memphis, Tenn., to Little Rock, 131 mls., is doing a paying business; the Little Rock & Fort Smith R. R., from the capital to the western part of the state, 50 mls. in operation and 60 mls. more graded; the Little Rock, Pine Bluff & New Orleans R. R., 20 mls. of track laid and iron purchased for 40 mls. more; the Mississippi, Ouachita & Red River R. R., from Eunice to Mississippi R., 42 mls. completed and 20 mls. more graded; Arkansas Central R. R., from Helena, on the Mississippi, to Aberdeen, thence to Little Rock, and thence due west, with a branch from Helena to Pine Bluff, 40 mls. completed and 110 mls. remaining under contract; the Kansas City & Fort Smith R. R., from Fort Smith due N., believed to be completed in 1873; the Cairo & Fulton R. R., from Cairo., Ill., to Pocahontas, Jacksonport and Little Rock, and thence S. W. through the state, under contract to be finished to Fulton by Jan. 1, 1874, and the Memphis & Kansas R. R., from Memphis, Tenn., through Jacksonport, Batesville and Yellville to Springfield, Mo., is under contract, and crosses the state from N. E. to S. W., connecting with the two lines above named at Little Rock. The Helena & Iron Mt. R. R. will pass through eastern Arkansas from S. to N., intersecting the Memphis & Little Rock R. R. at Madison.

Wealth and Finances.—The estimated value of real and personal property was in 1850, $39,841,025; in 1860, $219,255,473, and in 1870, $153,394,691. Since 1860 the wealth of the state has diminished $62,861,728, or nearly 29 per cent. The assessed value of real estate in 1870 was $83,102,304, and of personal estate $31,426,539. In 1860 the former was $63,245,740, and the latter $116,956,590. Thus, while the assessed value of real estate was a trifle greater in 1870 than in 1860, the value of personal estate fell off nearly three-fourths during this decade, a decrease mainly due to the abolition of slavery.

The total public debt of Arkansas (not national) was in 1870 (at the end of the month of June), $4,151,152. Of this amount the state debt was $3 459,557; the aggregate debt of the counties, $536,649, and of the towns, cities, etc., $154,946.

Education—According to the census of 1860 there were in Arkansas four colleges with 225 students, but the war interrupted all educational labors, and none of these colleges are now in operation. The constitution provides that the General Assembly shall establish and maintain free schools. It further provides for a State University with an agricultural department. The State Board consists of a State Superintendent and ten District Superintendents. But it seems that the efforts to establish public schools have been thus far but moderately successful. The free school system, however, is attracting notice and meets with favor from the people.

The number of school children in 1869 was estimated at 180,000, about 100,000 of whom were connected with the schools.

The Arkansas Institute for the education of the blind, founded 12 years ago, and the Arkansas Deaf and Mute Institute, founded two years ago, are in successful operation. Both are located at Little Rock.

Government.—The Governor, Lieutenant-Governor, Secretary of State, Auditor, Treasurer, Attorney-General and Superintendent of Public Schools, are chosen by the qualified electors of the state for a term of four years. The House of Representatives consists of 82 members chosen for two years, and the Senate of 24 members chosen for four years. The Legislature meets every two years on the first Monday of January.

All male persons, born in the United States, or naturalized, or having declared their intention to become citizens of the United States, who are 21 years old and upward, shall have resided in the state for 6 months next preceding an election, and are at the time actual residents of the county in which they offer to vote, are electors.

The Supreme Court consists of a Chief Justice and four Associate Justices. It has appellate jurisdiction and the supervision of all inferior courts. It holds annually two terms. The judges of the Supreme Court are appointed by the Governor for 8 years.

The Circuit Courts have original jurisdiction over criminal cases not otherwise provided for by law. The Judges and Attorneys of the District Courts are appointed for four years by the Governor, with the advice and consent of the Senate.

Counties.—Arkansas is divided into the following 64 counties: Arkansas, Ashley, Benton, Boone, Bradley Calhoun, Carroll, Chicot, Clark, Columbia Conway, Craighead, Crawford, Crittenden, Cross, Dallas, Desha, Drew, Franklin, Fulton, Grant, Greene, Hempstead, Hot Springs, Independence, Izard, Jackson, Jefferson, Johnson, Lafayette, Lawrence, Lincoln, Little River, Madison, Marion, Mississippi, Monroe, Montgomery, Nevada, Newton, Ouachita, Perry, Phillips, Pike, Poinsett, Polk, Pope, Prairie, Pulaski, Randolph, St. Francis, Saline, Sarber, Scott, Searcy, Sebastian, Sevier, Sharp, Union, Van Buren, Washington, White, Woodruff, Yell.

Cities and Villages.—Arkansas has but one incorporated city, Little Rock, the state capital, with a population of 12,380; four villages, with more than 1,500 inhabitants, and eight villages with from 500 to 1,500 inhabitants.

Arkansas, co. in Ark., E. part. Area about

1,200 sq. mls. Pop., 8,268; in 1860, 8,844. The surface is low and level, consisting generally of prairies. The rivers are skirted with woods. White R. forms part of the E. boundary. The La Cruez R., a tributary of the latter, traverses the co from N.N.W. to S.S.E. The Arkansas R. flows through the southern part, and receives the Bayou Metoe. The soil is very fertile and the climate warm. De Witt, on the N. bank of the Arkansas R., is the co. seat. Agr. productions in 1870: Wheat, 200 bush.; Indian-corn, 217,450 bush; cotton, 12,315 bales; Irish pot's, 17,327 bush; sweet pot's, 28,598 bush. Cash value of farms, $965,012. Total, estimated, value of all farm productions, including additions to stock, etc., $967,367.

Arkansas City, p. v. in Cowley co., Kans., lies at the junction of the Arkansas R. and White Water Cr., 170 mls. S. W. of Emporia, 280 mls. from Florence. Cattle trade with Tex. One newspaper.

Arkansas Post, p. v. in Arkansas co., Ark., on the N. bank of the Arkansas R., about 13 mls. S. E. of De Witt.

Arkansas River, one of the largest tributaries of the Mississippi, rises in the Rocky Mts., in 39° 23′ N. lat. and 106° 20′ long. W. of Greenwich. It first flows S. in a narrow valley between two mountain chains, west of the Middle Park, in Colorado, and then turns E., passing through the mountains, which extend between the San Luis Park and the South Park. Emerging from the Rocky Mts., it traverses the barren plains of E. Colorado and Kansas. Near Fort Dodge it deflects to the N. as far as Fort Zarab, whence it curves to the S. E., and passes through the N. E. part of Indian Ter. At Fort Smith it enters Arkansas, and divides it into two nearly equal sections, and at last joins the Mississippi near the town of Napoleon, in lat. 33° 22′ N. Its entire length probably exceeds 2,300 mls.; for 600 mls. it is over half a mile wide. During the summer months it is too shallow to be navigable, but during the greater part of the year it floats steamboats for upward of 700 mls. above its mouth. The difference between high and low water is 25 feet.

Armstrong, co. in Pa. Area about 760 sq. mls. Pop., 43,382; in 1860, 35,797. The N. boundary is formed by Bank Cr. and the Alleghany R. The latter passes through the co. from N. to S. Its principal affluents are: Mahoning Cr., Cowanshannonk Cr., Crooked Cr., and Conemaugh R., which forms the S. W. boundary. The surface is broken and hilly. The soil is fertile, particularly in the valleys. The co. embraces a part of the great bituminous coal basin, which extends through W. Pa. and E. Ohio. It also abounds in iron ore and has a number of rolling mills, foundries and bloomeries. The Alleghany Valley R. R. passes along the left bank of the Alleghany R. Kittanning is the co. seat. Agr. Productions in 1870: Wheat 298,192 bush.; rye, 135,257 bush.; oats, 883,846 bush.; Indian-corn, 680,314 bush.; Irish pot's, 100,761 bush.; sweet pot's, 54 bush.; butter, 964,020 lbs.; hay, 32,192 tons. Cash value of farms, $13,681,426. Total estimated, value of all farm productions, including additions to stock, etc., $2,299,674. Value of manufactures, $4,337,357.

Aroostook, co. in Me., embracing the N. E. part of the state. Area about 5,000 sq. mls. Pop. 30,240; in 1860, 22,479. The St. John R. flows through the W. part and then forms the N. boundary of the co. It is drained by tributaries of this R., as the Allegash R., Fish R. and Aroostook R., and a large number of small creeks. The Mattawamkeag R., a tributary of the Penobscot R., drains the S. part. The surface is generally high and hilly; the valley of the upper course of the St. John R. is the lowest part. Mars Hill, near the E. boundary, is probably the highest point. The co. abounds in lakes. The Eagle Lakes are in the N. E. portion, and Grand Lake washes the S. E. corner. The co. is covered with extensive forests, which yield valuable timber. The soil of the R. valleys is very fertile; but the climate is severe. The settlements are in the S. parts only. Houlton is the co. seat. Agr. productions in 1870: Wheat, 46,946 bush.; rye, 2,553 bush.; Indian-corn, 4,242 bush.; oats, 532,151 bush.; Irish pot's, 380,701 bush.; butter, 523,510 lbs.; hay, 48,052 tons. Cash value of farms, $3,010,130. Total, estimated, value of all farm productions, including additions to stock, etc., $1,845,600. Value of manufactures, $607,283.
Aroostook River, a tributary of the St. John R., rises in Penobscot co., Me., flows in a N. E. direction through Aroostook co. and joins the St. John R. in W. New Brunswick. Estimated length, 250 mls.

Ascension, parish in La., S. E. part. Area about 425 sq. mls. Pop. 11,577; in 1860, 11,484. It is bounded on the N. by Amite R. and on the E. by Lake Borgne. The S. E. part is traversed by the Mississippi R., from which the Bayou La Fourche branches off near Donaldsonville, the co. seat. The surface is low and level, and consists mostly of rich alluvial soil. Agr. productions in 1870: Cotton, 981 bales; sugar 6,423 hhds.; Indian-corn, 160,542 bush.; rice, 15,926 lbs.; Irish pot's, 1,053 bush.; sweet pot's, 4,910 bush. Cash value of farms, $1,475,633. Total, estimated, value of all farm productions, including additions to stock, etc., $84,583. Value of manufactures, $1,916,365.

Bald Mountain, p. v. in Gilpin co., Colo., 26 mls. N. W. of Golden City. Pop., 973.

Baldwin, co., in Ala., S. part. Area about 1,550 sq. mls. Pop. 6,004; in 1860, 7,530. It is bounded on the S. by the Gulf of Mexico, on the W. by Mobile Bay, Bonsevour Bay, and the Mobile R.; and on the E. by the Perdido R. which receives Hollingers Cr. and Blackwater Cr. The N. E. part is traversed by the Tensaw R., a stream which flows parallel to the Mobile R., and is connected with it by several branches, thus including a long and narrow delta. The surface is low and level, the soil not fertile. Large tracts are covered with pine forests. The Mobile & Montgomery R. R. passes through the co. Blakely is the co. seat. Agr. productions in 1870: Cotton, 87 bales; Indian-corn, 31,025 bush.; Irish pot's, 17 bush.; sweet pot's, 19,411 bush.; butter, 4,857 lbs.; hay, 79 tons. Cash value of farms, $140,-550. Total, estimated, value of all farm productions, including additions to stock, etc., $81,210. Total value of manufactures, $321,100.

Baldwin, co. in Ga., central part. Area, 256 sq. mls. Pop., 10,618; in 1850, 9,078. The surface of the N. part is undulating and hilly; of the S. part, which belongs to the tide-water region, low and level. The co. is intersected by the Oconee R., which receives Little R., forming the N. boundary, and Fishing Cr. The soil is generally poor but productive along the water-courses. The Milledgeville and Eatonton R. R. passes through the co. Milledgeville is the co seat. Agr. productions in 1870: Wheat, 3,553 bush.; rye, 197 bush.; Indian-corn, 89,857 bush.; oats, 1,335 bush.; Irish pot's, 759 bush.; sweet pot's, 13,285 bush.; butter, 19,330 lbs., cotton, 4,036 bales. Cash value of farms, $407,-566. Total, estimated, value of all farm productions, including additions to stock, etc., $638,-018. Value of manufactures, $364,450.

Baldwin, p. o. in Duval co., Fla.

Baldwin, p. v. in Jackson co., Iowa, on Iowa Midland R. R., 46 mls. from Clinton; is the center of trade for a rich agricultural district, and has good water-power, which is used extensively in manufacturing. One newspaper.

Baltic, p. v. in New London co., Conn., on the Hartford, Providence & Fishkill R. R., 10 mls. from Willimantic. It is almost entirely the property of the Sprague Manufacturing Company, and has a very large cotton mill, with 60,000 spindles.

Baltimore, co. in Md., N. part. Area about 715 sq. mls. Pop., 330,741; in 1860, 266,553. It borders in the N. on Pa. and in the S. on Chesapeake B. The eastern boundary is partly formed by the Little Gunpowder R., the S. W. by the Patapsco. The Gunpowder R. intersects the co. from N. to S. and receives many small affluents. The surface is diversified, the south-eastern part being low and level, the north-western rolling. The soil is mostly productive; some parts, however, are rocky. The co. is intersected by the Northern Central R. R., the Baltimore & Philadelphia R. R., the Baltimore & Ohio R. R., and the West Maryland R. R. All these lines terminate at Baltimore. Towsontown is the co. seat. Agr. productions in 1870: Wheat, 264,568 bush.; rye, 31,182 bush.; Indian-corn, 856,754 bush.; oats, 375,063 bush.; Irish pot's, 201,754 bush.; sweet pot's, 3,294 bush.; butter, 544,888 lbs.; hay, 35,791 tons. Cash value of farms, $29,181,762. Total, estimated, value of all farm productions, including additions to stock, etc., $3,447,945. More than half of the manufacturing establishments of Md. were in this co. (2,759); and the value of the products ($59,219,933) was nearly three-fourths of the grand total for the state. The material used in the manufactures had a value of $36,144,425, the capital invested was $26,049,040, and wages were paid out to 33,182 hands, to the amount of $10,352,078. The 293 steam-engines had 8,582 horse-power.

***Baltimore,** city in Baltimore co., Md., on the wide estuary of the Patapsco R., 12 mls. from its junction with the Chesapeake B., and 200 mls. from the Atlantic Ocean. Lies in 39° 17′ N. lat. and 76° 37′ W. long. It is the terminus of five railroads. The Baltimore & Ohio R. R. connects it with the W. (878 mls. to Chicago and 379 mls. to Wheeling); the Baltimore & Washington R. R. with Washington, 38 mls.; the Philadelphia, Wilmington & Baltimore R. R. with the northern and eastern cities (98 mls. to Philadelphia and 190 mls. to New York); the Northern Central R. R. with the interior of Pa. and N. Y. (178 mls. to Williamsport, Pa., and 354 mls. to Rochester, N. Y.); and the Western Maryland R. R. with the interior of the state. Being built upon picturesque hill slopes and terraces, and containing numerous public and private buildings of great magnificence, Baltimore is one of the most attractive cities of the Union. From the number of its monuments, it has been called the "Monumental City." Washington Monument, which stands on a hill 100 feet above tide-water, and consists of a base 20 feet high, and a doric column 76½ feet high, surmounted by the colossal statue of Washington, affords a panorama of unrivaled beauty and grandeur. The visitor who ascends the top of the column looks down upon the busy city, with its surrounding fields, gardens and waters. In the north and north-west he beholds the sumptuous residences of the wealthy; in the east and south-east the trade and business portions of the city, from which rise numerous domes and spires. The Battle Monument was erected to the memory of the defenders of the city in 1814. Wells and McComas Monument, erected in their honor for the part taken by them in the battle of North Point, September 12, 1814. The Wildey Monument, erected in honor of the founder of the order of Odd Fellows in the United States, consists of a pediment and a plain shaft, surmounted by the statue of Thomas Wildey.

Baltimore street, running E. and W., divides the city into two nearly equal parts, and is the fashionable thoroughfare, containing numerous elegant retail stores and jobbing houses. The principal public buildings are: The Exchange, an elegant structure with Ionic columns of Italian marble; the City Hall, in course of construction, and to be surmounted by a dome 222 feet high; the Court House, with marble pilasters and a dome; the new U. S. Court House; the Maryland Institute, containing the Center Market and an immense hall, 260 feet long; the Penitentiary, comprising three buildings, standing in a lot of four acres of ground, which is surrounded by a massive wall; the Corn and Flour Exchange, and the Jail or City Prison.

The city is rich in church architecture. The Roman Catholic Cathedral is surmounted by a dome and several towers, and boasts one of the finest organs in the country. St. Vincent de Paul and St. Alphonsus are also fine structures. Grace Church is a fine Gothic struc-

ture, with a lofty tower. St. Paul is built in the Norman style, and Emanuel Church of gray sandstone. Mt. Vernon Place M. E. Church is built of serpentine stone with colored stone copings. The Baptist Church, corner of Dolphin and Eutaw streets, is built of Maryland marble. The First Presbyterian Church, corner Madison and Park streets, is built of brown stone, and is an elegant specimen of architecture. The wealthy Israelites of the city have erected the imposing Loyd Street Synagogue.

The largest park of the city is Druid Hill Park, embracing 650 acres in the northern suburbs. It is a sylvan retreat, with stately trees, beautiful shrubbery, shady walks and secluded rides and drives. A fine prospect over the city and the bay is had from the tower standing at the head of Druid Lake. Lafayette Square and Harlem Square are in the northern part of the city. Union Square is at the head of West Lombard street, and Patterson Park, about 70 acres large, on East Baltimore street.

Green Mound Cemetery, 1¼ mls. from Battle Monument, and London Park Cemetery, about 2 mls. from the city, have beautiful grounds and many costly artistic monuments, and are well worth a visit.

The charitable institutions are the following: The Maryland Hospital, for the insane, in the eastern part of the city; Mount Hope Hospital, under the management of the Sisters of Charity; the Baltimore Infirmary; the Aged Widow's Home; the Alms house; two Orphan Asylums, and the House of Refuge, for juvenile delinquents.

The city was founded in 1729, and received its name in 1745, in honor of Lord Baltimore. In 1780 it became a port of entry. In 1850 it had 169,054 inhabitants; in 1860, 212,418, and in 1870, 267,354; making it the sixth largest city in the Union. The number of families was 49,929, and the number of dwellings 40,350. In the various branches of industry 94,737 persons were occupied, including 13,880 domestic servants; 12,289 laborers; 2,507 launderers and laundresses; 1,074 government employees; 438 physicians and surgeons; 342 lawyers; 304 clergymen, and 800 teachers. The number of agriculturists was 735; of men engaged in trade and transportation, 23,214, and manufactures and mechanics, 35,538. The last number includes 1,047 blacksmiths; 2,907 boot and shoe-makers; 96 brewers; 1,746 masons and stone-cutters; 762 butchers, 921 cabinet-makers; 312 carriage-makers; 3,160 carpenters; 1,039 cigar-makers and tobacco-workers; 927 coopers; 164 cotton and woolen mill operatives; 238 tanners and leather finishers; 126 fishermen; 281 harness and saddle-makers; 1,213 iron and steel workers; 671 machinists; 1,539 milliners and dress-makers; 1,335 painters and varnishers; 431 plasterers; 363 plumbers and gas-fitters; 577 printers; 780 ship-riggers, calkers, carpenters and smiths; 4,562 tailors and seamstresses, and 1,009 tinners.

Baltimore has numerous manufactories, and nearly all the products of the county (see co.) are made in the city. Iron foundries, steel works, leather tanneries, tobacco manufactories, locomotive and machine works, cotton and woolen mills, carriage and wagon shops, are the most important establishments.

In regard to foreign commerce, Baltimore ranks among the first cities of the Union. It imported in 1871 foreign goods to the amount of $24,672,871, and exported domestic goods to the amount of $15,037,855. New York and Boston alone surpass it in importation, and the following seven cities in exportation: New York, Boston, New Orleans, Mobile, Philadelphia, Savannah and San Francisco. In the year ended June 30, 1871, 832 vessels, with 315,734 tons, arrived from, and 686 vessels, with 194,880 tons, cleared for foreign countries. During the same year the total number of registered vessels was 96; of enrolled vessels, 1,128, and of licensed vessels, 186, making a total of 1,410 vessels, with 128,628 tons. Of these there were 796 sailing vessels; 98 steamers, and 516 canal boats.

The educational establishments of Baltimore are of the highest order, and compare favorably with those of any other city in the country. The number of children between the ages of 5 and 20, in 1871, was estimated at 75,000. Of these 34,169 were enrolled in the public schools, but the average attendance was only 19,279. The city had 75 primary schools, 37 grammar schools, 3 high schools, 6 evening schools, and one normal school for the training of teachers. Among the higher institutions may be mentioned the Notre Dame Institute, Loyola College, St. Mary's College, the Theological Seminary of St. Sulpice (all Roman Catholic), the Baltimore Female College, the Maryland College of Pharmacy, and the Baltimore College of Dental Surgery. The University of Maryland is at the corner of Green and Lombard streets, and includes a medical department, which was founded in 1807. The Athenæum, at the corner of Saratoga and St. Paul streets, is occupied conjointly by the Mercantile Library Association (26,000 volumes), the Baltimore Library (15,000 volumes), and the Maryland Historical Society. The Peabody Institute, founded by Geo. Peabody, is designed for literary and scientific purposes, and has already a well-selected library of 47,000 volumes, to which additions of from 3,000 to 4,000 volumes are made annually. The splendid charities recently left the city by the late John Hopkins, to found Hospital, School, Park, etc., amounted to $7,000,000—the most munificent gift ever made to an American city.

There are thirty-three papers published in the city, of which the following are the principal dailies and weeklies: "Sun," "German Correspondent," "American and Commercial Advertiser," "Gazette," "Wecker," "News," "Weekly," "Bulletin," "Saturday Night," "Sunday Telegram," "Episcopal Methodist," "Good News," etc.

The city is well provided with places of amusement. Holiday Street Theatre, burned 1873, is now rebuilt, in an enlarged and improved form. Ford's Grand Opera House was opened 1871. The Academy of Music, recently built, is one of the largest in the country. Front Street Theatre Comique is devoted to comedy.

***Bangor,** city and co. seat of Penobscot co., Me.; is the connecting point of the Maine Central R. R. and the European & North American R. R. It lies on the W. bank of the Penobscot R., and is 135 mls. from Portland by railroad. The river affords abundant water-power, which is utilized in mills and manufactories. The principal business is the lumber trade; immense quantities of pine, cedar, hemlock and spruce trees, are cut in the region drained by the Penobscot, and the lumber is either exported from Bangor or used for ship building. The coastwise trade and foreign commerce of Bangor is considerable. In 1871 it had 227 sailing vessels, with 37,142 tons, and five steamboats with 667 tons. It is a handsome city, with many fine public and private buildings. Steamboat lines connect Bangor with Portland and Boston. Pop., 18,289; in 1860, 16,407; in 1850, 14,432. Four newspapers.

Beauford, tn. in Blue Earth co., Minn. Pop., 336.
Beauford, p. o. in the above tn.
Beaufort, co. in N. C., eastern part. Area about 650 sq. mls. Pop., 13,011; in 1860, 14,766. It borders on Pamlico Sound, and its N. E. boundary is formed by Tare R., which empties into Pungo R., a branch of the sound. The wide estuary of the Pamlico R. intersects the co. from W. to E. The surface is low and level; the soil is very productive; large portions of the co. consist of swamps. Washington is the co. seat. Agr. productions in 1870: Wheat, 1,987 bush.; rye, 195 bush.; Indian-corn, 179,994 bush.; oats, 3,674 bush.; Irish pot's, 3,893 bush.; sweet pot's, 102,626 bush.; cotton, 1,987 bales; butter, 7,617 lbs.; hay, 379 tons. Cash value of farms, $481,471. Total, estimated, value of all farm productions, including additions to stock, etc., $496,161. Value of manufactures, $196,141.
Beaufort, district in S. C., forming the southern extremity of the state. Area about 1,550. Pop., 34,359; in 1860, 40,053. The district is bounded on the S. W. by the Savannah R., on the N. E. by the Combahee R., and on the S. E. by the Atlantic Ocean. The largest streams which intersect it are the Coosawhatchie and New Rs. The Coosawhatchie empties into the ocean by two channels, the Coosaw R. and the Broad R., which are separated by a number of low and very productive islands, as Port Royal Island, St. Helena Island, Prentiss Island, etc.; south of the mouth of Broad R. lies Hilton Head Island. The entire district consists of a low and level plain, which is throughout fertile. Near the sea-board there are extensive swamp lands. Beaufort is the co. seat. Agr. productions in 1870: Wheat, 614 bush.; rye, 539 bush.; Indian-corn, 285,532 bush.; oats, 1,392 bush.; Irish pot's, 1,655 bush.; sweet pot's, 118,036 bush.; cotton, 7,486 bales; butter, 23,727 lbs.; rice, 9,039,130 lbs. Cash value of farms, $2,554,149. Total, estimated, value of all farm productions, including additions to stock, etc., $2,220,266. Value of manufactures, $83,577.

Bedford, co. in Pa., S. part, borders on Md. Area about 950 sq. mls. Pop., 29,635; in 1860, 26,736. The surface is mountainous. Many ranges of the great Appalachian system trend through the co. in a N. N. E. direction, and inclose beautiful and often fertile valleys. Tussey's Mt. and Warrior Ridge traverse the center of the co., in close proximity. Farther to the W. are Dunning's Mt., Wills' Mt., Buffalo Ridge, etc. The principal chain of the Alleghany Mts. forms the N. W. boundary. The eastern part of the co. is traversed by Broad Top Mt., Town Hill and Sidling Hill. The Raystown Branch of the Juniata R. flows through the co. from W. to E., and turning N. passes out between Broad Top Mt. and Tussey's Mt. Its tributaries flow through the valleys parallel to the Mt. chains, as Dunn Cr., Cove Cr., etc. The southern part of the co. is drained by several tributaries of the Potomac R. Coal and iron are abundant. The Huntingdon & Broad Top R. R. follows the valley of the Juniata R. Bedford is the co. seat. Agr. productions in 1870: Wheat, 338,074 bush.; rye, 118,091 bush.; oats, 376,296 bush.; Indian-corn, 405,261 bush.; Irish pot's, 104,657 bush.; sweet pot's, 385 bush.; butter, 457,241 lbs.; hay, 28,623 tons. Cash value of farms, $9,495,119. Total, estimated, value of all farm productions, including additions to stock, etc., $1,765,574. Value of manufactures, $1,587,024.

Bedford, co. in Tenn., central part. Area, 504 sq. mls. Pop., 24,333; in 1860, 21,584. The greater part of it belongs to the Central Basin of Tennessee, and has a level surface and very productive soil, while the Highland rim extends into the eastern part. The largest stream is the Duck R., which intersects the co. from E. to W. The Nashville & Chattanooga R. R. passes through the co. Shelbyville is the co. seat. Agr. productions in 1870: Wheat, 212,922 bush.; rye, 10,486 bush.; Indian-corn, 1,010,642 bush.; oats, 104,801 bush.; Irish pot's, 18,275 bush.; sweet pot's, 17,408 bush.; tobacco, 19,290 lbs.; butter, 96,424 lbs.; hay, 3,202 tons. Cash value of farms, $7,511,259. Total, estimated, value of all farm productions, including additions to stock, etc., $2,037,652. Value of manufactures, $358,542.

Bedford, co. in Va., central part. Area, 505 sq. mls. Pop., 25,327; in 1860, 25,068. It is bounded on the N. W. by the Blue Ridge, and the W. part is traversed by several ranges of hills, as Miller's Mt. and others. The Staunton R. forms the southern boundary, and the James R. the northern. Goose Cr. and Otter Cr., tributaries of the Staunton, intersect the co. from W. to E. and drain the largest portions of its area. The co. belongs to the Piedmont or hilly region of the state; but extensive tracts are level or slightly undulating. The soil is very productive. The Virginia & Tennessee R. R. passes through the co. from E. to W. Liberty is the co. seat. Agr. productions in 1870: Wheat, 165,560 bush.; rye, 7,831 bush.; Indian-corn, 258,995 bush.; oats, 249,799 bush.; Irish pot's, 22,306 bush.; sweet pot's, 11,169 bush.; tobacco, 1,956,157 lbs.; butter, 200,506 lbs.; hay, 3,057 tons. Cash value of farms, $3,373,549. Total, estimated, value of all farm productions, including additions to stock, etc., $1,158,684. Value of manufactures, $421,017.

Benton, co. in Ark.; forms the N. W. extremity of the state. Pop., 13,831; in 1860, 9,106. The surface is hilly and in some parts mountainous. Pea Ridge extends through the center of the co. The largest stream is White R., which drains the eastern part. Sugar Cr., Spavinaw Cr. and the Illinois R., tributaries of the Arkansas, drain the central and western parts. The soil of the valleys is very productive; the uplands are heavily timbered. Bentonville is the co. seat. Agr. productions in 1870: Wheat, 84,779 bush.; Indian-corn, 342,046 bush.; oats, 40,569 bush.; Irish pot's, 18,595 bush.; sweet pot's, 9,866 bush.; tobacco, 35,280 lbs.; hay, 99 tons. Cash value of farms, $677,035. Total, estimated, value of all farm productions, including additions to stock, etc., $556,876. Value of manufactures, $159,112.

Benton, co. in Ind., N. W. part; borders on Ill. Area, 414 sq. mls. Pop., 5,642; in 1860, 2,809. It is covered with extensive prairies, alternating with deciduous forests. The soil is very productive. Pine and Sugar Crs. intersect and drain the co. Oxford is the co. seat. Agr. productions in 1870: Wheat, 50,513 bush.; rye, 11,942 bush.; Indian-corn, 458,857 bush.; oats, 121,842 bush.; Irish pot's, 22,426 bush.; sweet pot's, 104 bush.; butter, 103,200 lbs.; hay, 6,659 tons. Cash value of farms, $4,300,560. Total, estimated, value of all farm productions, including additions to stock, etc., $1,228,660. Value of manufactures, $25,035.

Benton, co. in Iowa, E. central part. Area, 720 sq. mls. Pop., 22,454; in 1860, 8,496. The co. has an undulating surface, and consists mostly of extensive prairies. The soil is very productive. Cedar R. intersects the N. E. part and receives numerous affluents, which drain the larger part of the co. The Iowa R. touches the S. W. corner. The Iowa Division of the Chicago & Northwestern R. R. intersects the co. from E. to W. Vinton is the co. seat. Agr. productions in 1870: Wheat, 1,254,947 bush.; rye, 2,050 bush.; Indian-corn, 1,516,420 bush.; oats, 468,543 bush.; Irish pot's, 97,941 bush.; sweet pot's, 192 bush.; wool, 18,974 lbs.; butter, 570,126 lbs.; hay, 32,473 tons. Cash value of farms, $8,716,034. Total, estimated, value of all farm productions, including additions to stock, etc., $2,155,748. Value of manufactures, $176,315.

Benton, co. in Minn., central part. Area about 400 sq. mls. Pop., 1,558; in 1860, 627. Its western boundary is formed by the Mississippi R., and it is drained by the Little Rock R., the W. branch of the Rum R., and the Elk R. The co. is a rolling plain of over 1,000 feet elevation. The soil of the bottom-lands is very productive. The St. Paul & Pacific R. R. extends along the Mississippi R., terminating at Sauk Rapids, the co. seat. Agr. productions in 1870: Wheat, 3,541 bush.; rye, 248 bush.; Indian-corn 5,036 bush.; oats, 7,672 bush.; Irish pot's, 5,312 bush.; butter, 17,620 lbs.; hay, 1,535 tons. Cash value of farms, $73,450. Total, estimated, value of all farm productions, including additions to stock, etc., $37,765. Value of manufactures, $5,300.

Benton, new co. in Miss., N part. This county has been formed of parts of Marshall and Tippah counties. It is drained by Tippah Cr. The surface is level and the soil productive. Ashland is the co. seat.

Benton, co. in Mo., central part. Area, 708 sq. mls. Pop. 11,322; in 1860, 8,473. The surface is mostly undulating and consists of prairies. The Osage R. intersects the co. from W. to E., and receives Grand R. with Teba Cr. from the W., Camp Cr. from the N., and Pomme de Terre R. from the S. The soil is fertile. Warsaw is the co. seat. Agr. productions in 1870: Wheat, 122,852 bush.; rye, 1,846 bush.; Indian-corn, 358,959 bush.; oats, 120,918 bush.; Irish pot's, 24,740 bush.; sweet pot's, 484 bush.; butter, 159,167 lbs.; hay, 2,926 tons. Cash value of farms, $2,448,509. Total, estimated, value of all farm productions, including additions to stock, etc., $575,239. Value of manufactures, $83,571.

Benton, co. in Oreg. W. part. Area about 1,012 sq. mls. Pop., 4,584; in 1860, 3,674. It extends from the coast of the Pacific Ocean in the W. to the Willamette R., a tributary of Columbia, in the E. The central part is mountainous and hilly. The eastern part includes a section of the low and very fertile valley of the Willamette, and is thus far the only settled district. The Yaquina and other small rivers drain the western part of the co. Corvallis is the co. seat. Agr. productions in 1870: Wheat, 196,598 bush.; rye, 211 bush.; Indian-corn, 2,343 bush.; oats, 146,233 bush.; Irish pot's, 38,320 bush.; butter, 100,800 lbs.; wool, 68,970 lbs.; hay, 4,176 tons. Cash value of farms, $1,480,433. Total, estimated, value of all farm productions, including additions to stock, etc., $417,063. Value of manufactures, $186,588.

Benton, co. in Tenn., N. W. part. Area about 400 sq. mls. Pop., 8,234; in 1860, 8,463. The Tennessee R. forms the entire eastern boundary; the Big Sandy R. part of the western. The co. has an average elevation of from 500 to 600 feet, a rolling surface and a moderately fertile soil. The Nashville & Northwestern R. R. intersects the co. from E. to W. Camden is the co. seat. Agr. productions in 1870: Wheat, 25,753 bush.; Indian-corn, 357,400 bush.; oats, 18,986 bush.; Irish pot's, 9,981 bush.; sweet pot's, 19,926 bush., tobacco, 412,435 lbs.; wool, 10,288 lbs.; cotton, 696 bales. Cash value of farms, $463,607. Total estimated, value of all farm productions, including additions to stock, etc., $599,786. Value of manufactures, $102,924

Berks, co. in Pa., E. part. Area, 920 sq. mls. Pop., 106,701; in 1860, 93,818. It is bounded on the N. by the Blue or Kittatinny Mts., and the S. E. part is traversed by the South Mt., a prolongation of the Virginia Blue Ridge. The greater part of the surface is diversified by low hills and fertile valleys. The largest stream is the Schuylkill R., which enters the co. from the N. and intersects it in a southerly direction. Its tributaries are the Tulpehocken Cr., Little Swatara Cr., Maiden Cr. and Manatawney Cr. There are rich coal and iron mines in this co., and some copper is also found. The co. is intersected by the Reading & Columbia R. R., several branches of the Pennsylvania Central R. R.; the Schuylkill Canal and the Union Canal. Reading is the co. seat. Agr. productions in 1870: Wheat, 930,653 bush.; rye, 281,867 bush.; oats, 1,425,157 bush.; Indian-corn, 1,267,194 bush.; Irish pot's, 400,846 bush.; sweet pot's, 1,675 bush.; butter, 2,658,031 lbs.; hay, 114,651 tons. Cash value of farms, $43,638,465. Total, estimated, value of all farm productions, including additions to stock, etc., $9,150,789. Value of manufactures, $16,243,453.

Berkshire, co. in Mass., forms the W. extremity of the state. Area about 900 sq. mls. Pop., 64,827; in 1860, 55,120. It is bounded on the W. by N. Y., on the S. by Conn., and on the N. by Vt. The Taconic or Taghcanic Mts. trend along the western boundary; the Hoosac Mts. traverse the E. part of the county from N. to S. Between these two ranges is the beautiful valley of the Housatonic R., which, with its tributaries, drains the larger part of the co. The scenery is justly famous for its picturesque beauty, and attracts many tourists as well as residents from other parts of the state. The soil of the valleys is productive. The Troy & Boston R. R., the Boston & Albany R. R. and the Housatonic R. R. intersect the co. Pittsfield is the co. seat. Agr. productions in 1870: Wheat, 2,798 bush.; rye, 35,903 bush.; Indian-corn, 156,384 bush.; oats, 248,642 bush.; Irish pot's, 355,670 bush.; butter, 1,038,751 lbs.; hay, 84,790 tons. Cash value of farms, $12,106,277. Total, estimated, value of all farm productions, including additions to stock, etc., $3,063,468. Value of manufactures, $20,444 225.

Berrien, co. in Ga., S. part. Area about 775 sq. mls. Pop., 4,518; in 1860, 3,475. The Allapaha R. intersects its N. E. corner, and then forms the eastern boundary. Little R. forms the western. The Withlacoochee R., an affluent of the latter, intersects the co. from N. to S. The surface is low and level; the soil mostly sandy and but moderately productive. Nashville is the co. seat. Agr. productions in 1870: Indian-corn, 76,976 bush.; oats, 41,184 bush.; Irish pot's, 449 bush.; sweet pot's, 55,875 bush.; rice, 119,462 lbs.; butter, 16,136 lbs.; cotton, 671 bales. Cash value of farms, $132,772. Total, estimated, value of all farm productions, including additions to stock, etc., $340,059. Value of manufactures, $19,774.

Berrien, co. in Mich., forms the S. W. extremity of the state. Area about 580 sq. mls. Pop., 35,104; in 1860, 22,378. It borders on Lake Michigan. The surface is undulating, and consists chiefly of prairies. The St. Joseph's R. flows through the co. from S. to N., and receives the Pawpaw R. and other tributaries. The S. W. part is drained by the Galliea R., which empties into Lake Michigan. The valley of the St. Joseph's R. contains the richest part of the co., and is heavily timbered. Berrien Springs is the co. seat. Agr. productions in 1870: Wheat, 443,809 bush.; rye, 3,401 bush.; Indian-corn, 469,705 bush., oats, 178,217 bush.; Irish pot's, 282,503 bush.; wool, 90,769 lbs.; butter, 548,959 lbs.; hay, 27,054 tons. Cash value of farms, $14,958,851. Total, estimated, value of all farm productions, including additions to stock, etc., $2,576,407. Value of manufactures, $2,030,930.

Bexar, co. in Tex., S. W. part. Area about 1,450 sq. mls. Pop., 16,043; in 1860, 14,454. The surface consists of level plains, which are diversified by picturesque hills. Prairies predominate largely over the forest lands, which are mostly confined to the river bottoms. The soil in some parts is very fertile, and the climate salubrious. The San Antonio R. forms the N. E. boundary. The Medina R., a tributary of the Nueces, forms part of the western boundary, and traverses the southern part of the co. Its largest tributaries are the Leon Cr. and Salado Cr. San Antonio is the co. seat. Agr. productions in 1870: Wheat, 215 bush; rye, 369 bush.; Indian-corn, 81,997 bush.; Irish pot's, 268 bush.; sweet pot's, 3,409 bush.; butter, 22,952 lbs.; hay, 229 tons. Cash value of farms, $256,129. Total, estimated, value of all farm productions, including additions to stock, etc., $326,597. Value of manufactures, $152,010.
Bexar, p. o. in Marion co., Ala.
Bibb, co. in Ala., central part. Area about 550 sq. mls. Pop., 7,469; in 1860, 11,894. The surface is hilly, and the soil moderately fertile. The Cahawba R. flows through the co. from N. to S., and receives several tributaries, as Shultz Cr., Haysoppy Cr. and Affonee Cr. The Selma, Rome & Dalton R. R. intersects the eastern part of the co. from N. to S. Centreville is the co. seat. Agr. productions in 1870: Wheat, 6,826 bush.; rye, 136 bush.; Indian-corn 82,620 bush.; oats, 13,645 bush.; Irish pot's, 352 bush.; sweet pot's, 14,554 bush.; cotton, 3,973 bales; butter, 7,395 lbs. Cash value of farms, $295,110. Total, estimated, value of all farm productions, including additions to stock, etc., $273,777. Value of manufactures, $113,252.
Bibb, co. in Ga., central part. Area about 250 sq. mls. Pop., 21,255; in 1860, 16,291. The Ocmulgee R. forms parts of the eastern boundary, and partly intersects the co.; the Echaconnee R., which joins the Ocmulgee at the southern extremity, forms the S. W. boundary; Tobesoska Cr. drains the co. The surface is undulating, and, except along the line of the streams, is poor. The co. is intersected by the Macon & Western R. R., the Macon & Brunswick R. R., the Muskogee R. R., and the Georgia Central R. R., all of which terminate

at Macon, the co. seat. Agr. productions in 1870: Wheat, 1,030 bush; rye, 105 bush.; Indian-corn, 148,660 bush.; oats, 4,310 bush.; Irish pot's, 460 bush.; sweet pot's, 46,975 bush.; cotton, 6,693 bales; butter, 42,460 lbs. Cash value of farms, $1,388,754. Total, estimated, value of all farm productions, including additions to stock, etc., $1,045,633. Value of manufactures, $1,497,301.

Blount, co. in Ala., N. part. Area about 800 sq. mls. Pop., 9,945; in 1860, 10,865. The co. is traversed from S. W. to N. E. by two depressions known as Brown's Valley and Murphrey's Valley, on either side of which the surface is moderately elevated and hilly. The soil of the valleys is productive; the highlands are covered with deciduous forests. The largest stream is the Locust Fork of the Black Warrior R., which traverses the center of the co. from N. W. to S. E., passing through the highlands between the two valleys above named. The western part is drained by the Mulberry Fork of the Black Warrior R. The Tennessee & Alabama R. R. passes through the co. from N. to S. Blountsville is the co. seat. Agr. productions in 1870: Wheat, 47,375 bush.; rye, 1,049 bush.; Indian-corn, 266,553 bush.; oats, 12,779 bush.; Irish pot's, 4,769 bush.; sweet pot's, 31,578 bush.; cotton, 950 bales; butter, 83,055 lbs.; hay, 63 tons. Cash value of farms, $649,291. Total, estimated, value of all farm productions, including additions to stock, etc., $572,045. Value of manufactures, $84,504.

Blount, co. in Tenn., E. part. Area about 450 sq. mls. Pop., 14,237; in 1860, 13,270. The Iron Mts. and Great Smoky Mts., which are sections of the lofty Unaka range, form the S. E. boundary and separate the co. from S. C. The Holston R. washes the north-western boundary and the Little Tennessee R. the south-western. The N. W. part of the co. belongs to the wide valley of East Tennessee, and has a very productive soil; the S. E. part is mountainous, being occupied by the spurs and flanks of the great mountain range above named. The Chilowee Mts. traverse the center of the co. Maryville is the co. seat. Agr. productions in 1870: Wheat, 107,829 bush.; rye, 774 bush.; Indian-corn, 384,583 bush.; oats, 104,501 bush.; Irish pot's, 2,180 bush.; sweet pot's, 3,520 bush.; butter, 129,535 lbs.; hay, 3,658 tons. Cash value of farms, $2,410,825. Total, estimated, value of all farm productions, including additions to stock, etc., $986,532. Value of manufactures, $327,920.

Blue Ridge, p. o. in Henderson co., N. C.
Blue Ridge, p. o. in Botetourt co., Va.
Blue Ridge, the most eastern chains of the Appalachian system in Va., N. C. and Ga., trend in a S. E. direction from the Potomac R. near Harper's Ferry. In Va. the Blue Ridge separates the Shenandoah Valley from the Piedmont district, and increases in height from N. to S., attaining its greatest elevation in the peaks of Otter (3,993 feet) and Chunder Knob, near the gap through which passes the James R. The Blue Ridge of N. C. is a prolongation of the former, but greatly exceeds it in elevation. A number of high spurs branch off from it in a N. W. direction, and join the Great Unaka chain, which separates N. C. from Tenn. These are the Black Mts., Newfound Mt., Balsam Mt., Cowee Mts., Nantahela Mts., and Valley River Mts., which divide western N. C. into a series of basins, each of which gives rise to and is traversed by an affluent of the Tennessee R. The highest peaks in the Carolina Blue Ridge and its branches are: High Pinnakle, 5,701 ft.; Rocky Knobs, 5,306 ft.; Graybeard, 5,448 ft.; Big Craggy, 6,090 ft.; Bull's Head, 5,935 ft.; Craggy Pinnakle, 5,945 ft.; Mt. Mitchell, 6,582 ft.; Mt. Gibbs, 6,591 ft.; Sugarloaf, 6,403 ft.; Black Dome, 6,707 ft.; Balsam Cone, 6,671 ft.; Black Brother, 6,619 ft.; Bowlen's Pyramid, 6,248 ft.; Grandfather, 5,897 ft.; Grandmother, 5,797 ft. The principal passes leading across the Blue Ridge of Va. are, Snicker's Gap; Thornton's Gap; Swift Gap; Brown's Gap; Rockfish Gap; Panther Gap, and Buford's Gap; of N. C.: Swananoa Gap; of Ga.: Rabun Gap.

Boise, co. in Idaho, E. part. Area, 8,000 sq. mls. Pop., 3,834. It is bounded on the E. by the principal chain of the Rocky Mts., and on the S. by the Salmon River Mts. The co. is traversed by elevated mountain chains and ranges of hills. The valleys contain, however, much excellent farm land. The East Fork and Rock Fork of the Salmon R. rise in the S. part and flow to the N. The S. E. part of the co. is drained by affluents of the Snake R. Gold mining is the principal occupation of the inhabitants. Idaho City is the co. seat. Agr. productions in 1870: Wheat, 5,032 bush.; oats, 9,827 bush.; Indian-corn, 350 bush.; Irish pot's, 11,747 bush.; butter, 2,000 lbs., hay, 747 tons. Cash value of farms, $40,150. Total, estimated, value of all farm productions, including additions to stock, etc., $80,690. Value of manufactures, $155,147.
***Boise City,** capital of Idaho and co. seat of Ada co.; is situated on a treeless plain on the northern bank of the Boise R., a tributary of the Snake R. It is 300 mls. N. W. of Salt Lake City, and is reached by stage from Winnemucca, on the Central Pacific R. R., and also by stage from Indian Creek. It has wide avenues and is overlooked and protected by Fort Boise. The surrounding county has good farming lands, and there are gold and silver mines in the vicinity. Two newspapers. Pop., 995.

Boone, co. in Ark., N. part, bordering on Mo. Area about 700 sq. mls. Pop., 7,032. It is drained by the White R. and its tributary, Crooked Cr. The surface is hilly. The soil of the bottom lands is fertile. Harrison is the co. seat. Agr. productions in 1870: Wheat, 41,930 bush.; Indian-corn, 341,042 bush.; oats, 22,837 bush.; Irish pot's, 12,394 bush.; sweet pot's, 10,027 bush.; cotton, 205 bales; tobacco, 55,365 lbs. Cash value of farms, $501,945. Total, estimated, value of all farm productions, including additions to stock, etc., $451,736. Value of manufactures, $32,188.

Boone, co. in Ill., N. part. Area, 275 sq. mls. Pop., 12,942; in 1860, 11,678. It is bounded on the N. by Wis. The surface is slightly undulating and consists of prairies and Woodlands in nearly equal proportions. The soil is very fertile. The co. is drained by several affluents of the Rock R., as Kishwaukee R., Piskasaw Cr., etc. Belvidere is the co. seat. Agr. productions in 1870: Wheat, 241,641 bush.; rye, 35,871 bush.; oats, 679,127 bush.; Indian-corn, 466,985 bush.; Irish pot's, 167,311 bush.; sweet pot's, 70 bush.; butter, 555,159 lbs.; hay, 31,323 tons. Cash value of farms, $6,916,863. Total, estimated, value of all farm productions, including additions to stock, etc., $260,304. Value of manufactures, $588,275.

Boone, co. in Ind., N. W. central part. Area, 418 sq. mls. Pop. 22,593; in 1860, 16,753. The surface is diversified by gentle undulations and level tracts; the soil is very productive. The northern part is drained by Sugar Cr.,

the southern by Eagle Cr. The Indianapolis, Cincinnati & Lafayette R. R. intersects the co. from S. E. to N. W. Lebanon is the co. seat. Agr. productions in 1870: Wheat, 388,352 bush.; rye, 14,337 bush.; Indian-corn, 749,482 bush.; oats, 52,075 bush.; Irish pot's, 48,278 bush.; sweet pot's, 126 bush.; butter, 261,816 lbs.; hay, 9,041 tons. Cash value of farms, $8,974,665. Total, estimated, value of all farm productions, including additions to stock, etc., $3,814,552. Value of manufactures, $886,885.

Boone, co. in Iowa, central part. Area, 648 sq. mls. Pop., 14,584; in 1860, 4,232. The Des Moines R. flows through the co. from N. N. W. to S. S. E., and its tributaries, Beaver Cr. and Montgomery Cr., drain respectively the S. W. and N. E. parts. The surface is rolling, and the soil productive. The Iowa division of the Chicago & Northwestern R. R. intersects the co. from E. to W. Boonesborough is the co. seat. Agr. productions in 1870: Wheat, 176,969 bush.; rye, 878 bush.; Indian-corn, 727,831 bush.; oats, 151,272 bush.; Irish pot's, 63,541 bush.; sweet pot's, 113 bush.; wool, 20,825 lbs.; butter, 256,549 lbs.; hay, 22,019 tons. Cash value of farms, $3,438,031. Total, estimated, value of all farm productions, including additions to stock, etc., $952,896. Value of manufactures, $388,417.

Boone, co. in Ky., forms the N. extremity of the state. Area, 310 sq. mls. Pop., 10,696; in 1860, 11,196. It is bounded on the N. and W. by the Ohio R., which here forms the "Great Bend" and separates the co. from Ohio and Ind. Big Boone Cr. intersects it from E. to W. The surface is hilly, and the soil mostly fertile. Burlington is the co. seat. Agr. productions in 1870: Wheat, 93,424 bush.; rye, 32,621 bush.; Indian-corn, 770,505 bush.; oats, 86,441 bush.; Irish pot's, 81,518 bush.; sweet pot's, 2,240 bush.; butter, 198,511 lbs.; hay, 6,826 tons. Cash value of farms, $8,601,330. Total, estimated, value of all farm productions, including additions to stock, etc., $1,552,670. Value of manufactures, $472,663.

Boone, co. in Mo., central part. Area, 650 sq. mls. Pop., 20,765; in 1860, 14,452. The Missouri R. forms the south-western boundary, and Cedar Cr. part of the eastern. Roche Perice R. and Bonne Femme R. traverse the co. from N. to S. The surface is uneven, and consists chiefly of prairies; while the river bottoms are heavily timbered. The soil is very productive. A branch of the Northern Missouri R. R. intersects the co. Columbia is the co. seat. Agr. productions in 1870: Wheat, 235,650 bush.; rye, 14,981 bush.; Indian-corn, 1,096,114 bush.; oats, 260,019 bush.; Irish pot's, 21,909 bush.; sweet pot's, 719 bush.; tobacco, 149,634 lbs.; butter, 83,833 lbs.; hay, 5,110 tons. Cash value of farms, $5,883,432. Total, estimated, value of all farm productions, including additions to stock, etc., $1,212,831. Value of manufactures, $802,405.

Boone, co. in W. Va., S. W. part. Area, 530 sq. mls. Pop., 4,553; in 1860, 4,840. Its southern boundary is formed by the Guyandotte Mt., which separates it from Va. The Spruce Fork Ridge trends along the S. W. boundary. The surface is broken, and in the southern part mountainous; dense forests cover most of this co.; the soil of the valleys is fertile. Little Coal R. rises in the southern extremity, and intersects the co. from S. to N., receiving numerous tributaries, the largest of which are Laurel Cr., Pond Fork, and Spruce Fork. Ballardsville is the co. seat. Agr. productions in 1870: Wheat, 2,585 bush.; rye, 1,398 bush.; Indian-corn, 129,630 bush.; oats, 13,667 bush.; Irish pot's, 12,043 bush.; sweet pot's, 2,676 bush., butter, 55,784 lbs.; hay, 191 tons. Cash value of farms, $268,899. Total, estimated, value of all farm productions, including additions to stock, etc., $168,449. Value of manufactures, $56,000.

***Boston,** city, capital of Mass. and co. seat of Suffolk co., is situated at the western extremity of Boston B., an extension of Massachusetts B., in 42° 21′ 22″ N. lat. and 71° 4′ 9″ long. W. of Greenwich. The city comprises five sections: Boston proper, situated on the peninsula of Tremont or Trimount; East Boston, on the peninsula E. of Boston Harbor; South Boston; the Highlands (formerly the city of Roxbury, Norfolk co.), and the Sixteenth Ward (formerly the city of Dorchester, Norfolk co.).

The first settler of Boston proper was the Rev. John Blackstone, who sold his claim to the peninsula for £30 sterling, and removed to Rhode Island in 1635. The first church was built in 1632; the first wharf in 1673; the first postmaster was appointed in 1677, and the first newspaper (the "Boston News-Letter") was published in 1704. On the 23d of February, 1822, the city was incorporated. Its population then was about 45,000. In 1850 Boston had 136,881 inhabitants; in 1860, 177,840, and in 1870, 250,526, inclusive of Roxbury and Dorchester, which had been added to the corporation since the preceding census. The number of families was 48,188, averaging 5.20 persons each; and of dwellings, 29,623, or 8.46 persons to each dwelling.

The old city is irregularly built, and has many crooked and narrow streets. The narrow isthmus, called the "Neck," which connects the old city with the main land of Roxbury, has been greatly enlarged by filling up the shallow waters on its northern side, and now contains broad avenues with magnificent private residences, stores, churches, etc. Boston is connected with South Boston and with Charlestown (N. of Charles R.) by several bridges, and lines of steamboats ply to East Boston and other points within and outside the harbor.

The railroads centering at Boston pass through nearly every village within 20 mls. from the city, and furnish a most complete system of connections with every part of the Union. The Boston & Albany R. R, 202 mls. long, extends to Albany, N. Y., and there joins the New York Central R. R. for all points W. and S. At Springfield it joins the railroad to Hartford and New Haven, by which line the distance to New York is 237 mls. The Boston, Hartford & Erie R. R. extends to Putnam, Conn. The Old Colony R. R. connects Boston with Newport, R. I., 67 mls., and has several branches to the south-eastern portion of the

state. The Boston & Providence R. R., 44 mls., has also several branches. The Boston & Maine R. R. extends to South Berwick Junction, 74 mls., and thence affords access to all parts of Me. and Canada. The Boston, Lowell & Nashua R. R. extends to the northern part of Mass.; the Eastern R. R. to Portsmouth, N. H., and the Fitchburg R. R. to Fitchburg, 50 mls.

The principal public buildings are the following: the State House, on the summit of Beacon Hill and fronting the Common; erected in 1798. The view from the cupola surmounting the building, and 230 ft. above tide-water, is very fine, and embraces all parts of the city and the bay with its numerous islands. Faneuil Hall, the "Cradle of Liberty," is the famous historical building in which the Fathers of the Revolution addressed the citizens on the political questions of the times, and often since have its walls resounded with eloquent harangues. It was given to the city by Peter Faneuil, in 1740; destroyed by fire in 1761, and rebuilt in 1763. The Custom House is conveniently located at the foot of State street, near the head of Long Wharf. The Merchant's Exchange, a massive fire-proof building, covers an area of 13,000 sq. ft. The Court House is a fine building, in Court Square, and the City Hall, near this square, fronts on School street. A colossal bronze statue of Benjamin Franklin was erected in 1856 in front of the City Hall.

The city has 130 churches, many of which are buildings of much architectural beauty, while others are conspicuous for their age and historical associations. Christ Church, on Salem street, was erected in 1722; King's Chapel in 1686; Trinity Church in 1734; Old South Church in 1730, and Brattle Street Church in 1773. Tremont Temple, in St. Paul street, has 3,000 sittings. Park Street Church is noted for its graceful spire; Central Church is considered to be the most sumptuous building of its kind in New England, and the Church of the Immaculate Conception (Roman Catholic) is a grand and imposing structure. The immense Catholic Cathedral, now in course of construction, promises to be one of the finest church buildings in the country.

The Boston Common, a beautiful park of nearly 50 acres, is between the old part of the city and the "Neck," slopes down from Beacon street, and is an attractive resort. To the W. of it extends the Public Garden, 24 acres, which is ornamented with ponds, flower-beds, and several statues of artistic merit. Concord, Chester, Blackstone and Franklin squares are smaller public parks.

Boston has always been famous for the number and excellence of its literary, scientific or artistic institutions, and its public or private schools. The Athenæum, on Beacon street, was incorporated in 1807; has a library of nearly 100,000 volumes, a fine gallery of paintings and a sculpture gallery. The Public Library, founded in 1852, facing the Common, possesses 130,000 volumes; and the Mercantile Library, at the corner of Summer and Hawby streets, 20,000 volumes. The Massachusetts Historical Society, on Tremont street, has valuable collections of books, maps, coins, etc. Another interesting library is that of the New England Historical and Genealogical Society. The American Society of Arts and Sciences occupies an apartment in the Athenæum building. The Lowell Institute, founded by John Lowell, Jr., provides for regular courses of lectures on religious and scientific topics, which are free to all. Among the other active societies may be mentioned the Handel and Hayden Society (musical); the American Statistical Society, the Institute of Technology and the Natural History Society. The School of Technology is arranged on the plan of the Conservatoire des Arts and Metiers and the École Centrale of Paris. It is not yet complete, but will embrace three distinct departments, known as the Society of Arts, the School of Science and Art and the Museum of Industrial Art and Science. The Studio Building, at the corner of Tremont and Broomfield streets, is occupied by many prominent artists of Boston.

The number of persons in the city between 5 and 15 years of age was, in 1870, 46,301; and the average whole number of pupils belonging to the day-schools was 35,164, while the average attendance was 32,463. In the same year Boston had 323 primary schools, 36 grammar schools, 30 high schools, and 950 teachers, of whom 132 were male and 818 female. The current expenses for the schools, including salaries, amounted to $987,412, and the expenditures for school-houses and lots to $512,338, making a total for all school purposes of $1,599,750. The average cost per pupil was $28.07.

There were published, in 1872, 133 newspapers and periodicals. The dailies having the largest circulation were the following: "Evening Traveller," 19,530; "Herald," 90,720; "Journal," 30,000; "Post," 11,000; "Times," 14,000; "Transcript," 12,000. The weeklies were: "Every Saturday," 20,000; "Home Circle," 85,000; "Illustrated Police News," 50,000; "Pilot," 55,000; "Sporting Times," 35,000; "Waverly Magazine," 43,000; "Youth's Companion," 82,000; and the monthlies: "Atlantic Monthly," 35,000; "Cherub," 30,000; "Christian Banner," 25,000; "Folio," 28,000; "Journal of Chemistry," 20,000; "Missionary Herald," 30,000; "Nursery," 35,000; "Oliver Optic's Magazine," 22,000, and "Our Young Folks," 35,000.

According to the ninth census there were in Boston 37,267 persons engaged in professional and personal services, including 14,026 servants, 13,332 laborers, 267 clergymen, 98 journalists, 343 lawyers, 468 physicians and surgeons, 1,162 teachers, and 1,258 officials and employes of the government. In agriculture were engaged 499 persons; in trade and transportation, 25,997; in manufacturing and mechanical pursuits, 38,977, including 2,026 masons and stone-cutters, 1,394 cabinet-makers and upholsterers, 4,181 carpenters and joiners, 920 cotton and woolen mill operatives, 1,586 machinists, 1,983 painters and varnishers, 1,568 printers, 5,808 tailors, etc., 518 bakers, 886 blacksmiths, 558 book-binders, 1,126 boot and shoemakers, and 117 butchers. The whole number of persons engaged in the various occupations was 102,740.

Boston is one of the principal commercial cities in the United States. The harbor is commodious, and in depth of water is not surpassed by any on the Atlantic coast. In the year ending June 30, 1871, Boston imported goods to the amount of $53,652,225, and exported domestic goods for $12,951,291, and foreign goods for $1,459,398. The principal articles imported were: India-rubber and gutta-percha goods, $531,950; indigo, $594,338; madder, $308,908; rags for the manufacture of paper, $854,339; terra japonica, or gambier, $220,395; books, maps, engravings, etc., $129,240; chloride of lime, $91,677; bituminous coal, $292,666; coffee, $698,729; cotton goods, $1,416,837; chemicals, $630,852; earthen and china ware, $672,837; fancy goods, $253,061; raw flax, $163,850; linen manufacture, $1,843,699; fruits, $1,349,858; glass, $222,764; raw hemp, $1,201,148; hides and skins, $3,158,524; pig iron, $304,861; bar iron, $1,962,116; rails, $498,831; sheet iron, $163,010; scrap iron, $230,174; other iron manufactures, $405,103; raw jute, $417,894; gunny cloth and bagging, $602,864; lead, $282,515; kid gloves, $229,887; printing paper, $74,275; provisions, $119,092; salt, 158,208; saltpeter, $102,

429; silk manufactures, $1,127,305; carbonate of soda and soda ash, $259,192; spices, $400,908; sugar, $7,342,565; molasses, $1,627,502; tea, $245,382; tin, $2,528,711; woolen shawls, $146,180; carpets, 530,898; dress goods (woolen), $2,188,451; and zinc and spelter, $91,718.

The total number of vessels entered from foreign countries during the year ended June 30, 1871, was 3,514, with a tonnage of 835,104. Of these, 2,843 vessels with 569,431 tons were foreign. During the same period 3,289 vessels, with 602,553 tons, cleared for foreign countries. The number of vessels registered in the district was 427 with 281,608 tons; enrolled, 423 with 55,261 tons, and licensed, 83 with 916 tons.

The manufactories of Boston are extensive, and the amount of goods produced in the city and Suffolk co. (see co.), amounted in 1870 to $111,380,840, embracing boots and shoes, men's clothing, furniture, dressed furs, iron goods, leather, beer and spirits, planed lumber, machinery, refined sugar and molasses, pianos and musical instruments, upholstery, etc.

Boston has more places of amusement in proportion to the population than any other city in the country, except New York. The most prominent are the Boston Theater, Boston Museum, Howard Athenæum, Selwyn's Theater, Theater Comique, Lyceum, Olympic, Boston Music Hall, which has the second largest organ in the world, and the Horticultural Hall.

The principal hotels are: Revere House, Tremont House, American House, Parkers Hotel, United States Hotel, Adams House, Albemarle, Everett House, Sherman House, and Waverly House.

Botetourt, co. in Va., W. part. Area about 560 sq. mls. Pop., 11,329; in 1860, 11,516. It extends from the Blue Ridge in the S. E. to Middle Mt. and Rich Patch Mt. in the N. W., and is traversed by several chains all trending S. W. and N. E., as John's Creek Mt., Barbers Ridge, North Mt. and others. These chains inclose fertile valleys, which are traversed by affluents of the James R., as Craig's Cr., Catawba Cr., etc. The James enters the co. from the N. and then turns eastward, successively breaking through several of the mountain ranges. The Staunton R. forms part of the southern boundary. The Virginia & Tennessee R. R. passes through the southern extremity of the co. Finncastle is the co. seat. Agr. productions in 1870: Wheat, 152,799 bush.; rye, 2,325 bush.; Indian-corn, 95,986 bush; oats, 92,307 bush.; Irish pot's, 8,086 bush.; sweet pot's, 1,034 bush.; tobacco, 196,459 lbs.; butter, 99,557 lbs.; hay, 3,752 tons. Cash value of farms, $2,748,574. Total, estimated, value of all farm productions, including additions to stock, etc., $478,607. Value of manufactures, $272,136.

Bourbon, co. in Kans., S. E. part, borders on Mo. Area, 684 sq. mls. Pop., 15,076; in 1860, 6,101. The surface is undulating and consists chiefly of prairies. The water-courses are skirted with belts of timber. The soil is very productive. The Little Osage R. drains the northern part, and its affluent, the Marmiton R., the central. Both streams flow due E. through the co. The Missouri R., Fort Scott and Gulf R. Rs. intersect the co. from N. to S. Fort Scott is the co. seat. Agr. productions in 1870: Wheat, 145 179 bush.; rye, 2,081 bush.; Indian-corn, 706,607 bush.; oats, 266,320 bush.; Irish pot's, 81,527 bush.; sweet pot's, 2,824 bush.; butter, 255,218 lbs.; hay, 20,789 tons. Cash value of farms, $4,783,865. Total, estimated, value of farms, including additions to stock, etc., $1,187,729. Value of manufactures, $1,131,135.

Bourbon, co. in Ky., N. part. Area about 300 sq. mls. Pop., 14,863; in 1860, 14,860. It is bounded on the N. E. by the South Fork of the Licking R., and drained by Stoner's Cr., Stroad's Cr., and Hinkston Cr. The surface is hilly and the soil of the valleys highly pro-

ductive. There are numerous chalybeate and Sulphur Springs in the co. The Kentucky Central R. R. passes through the co. from N. to S. Paris is the co. seat. Agr. productions in 1870: Wheat, 71,717 bush.; rye, 67,739 bush.; Indian-corn, 1,229,515 bush.; oats, 114,762 bush.; Irish pot's, 29,961 bush.; sweet pot's, 2,015 bush.; butter, 163,850 lbs.; hay, 5,572 tons. Cash value of farms, $15,945,373. Total, estimated, value of all farm productions, including additions to stock, etc., $2,541,896. Value of manufactures, $562,519.

Breathedsville, p. v. in Washington co., Md., on Antietam Cr. and Washington County Branch R. R., 17¾ mls. N. of Knoxville on the Potomac R.
Breathitt, co. in Ky., E. part. Area about 590 sq. mls. Pop., 5,672; in 1860, 4,980. The surface is elevated and hilly. The soil of the valleys, which are usually deeply cut, is very fertile; while the uplands, consisting of prairies and forests, are but moderately productive. The East Fork of the Kentucky R. intersects the co. from S. to N., and then forms part of the N. boundary. It receives Cane Fork and Troublesome Cr. The Middle Fork of the Kentucky R. drains the W. part of the co. Jackson is the co. seat. Agr. productions in 1870: Wheat, 4,066 bush.; rye, 520 bush.; Indian-corn, 166,729 bush.; oats, 8,205 bush.; Irish pot's, 11,224 bush.; sweet pot's, 2,565 bush.; butter, 14,275 lbs.; hay, 91 tons. Cash value of farms, $437,469. Total, estimated, value of all farm productions, including additions to stock, etc., $198,701. Value of manufactures, $14,614.
Breaux Bridge, p. o. in St. Martin's parish, La.
Breckenridge, tn. in Jackson co., Ark. Pop., 694.
Breckinridge, p. v. and the co. seat of Summit co., Colo., on the Blue R. and N. of Gilmers Pillars.
Breckinridge, co. in Ky., N. W. part; borders on Ind. Area about 500 sq. mls. Pop., 13,440; in 1860, 13,236. The Ohio R. forms the N. W. boundary, and receives Clover Cr., Sinking Cr. and Yellow Cr. Rough Cr., a tributary of the Green, washes the S. boundary. The surface is rolling, and in some parts hilly. Sinking Cr. a few miles from its source disappears below the ground, and re-appears 6 mls. below. Near it is the Penitentiary Cave. Hardinsburgh is the co. seat. Agr. productions in 1870: Wheat, 57,921 bush.; rye, 5,734 bush.; Indian-corn, 526,080 bush.; oats, 129,703 bush.; Irish pot's, 22,918 bush.; sweet pot's, 4,952 bush.; tobacco, 3,338,471 lbs.; butter, 139,207 lbs.; hay, 3,746 tons. Cash value of farms, $2,155,576. Total, estimated, value of all farm productions, including additions to stock, etc., $1,451,942. Value of manufactures, $152,814.
Breckinridge, p. v. in Wilkin co., Minn., on the Red R. of the North; is the terminus of the St. Paul's & Pacific R. R., 82 mls. N. W. of Benson.

***Brooklyn,** city and co. seat of Kings's co., N. Y.; is situated at the western extremity of Long Island, on the East River, opposite New York, and on New York B. It has a water frontage of more than 10 mls., extending from Newton Cr. to the limits of Greenwood Cemetery; and formerly consisted of several towns, as Brooklyn proper, Williamsburgh, Bushwick, etc., which were incorporated under one municipal government in 1855. Brooklyn is connected with New York by several lines of steam ferries, the principal of which are the Fulton, Wall Street, South, Catherine, Jackson and Hamilton Avenue ferries. It is the terminus of the several railroads which intersect Long Island, as the Brooklyn, Bath & Coney Island R. R.; the Flushing & North Side R. R. and the South Side R. R.

The city was settled in 1625, and being the scene of several important events of the Revolution and the War of Independence, possesses great historical interest. As it is in reality but a portion of New York, its growth has fully kept pace with that of the great metropolis. In 1850 it had 96,838 inhabitants; in 1860, 266,661; and in 1870, 396,099. Of these, 251,381 were natives of the United States, and 144,718 natives of foreign countries, including 36,769 Germans; 73,985 Irishmen; 18,832 Englishmen; 4,098 Scotchmen, and 1,892 Frenchmen. The population numbers 80,066 families, of 4.95 persons each; and occupies 45,834 dwellings, of 8.64 persons each.

The number of persons engaged in horticulture and farming was 565; in personal and professional services, 42,920; in trade and transportation, 38,166, and in manufactures and mechanical industries, 57,544. These sums include 367 clergymen; 216 journalists; 729 lawyers; 584 physicians and surgeons; 1,449 teachers; 16,208 domestic servants; 1,499 employes of civil government; 11,690 traders and dealers; 13,458 clerks and salesmen; 2,599 carmen and teamsters; 2,674 sailors, steamboatmen, etc.; 1,213 bakers; 1,298 blacksmiths; 931 book-binders; 2,809 shoe-makers; 2,902 masons and stone-cutters; 1,323 butchers; 997 cabinet-makers and upholsterers; 210 carriage-makers; 5,740 carpenters and joiners; 1,416 cigar-makers and tobacco-workers; 1,158 coopers; 784 cotton and woolen mill operatives; 386 tanners and leather finishers; 251 harness-makers; 746 hat and cap-makers; 1,155 iron works operatives; 2,622 machinists; 2,934 milliners and dress-makers; 2,250 painters and varnishers; 108 paper mill operatives; 516 plasterers; 757 plumbers and gas fitters; 2,039 printers; 1,598 ship-riggers, carpenters and smiths; 6,084 tailors and tailoresses, and 655 tinners.

Brooklyn is one of the handsomest cities in the world. Many of the wealthy merchants, doing business in New York, have here their stately mansions. The city is elevated and somewhat uneven. The "Heights," extending on both sides of the landing of Wall Street Ferry, are 70 feet high, and afford extensive

and magnificent views over the bay, with its ships and boats; over the great sister city, with its spires and domes; or over the more distant country, with its fields and forests. Many of the streets of Brooklyn are lined with beautiful shade trees, and, with the exception of Fulton street, are straight and intersect each other at right angles. The numerous church edifices, many of which are unsurpassed for architectural beauty, have given rise to the appellation of the "City of Churches," by which Brooklyn is known throughout the land. For an enumeration of the principal ones, the reader is referred to Appleton's Handbook of American Travel; and other guide books.

Among the prominent public buildings may be mentioned the following: The City Hall, at the junction of Court and Fulton streets, and near it the County Court House; Kings County Jail, in Raymond street; the Post-office, in Washington street; the new Mercantile Library, in Montague street, containing also the rooms of the Long Island Historical Society; the Academy of Music, opposite the Mercantile Library; the Packer Collegiate Institute (for young ladies), on Joralemon street; and the Polytechnic Institute, on Livingston street.

The U. S. Navy Yard is situated on the point of land between East River and Wallabout B., in the north-eastern part of Brooklyn proper; and is nearly 40 acres in extent. It includes a large dry-dock and the U. S. Naval Lyceum, a literary institution. The U. S. Marine Hospital, opposite the Navy Yard, on the Wallabout, is surrounded by extensive grounds, and has room for 500 patients. About a mile below the South Ferry is the Atlantic Dock, a basin containing 42¼ acres, with sufficiently deep water for ships of the largest description.

The most noted park of Brooklyn is Prospect Park, the entrance to which is at the junction of Park, Flatbush and Vanderbilt avenues. It measures 600 acres, and with its beautiful distant views, its groves of trees and shrubbery, equals, if it does not surpass, the Central Park in New York. Washington Park (Fort Greene) is on a plateau, to the N. E. of City Hall, between Myrtle and DeKalb avenues; and Greenwood Cemetery, which includes 242 acres of ground, most beautifully laid out and ornamented, is in the southern part of the city, at Gowanus.

The public schools of Brooklyn are excellent and in a most prosperous condition. In 1871 there were 52 Primary schools, with 481 teachers and 28,205 pupils; and 38 Grammar schools, with 335 teachers and 12,774 pupils, and 21 evening schools, with 177 teachers and 2,071 pupils. The school population (from 5 to 21 years of age) numbered 135,869: only 66,396 of whom were in the public schools, while the average attendance was but 35,938. The receipts for school purposes amounted to $1,158,524, and the expenditures to $958,228, making the cost per pupil upon average attendance $18.31. The foremost college of the city is the Collegiate and Polytechnic Institution, which had 22 instructors and 562 students. St. John Baptist College is Roman Catholic. Packer Collegiate Institute had 34 instructors and 792 students. Long Island College Hospital, a medical school, had 11 instructors and 101 students. The Mercantile Library had 39,500 volumes, and the Brooklyn Institute 10,000 volumes.

The following are the principal newspapers of Brooklyn, with their circulation: "Brooklyn Times" (daily), 10,000; "Brooklyn Eagle," 25,000; "Brooklyn Union," 14,000; the "Brooklyn Eureka Pearl (monthly), 5,300.

Brown, co. in Ill., W. part. Area about 320 sq. mls. Pop., 12,205; in 1860, 9,938. The Illinois R. forms the eastern boundary, and its tributary, Crooked Cr., the northern. McKees Cr. intersects the S. part The surface is level and consists alternately of prairies and deciduous forests. The Toledo, Wabash & Western R. R. intersects the co. Mount Sterling is the co. seat. Agr. productions in 1870: Wheat, 130,778 bush.; rye, 4,742 bush.; oats, 70,832 bush.; Indian-corn, 337,769 bush.; Irish pot's, 22,604 bush.; sweet pot's, 183 bush.; butter, 72,614 lbs.; hay, 5,633 tons. Cash value of farms, $3,149,005. Total, estimated, value of all farm productions, including additions to stock, etc., $460,981. Value of manufactures, $251,647.

Brown, co. in Ind., central part. Area, 320 sq. mls. Pop., 8,681; in 1860, 6,507. The surface is level, or slightly undulating, and consists of fertile prairies and forests of deciduous trees, as oak, maple, hickory, etc. Beanblossom Cr. flows through the northern part; Salt Cr. through the southern. Both are tributaries of the White R. Nashville is the co. seat. Agr. productions in 1870: Wheat, 83,056 bush.; rye, 2,504 bush.; Indian-corn, 197,734 bush.; oats, 61,139 bush.; Irish pot's, 17,779 bush.; sweet pot's, 653 bush.; butter, 67,754 lbs.; hay, 2,348 tons. Cash value of farms, $1,205,152. Total, estimated, value of all farm productions, including additions to stock, etc., $359,069. Value of manufactures, $102,540.

Brown, co. in Kans., N. E. part; borders on Nebr. Area, 648 sq. mls. Pop., 6,823; in 1860, 2,607. The surface is undulating and mostly covered with prairies, which have a fertile soil. The northern part is drained by several small branches of the Nemaha R.; the southern part by the Sautrelle R. and its tributaries, Webster Cr. and Stranger Cr. The Central Branch of the Union Pacific R. R. intersects the co. from E. to W. Hiawatha is the co. seat. Agr. productions in 1870: Wheat, 59,619 bush.; Indian-corn, 614,268 bush.; oats, 128,136 bush.; Irish pot's, 57,961 bush.; wool, 9,633 lbs.; butter, 131,257 lbs.; hay, 12,582 tons. Cash value of farms, $2,245,711. Total, estimated, value of all farm productions, including additions to stock, etc., $454,233. Value of manufactures, $51,750.

Brown, co. in Minn., S. part. Area about 420 sq. mls. Pop., 6,396; in 1860, 2,339. It is bounded on the N. W. by the Minnesota R., and intersected by the tributaries of this R., Sleepy Eye Cr. and Big Cottonwood R. The surface is a rolling table-land, and consists chiefly of prairies. The soil of the river bottoms is very fertile. New Ulm is the co. seat. Agr. productions in 1870: Wheat, 213,970 bush.; rye, 770 bush.; Indian-corn, 34,525 bush.; oats, 156,768 bush.; Irish pot's, 24,556 bush.; butter, 94,993 lbs.; hay, 16,520 tons. Cash value of farms, $1,493,537. Total, estimated, value of all farm productions, including additions to stock, etc., $333,061. Value of manufactures, $135,105.

Brown, co. in Ohio, S. part. Area, 502 sq. mls. Pop., 30,802; in 1860, 29,958. The Ohio R. forms the southern boundary and separates the co. from Ky. The principal streams are the East Fork of the Little Miami R., which drains the N. E. corner; White Oak Cr., which intersects the co. from N. to S.; Straight Cr. and Eagle Cr. The surface is rolling. The valley of the Ohio R. is bounded by the steep slopes of the general surface, which appear like lofty hills, when viewed from below. Georgetown is the co. seat. Agr. productions in 1870: Wheat, 199,605 bush.; rye, 17,740 bush.; Indian-corn, 926,168 bush.; oats, 196,305 bush.; Irish pot's, 93,510 bush.; sweet pot's, 12,357 bush.; butter, 519,771 lbs.; hay, 13,587 tons. Cash value of farms, $9,376,576. Total, estimated, value of all farm productions, including additions to stock, etc., $2,196,181. Value of manufactures, $853,327.

Brown, co. in Tex., central part. Area about 950 sq. mls. Pop., 544; in 1860, 244. The Camanche Mts. form its eastern boundary, and the Colorado R. the southern. The North Fork of the Colorado traverses the co. from N. N. W. to S. S. E., and receives several small affluents. The surface is undulating, and in the eastern parts hilly. The soil is productive but the climate is arid. Brownwood is the co. seat. Agr. productions in 1870: Wheat, 60 bush.; Indian-corn, 11,000 bush.; sweet pot's, 70 bush.; butter, 1,000 lbs., hay, 11 tons. Cash value of farms, $6 450. Total, estimated, value of all farm productions, including additions to stock, etc., $18,422.

Brown, co. in Wis., E. part. Area, 522 sq. mls. Pop., 25,168; in 1860, 11,795. The surface is diversified by hills and undulations, and the soil is generally fertile. The co. includes the head of Green B., and is drained by the Fox or Neenah R., which empties into the B. and is navigable. The co. is intersected by the Chicago & Northern Wisconsin R. R. Green Bay is the co. seat. Agr. productions in 1870:

Wheat, 164,217 bush.; rye, 16,498 bush.; Indian-corn, 13,152 bush.; oats, 153,953 bush.; Irish pot's, 68,329 bush.; sweet pot's, 6 bush.; butter, 309,838 lbs.; hay, 19,525 tons. Cash value of farms, $2,655,608. Total, estimated, value of all farm productions, including additions to stock, etc., $860,127. Value of manufactures, $2,076,410.

Buchanan, co. in Iowa, E. part. Area, 576 sq. mls. Pop., 17,034; in 1860, 7,906. The co. has an undulating surface, which consists chiefly of fertile prairies, and is traversed by the Wapsipinicon R. and Buffalo Cr., flowing from N. W. to S. E. The Iowa division of the Illinois Central R. R. intersects the co. from E. to W. Independence is the co. seat. Agr. productions in 1870: Wheat, 719,581 bush.; rye, 256 bush.; Indian-corn, 617,310 bush.; oats, 534,530 bush.; Irish pot's. 85,282 bush.; sweet pot's, 4 bush.; butter, 533,519 lbs.; wool, 39,990 lbs.; hay, 28,667 tons. Cash value of farms, $6,021,232. Total, estimated, value of all farm productions, including additions to stock, etc., $1,597,375. Value of manufactures, $607,001.
Buchanan, co. in Mo., N. W. part. Area about 420 sq. mls. Pop., 35,109; in 1860, 23,850. It is bounded on the W. by the Missouri R., which separates it from Kansas, and drained by the Little Platte R., flowing from N. to S., Livingston Cr. and Castile Cr. The surface is undulating and consists chiefly of prairies; the water-courses only being skirted by belts of timber. The soil is very productive. The St. Joseph & Council Bluff R. R. follows the Missouri R., and the other railroads which intersect the co. are the Missouri Valley R. R., the Hannibal & St. Joseph R. R., and the Lexington, Sedalia & St. Joseph R. R. All these lines intersect at St. Joseph, the co. seat. Agr. productions in 1870: Wheat, 249,874 bush.; rye, 698 bush.; Indian-corn, 1,070,517 bush.; oats, 157,611 bush.; Irish pot's, 122,051 bush.; sweet pot's, 3,416 bush.; tobacco, 5,390 lbs.; butter, 63,530 lbs.; hay, 3,172 tons. Cash value of farms, $5,882,120. Total, estimated, value of all farm productions, including additions to stock, etc., $1,377,826. Value of manufactures, $3,454,893.
Buchanan, co. in Va., S. W. part, bordering on Ky. Area about 500 sq. mls. Pop., 3,777; in 1860, 2,793. This co. has a mountainous and elevated surface. The Cumberland Mts. extend into the N. W. part, and the Dividing Ridge trends along its S. E. boundary. The Louisa Fork and Russells Fork, the head streams of the West Fork of the Sandy R., traverse the co. from S. E. to N. W. and receive numerous tributaries within their area. The soil of the valleys is fertile and well adapted to grazing purposes. The mountains and hills are generally covered with dense forests. Grundy is the co. seat. Agr. productions in 1870: Wheat, 3,184 bush.; rye, 3,047 bush.; Indian-corn, 82,624 bush.; oats, 14,990 bush.; Irish pot's, 6,726 bush.; sweet pot's, 3,973 bush.; tobacco, 6,424 lbs.; butter, 71,955 lbs.; hay, 79 tons. Cash value of farms, $293,994. Total, estimated, value of all farm productions, including additions to stock, etc., $130,526. Value of manufactures, $16,435.

Bullitsville, p. o. in Boone co., Ky.

Bullitt, co. in Ky., N. part. Area, 320 sq. mls. Pop., 7,781; in 1860, 7,289. It is bounded on the W. by Salt R., a tributary of the Ohio, which passes within a short distance from the N. W. corner of the co. The East Fork of Salt R. intersects it from E. to W., and receives Floyd's Cr. The surface is rolling and in some parts hilly. Iron ore is abundant. The Louisville & Nashville R. R. passes through the co. from N. to S. Shepherdsville is the co. seat. Agr. productions in 1870: Wheat, 34,752 bush.; rye, 1,176 bush.; Indian-corn, 337,320 bush.; oats, 82,739 bush.; Irish pot's, 8,487 bush.; sweet pot's, 835 bush.; butter, 61,498 lbs.; hay, 3,606 tons. Cash value of farms, $2,056,652. Total, estimated, value of all farm productions, including additions to stock, etc., $600,009. Value of manufactures, $388,114.

Bullock, co. in Ala., S. E. part. Area, 612 sq. mls. Pop., 24,474. The co. has a low and level surface, diversified in several localities by low sandy ridges. The soil is but moderately fertile. The Tallapoosa R. forms part of the N. boundary, and its affluents, the Ufowpee Cr., Calcebee Cr. and Oaktuskee drain the co. The Montgomery & West Point R. R. intersects the co. from E. to W. Union Springs is the co. seat. Agr. productions in 1870: Wheat, 274 bush.; rye, 3 bush.; Indian-corn, 389,791 bush.; oats, 13,632 bush.; Irish pot's, 259 bush.; sweet pot's, 33,021 bush.; cotton, 17,972 bales; butter, 50 lbs.; hay, 1,758 tons. Cash value of farms, $2,468,172. Total, estimated, value of all farm productions, including additions to stock, etc., $2,008,451. Value of manufactures, $143,829.

Bullock, co. in Ga., E. part. Area, 833 sq. mls. Pop., 5,610; in 1860, 5,668. The Ogeechee R. forms the north-eastern boundary, the Cannowchee the south-western, and Sculls Cr., an affluent of the Ogeechee, part of the north-western. Big Lotts Cr. and other tributaries of the Cannowchee drain the greater part of the co. The surface is low and level. Large tracts

are covered with "pine barrens." Most of the soil is sandy and unproductive. Statesborough is the co. seat. Agr. productions in 1870: Indian-corn, 81,555 bush.; oats, 22,799 bush.; sweet pot's, 21,034 bush.; cotton, 1,000 bales; rice, 21,896 lbs.; butter, 14,941 lbs. Cash value of farms, $189,255. Total, estimated, value of all farm productions, including additions to stock, etc., $333,500. Value of manufactures, $14,300.

Butler, co. in Ala., S. part. Area about 820 sq. mls. Pop., 14,981; in 1860, 18,122. The surface is slightly rolling, and the soil moderately fertile. The E. part is traversed by Nepulgah R., and the central by the Sepulgah R., both tributaries of the Conecuh. The N. W. corner is intersected by Cedar Cr., an affluent of the Alabama R. The Mobile & Montgomery R. R. passes through the co. from N. E. to S. W. Greenville is the co. seat. Agr. productions in 1870: Indian-corn, 251,512 bush.; oats, 4,126 bush.; Irish pot's, 1,233 bush.; sweet pot's, 60,116 bush; cotton, 5,854 bales; butter, 12,365 lbs.; hay, 110 tons. Cash value of farms, $927,827. Total, estimated, value of all farm productions, including additions to stock, etc., $983,066. Value of manufactures, $262,205.
Butler, co. in Iowa, N. E. part. Area, 576 sq. mls. Pop., 9,951; in 1860, 3,724. The surface is undulating, and consists mostly of extensive prairies, which have a very productive soil. The West Fork of Cedar R. intersects the

center of the co. from W. N. W. to E. S. E., and its tributaries. Shell Rock R. and Beaver Cr., drain respectively the N. E. and S. parts. The Dubuque & Sioux City R. R. passes through the co. from E. to W. Butler Centre is the co. seat. Agr. productions in 1870: Wheat, 508,557 bush.; rye, 919 bush.; Indian-corn, 422,448 bush.; oats, 261,000 bush.; Irish pot's, 46,739 bush.; sweet pot's, 3 bush.; wool, 15,752 lbs.; butter, 268,273 lbs.; hay, 16,351 tons. Cash value of farms, $3,294,701 Total, estimated, value of all farm productions, including additions to stock, etc., $1,061,249. Value of manufactures, $253,566.

Butler, co. in Kans., S. part. Area, 1,440 sq. mls. Pop., 5,035; in 1860, 437. It has a slightly rolling surface, consisting chiefly of prairies. The soil is productive. White Water Cr., a tributary of the Arkansas R., and Walnut Cr., intersect the co. from N. to S. Chelsea is the co. seat. Agr. productions in 1870: Wheat, 5,344 bush.; rye 727 bush.; Indian-corn, 38,915 bush.; oats, 2,406 bush.; Irish pot's, 1,640 bush.; hay, 4,465 tons. Cash value of farms, $544,230. Total, estimated, value of all farm productions, including additions to stock, etc., $107,-411. Value of manufactures, $21,774.

Butler, co. in Ky., W. part. Area about 500 sq. mls. Pop., 9,404; in 1860, 7,927. It is intersected from W. to E. by the Green R., which receives Welshes Cr., Indian Cr. and Muddy Cr. The latter forms part of the western boundary. The surface is rolling and the soil but moderately productive. Morgantown is the co. seat. Agr. productions in 1870: Wheat, 13,875 bush.; rye, 77 bush.; Indian-corn, 340,115 bush.; oats, 60,506 bush.; Irish pot's, 10,676 bush.; sweet pot's, 7,057 bush.; tobacco, 1,008,582 lbs.; butter, 64,775 lbs.; hay, 1,068 tons. Cash value of farms, $1,011,750. Total, estimated, value of all farm productions, including additions to stock, etc., $475,976. Value of manufactures, $71,774.

Butler, co. in Mo., S. E. part. Area, 565 sq. mls. Pop., 4,298; in 1860, 2,830. It borders in the E. on the St. Francis R., and in the S. on the state of Ark. The Big Black R. flows through the middle from N. to S., and Cane Cr., an affluent of the latter, drains the western part. The surface is level and the soil productive. Poplar Bluff is the co. seat. Agr. productions in 1870: Wheat, 10,994 bush.; rye, 86 bush.; Indian-corn, 185,009 bush.; oats, 12,018 bush.; Irish pot's, 5,142 bush., sweet pot's, 3,277 bush.; tobacco, 48,245 lbs.; butter, 1,146 lbs.; hay, 181 tons. Cash value of farms, $427,272. Total, estimated, value of all farm productions, including additions to stock, etc., $725,824. Value of manufactures, $30,274.

Butler, co. in Nebr., E. part. Area, 585 sq. mls. Pop., 1,286; in 1860, 27. It is bounded on the N. by the Platte R., and drained in the S. W. by the Big Blue R. The surface is rolling. Savannah is the co. seat. Agr. productions in 1870: Wheat, 18,668 bush.; Indian-corn, 21,020 bush.; oats, 9,350 bush.; Irish pot's, 6,050 bush.; butter, 12,210 lbs.; hay, 2,261 tons. Cash value of farms, $317,800. Total, estimated, value of all farm productions, including additions to stock, etc., $50,760. Value of manufactures, $2,240.

Butler, co. in Ohio, S. W. part, borders on Ind. Area, 450 sq. mls. Pop., 39,912; in 1860, 35,840. It is intersected from N. E. to S. W. by the Miami R., which receives Elk Cr. and Four Mile Cr. The Dry Fork of the White Water R. drains the S. W. part of the co. The surface is level and the soil very productive. The Cincinnati & Indianapolis Junction R. R. and the Cincinnati & Richmond R. R. pass through the co. Hamilton is the co. seat. Agr. productions in 1870: Wheat, 627,377 bush.; rye, 1,863 bush.; Indian-corn, 1,716,862 bush.; oats, 229,621 bush.; Irish pot's, 113,135 bush.; sweet pot's, 5,688 bush.; butter, 548,875 lbs.; hay, 10,692 tons. Cash value of farms, $21,452,774. Total, estimated, value of all farm productions, including additions to stock, etc., $3,807,719. Value of manufactures, $5,106,432.

Butler, co. in Pa., W. part. Area about 800 sq. mls. Pop., 36,510; in 1860, 35,594. The surface is undulating and the soil but moderately fertile. It consists in many parts of sand. This co. touches with its N. E. and S. E. corners on the Susquehanna R. The N. part is drained by Slippery Rock Cr. and Bear Cr., and the center by Conequenessing Cr., which receives many tributaries, as Break Neck Cr., Yellow Cr. and others. Little Buffalo Cr. drains the S. E. part. Iron ore and bituminous coal are extensively mined. Butler is the co. seat. Agr. productions in 1870: Wheat, 294,464 bush.; rye, 179,577 bush.; oats, 1,099,163 bush.; Indian-corn, 453,894 bush.; Irish pot's, 187,984 bush.; sweet pots, 85 bush.; butter, 1,447,093 lbs.; hay, 52,567 tons. Cash value of farms, $18,230,848. Total, estimated, value of farm productions, including additions to stock, etc., $3,125,482. Value of manufactures, $1,330,032.

Calaveras, co. in Cal., E. part. Pop., 8,895; in 1860, 16,299. It is bounded on the N. by the Mokelumne R., and on the S. by the Stanislaus R. The larger portion of the co. is occupied by the spurs and outliers of the Sierra Nevada. The western part is low and level. Bear Mt., a well-timbered range, trends N. and S. and separates the low section from the mountain region. Placer mining is profitably conducted among the foot hills, which, from an early period, have been noted for their rich surface diggings. Agriculture, vine growing and stock raising are important branches of industry. Mokelumne Hills is the co. seat. One of the greatest curiosities of the state is the Big Tree Grove, growing on the divide between the Stanislaus and Calaveras Rs., about 20 mls. E. of Mokelumne Hills, and 4,759 feet above the sea. It consists of 92 giant trees (sequoia gigantea), which vary in height from 150 to 327 feet, and in diameter from 15 to 30 feet. Agr. productions in 1870: Wheat, 8,341 bush.; Indian-corn, 4,535, bush.; Irish pot's 6,695 bush.; sweet pot's, 400 bush.; wool, 129,025 lbs.; butter, 66,357 lbs.; hay, 6,213 tons. Cash value of farms, $221,245. Total, estimated, value of all farm productions, including additions to stock, etc., $389,388. Value of manufactures, $606,159.
Calaveras River, tributary of the San Joaquin in Cal.; it rises in the Sierra Nevada and traverses Calaveras and San Joaquin cos.
Calcutta, p. o. in Clay co., Ind.
Calcutta, p. v. in Columbiana co., Ohio, 4 mls. N. of Liverpool, on the Cleveland & Pittsburgh R. R.
Calcasieu, parish in La., S. W. part; bordering on Tex. Area about 3,500 sq. mls. Pop., 6,733; in 1860, 5,928. The surface is low and level. Extensive swamps occur along the sea coast. The larger part of the co. consists of beautiful prairies and savannahs, affording excellent pasture. The Calcasieu R. flows through the co. from N. E. to S. W. Before it reaches the gulf it expands into the Calcasieu L. The Sabine R. forms the W. boundary, and the Mermentou R. the S. E. boundary. The best soil lies along the water-courses. The New Orleans, Houston & Texas R. R. will intersect the co. from E. to W. Lake Charles is the co. seat. Agr. productions in 1870: Indian-corn, 39,950 bush.; Irish pot's, 90 bush.; sweet pot's, 29,380 bush.; cotton, 605 bales; rice, 29,400 lbs.; sugar, 28 hhds. Cash value of farms, $83,800. Total, estimated, value of all farm productions, including additions to stock, etc., $100,120. Value of manufactures, $206,500.

Caldwell, co. in Ky., W. part. Area about 250 sq. mls. Pop., 10,826; in 1860, 9,318. It is bounded on the E. by the Tradewater R., a tributary of the Ohio. The surface is level or slightly undulating and the soil is fertile. Princeton is the co. seat. Agr. productions in 1870: Wheat, 56,847 bush.; rye, 661 bush.; Indian-corn, 438,660 bush.; oats, 26,667 bush.; Irish pot's, 11,674 bush.; sweet pot's, 10,571 bush.; tobacco, 2,221,899 lbs.; butter, 84,886 lbs.; hay, 1,227 tons. Cash value of farms, $1,448,191. Total, estimated, value of all farm productions, including additions to stock, etc., $803,169. Value of manufactures, $167,646.

Caldwell, parish in La., N. central part. Area, 528 sq. mls. Pop., 4,820; in 1860, 4,833. The surface is undulating and consists mainly of prairies. The soil along the rivers is fertile, but large tracts are sandy and not productive. The Washita R. intersects the co. from N. to S. Boeuf Bayou forms the E. boundary. Bayou Castor and its tributaries drain the W. part. Columbia is the co. seat. Agr. productions in 1870: Indian-corn, 75,741 bush.; Irish pot's, 362 bush.; sweet pot's, 15,512 bush.; cotton, 4,157 bales. Cash value of farms, $260,275. Total, estimated, value of all farm productions, including additions to stock, etc., $102,644. Value of manufactures, $5,600.

Caldwell, co. in Mo., N. W. part. Area, 435 sq. mls. Pop., 11,390; in 1860, 5,034. The surface is undulating, and the soil fertile. The larger part of the co. is drained by Shoal Cr. and other small affluents of the Grand R. The Hannibal & St. Joseph R. R. passes through the co. from E. to W. Kingston is the co. seat. Agr. productions in 1870: Wheat, 104,130 bush.; rye, 7,408 bush.; Indian-corn, 728,121 bush.; oats, 217,040 bush.; Irish pot's, 59,872 bush.; sweet pot's, 288 bush.; butter, 206,150 lbs.; hay, 6,745 tons. Cash value of farms, $5,150,055. Total, estimated, value of all farm productions, including additions to stock, etc., $1,159,002. Total value of manufactures, $214,271.

Caldwell, co. in N. C., N. W. part. Area about 450 sq. mls. Pop., 8,476; in 1860, 7,497. It is bounded on the W. by the Blue Ridge and on the S. by the Catawba R. The Yadkin rises in this co. and flows north-west. A large part of its area is occupied by the slopes and spurs of the Blue Ridge, and some lower chains, as the Warrior Mt. and the Brushy Mt. The higher tracts are covered with forests; the lower include many meadows, which afford excellent pasturage. This co. abounds in picturesque scenery. Lenoir is the co. seat. Agr. productions in 1870: Wheat, 24,455 bush.; rye, 6,425 bush.; Indian-corn, 207,731 bush.; oats, 35,313 bush.; Irish pot's, 19,194 bush.; sweet pot's, 18,057 bush.; tobacco, 27,000 lbs.; butter, 55,550 lbs.; hay, 540 tons. Cash value of farms, $856,919. Total, estimated, value of all farm productions, including additions to stock, etc., $390,002. Value of manufactures, $98,687.

Caldwell, co. in Tex., central part. Area about 550 sq. mls. Pop., 6,572; in 1860, 4,481. It borders in the S. W. on the San Marcos R., which receives Plum Cr. The N. W. part is drained by small affluents of the Colorado R., as Cedar Cr., Walnut Cr., Sandy Cr. The surface is rolling and the soil fertile. Lockhart is the co. seat. Agr. productions in 1870: Indian-corn, 120,965 bush.; Irish pot's, 1,130 bush.; sweet pots, 12,039 bush.; butter, 33,142 lbs.; cotton, 1,692 bales; hay, 61 tons. Cash value of farms, $500,331. Total, estimated, value of all farm productions, including additions to stock, etc., $169,369. Value of manufactures, $13,355.

Caldwell, tn. in White co., Ark. Pop., 451.

Calhoun, co. in Ala., E. N. E. part. Area about 1,000 sq. mls. Pop., 13,980; in 1860, 21,539. It is bounded on the W. by the Coosa R., which receives within it several tributaries, as the Tallasahatchee and others. The Tallapoosa R, flows through the S. E. part of the co. The surface is diversified; several ranges of hills traverse the E. portion from N. E. to S. W., the highest of which are known as the Lost Mt. and Chookolocko Mt. The R. valleys are level and contain excellent farm land. The Selma, Rome & Dalton R. R. passes through the co. from N. E. to S. W. Jacksonville on the Tallasahatchee R. is the co. seat. Agr. productions in 1870: Wheat, 79,818 bush.; rye, 375 bush.; Indian-corn, 238,451 bush.; oats, 29,030 bush.; Irish pot's, 3,867 bush.; sweet pot's, 16,776 bush.; cotton, 3,038 bales; butter, 88,463 lbs.; hay, 55 tons. Cash value of farms, $1,324,105. Total, estimated, value of all farm productions, including additions to stock, etc., $713,006. Value of manufactures, $321,226.

Calhoun, co. in Ark., S. part. Area about 625 sq. mls. Pop., 3,853; in 1860, 4,103. It is bounded on the S. W. by the Washita R. and on the E. by the Moro R., which flows from N. to S., and is a tributary of the Washita, as well as Locust Bayou and the other water-courses draining this co. The surface is rolling, and consists mainly of fertile prairies. The R. valleys are covered with forests of cottonwood and other deciduous trees. Agriculture is the main business. Hampton is the co. seat. Agr. productions in 1870: Wheat, 255 bush.; Indian-corn, 102,705 bush.; oats, 835 bush.; sweet pot's, 13,746 bush.; tobacco, 125 lbs.; cotton, 2,593 bales. Cash value of farms, $258,884. Total, estimated, value of all farm productions, including additions to stock, etc., $296,079. Value of manufactures, $17,145.

Calhoun, co. in Fla., W. part. Area about 1,100 sq. mls. Pop., 993; in 1860, 1,446. It borders on the Gulf of Mexico, and is bounded on the E. by the Apalachicola R. The most southern part is Cape St. Blas, N. of which is St. Joseph's B. The surface is mostly low and level; the soil fertile. The co. seat is Abe Spring. Agr. productions in 1870: Oats, 180 bush.; Indian-corn, 25,970 bush.; Irish pot's, 640 bush.; sweet pot's, 13,950 bush.; cotton, 158 bales; butter, 640 lbs.; rice, 6,237 lbs.; hay, 2 tons. Cash value of farms, $51,970. Total, estimated, value of all farm productions, including additions to stock, etc., $37,050. Value of manufactures, $15,800.

Calhoun, co. in Ga., S. W. part. Area, 286 sq. mls. Pop., 5,503; in 1860, 4,913. It is bounded on the E. by the Chickesawhachee Cr. and intersected by the Ichawaynochaway Cr. The surface is level and the soil but moderately productive. Morgan is the co. seat. Agr. productions in 1870: Wheat, 45 bush.; Indian-corn, 101,517 bush.; oats, 5,546 bush.; Irish pot's, 514 bush.; sweet pot's, 11,243 bush.; cotton, 3,843 bales; butter, 14,085 lbs. Cash value of farms, $529,930. Total, estimated, value of all farm productions, including additions to stock, etc., $498,675. Value of manufactures, $44,901.

Calhoun, co. in Ill., W. part, bordering on Mo. Area, 260 sq. mls. Pop., 6,562; in 1860, 5,144. It occupies the narrow strip of land between the Mississippi R. in the W. and the Illinois R. in the E., which unite at the southeastern extremity. The surface is uneven, being cut up by ravines, and a line of bluffs, perpendicular in many places, separates the low and level bottom of the Mississippi from the more elevated tracts. These bottom-lands are very fertile. Hardin is the co. seat. Agr. productions in 1870: Wheat, 221,373 bush.; rye, 186 bush.; oats, 26,234 bush.; Indian-corn, 234,041 bush.; Irish pot's, 29,980 bush.; sweet pot's, 977 bush.; butter, 35,700 lbs.; hay, 1,914. Cash value of farms, $1,991,145. Total, estimated, value of all farm productions, including additions to stock, etc., $626,364. Value of manufactures, $106,913.

Calhoun, co. in Iowa, central part. Area, 576 sq. mls. Pop., 1,602; in 1860, 147. The surface is undulating, and at an average lies more than 1,000 feet above the sea level. The greater part of it consists of prairies. The largest stream is Indian Cr., which crosses the S. W. corner of the co. and receives Cedar Cr., Camp Cr. and Lake Cr. In the northern part are the Twin Lakes, forming a considerable body of fresh water abounding with fish. Lake City is the co. seat. Agr. productions in 1870: Wheat, 36,327 bush.; Indian-corn, 36,589 bush.; oats, 14,430 bush.; Irish pot's, 1,667 bush.; wool, 1,077 lbs.; butter, 8,927 lbs.; hay, 1,149 tons. Cash value of farms, $215,000. Total, estimated, value of all farm productions, including additions to stock, etc., $62,840. Value of manufactures, $8,442.

Calhoun, co. in Mich., S. part. Area, 720 sq. mls. Pop., 36,539; in 1860, 29,564. The surface is undulating and the soil very productive. The Kalamazoo R. intersects the northern part, the St. Josephs the southern. The co. consists mainly of open prairies interspersed with groves of white oak and other forest trees. The Michigan Central R. R. passes through the co. from E. to W. Marshall is the co. seat. Agr. productions in 1870: Wheat, 741,463 bush.; rye, 973 bush.; Indian-corn, 739,832 bush.; oats, 304,872 bush.; Irish pot's, 389,738 bush.; wool, 449,651 lbs.; butter, 824,058 lbs.; hay, 47,052 tons. Cash value of farms, $16,727,160. Total, estimated, value of all farm productions, including additions to stock, etc., $3,206,325. Value of manufactures, $3,849,099.

Calhoun, co. in Miss., N. part. Area, 594 sq. mls. Pop., 10,561; in 1860, 9,518. The surface is mostly level and gently slopes from E. to W. The co. is heavily timbered. The principal streams which drain it are the Yallaboosha R., the Loosa Schoona R. and Huckalafa Cr., a tributary of the latter. Pittsborough is the co. seat. Agr. productions in 1870: Wheat, 6,119 bush; rye, 63 bush.; Indian-corn, 303,405 bush; oats, 8,024 bush.; Irish pot's 1,814 bush.; sweet pot's, 31,800 bush.; cotton, 4,329 bales; butter, 127,180 lbs; hay, 969 tons. Cash value of farms, $1,016,025. Total, estimated, value of all farm productions, including additions to stock, etc., $1,078,975. Value of manufactures, $144,082.

Calhoun, co. in Tex., S. part. Area, 485 sq. mls. Pop., 3,443; in 1860, 2,642. It forms a peninsula lying between Espiritu Santo B., on the S. W., and Matagorda B., with Lavaca B. on the N. E. Guadalupe R. forms part of the

W. boundary. The surface is low and level along the sea shore and slightly undulating in the W. The soil is mostly very productive though sandy. Thickets of cactus and other spring plants cover considerable tracts and are known by the Spanish name of chaparral. Indianola is the co. seat. Agr. productions in 1870: Indian-corn, 4,165 bush.; Irish pot's, 920 bush.; sweet pot's, 2,432 bush.; butter, 6,200 lbs.; hay, 248 tons. Cash value of farms, $55,780. Total, estimated, value of all farm productions, including additions to stock, etc., $35,478. Value of manufactures, $351,989.

Calhoun, co. in W. Va., central part. Area about 285 sq. mls. Pop., 2,939; in 1860, 2,602. This co. occupies a portion of the Little Kanawha R. Valley, and is bounded on the N. by the South Fork of Hughes R. The West Fork of the Little Kanawha forms part of the southern boundary. The surface is deeply furrowed by the river valleys, and in some parts rises to a considerable elevation. Grantsville is the co. seat. Agr. productions in 1870: Wheat, 5,382 bush.; rye, 849 bush.; Indian-corn, 52,202 bush.; oats, 8,357 bush.; Irish pot's, 6,160 bush.; sweet pot's, 632 bush.; butter, 24,640 lbs.; hay, 985 tons. Cash value of farms, $332,762. Total, estimated, value of all farm productions, including additions to stock, etc., $132,114. Value of manufactures, $6,000.

Calhoun, p. v. in Lowndes co., Ala., on the Mobile & Montgomery R. R., 29 mls. from Montgomery. Pop., 75.

Calhoun, tn. in Columbia co., Ark. Pop., 806.

Calhoun, p. o. in the above tn.

Calhoun, p. v. and the co. seat of Gordon co., Ga., on the Oostanaula R., and the Western & Atlantic R. R., 19 mls. N. of Kingston, and 80 mls. from Atlanta; has considerable commerce, and lies in a farming district. One newspaper.

Calhoun, p. v. in Richland co., Ill., 5 mls. S. of Olney, the co. seat.

Calhoun, tn. in Calhoun co., Iowa. Pop., 263.

Calhoun, tn. in Harrison co., Iowa. Pop., 371.

Calhoun's Mills, p. o. in Abbeville district, S. C.

CALIFORNIA, next to Tex. the largest state of the Union, is bounded by Oreg. on the N., Nev. and Ariz. on the E., Mexico on the S., and the Pacific Ocean on the W. It extends from 32° 34′ to 42° N. lat., and from 114° 8′ to 124° 24′ W. long. The extreme length from the Colorado R. in the S. E., to the Pacific coast in the N. W., is over 800 mls.; the average width from E. to W. is about 175 statute mls. The area has been computed at 188,981 sq. mls., or 120,947,840 acres; 40,000,000 of which are arable, 35,000,000 suitable for grazing, and 10,000,000 unfit for cultivation. The lands subject to overflow, known as the "Tule lands," comprise 5,000,000 acres, and the mountains cover an area of nearly 26,000,000 acres.

Surface.—California is naturally divided into four distinct regions: 1. The Coast Ranges; 2. The Sierra Nevada; 3. The Central Valley, and 4. The South-western Region. The coast-line, extending over 10° of lat., has a regular north-western trend between the parallels of 35° and 40° N. lat., and the three first-named divisions present the same general direction. The coast ranges occupy a belt of about 40 mls. in width, extending through the entire length of the state from S. to N., and contiguous to the shores of the Pacific Ocean. They consist of numerous ranges and ridges of about 3,000 feet average elevation above the sea level, inclosing fertile and often highly picturesque valleys between them. The Bs. of San Francisco and San Pablo, together with the low ground which extends on both sides of the mouth of the Sacramento R., break the continuity of the coast ranges, and divide them into a northern and southern group. "The scenery of these ranges," according to J. D. Whitney, "is rarely more than picturesque, but always peculiar." "It is not so much the summits and ridges as the valleys nestling between them, which give character to the landscape. Besides we must allow its share in producing the general impression to the peculiar erosion of the mountain masses, made conspicuous by the absence of forests, and especially to the peculiar atmosphere, which invests them with a peculiar charm." (See Coast Ranges.) The second mountain belt is occupied by the great "Snowy Range," or the Sierra Nevada, which trends from the S. E. to the N. W. for a distance of over 550 mls., and has an average width from E. to W. of 80 mls. It forms the western edge of the great continental upheaval, or plateau, designated by the general name of the Cordilleras; and corresponds in position to the Rocky Mts., the one being the western the other the eastern edge of the mass. No range among the Cordilleras surpasses, if any one equals, the Sierra Nevada in extent or altitude, and certainly no one can be compared with it in the general features of interest which characterize it—scenery, vegetation and mineral wealth. The Sierra inosculates with the coast ranges at its two extremities, the Tejon Pass in the S. (in about 35° N. lat.) and Mt. Shasta in the N. In these localities the two mountain systems are so linked that there is no longer any geographical, but only a geological, distinction to be made between them. The average height of the Sierra is three times as great as that of the coast ranges. Its culminating section is in the neighborhood of 36½° N. lat., and from here the height of the peaks, as well as of the passes, sinks as we go northward or southward. At Lassen's Pk., in about 40½° N. lat., the Sierra expands into a grand volcanic plateau, extending from Mt. Shasta in the W. to Warner's Range in the E. (near the north-eastern extremity of the state), and forming a labyrinth of ridges and valleys, defying all attempts at classification. Between the Sierra Nevada and the coast ranges there lies an extensive low plain, the third of the physical regions above enumerated, and known as the Central Valley, or as the Valley of the Sacramento and San Joaquin Rs. The traveler passing up either of these streams observes at a distance of 20 or 30 mls. on either hand a continuous wall of mountains, which appear in the dim distance as simple narrow uplifts, but which are in reality but the edges of the broad mountain belts above described. This valley is level, and on the whole but slightly elevated above tide-water, including large tracts of "Tule," or overflowed lands. It is nearly 400 mls. long, and includes an area of about 18,000 sq. mls.

The three physical regions above described are arranged in belts, strictly parallel to and conforming with the sea coast. The fourth and last region has its own distinct peculiarities, and embraces the south-eastern part of the state. From the coast ranges, where they inosculate with the Sierra Nevada at the Tejon Pass branch off mountain ranges: as the San Bernardino Mt., San Jacinto Mt., Santa Anna Mts., and many others. They include seques-

tered valleys, which, with their fertile soil, beautiful scenery and semi-tropical climate, form one of the most attractive features of California. But to the N. E. of this beautifully diversified district, there extends the little known desert of the interior, which, geographically speaking, forms part of the great Interior Basin. Arid and hot, sandy and sterile, with numerous rocky, bleak and barren mountain chains, and a few insignificant water-courses, it has no attractions either for the tourist or the settler. A part of it is known as the Mohave River Desert.

Bays and Harbors.—The largest, and in every way the finest, B. on the coast of the state, is that of San Francisco. The entrance from the Ocean is the Golden Gate, a strait of one mile in width and hemmed in by the picturesque terminations of the Coast Ranges on the N. and on the S. The bay is nearly 50 mls. long and 9 mls. wide, and is sheltered from the violence of the winds on all sides by the surrounding hills. Toward the N. it expands into another large sheet of water, San Pablo B., from the eastern extremity of which Carquines Strait leads into Suisun B. The latter receives the waters of the Sacramento and San Joaquin Rs. San Diego Harbor is on the southern extremity of the coast, about 456 mls. S. of San Francisco. It is well sheltered by surrounding hills, but lacks the advantages for inland commerce which San Francisco possesses. San Pedro B., in Los Angeles co., is 373 mls. S. of San Francisco, San Louis Obispo B. nearly 100 mls., Monterey B. 92 mls., Santa Cruz Harbor, 86 mls., and Half Moon B., 46 mls. Drakes B. is 36 mls. N. of the Golden Gate, Tomales B., 45 mls., Bodega B., 50 mls., and Humboldt B., 223 mls.

Rivers and Lakes.—California has but two large rivers, the Sacramento and San Joaquin, which traverse the great central valley in opposite directions and pour their united waters into Suisun B. The main, though shorter, fork of the Sacramento, rises near Mt. Shasta, while the East Fork, also called Pitt R., rises in Warners Range and flows through the lofty plateau which extends between this range and the Sierra Nevada. The San Joaquin rises near Tulare Lake and flows north. Both streams receive numerous tributaries from the Sierra Nevada, but comparatively few from the Coast Ranges. (See Sacramento R. and San Joaquin R.) The Colorado washes the S. E. boundary of the state, and being navigable to Callville, Nev., for small boats, is of considerable commercial importance.

The many smaller streams of California which empty into the Pacific Ocean rise among the Coast Ranges, and drain their valleys and slopes. Enumerated from N. to S. they are the following: Klamath R., the outlet of the Klamath Lakes in Oreg.; Mud R., Eel R., formed by the junction of the Main and South Forks, and emptying N. of Cape Mendocino; Russian R., Cayote Cr., entering the southern extremity of San Francisco B.; the Rio San Benito and the Rio Salinas or de Monterey, both entering the B. of Monterey; Gayamas R., Santa Inez Cr., Santa Clara R., San Gabriel R., Santa Anna R., Margarita R., San Luis Rey R., San Bernardo R., San Diego R., and lastly the Rio Tia Juana, which flows near the southern boundary of the state.

Climate.—A country extending so far N. and S., and comprising such contrast of elevations and surface structure as California, naturally presents in its different parts greatly varying climatic conditions. The mean annual temperature in the extreme N. of the state is probably below 50 degr. fahr.; in the S. E., where the Colorado Desert extends into the state, it exceeds 70 degr. Observations made during the year 1858 in central California gave the following results: In San Francisco, mean annual temperature, 55° 23′; highest temperature, 91°; lowest 35°; in Sacramento, mean annual temperature, 59° 58′; highest temperature, 97°, lowest 29°; in Marysville, mean annual temperature, 63° 32′, highest temperature, 103°, lowest, 29°. It will be noticed that the range between the extremes increases with the distance from the coast. In San Francisco it is 55°; in Sacramento 68°, and in Marysville 74°. The coast ranges and their valleys have a decidedly oceanic climate: moist, equable and free from sudden changes. In San Francisco rain begins to fall freely in November or December, but gradually diminishes in January; February is spring-like, with but little rain; March and April are pleasant and showery. In May the sea breeze begins and continues through the next three months. In September and October it moderates, and the air is mostly dry. September is the hottest month in the year, and then follow October, August and July. The interior of the state has a continental climate, the influence of the sea scarcely reaching beyond the most eastern of the coast ranges. As we recede from the ocean the days are warmer and the nights colder. The great central valley has very dry summers, and hardly any rain falls from May to November (hence the absence of forests); while the winters are moist. In the Sierra Nevada the temperature decreases and the rain fall increases steadily with the altitude. The line of perpetual snow is about 9,000 feet above the ocean. The south-eastern corner of the state, which includes a part of the Colorado Desert, has a climate of its own. The heat is intense, and in July the thermometer often rises above 100°. The average annual fall of rain through the state increases from S. to N., and in the Sierra Nevada with the altitude. In Fort Yuma it is but 4 inches; in San Diego 10; in San Francisco 22; at Humboldt B. 34; and in the Sierra, above 5,000 feet, 44 inches and more.

Vegetation.—Of the 1,500 species of plants composing the flora of Cal., about 225 are found only in this state or in Oreg., while the others, which are represented elsewhere, are marked with strong individual peculiarities. The number of species of trees is small compared with those of the eastern portions of the continent, nor is the extent and compactness of forests nearly so great as there. The great interior valley consists mainly of prairies, only the water-courses being fringed with narrow belts of cottonwood and other deciduous trees. The coast ranges produce forests not remarkable for variety or extent. The valleys are park-like, as the trees grow in graceful clumps. Various kinds of oak and conifers predominate everywhere. The shrubby undergrowth consists of the "chamiro," the "manzanita," called by the settler the "California lilac," and various shrubby oaks, each furnished with as many thorns as there are points to leaves and branches, making what is known as the "chaparal," impenetrable thickets, rendering part of the state quite inaccessible. The glory of the coast ranges is the Redwood (Sequoia sempervirens), a coniferous tree of great size and beauty of form. It frequently attains a height of 275 feet, and a circumference at the base of 50 feet. In the Sierra Nevada there are extensive forests, consisting mainly of pines, firs and other coniferous trees. The most remarkable species among these is the "Big Tree" (Sequoia gigantea), which is found exclusively scattered over limited areas in the Sierra, over 4,000 feet above the sea level, and as far as known between 36° and 38° 15′ lat. There are eight distinct patches or groves of the big trees. The one in Calaveras co., on the road which crosses the Sierra at the Silver Pass, was first discovered, and is the most accessible. It contains from 90 to 100 trees, varying in height from 256 to 325 feet, and in circumference, 10 feet above the ground, from 31 to 45 feet. Another grove occurs near the border of Calaveras and Tuolumne cos., and about 25 mls. S. E. of this there is a third. The

Mariposa Grove is situated about 16 mls. S. of the Lower Hotel in the Yosemite Valley.

Animals.—At the head of the Californian mammalia stands the grizzly bear. Formerly quite abundant in nearly all parts of the state, it now lives only in the more thinly inhabited sections. The black bear is limited to the cos. N. of San Francisco B. The raccoon does not materially differ from that of the Atlantic states, and lives in the woodless districts, while the badger is confined to the forests. The other carnivora are: the skunk, the glutton, or wolverine, a few of which are occasionally killed on the heights of the northern Sierra; the marten, mink, weasel, otter, cougar or panther, the beautifully spotted jaguar, the gray wolf, several kind of foxes, and the opossum. The insect-eaters are represented by the western mole and the star-nosed mole; and the rodents or gnawers by the beaver, the woodchuck, several species of squirrels, mice and muskrats. To the ruminants or cud-chewers belong the elk, the white-tailed deer and the black-tailed deer, the antelope and the mountain sheep or "Bighorn" (Ovis montana). Nearly all the orders of birds common to the temperate zone are well represented in California. The principal are several kinds of wood-peckers, the white-headed eagle, the golden eagle, the fish hawk, marsh hawk and white-tailed hawk, numerous species of owls, humming birds, etc. There are eighty-five species of reptiles in Cal., as tortoise, the western terrapin, lizards (more numerous than in any other state), rattlesnakes, various harmless serpents and frogs. Fishes abound in the rivers and lakes and near the sea coast, and in variety excel those of any other division of equal extent. The salmon are plentiful in spring, and trout of large size and excellent quality inhabit the mountain lakes. Perches of several feet in length are frequently caught. The white fish inhabits the southern waters of the state. The "Big Basse" caught near San Francisco is considered the best sea-fish sold in that market. The Cal. mackerel is similar to the Atlantic species but smaller, and is mostly eaten fresh. Eatable mollusks, as clams, oysters and muscles, are extensively sold for food, and crabs, lobsters and shrimps are both abundant and large.

Population.—California had, in 1870, 582,031 inhabitants, 499,424 of whom were white, 4,272 colored, 40,310 Chinese, and 29,025 Indians. Of the latter there were 21,784 sustaining tribal relations, and 7,241 out of tribal relations. The nativities were as follows: Born in the United States, 350,416, including 162,093 native Californians; born in foreign countries, 209,830, including 10,602 British Americans, 17,685 Englishmen, 54,421 Irishmen, 4,949 Scotchmen, 29,699 Germans, 4,630 Italians and 8,978 Mexicans. The growth of Cal. has been very rapid. The first census, which was taken in 1850, shortly after the gold discoveries, reports 92,597 inhabitants; that of 1860, 379,994 inhabitants.

Occupations.—The number of persons above 10 years of age in 1870 was 430,444, and of these 238,648 were engaged in the different classes of gainful occupation, viz.: In agriculture, 47,863; in professional and personal services, 76,112; in trade and transportation, 33,165; and in manufactures, mechanical and mining industries, 81,508. The two branches most numerous were: Farm laborers, 37,586, and miners, 36,339; the farmers numbered 24,061; domestic servants, 15,472; clergymen, 569; lawyers, 1,115; journalists, 209; and physicians and surgeons, 1,257.

Mining.—The first gold discovery was made in 1848 by I. W. Marshall, while digging a race for a saw mill of Captain Sutter. As soon as the news of it became known thousands of adventurers from the eastern states, from Europe, and even from distant China, flocked to the land of promise, and ever since Cal. has held the first place among the gold-producing countries of the world. Gold is obtained by being washed out of the soil, or by crushing the quartz rock containing the metallic veins, in mills. The washing process on a small scale is called "placer mining," and is not now much followed in the state. Hydraulic mining is placer mining on a large scale, and is still a highly remunerative pursuit. It requires much outlay of capital. Large quantities of water are carried down from the mountains in flumes or ditches, and immense hills, hundreds of feet high, are washed away until the gold-bearing gravel is reached. The metal is saved in long sluice-boxes, through which the earth and water are run, in the bottom of which gold is caught by quicksilver, then the mass of earth and gravel is run off into some deep valley or river, and it is this operation which often renders hydraulic mining so extremely costly.

Quartz mining is now the chief process of obtaining gold in Cal., and will remain so for years, as the veins are rich and abundant. The productive gold mines are located principally on the western slopes and spurs of the Sierra Nevada, and in the following cos.: Inyo, Mariposa, Tuolumne, Calaveras, Amador, El Dorado, Placer, Nevada, Sierra, Yuba, Butte, Plumas, Alpine, Shasta and Del Norte.

The amount of gold taken from the mines can never be known accurately, as no records are kept. But the fact is certain that the yield annually increased from 1849, culminated in 1853, and has since then gradually fallen off. The amount of treasure manifested for exportation from San Francisco was, in 1849, $4,921,250; in 1851, $42,582,695; in 1853, $57,330,034; in 1855, $45,182,631; in 1857, $48,976,697; in 1859, $47,649,462; in 1861, $40,639,080; in 1863, $46,071,920, and in 1865, $44,984,546. R. W. Raymond, U. S. Commissioner of Mining Statistics, estimates the total yield of bullion for 1869 at $20,000,000.

Silver mining is almost the sole pursuit for the inhabitants of the three cos. of Calaveras, El Dorado and Shasta. It occurs mostly in argentiferous galena. Very rich deposits of quicksilver ore (cinnabar) occur in many parts of the state, but the only mines yielding profitable returns are the New Almaden, the New Idria, the Redington, the Guadalupe, and the San Juan Bautista. The first of these was the earliest opened, and is by far the most productive. It yielded from July, 1850, to December, 1867, 461,887 flasks, or 35,333,586 lbs. of pure metal. Productive coal mines are worked near Mt. San Diablo, E. of San Francisco B., and among the other mineral treasures of the state are copper, iron, borax, salt and sulphur.

Agriculture.—In Cal. the rains begin late in October. Grass is green all winter; plowing begins on the first of December, and sowing is continued as late as March. Thus the farmer has three or four months to put in his crops. Corn is planted from March to May, and harvested as late as December. After the middle of April the rains cease, and the whole harvest season is absolutely without rain. The great valleys of the San Joaquin and the Sacramento embrace the far greater part of the farming lands of Cal.; but many of the valleys of the coast ranges, and those S. of the San Bernardino Mts., are equally productive. With so large a body of most fertile lands and so favorable a climate, provided the farmer adapts himself to the peculiarity of the seasons, agriculture is already the principal occupation of Cal. In 1870 the improved land amounted to 6,218,133 acres, or between one-sixth and one-seventh of the arable surface of the state. The cash value of farms was $141,240,028; or $22.70 per improved acre. Farmers paid wages to the amount of $10,369,247, and the farm productions, including additions to stock, were worth $49,856,024. The wheat crop amounted to 16,676,702 bush., which were mostly grown in the valley of San Joaquin. Fields of 2,000 or 4,000 acres

make but small farms there, and ten times larger ones are not at all rare. In 1872 the wheat crop was estimated at 180,000 tons, and the surplus of the whole state was believed to require for transportation 700 ships of 1,000 tons each. The other crops were (according to the census) 1,221,222 bush. of corn; 1,757,507 bush of oats; 8,783,490 bush. of barley; 11,391,743 lbs. of wool; 2,049,227 bush. of Irish pot's; 202,035 bush. of sweet pot's; 7,969,744 lbs. of butter; 551,773 tons of hay, and 1,814,656 gallons of wine. The grape vine thrives excellently in Cal., and even those varieties which in the East can only be raised in glass houses are grown there in the open air. Extensive vineyards are near Sonoma, Visalia, in the Napa Valley, and near Anaheim in Los Angeles co. Semi-tropical fruits are extensively raised in southern Cal., and include the orange, olive, lemon, lime, etc. Immense orchards of apples pears, peaches, and other northern fruits have been planted in the central portions of the state, and their products are largely exported to the eastern states. In 1870 the value of orchard products was $1,384,480. The total value of all live stock was $37,964,752; and the number of horses was 192,273; of mules and asses, 17,533; of milch cows, 164,093; of working oxen, 5,944; of other cattle, 461,361; of sheep, 2,768,187, and of swine, 444,617.

Manufactures.—In 1870 there were 3,984 manufacturing establisments in Cal., employing 604 steam-engines with 18,493 horse-power, and 25,392 hands. The capital invested in this branch of industry was $39,728,202; the wages paid were $13,136,722; the materials used had a value of $35,351,193, and the total value of products amounted to $66,594,556. The most important branches and the value of their products were: Blacksmithing, $1,161,790; boots and shoes, $2,214,807; bakery products, $1,185,820; carpentering and building, $1,391,163; carriages and wagons, $1.309,443; men's clothing, $1,090,270; flouring and grist-mill products, $9,036,386; lumber, $5,279,914; machinery, $3,214,817; refined sugar, $3,904,045; printing and publishing, $1,523,446; quicksilver, $1,027,680; milled quartz, $3,405,778; cigars, $1,909,917; and woolen goods, $1,102,754.

Commerce and Railroads.—The total declared value of goods imported in San Francisco was, in 1870, $20,384,907, and the export of domestic goods $20,791,414, and the export of foreign goods $2,855,116. Cal. has 143 steam vessels, with 49,886½ tons; 720 sailing vessels, with 75,352½ tons, and 63 barges, with 8,061½ tons; or an aggregate of 926 vessels, with 133,300 tons burden.

In 1862 Cal. had but 23 mls. of railroads; in 1873, 1,013 mls. The principal lines are as follows: The Central Pacific R. R., from San Francisco to Ogden, Utah, 881 mls., with branches from Niles to San José, 18 mls.; from Lathrop to Visalia, 152 mls., 20 of which were completed in 1871; from Roseville to Oregon state line, 330 mls., 70 mls. of which were in use in 1871; from Alameda to Haywards, 15 mls., and from Oakland to Brooklyn, 5 mls.; the Southern Pacific R. R., from San Francisco via Tehachapi Pass and Los Angeles to Fort Yuma, on the Colorado R., about 720 mls., 175 mls. of which were completed June 1, 1872. At Fort Yuma the road will connect with the Texas Pacific R. R., which is now rapidly crossing Indian Ter.

Wealth, Taxation and Indebtedness.—The assessed value of real estate in 1870 was $176,527,160; of personal property, $93,426,908; together, $269,644,068. The taxation, not national, was $2,982,929, of which $1,456,024 was state tax, $1,122,971 county tax, and $403,937 town and county tax. The public state debt was, on April 1st, 1872, $3,312,500, payable in N. Y., and bearing 7 per cent. interest. Principal and interest payable in gold. In addition to this the state pays 6 per cent. interest on bonds, to the amount of $1,500,000, issued by the Central Pacific R. R.

Education and Newspapers.—The schools of Cal. are justly famous, and the educational interest is in no state better appreciated and supported. In 1870 there were 91,176 children attending school, against 25,916 in 1860, and 993 in 1850. The number of schools of all classes was 1,548, with 2,444 teachers. The 1,342 public schools had an income of $1,627,376, mostly derived from taxation and public funds. The two universities had 18 teachers and 250 pupils, 65 of whom were females. The 17 colleges had 156 teachers and 3,046 pupils. Besides these institutions Cal. had 5 academies, a medical school, a theological seminary, a commercial institute, an institute for the blind and one for the deaf and dumb, 8 schools of art and music, and 2 technical schools. There were further, 154 day and boarding schools and 18 parochial and charity schools.

The total number of newspapers was 201, which had a circulation of 491,903. Of these there were dailies, 33; tri-weeklies, 4; semi-weeklies, 4; advertising sheets, 4, and monthlies, 3. These papers represented the following interests: Agriculture, 2; benevolent and secret societies, 4; commercial and financial, 15; literature, 6; those devoted to nationality numbered 7; to politics, 141, with a circulation of 239,253; to religion, 14; and to technical and professional interests, 7.

Those having the largest circulation are: "San Francisco Call" (daily), 24,394; "San Francisco Chronicle" (daily), 21,500; "San Francisco Alta California" (daily), 5,500; "San Francisco Bulletin" (daily), 11,000; "Sacramento Union" (weekly), 15,000; "San Francisco Wine Dealer's Gazette" (monthly), 7,680; and San Francisco West" (monthly), 10,000.

Government.—Cal. was ceded to the United States by the treaty of peace which terminated the war with Mexico in 1848, and was admitted into the Union as a state in 1850. The Governor, Lieut. Governor, Secretary of State, Comptroller, Treasurer, Attorney-General, Surveyor-General, and Superintendent of Public Instruction are chosen for four years, commencing with the first Monday in December after election. The last election for state officers was in September, 1871.

The Legislature meets biennially on the first Monday of December of the odd years. It consists of forty Senators and eighty Representatives.

The Supreme Court consists of a Chief Justice and four Associate Justices. It has appellate jurisdiction in all cases of equity, in all cases involving the title or possession of real estate, or in which the matter in controversy amounts to $300, and in all criminal cases amounting to felony on questions of law alone. The state is divided into 14 judicial districts, in each of which there is a district court. The term of office for the Justices of the Supreme Court is 10 years; for the Judges of the District Courts 6 years, and for Judges of the County Courts 4 years.

The state is divided into the following fifty counties: Alameda, Alpine, Amador, Butte, Calaveras, Colusa, Contra Costa, Del Norte, El Dorado, Fresno, Humboldt, Inyo, Kern, Klamath, Lake, Lassen, Los Angeles, Marine, Mariposa, Mendocino, Merced, Mono, Monterey, Napa, Nevada, Placer, Plumas, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Barbara, Santa Clara, Santa Cruz, Shasta, Sierra, Siskiyou, Solano, Sonoma, Stanislaus,, Sutter, Tehama, Trinity, Tulare, Tuolumne, Yolo, Yuba.

The state capital is Sacramento, on the R. of the same name, with 16,283 inhabitants. The metropolis is San Francisco, with 149,473 inhabitants. The four remaining cities are: Oakland, 10,500 inhabitants; Stockton, 10,066 inhabitants; San José, 9,089 inhabitants, and Los Angeles, 5,728 inhabitants.

Callaway, co. in Ken., S. W. part. Area about 400 sq. mls. Pop., 9,410; in 1860, 9,915. The Tennessee R. forms the E. boundary; the state line of Tenn. the southern. The greater part of the co. has a rolling or hilly surface; but the bottom-lands of the water-courses are wide and level, consisting mostly of alluvial flats of great fertility. The East fork of Clark's R. flows through the center of the co. from S. to N.; the South fork flows through the western part, and Jonathan Cr. through the eastern. The two last-named streams rise within the co. Murray is the co. seat. Agr. productions in 1870: Wheat, 33,770 bush.; rye, 698 bush.; Indian-corn, 417,410 bush.; oats, 9,228 bush.; Irish pot's, 10,355 bush.; sweet pot's, 15,473 bush.; tobacco, 1,994,502 lbs.; butter, 66,040 lbs.; hay, 541 tons. Cash value of farms, $1,194,590. Total, estimated, value of all farm productions, including additions to stock, etc., $778,798. Value of manufactures, $153,880.
Callaway, co. in Mo., E. central part. Area, 713 sq. mls. Pop., 19,202; in 1860, 17,449. It borders in the S. on the Missouri R., and in the W. on Cedar Cr. The surface is undulating and has a general slope from the N. to the S. A large part consists of prairies. The soil is very productive. The co. is drained by several small creeks, flowing into the Missouri R. Cannel and bituminous coal and iron ore are abundant. Fulton is the co. seat. Agr. productions in 1870: Wheat, 167,545 bush.; rye, 7,993 bush.; Indian-corn, 971,715 bush.; oats, 405,294 bush.; Irish pot's, 45,229 bush.; sweet pot's, 2,325 bush.; tobacco, 938,228 lbs.; butter, 205,233 lbs.; hay, 10,395 tons. Cash value of farms, $5,863,926. Total, estimated, value of all farm productions, including additions to stock, etc., $1,649,405. Value of manufactures, $281,107.

Cambria, co. in Pa., S. W. part. Area about 675 sq. mls. Pop., 36,569; in 1860, 29,155. This co. is a part of the great Apalachian Plateau, and has an average elevation above the sea level of 1,200 feet. The surface is broken and cut by deep valleys and ravines. The eastern boundary is formed by the Alleghany Mts. Large tracts are covered with forests, which yield large quantities of lumber. Near the center are the sources of the West Branch of the Susquehanna R., and its affluents, Chest Cr. and Clearfield Cr. The Conemaugh R. rises in the Alleghany Mts. and traverses the co. from E. to W. Its tributary, Blacklick Cr., also rises in this co. Thus it includes part of the water shed between the Atlantic Ocean and the Ohio R. The co. is intersected by the Pennsylvania Central R. R., and a branch connects Cresson on this road with Ebensburgh, the co. seat. The Pennsylvania Canal follows the valley of the Conemaugh R. Agr. productions in 1870: Wheat, 56,938 bush.; rye, 47,385 bush.; oats, 346,991 bush; Indian-corn, 153,252 bush.; Irish pot's, 89,368 bush.; butter, 428,273 lbs.; hay, 25,801 tons. Cash value of farms, $4,834,076. Total, estimated, value of all farm productions, including additions to stock, etc., $1,140,417. Value of manufactures, $8,641,813.

Camden, tn. in Ray co., Mo. Pop., 3,347.

Camden, p. v. in the above tn., on the left bank of the Missouri R., on the North Missouri R. R., 34 mls. E. of Kansas City and 84 mls. W. of Moberly Junction. By water it is 325 mls. from St. Louis, and large quantities of tobacco, hemp and grain are shipped to that city.

Camden, tn. in DeKalb co., Mo. Pop., 1,359.

Camden, co. in Mo., central part. Area, 580 sq. mls. Pop., 6,108; in 1860, 4,975. It has a hilly and broken surface, and is intersected by the Osage R., which also forms part of the northern boundary. The Big Niangua R., an affluent of the Osage, flows through the central part, the Little Niangua R. flows through the western and the Auglaize R. through the eastern. Linn Creek is the co. seat. Agr. productions in 1870: Wheat, 43,001 bush.; rye, 1,377 bush.; Indian-corn, 181,288 bush.; oats, 23,415 bush.; Irish pot's, 9,486 bush.; sweet pot's, 723 bush.; tobacco, 25,507 lbs.; hay, 430 tons. Cash value of farms, $492,558. Total, estimated, value of all farm productions, including additions to stock, etc., $275,150. Value of manufactures, $104,197.

Camden, p. v. in Seward co., Nebr., on the North Fork of the Big Blue R. and 4½ mls. S. E. of Milford, the co. seat.

***Camden,** city and the co. seat of Camden co., N. J., on the E. bank of the Delaware R., opposite Philadelphia, with which it is connected by steam ferries. By the Camden & Amboy R. R. it is 32 mls. S. S. W. of Trenton and 87 mls. S. W. of N. Y., and other railroads connect it with Cape May and Atlantic City, in the eastern and southern parts of the state. Camden has iron foundries, machine works, cotton factories, woollen factories, and considerable trade. Pop., 20,045; in 1860, 14,358, and in 1850, 9,479. Three newspapers.

Camden, co. in N. J., S. part. Area, 275 sq. mls. Pop., 46,193; in 1860, 34,457. It borders in the N. W. on the Delaware R., opposite Philadelphia. The N. E. boundary is formed by the Pensauken Cr. and Mullica R.; the S. W. boundary by Big Timber Cr. The surface is low and level; the soil sandy but productive; and, as marl is abundant, the co. has ample facilities for farming and gardening. Large quantities of fruit and vegetables are raised for the Philadelphia market. The Camden & Atlantic R. R. intersects the co. from N. W. to S. E. Camden is the co. seat. Agr. productions in 1870: Wheat, 85,284 bush.; rye, 27,036 bush.; oats, 17,808 bush.; Indian-corn, 320,774 bush.; Irish pot's, 376,369 bush.; sweet pots, 113,523 bush.; butter, 206,775 lbs.; hay, 16,389 tons. Cash value of farms, $8,793,480. Total, estimated, value of all farm productions, including additions to stock, etc., $2,072,298. Value of manufactures, $8,330,013.

Camden, co. in N. C., N. E. part; borders on Va. Area about 275 sq. mls. Pop., 5,351; in 1860, 5,343. The south-western boundary is formed by the Pasquotank R., the south-eastern by North R., and the southern by Albemarle Sound, into which these rivers empty. The surface is low and level, and much of the soil is sandy. Large tracts are covered with cypress and cedar forests. The Great Dismal Swamps occupy the northern part of the co. The Dismal Swamp Canal, which connects the Pasquotank R. with Deep Cr., an affluent of the James, passes through the co. from S. to N. Camden Court House is the co. seat. Agr. productions in 1870: Wheat, 2,823 bush.; Indian-corn, 329,660 bush.; oats, 10,430 bush.; Irish pot's, 7,186 bush.; sweet pot's, 24,655 bush.; butter, 9,646 lbs. Cash value of farms, $531,296. Total, estimated, value of all farm productions, including additions to stock, etc., $337,789. Value of manufactures, $67,650.

Camden, tn. in Oneida co., N. Y. Pop., 3,687.

***Camden,** p. v. in the above tn., on the Rome & Watertown R. R., 18 mls. N. W. of Rome. Pop., 1,703. One newspaper.

Camden, tn. in Lorain co., Ohio. Pop., 858.

Camden, v. in the above tn , on the Cleveland & Toledo R. R., 7 mls. W. of Oberlin.

Camden, p. v. in Preble co., Ohio, on the Cincinnati, Hamilton & Dayton R. R., 44 mls. N. of Cincinnati and 9 mls. S. of Eaton. It lies in a fertile farming district, and has excellent water-power. Pop., 648.

***Camden,** p. v. and co. seat of Kershaw district. S. C.; is the terminus of a branch of the South Carolina R. R., joining the main line at Kingsville, and lies near the Wateree R. in a fertile district. The river is navigable to this point. It is a flourishing place, has an academy and considerable local trade. Pop., 1,007. Two newspapers.

Camden, p. v. and the co. seat of Benton co., Tenn., 9 mls. from the Tennessee R. and 24 mls. E. of Huntingdon. Pop., 148.

Camden Court House, p. v. and the co. seat of Camden co., N. C., 5 mls. from Elizabeth City.

Camden Mills, v. in Rock Island co., Ill., near the Junction of the Rock Island and Mississippi Rs. It has abundant water-power, and is about 3 mls. S. of Rock Island.

Campbell, co. in Ga., W. part. Area, 272 sq. mls. Pop., 9,176; in 1860, 8,301. The Chattahoochie R. flows through the co. from N. E. to S. W. The surface is rolling and the soil productive. Campbellton is the co. seat. Agr. productions in 1870: Wheat, 38,478 bush.; rye, 115 bush.; Indian-corn, 159,502 bush.; oats, 17,126 bush.; sweet pot's, 585 bush.; butter, 48,800 lbs.; cotton 2,621 bales. Cash value of farms, $796,235. Total, estimated, value of all farm productions, including additions to stock, etc., $669,954. Value of manufactures, $310,047.

Campbell, a co. in Ky., N. part. Area about 125 sq. mls. Pop., 27,406; in 1860, 20,909. It occupies the most northern part of the region inclosed between the Ohio and Licking Rs., which unite at its north-western extremity. The surface consists of rolling uplands and level river bottoms. These have a very rich soil, but even the higher ground is fertile. The co. is one of the most densely inhabited portions of the state, and is in a high state of cultivation. Newport, on the Ohio R., opposite Cincinnati, is the co. seat. Agr. productions in 1870: Wheat, 18,366 bush.; rye, 9,084 bush.; Indian-corn, 166,509 bush.; oats, 69,599 bush.; Irish pot's, 66,989 bush.; sweet pot's, 8,319 bush.; butter, 98,217 lbs.; hay, 3,603 tons. Cash value of farms, $2,991,854. Total, estimated, value of all farm productions, including additions to stock, etc., $578,422. Value of manufactures, $3,222,522.

Campbell, co. in Tenn., N. E. part; borders on Ky. Area, 210 sq. mls. Pop., 7,445; in 1860, 6,712. The surface is mountainous. The principal ridge of the Cumberland Mts. passes through it from N. W. to S. E. Forests cover extensive tracts of land. The N. E. portion is drained by the Clear Fork, a tributary of the Cumberland R., and by the New R., a tributary of the Big South Fork of the Cumberland. The Powells R. washes the S. E. boundary. Jacksonburg is the co. seat. Agr. productions in 1870: Wheat, 18,401 bush.; rye, 239 bush.; Indian-corn, 127,145 bush.; oats, 65,208 bush.; Irish pot's, 10,112 bush.; sweet pot's,

2,455 bush.; butter, 65,327 lbs.; hay, 1,069 tons. Cash value of farms, $897,182. Total, estimated, value of all farm productions, including additions to stock, etc., $350,291. Value of manufactures, $44,967.

Campbell, co. in Va., S. part. Area, 575 sq. mls. Pop., 28,384; in 1860, 26,197. It is bounded on the S. by the Stanton R., and on the N. by the James R. The largest part of the co. is drained by the affluents of the Stanton, as Otter R., Seneca Cr. and Falling R. The surface is diversified with hills and valleys, and the soil is generally fertile. The Virginia & Tennessee R. R. intersects the N. W. corner of the co., and is joined at Lynchburg by the South Side R. R. Campbell Court House is the co. seat. Agr. productions in 1870: Wheat, 77,057 bush.; rye, 2,534 bush.; Indian-corn, 226,690 bush.; oats, 175,733 bush.; Irish pot's, 15,106 bush.; sweet pot's, 7,359 bush.; butter, 71,275 lbs.; tobacco, 1,761,901 lbs.; hay, 1,555 tons. Cash value of farms, $3,048,166. Total, estimated, value of all farm productions, including additions to stock, etc., $858,333. Value of manufactures, $1,165,398.

Carroll, co. in Ark., N. N. W. part, bordering on Mo. Area about 1,038 sq. mls. Pop., 5,780; in 1860, 9,383. The surface is hilly and broken. The principal river is the Kings R., which forms part of the western boundary and traverses the western part from S. to N. It receives Osage Fork and Piney Cr. and is a tributary of the White R., which flows through the north-eastern corner of the co. and receives Bear Cr. Carrollton is the co. seat. Agr. productions in 1870: Wheat, 20,438 bush.; Indian-corn, 172,696 bush.; oats, 10,483 bush.; Irish pot's, 5,041 bush.; sweet pot's, 2,797 bush.; tobacco, 15,545 lbs. Cash value of farms, $224,617. Total, estimated, value of all farm productions, including additions to stock, etc., $173,324. Value of manufactures, $146,229.

Carroll, co. in Ga., W. part, bordering on Ala. Area, 516 sq. mls. Pop., 11,782; in 1860, 11,991. It is bounded on the S. E. by the Chattahoochee R. and intersected by the Tallapoosa R. The surface is rolling and the soil fertile. Carrollton is the co. seat. Agr. productions in 1870: Wheat, 40,981 bush.; rye, 23 bush.; Indian-corn, 215,338 bush., oats, 8,997 bush.; Irish pot's, 958 bush.; sweet pot's, 29,640 bush.; cotton, 1,964 bales; butter, 113,083 lbs. Cash value of farms, $915,093. Total, estimated, value of all farm productions, including additions to stock, etc., $607,120. Value of manufactures, $211,037.

Carroll, co. in Ill., N. W. part. Area, 416 sq. mls. Pop., 16,705; in 1860, 11,733. It borders on the Mississippi R., which separates it from Iowa. The surface is undulating and the greater part consists of fertile prairies. The co. is drained by Plum Cr., Otter Cr., Elk Cr., Horn Cr. and Rush Cr. It lies within the lead region of the state, and considerable quantities of this metal are obtained from the mines. Mount Carroll is the co. seat. Agr. productions in 1870: Wheat, 418,333 bush.; rye, 25,721 bush.; oats, 775,100 bush.; Indian-corn, 1,367,965 bush.; Irish pot's, 133,949 bush.; sweet pot's, 113 bush.; butter, 532,486 lbs.; hay, 25,610 tons. Cash value of farms, $8,265,045. Total, estimated, value of all farm productions, including additions to stock, etc., $2,672,966. Value of manufactures, $469,456.

Carroll, co. in Ind., N. W part. Area, 378 sq. mls. Pop., 16,154; in 1860, 13,489. The surface is mostly undulating and the soil very fertile. The Wabash R. flows through it from N. E. to S. W., and receives Deer Cr., while the western part is drained by the Tippecanoe R. A considerable part of this co. consists of open prairies. The Wabash & Western R. R. passes through the co., and also the Wabash & Erie Canal, which has been constructed along the Wabash R. Delphi is the co. seat. Agr. productions in 1870: Wheat, 521,689 bush.; rye, 1,523 bush.; Indian-corn, 401,635 bush.; oats, 65,738 bush.; Irish pot's, 36,834 bush.; sweet pot's, 972 bush.; butter, 236,988 lbs.; hay, 7,475 tons. Cash value of farms, $7,420,307. Total, estimated, value of all farm productions, including additions to stock, etc., $1,317,588. Value of manufactures, $704,421.

Carroll, co. in Iowa, W. part. Area, 576 sq. mls. Pop., 2,451; in 1860, 281. The surface consists chiefly of rolling prairies, which have a fertile soil. The co. has a mean elevation of over 1,000 feet above the sea level. Indian Cr. flows through the N. E. corner; the southern and central parts are drained by the Middle Coon and South Coon Rs., and the western by an affluent of Boyer R. The Chicago & North-western R. R. passes through the co. from E. to W. Carrollton is the co. seat. Agr. productions in 1870: Wheat, 68,830 bush.; Indian-corn, 65,758 bush.; oats, 12,525 bush.; Irish pot's, 3,947 bush.; wool, 1,858 lbs.; butter, 14,626 lbs.; hay, 2,189 tons. Cash value of farms, $456,044. Total, estimated, value of all farm productions, including additions to stock, etc., $100,400. Value of manufactures, $116,846.

Carroll, co. in Ky., N. part, bordering on Ind. Area about 180 sq. mls. Pop., 6,189; in 1860, 6,579. The surface consists of rolling and hilly upland, and low alluvial river bottoms of great fertility. The bottom of the Ohio is bounded in the S. by a chain of preciptons hills. The co. is drained by the Ohio R., which forms the N. boundary, and the Kentucky R., which intersects it from S. E. to N. W.; Eagle Cr., an affluent of the Kentucky R., forms part of the southern boundary. Carrollton is the co. seat. Agr. productions in 1870: Wheat, 38,236 bush.; rye, 4,778 bush.; Indian-corn, 263,629 bush.; oats, 19,027 bush.; Irish pot's, 26,965 bush.; sweet pot's, 185 bush.; tobacco, 669,875 lbs.; butter, 20,114 lbs.; hay, 3,817 tons. Cash value of farms, $1,806,127. Total,

estimated, value of all farm productions, including additions to stock, etc., $454,562. Value of manufactures, $155,066.

Carroll, parish in La., N. E. part, bordering in the N. on Ark., and on the E. by the Mississippi R., which separates it from the state of Miss. Area about 1,000 sq. mls. Pop., 10,110; in 1860, 18,052. The surface is low and level. Along the Mississippi R. levees have been constructed to protect the rich bottom-lands against inundations. The Boeuf Bayou forms the western boundary; the Bayou Macon and the Tensas R. intersects the co. from N. to S. Lake Providence is the co. seat. Agr. productions in 1870: Indian-corn, 142,525 bush.; Irish pot's, 1,320 bush.; sweet pot's, 12,765 bush.; cotton, 20,384 bales; butter, 17,230 lbs. Cash value of farms, $2,376,630. Total, estimated, value of all farm productions, including additions to stock, etc., $1,625,238.

Carroll, co. in Md., N. part, bordering on Pa. Area about 500 sq. mls. Pop., 28,619; in 1860, 24,533. The surface is hilly and broken; the soil but moderately fertile. The Monocacy R. forms part of its western boundary; the Gun Powder R. the eastern, and a tributary of the latter the southern. The Baltimore & Ohio R. R. passes through the co. near its southern border; the Western Maryland R. R. intersects the center from S. E. to N. W. Westminster is the co. seat. Agr. productions in 1870: Wheat, 427,586 bush.; rye, 35,257 bush.; Indian-corn, 716,887 bush.; oats, 425,019 bush.; Irish pot's, 118,072 bush.; sweet pot's, 5,621 bush.; butter, 823,759 lbs.; hay, 30,766 tons. Cash value of farms, $11,751,865. Total, estimated, value of all farm productions, including additions to stock, etc., $2,719,378. Value of manufactures, $1,130,730.

Carroll, co. in Miss., N. central part. Area about 850 sq. mls. Pop., 21,046; in 1860, 22,035. The surface nearly level, and low. The W. boundary is formed by the Yazoo R. and the Tallahatchee R. The bottom-lands of the Yazoo occupy the larger part of the co. and are extremely fertile. The Yallabasha R. intersects the N. W. corner, and joins the Yazoo in this co. The S. E. corner is intersected by the Big Black R. The Yazoo and its larger tributaries are navigable throughout the year. The Mississippi & Tennessee R. R. passes through the E. part of the co. from N. to S. Carrollton is the co. seat. Agr. productions in 1870: Wheat, 6,821 bush.; rye, 107 bush.; Indian-corn, 433,245 bush.; oats, 3,843 bush.; Irish pot's, 4,637 bush.; sweet pot's, 29,794 bush.; cotton, 14,135 bales; butter, 25,923 lbs.; hay, 706 tons. Cash value of farms, $1,833,972. Total, estimated, value of all farm productions, including additions to stock, etc., $1,846,746. Value of manufactures, $158,952.

Carroll, co. in Mo., N. W. part. Area about 700 sq. mls. Pop., 17,446; in 1860, 9,763. It has a rolling surface, and large portions of it are covered with prairies. The river bottoms are skirted with timber. The southern boundary is formed by the Missouri R., the eastern by Grand R. The latter receives Big Cr., the former Waconda Cr., traversing the co. from W. to E. Carrollton is the co. seat. Agr. productions in 1870: Wheat, 223,079 bush.; rye, 8,016 bush.; Indian-corn, 1,205,966 bush.; oats, 192,829 bush.; Irish pot's, 57,453 bush.; sweet pot's, 986 bush.; tobacco, 256,578 lbs.; butter, 186,278 lbs.; hay, 4,986 tons. Cash value of farms, $4,974,203. Total, estimated, value of all farm productions, including additions to stock, etc., $1,369,854. Value of manufactures, $551,948.

Carroll, co. in N. H., E. part. Area, about 500 sq. mls. Pop., 17,332; in 1860, 20,465. It borders in the E. on Me., and includes in the N. several ranges and peaks of the White Mts., as Crawford's Mt., Conway Mt. and others. The surface is greatly broken and diversified, and has a general slope from N. to S. The soil is productive, but requires much labor. The Saco R. traverses the northern part of the co.; the Ossipee the middle. Lakes and ponds are numerous. The largest of these is Lake Ossipee. Of the still larger, Winnipiseogee and Squam lakes, portions are included within this co. Ossipe is the co. seat. Agr. productions in 1870: Wheat, 17,035 bush.; rye, 1,860 bush.; oats, 59,853 bush.; Indian-corn, 106,385 bush.; Irish pot's, 327,694 bush.; butter, 504,194 lbs.; hay, 43,052 tons. Cash value of farms, $4,963 413. Total, estimated, value of all farm productions, including additions to stock, etc., $1,702,204. Value of manufactures, $1,151,304.

Carroll, co. in Ohio, E. part. Area about 420 sq. mls. Pop., 14,491; in 1860, 15,738. The surface is rolling and the soil productive. The co. is drained by Sandy Cr., Yellow Cr., and the Conotten R., which are tributaries of the Tuscarawas R. Coal and iron are abundant. The Tuscarawas R. R. passes through the N. W. corner of the co. and the Carrollton, from which Oneida R. R. branches off, in a southerly direction. Carrollton is the co. seat. Agr. productions in 1870: Wheat, 211,008 bush.; rye, 23,699 bush.; Indian-corn, 417,864 bush.; oats, 520,653 bush.; Irish pot's, 75,819 bush.; sweet pot's, 112 bush.; butter, 600,785 lbs.; hay, 27,133 tons. Cash value of farms, $11,939,575. Total, estimated, value of all farm productions, including additions to stock, etc., $1,685,624. Value of manufactures, $277,496.

Carroll, co. in Tenn., W. part. Area about 650 sq. mls. Pop., 19,447; in 1860, 17,437. The surface is level and the soil very fertile. The eastern part of the co. is drained by the Big Sandy R., a tributary of the Tennessee and the western by the Middle Fork and South Fork of the Obion R., a tributary of the Mississippi. The Memphis & Louisville R. R., and the Nashville & Northwestern R. R. pass through this co. and intersect at McKenzie in the north-western part. Huntingdon is the co. seat. Agr. productions in 1870: Wheat, 93,872 bush.; rye, 70 bush.; Indian-corn, 777,922 bush.; oats, 4 206 bush.; Irish pot's, 213 bush.; sweet pot's, 371 bush.; cotton, 5,023 bales; tobacco, 10,840 lbs.; butter, 272,083 lbs.; hay, 108 tons. Cash value of farms, $3,077,511. Total, estimated, value of all farm productions, including additions to stock, etc., $1,791,796. Value of manufactures, $476,646.

Carroll, co. in Va., S. W. part; borders on N. C. Area, 444 sq. mls. Pop., 9,147; in 1860, 8,012. It is bounded on the S. E. by the Blue Ridge, and on the N. W. by the Ewing Mt. and Poplar Camp Mt. Lower ranges traverse the co. in a direction parallel to the Blue Ridge. The largest stream is New R., which intersects the western corner. Its tributaries, draining this co., are: the Big and the Little Reedy Island Crs., Poplar Camp Cr., Crooked Cr., and Chestnut Cr., all rising in the Blue Ridge and flowing to the N. W. The surface is hilly, and in many parts too rough for cultivation. The soil of the valleys is productive. Grayson Sulphur Springs, near New R., are an attractive summer resort. The co. possesses valuable mineral resources. Hillsville is the co. seat. Agr. productions in 1870: Wheat, 13,382 bush.; rye, 25,080 bush.; Indian-corn, 91,772 bush.; oats, 42,658 bush.; Irish pot's, 10,837 bush.; sweet pot's, 1,345 bush.; tobacco, 9,557 lbs.; butter, 74,893 lbs.; hay, 2,713 tons. Cash value of farms, $638,494. Total, estimated, value of all farm productions, including additions to stock, etc., $363,993. Value of manufactures, $81,780.

***Carson City,** the capital of Nevada, and the co. seat of Ormsby co., near the eastern base of the Sierra Nevada, and 3 mls. W. of the Carson R. It lies 27 mls. S. of Reno on the Pacific R. R. In the vicinity are rich silver mines. Pop., 3,042. One newspaper.
Carson Lake, tn. in Mississippi co., Ark. Pop., 74.
Carson's Landing, p. v. in Bolivar co., Miss., 25 mls. from Beulah.
Carson River rises among the eastern foothills of the Sierra Nevada, in Alpine co., Cal.; flows N. through Douglas and Ormsby cos., Nev., and then turns to the E. through Lyon and Churchill cos. It empties into Carson Lake, which discharges its surplus waters into the Humboldt and Carson Sink, through the Carson Slough.
Carson Sink Mountains, a range in Churchill co., Nev., bounding the Carson Desert, in which the Humboldt and Carson Sink is situated, on the E. They contain numerous silver mines.
Carter, co. in Ky., N. E. part. Area about 525 sq. mls. Pop., 7,509; in 1860, 8,516. The surface is broken and hilly, and averages more than 1,000 feet in elevation above the sea level. The Little Sandy R. and Taggart's Cr. flow through the co. from S. W. to N. E. Their valleys are deep, and include some very fertile alluvial flats. The uplands are too rough for farming. Coal and building stone are abundant. Grayson is the co. seat. Agr. productions in 1870: Wheat, 13,214 bush.; rye, 1,378 bush.; Indian-corn, 282,691 bush.; oats, 41,507 bush.; Irish pot's, 19,184 bush.; sweet pot's, 4,217 bush.; butter, 107,529 lbs.; hay, 1,270 tons. Cash value of farms, $587,800. Total, estimated, value of all farm productions, including additions to stock, etc., $370,524. Value of manufactures, $149,375.
Carter, co. in Mo., S. E. part. Area about 500 sq. mls. Pop., 1,455; in 1860, 1,235. The surface is hilly and covered with pine forests. The soil is fertile, particularly in the valleys. Current R., a tributary of the Big Black, flows through the co. from N. to S. Van Buren is the co seat. Agr. productions in 1870: Wheat,

4,992 bush.; rye, 571 bush.; Indian-corn, 73,259 bush.; oats, 7,311 bush., Irish pot's, 1,398 bush.; sweet pot's, 862 bush.; tobacco, 28,550 lbs.; butter, 11,351 lbs.; hay, 27 tons. Cash value of farms, $153,686. Total, estimated, value of all farm productions, including additions to stock, etc., $68,625. Value of manufactures, $8,513.

Carter, co. in Tenn., N. E. part, bordering on N. C. Area about 350 sq. mls. Pop., 7,909; in 1860, 7,124. This co. is mountainous and belongs to the highest portion of the state. The Iron Mt., a part of the great Unaka Range, forms the S. E. boundary, and occupies, with its spurs, a large section of its area. The Holston Mt. forms the N. W. boundary, and other ridges cross from N. E. to S. W. The Watauga R. flows through it from E. to W., and receives several affluents, as the Big Doe Cr., with Little Doe Cr., Roanes Cr. and Stoney Cr. The mountains are covered with stately forests, and contain rich iron mines. The valleys have a fertile soil and are successfully cultivated. Elizabethtown is the co. seat. Agr. productions in 1870: Wheat, 37,669 bush.; rye, 4,094 bush.; Indian-corn, 132,097 bush.; oats, 63,396 bush.; Irish pot's, 8,882 bush.; sweet pot's, 2,781 bush.; butter, 2,227 lbs.; hay, 2,155 tons. Cash value of farms, $1,022,276. Total, estimated, value of all farm productions, including additions to stock, etc., $275,355. Value of manufactures, $161,613.

Cass, co. in Ill., central part. Area about 360 sq. mls. Pop., 11,580; in 1860, 11,325. It is bounded on the W. by the Illinois R., and on the N. by the Sangamon R., and drained by their affluents. The surface consists for the most part of level or slightly undulating prairies, which have a very fertile soil. The Peoria, Pekin & Jacksonville R. R. intersects the co. from S. to N. Beardstown is the co. seat. Agr. productions in 1870: Wheat, 139,219 bush.; rye, 2,772 bush.; oats, 168,784 bush.; Indian-corn, 1,146,980 bush.; Irish pot's, 20,551 bush.; sweet pot's, 1,233 bush.; butter, 80,690 lbs.; hay, 4,136 tons. Cash value of farms, $4,591,535. Total, estimated, value of all farm productions, including additions to stock, etc., $1,071,951. Value of manufactures, $293,252.
Cass, co. in Ind., N. central part. Area, 420 sq. mls. Pop., 24,191; in 1860, 16,843. The surface is rolling or level. The northern part consists of prairies; the southern is covered with fine forests of deciduous trees. The co. is drained by the Wabash R., which flows through it from E. to W. and receives several small Crs. Several railroads cross this co., intersecting each other at Logansport. The Toledo, Peoria & Warsaw R. R. runs through it from E. to W.; the Toledo, Wabash & Western R. R. from N. E. to S. W.; the Columbus, Chicago & Indiana Central R. R. from S. E. to N. W., and a branch of the latter road from E. S. E. to N. N. W.: the Wabash & Erie Canal also passes through the co. Logansport is the co. seat. Agr. productions in 1870: Wheat, 401,163 bush.; rye, 8,204 bush.; Indian-corn, 312,434 bush.; oats, 90,835 bush.; Irish pot's, 55,077 bush.; sweet pot's, 1,241 bush.; butter, 310,588 lbs.; hay, 10,516 tons. Cash value of farms, $7,077,945. Total, estimated, value of all farm productions, including additions to stock, etc., $1,328,609. Value of manufactures, $2,599,989.
Cass, co. in Iowa, S. W. part. Area, 576 sq. mls. Pop., 5,464; in 1860, 1,612. The surface is rolling and more than 1,000 feet above the sea level, consisting mostly of prairies. The co. is drained by the Nishnabatona R. and Seven Mile Cr., both tributaries of the Missouri R. Lewis is the co. seat. Agr. productions in 1870: Wheat 54,529 bush.; rye, 150 bush.; Indian-corn, 535,500 bush.; oats, 23,144 bush.; Irish pot's, 13,867 bush.; wool, 550 lbs.; butter, 55,185 lbs.; hay, 7,061 tons. Cash value of farms $820,231. Total, estimated, value of all farm productions, including additions to stock, etc., $261,739. Value of manufactures, $97,756.
Cass, co. in Mich., S. W. part, bordering on Ind. Area, 504 sq. mls. Pop., 21,049; in 1860, 17,721. The surface is level, and consists chiefly of prairies and oak openings. The co.

is drained by the Christiana and Dowagiac Rs., which are tributaries of the St. Joseph's R. The latter intersects the S. E. corner of the co. The Michigan Central R. R. passes through the N. W. part. Cassopolis is the co. seat. Agr. productions in 1870: Wheat, 630,271 bush.; rye, 4,263 bush.; Indian-corn, 670,013 bush.; oats, 175,665 bush.; Irish pot's, 302,058 bush.; wool, 143,913 lbs.; butter, 443,182 lbs.; hay, 33,078 tons. Cash value of farms, $12,220,821. Total, estimated, value of all farm productions, including additions to stock, etc., $2,203,229. Value of manufactures, $816,914.

Cass, co. in Minn., N. central part. Area about 5,000 sq. mls. Pop., 380; in 1860, 150. This co. is washed on the N. W., N. E. and S. E. by the Mississippi R. Itasca Lake, from which the great river emerges, lies near the W. border; and at the N. border are several large sheets of water formed by the Mississippi, as Pemidji Lake, Lake Cass, and Winibigoshish Lake. Leech Lake, the largest in the co., lies in the N. part, and is drained by the Leech R., a tributary of the Mississippi. In the central and S. parts there are several clusters of small lakes, numbering probably several hundred. The Crow Wing R. rises in the W. part of the co., and forms its S. W. boundary. Other streams draining it are Pine R. and Willow R. The co. has a rolling surface, nearly 1,000 feet in height above the sea level. Forests, mostly pine, are abundant; lumbering is the principal occupation. Agr. productions in 1870: Indian-corn, 330 bush.; oats, 1,200 bush.; Irish pot's, 900 bush. Cash value of farms, $850. Total, estimated, value of all farm productions, including additions to stock, etc., $1,770.

Cass, co. in Mo., W. part. Area about 750 sq. mls. Pop., 19,296; in 1860, 9,794. It borders on Kans., and is intersected by Grand R., which flows from the N. W. to the S. E., and receives numerous small affluents within it. The surface consists chiefly of rolling prairies, alternating with small tracts of woodland. The soil is productive. Harrisonville is the co. seat. Agr. productions in 1870: Wheat, 205,789 bush.; rye, 3,427 bush.; Indian-corn, 1,711,952 bush.; oats, 262,472 bush.; Irish pot's, 82,859 bush.; sweet pot's, 4,274 bush.; tobacco, 19,281 lbs.; butter, 252,508 lbs.; hay, 12,100 tons. Cash value of farms, $7,883,937. Total, estimated, value of all farm productions, including additions to stock, etc., $1,629,529. Value of manufactures, $410,077.

Cass, co. in Neb., E. part, bordering on Iowa. Area about 540 sq. mls. Pop., 8,151; in 1860, 3,369. The surface of the co. is mostly undulating; the eastern part, comprising the very fertile bottom-lands of the Missouri R., which forms the eastern boundary, is level. A line of bluffs separates the river bottoms from the higher and less productive uplands. The latter consists mainly of prairies. The Platte R. forms the N. boundary, and joins the Missouri at the N. E. extremity of the co. Plattsmouth is the co. seat. Agr. productions in 1870: Wheat, 224,670 bush.; rye, 230 bush.; Indian-corn, 674,558 bush.; oats, 137,986 bush.; Irish pot's, 78,107 bush.; sweet pot's, 325 bush.; butter, 171,262 lbs.; hay, 11,971 tons. Cash value of farms, $2,886,152. Total, estimated, value of all farm productions, including additions to stock, etc., $1,408,405. Value of manufactures, $233,356.

Cass, co. in Tex., N. E. part; borders on Ark. and La. Area, 1,230 sq. mls. Pop., 8,875; in 1860, 8,411. The northern boundary is formed by the Sulphur Fork of the Red R.; the southern by the Big Cypress R. and Soda Lake, which receives Black R. and other affluents. The surface is low and gently undulating. The soil is fertile, and consists of a deep red loam. The bottom-lands of the streams are swampy and subject to inundation. Iron ore of good quality occurs. Linden is the co. seat. Agr. productions in 1870: Wheat, 292 bush.; rye, 69 bush.; Indian-corn, 256,505 bush.; oats, 462 bush.; Irish pot's, 4,984 bush.; sweet pot's, 36,328 bush.; cotton, 5,996 bales; butter, 53,595 lbs. Cash value of farms, $406,566. Total, estimated, value of all farm productions, including additions to stock, etc., $1,066,633.

Cecilian, p. v. in Hardin co., Ky., on the Elizabethtown & Paducah R. R., 6 mls. S. W. of Elizabethtown.

Cecilton, p. v. in Cecil co., Md., 18½ mls. S. of Elkton.

Cedar, co. in Iowa, E. part. Area, 576 sq. mls. Pop., 19,731; in 1860, 12,949. The surface consists of rolling prairies, alternating with tracts of woodland; the soil is fertile. The largest stream is the Cedar R., which flows through the co. from N. W. to S. E. The N. E. corner is intersected by the Wapsipinicon R. Numerous creeks, tributary to the Cedar R., afford a considerable supply of water. The Iowa Division of the Chicago & Northwestern R. R. crosses the co. from E. to W. The Iowa & Pacific R. R. crosses the S. W. corner. Tipton is the co. seat. Agr. productions in 1870: Wheat, 632,878 bush.; rye, 6,285 bush.; Indian-corn, 2,203,802 bush.; oats, 723,312 bush.; Irish pot's, 92,937 bush.; sweet pot's, 15 bush.; wool, 35,087 lbs.; butter, 741,650 lbs.; hay, 38,820 tons. Cash value of farms, $10,473,122. Total, estimated, value of all farm productions, including additions to stock, etc., $2,754,614. Value of manufactures, $177,002.

Cedar, co. in Mo., S. W. part. Area about 440 sq. mls. Pop., 9,474; in 1860, 6,637. It has an undulating surface and a moderately productive soil. The principal stream is the Big Sac R., which receives the Little Sac from the S. E. and Horse Cr. from the S. W. The co. has a general slope toward the N. Stockton is the co. seat. Agr. productions in 1870: Wheat, 59,377 bush.; rye, 622 bush.; Indian-corn, 326,060 bush.; oats, 49,588 bush.; Irish pot's, 17,070 bush.; sweet pot's, 2,004 bush.; tobacco, 37,465 lbs.; butter, 15,147 lbs.; hay, 1,102 tons. Cash value of farms, $1,429,938. Total, estimated, value of all farm productions, including additions to stock, etc., $335,229. Value of manufactures, $48,731.

Cedar, co. in Neb., N. E. part, bordering on Dakota. Area about 700 sq. mls. Pop., 1,032; in 1860, 246. The N. boundary is formed by the Missouri R. The Big Bow Cr., a tributary of the Missouri, traverses the co. from S. W. to N. E. The surface is mostly rolling and the soil but moderately fertile. Saint James is the co. seat. Agr. productions in 1870: Wheat, 24,555 bush.; Indian-corn, 16,900 bush.; oats, 11,875 bush.; Irish pots, 12,190 bush.; butter, 41,950 lbs.; hay, 3,214 tons. Cash value of farms, $244,050. Total, estimated, value of all farm productions, including additions to stock, etc., $133,880. Value of manufactures, $90,940.

Centre, co. in Pa., central part. Area about 1,100 sq. mls. Pop., 34,418; in 1860, 27,000. The West Branch of the Susquehanna and its tributary, Mushannon Cr., form the N. W. boundary. The co. is traversed by several parallel ranges of the Appalachian System from S. W. to N. E; and thus comprises a number of natural divisions The N. W. part, between the streams above named and the Alleghany Mts., is a broken and elevated table-land. Between the Alleghany and Bald Eagle Mts. is a long and narrow valley, which is traversed by Bald Eagle Cr., a tributary of the Susquehanna. S. E. of the Bald Eagle Mts. extends the wide Nittany Valley, which is in part separated from the Penn's Valley and Brush Valley, the next division, by the Nittany Mts. Penn's Valley is bounded by the long range of Tusseys Mt., and the crest of Path Valley Mts. forms the S. E. boundary of the co. Bald Eagle Cr. receives Beach Cr. from the N. W. and Spring Cr. from the S. Penn's Cr., a tributary of the Susquehanna, traverses the valley which bears the same name from W. S. W. to E. N. E. The soil of the valleys is very productive; the mountains are covered with forests. The co. abounds in rich iron ore. The Lock Haven & Tyrone R. R. follows the Bald Eagle Creek. Bellefonte is the co. seat. Agr. productions in 1870: Wheat, 475,145 bush.; rye, 63,108 bush.; oats, 389,628 bush.; Indian-corn 1,044,760 bush.; Irish pot's, 117,403 bush.; butter, 521,090 lbs.; hay, 27,725 tons. Cash value of farms, $13,565,198. Total, estimated, value of all farm productions, including additions to stock, etc., $2,052,317. Value of manufactures, $3,047,674.

Champaign, co. in Ill., E. part. Area, 1,095 sq. mls. Pop., 32,737; in 1860, 14,629. The surface is on the whole level and consists of open and fertile prairies. The Grand Prairie occupies a large part of it. The Sangamon R. flows through the north-western part. The Kaskaskia and Embarras Rs. rise in this co. and flow to the S. The soil is very fertile, consisting of deep mold. The Chicago Branch of the Illinois Central R. R. passes through the co. from N. to S., and the Wabash & Western R. R. from E. to W. Urbana is the co. seat. Agr. productions in 1870: Wheat, 225,668 bush.; rye, 45,752 bush.; oats, 721,375 bush.; Indian-corn, 3,924,720 bush.; Irish pot's, 266,918 bush.; sweet pot's, 2,263 bush.; butter, 716,430 lbs.; hay, 44,800 tons. Cash value of farms, $16,634,591. Total, estimated, value of all farm productions, including additions to stock, etc., $4,595,875. Value of manufactures, $1,290,478.

Champaign, co. in Ohio, W. central part. Area, 345 sq. mls. Pop., 24,188; in 1860, 22,699. The south-eastern part of the co. has an undulating surface; the north-western is level. The Mad R. flows through it from N. to S. and receives numerous small affluents. The soil is very fertile. Urbana, the co. seat, is an important railroad center. Here the Atlantic & Great Western R. R., the Columbus & Indiana Central R. R., and the Cincinnati & Sandusky R. R. intersect each other. Agr. productions in 1870: Wheat, 724,360 bush.; rye, 3,943 bush.; Indian-corn, 1,280,472 bush.; oats, 244,073 bush.; Irish pot's, 74,277 bush.; sweet pot's, 4,281 bush.; butter, 344,401 lbs.; hay, 21,082 tons. Cash value of farms, $14,501,483. Total, estimated, value of all farm productions, including additions to stock, etc., $3,100,264. Value of manufactures, $1,343,501.

Champaign, tn. in Champaign co., Ill. Pop., 5,333.

***Champaign,** city in the above tn., at the junction of the Indianapolis, Bloomington & Western R. R. with the Illinois Central R. R., 128 mls. S. of Chicago and 2 mls. W. of Urbana; is surrounded by a fertile agricultural district, and rapidly grows in population and wealth. The State Industrial University is located here. Pop., 4,625; in 1860, 1,727. Three newspapers.

Champlain, Lake, between N. Y. and Vt., extending a few mls. into Canada; is 135 mls. long and varies in width from 1 mle. to 12 mls. Its depth does not exceed 300 feet. It is drained by the Richelieu R., and receives numerous small streams, the largest of which are Missisqui R., Winooski R., Saranac R., Chazy R., Au Sable R., the outlet of Lake George, Onion R. and Otter Tail Cr. Numerous islands are distributed over its surface, as Schuyler Island, La Motte Island, North Hero and South Hero. On the Vt. shore extends a fertile plain, while the N. Y. shore is formed by the most easterly ranges and spurs of the Adirondack Mts. The lake is navigated by numerous steamboats, except during the winter months, when it is covered with ice. The grandeur of its surroundings attracts many tourists.

Charleston, p. o. in the above tn., 9 mls. W. of Mansfield.

***Charleston,** city and the co. seat of Charleston co., S. C., occupies the peninsula between Cooper and Ashley Rs., which form the harbor, and is about 7 mls. distant from the ocean. It was founded in 1672, and in 1731 contained but 600 houses. In 1783 it was incorporated; in 1796 nearly a third part was destroyed by fire, and another great conflagration occurred in 1838. The population was, in 1800, 18,711; in 1810, 24,711; in 1820, 24,780; in 1830, 30,289; in 1840, 29,261; 1850, 42,985; in 1860, 40,467, and in 1870, 48,956. Of the last number 44,064 were native Americans, 4,892 foreigners, 22,749 were white, and 26,173 colored persons.

The ground on which Charleston stands is low and level, so that the city, as we sail up from the B., seems to rest upon the waters, and has been called (somewhat inappropriately) the American Venice. There are no splendid avenues, no imposing public buildings, and yet the city makes a favorable impression upon the traveler. Many fine private residences are surrounded by open grounds, or gardens, and embowered in sombre magnolias. The character of the streets is that of retiring respectability.

Charleston is a port of entry and one of the first commercial cities of the south. The spacious harbor admits vessels drawing 17 feet, and the railroad connections with the interior are ample. The lines terminating here are: The South Carolina R. R., the Savannah & Charleston R. R., and the Northeastern R. R. Cotton and rice are the principal articles of export. In the year ended June 30, 1871, Charleston exported domestic goods to the value of $12,387,524, and imported foreign goods to the value of $521,559. The entries from foreign countries were 51 American vessels, with 12,039 tons; 105 foreign vessels, with 35,065 tons—making a total of 157 vessels, with 48,104 tons. The clearances for foreign countries were 64 American vessels, with 25,813 tons; 120 foreign vessels, with 48,726 tons—making a total of 184 vessels, with 74,539 tons.

The last census report contains the following statistics of occupations: in agriculture were engaged 331 persons; in professional and personal services, 9,949; in trade and transportation, 3,496, and in manufacturing and mechanical trades, 4,929.

Charleston (including the co.) had, in 1871, 8 schools in operation. The total school population between 6 and 16 years of age was 10,247; but only one-third of these, 3,423, were in the public schools, and the average number attending school was 1,938. The whole amount expended for teachers' salaries was $10,886. The number of newspapers published was 14, of which the "Monthly Rural Carolinian" had the largest circulation (11,350). The most important daily papers are: "The Courier," "The News" and "The Republican."

The entrance to Charleston B. is between Sullivan's Island and Morris Island, and is defended against a naval attack by Fort Moultrie, Fort Sumter, Castle Pinkney and Fort Ripley. The siege and capture of Fort Sumter in April, 1861, was the first hostile act against the Federal Government, and initiated the late civil war.

Cherokee, co. in Ala., E part. Area about 350 sq. mls. Pop., 11,132; in 1860, 18,360. The co. borders on Georgia, and is traversed by several ranges of low hills, trending chiefly from N. to S. The Coosa R. flows through the centre of the co. from N. to S. in a low and very fertile valley. The more elevated portions are covered with a fine growth of timber. Centre is the co. seat. Agr. productions in 1870: Wheat, 68,540 bush.; rye, 568 bush.;

Indian-corn, 231,946 bush.; oats, 27,683 bush.; Irish pot's, 4,938 bush.; sweet pot's, 24,675 bush.; butter, 83,785 lbs.; cotton, 1,807 bales; hay, 510 tons. Cash value of farms, $1,267,033. Total, estimated, value of all farm productions, including additions to stock, etc., $365,213. Value of manufactures, $290,233.

Cherokee, co. in Ga., N. W. central part. Area 405 sq. mls. Pop., 10,399; in 1860, 11,291. It is intersected by the Etowah R., by whose tributaries it is also drained. The surface is rolling, and the soil of the valleys very fertile. Canton is the co. seat. Agr. productions in 1870: Wheat, 59,064 bush.; rye, 764 bush.; Indian-corn, 168,529 bush.; oats, 22,786 bush.; Irish pot's, 1,034 bush.; sweet pot's, 11,911 bush.; butter, 53,797 lbs.; cotton, 347 bales; hay, 60 tons. Cash value of farms, $704,048. Total, estimated, value of all farm productions, including additions to stock, etc., $891,641. Value of manufactures, $71,392.

Cherokee, co. in Iowa, N. W. part. Area, 576 sq. mls. Pop., 1,967; in 1860, 58. The surface broken, forming a part of the "Coteau des Prairies," an extensive table-land entering the state from the N. Woods are only found along the banks of the streams. The co. is drained by the Little Sioux R. and its tributary, the Mud R., which have a southerly course. Cherokee is the co. seat. Agr. productions in 1870: Wheat, 10,797 bush.; Indian-corn, 21,896 bush.; oats, 6,584 bush.; Irish pot's, 6,178 bush.; butter, 30,775 lbs.; hay, 4,277 tons. Cash value of farms, $401,025. Total, estimated, value of all farm productions, including additions to stock, etc., $182,680. Value of manufactures, $9,052.

Cherokee, co. in Kans., forms the S. E. corner of the state. Area, 576 sq. mls. Pop., 11,038. It bounds in the E. on Missouri and in the S. on the Ind. Ter. The surface is rolling and consists of prairies; the soil is fertile. The co. is drained by the Neosho R. and Willow Cr. The former intersects the western part, the latter the eastern, and both flow from N. to S. The Missouri R., Ft. Scott & Gulf R. R., pass through the co. from N. to S. Columbus is the co. seat. Agr. productions in 1870: Wheat, 53,792 bush.; rye, 1,454 bush.; Indian-corn, 291,916 bush.; oats, 68,059 bush.; Irish pot's, 25,609 bush.; sweet pot's, 3,427 bush.; butter, 95,340 lbs.; hay, 18,883 tons. Cash value of farms, $131,428. Total, estimated, value of all farm productions, including additions to stock, etc., $348,675. Value of manufactures, $210,860.

Cherokee, co. in N. C., forming the western extremity of the state. Area about 975 sq. mls. Pop., 8,080: in 1860, 9,166. The Unaka Mts. form the N. W. boundary, and their spurs and outlying chains occupy a large part of the surface of this co. The Little Tennessee R. forms part of the N. boundary, and receives Cheowah Cr. The Hiawassee R. traverses the southern part of the co. Valley R., Brasstown Cr., and Notley R. are its principle affluents. The valleys of the Hiawassee and Little Tennessee are separated by the Long Ridge and Valley River Mts. The co. contains much land which is well adapted to grazing. Murphey is the co. seat. Agr. productions in 1870: Wheat, 3,628 bush.; rye, 8,830 bush.; Indian-corn, 162,529 bush.; oats, 18,098 bush.; Irish pot's, 10,702 bush.; sweet pot's, 8,588 bush.; butter, 58,867 lbs.; tobacco, 19,392 lbs.; hay, 530 tons. Cash value of farms, $480,909. Total, estimated, value of all farm productions, including additions to stock, etc., $203,743. Value of manufactures, $17,272.

Cherokee, co. in Tex., E. part. Area 1,150 sq. mls. Pop., 11,079: in 1860, 12,098. The Neches R. forms the western boundary, the Angelina, a tributary of the Neches, the eastern. The surface is slightly undulating, and pleasantly diversified by fertile prairies and forests; the latter grow mostly along the streams. Rusk is the co. seat. Agr. productions in 1870: Wheat, 1,877 bush.; rye, 124 bush.; Indian-corn, 292,181 bush.; oats, 9,873 bush.; Irish pot's, 2,140 bush.; sweet pot's, 30,230 bush.; cotton, 5,185 bales; butter, 25,480 lbs. Cash value of farms, $465,947. Total, estimated, value of all farm productions, including additions to stock, etc., $660,298. Value of manufactures, $5,950.

Chesapeake Bay enters Va. between C. Charles and C. Henry, and extends N. into Md. It is over 200 mls. long, and its width varies from 5 to 40 mls. Its shores are deeply indented by bays and the estuaries of numerous streams. The largest affluents are the Susquehanna, Pautuxent, Potomac, Rappahannock, York and James Rs. The area drained by the B. is estimated at over 70,000 sq. mls.
***Chesapeake City,** p. v. in Cecil co., Md., 6 mls. S. of Elkton. It is the western terminus of the Delaware & Chesapeake Canal. Pop., 1,008.
Cheshire, co. in N. H.; forms the S. W. part of the state. Area about 775 sq. mls. Pop., 27,265; in 1860, 27,434. The Connecticut R. forms the W. boundary. The Ashuelot intersects the co. from N. to S. W., and receives within it numerous tributaries. The Contoocook rises in the south-eastern part. The surface is broken and hilly, and several mountains of considerable elevation rise in this co., as the Grand Monadnock Mts. and the Ashuelot Mts. The most fertile portion is the valley of the Connecticut; the soil is generally productive. The Cheshire R. R. intersects the co. from S. E. to N. W., and from it branches off the Ashuelot R. R., to the S. W. Keene is the co. seat. Agr. productions in 1870: Wheat, 5,369 bush.; rye, 7,165 bush.; oats, 104,601 bush.; Indian-corn, 146,040 bush.; Irish pot'o, 263,791 bush.; butter, 531,601 lbs.; hay, 56,975 tons. Cash value of farms, $7,151,499. Total, estimated, value of all farm productions, including additions to stock, etc., $1,895,950. Value of manufactures, $5,910,774.

***Chester,** city in the above tn., on the Philadelphia, Wilmington & Baltimore R. R., 12

mls. S. W. of Philadelphia. It lies near the Delaware R., and has several manufactories of cars, cotton goods and woollen goods. It is the oldest town of the state, having been settled by the Swedes in 1643. Pop., 4,485. Five newspapers.

Chester, co. in Pa., S. E. part, bordering on Md. and Del. Area 740 sq. mls. Pop., 77,805; in 1860, 74,578. It is bounded on the N. E. by the Schuylkill R., on the W. partly by the Octoraro Cr., and on the E. partly by Brandywine Cr., which rises in the co. and drains the central part. The Schuylkill R. receives Pigeon Cr., French Cr. and Pickering Cr. White Clay Cr., a tributary of the Brandywine, and Elk Cr., which empties into the N. E. extremity of Chesapeake B., drain the S. E. part. The surface is rolling and pleasantly diversified by fertile valleys. The ridge of Welsh Mt. trends near the N. W. boundary. The co. abounds in rare and useful minerals, as kaolin, titanium, zircon, agate, beryl, etc.; roofing slate, marble, zinc, lead and silver are found, but the most important mining product is iron. The co. is intersected by the Pennsylvania Central R. R., the Chester Valley R. R., the West Chester & Philadelphia R. R., the Brandywine & Waynesburgh R. R., and the Philadelphia & Baltimore Central R. R. West Chester is the co. seat. Agr. productions in 1870: Wheat, 753,803 bush.; rye, 12,481 bush.; oats, 1,034,430 bush.; Indian-corn, 1,540,125 bush.; Irish pot's, 404,363 bush.; sweet pot's, 7,076 bush.; butter, 2,848,243 lbs.; hay, 114,820 tons. Cash value of farms, $46,737,688. Total, estimated, value of all farm productions, including additions to stock, etc., $8,554,928. Value of manufactures, $11,494,543.

Chester, district in S. C., N. part. Area, 570 sq. mls. Pop., 18,805; in 1860, 18,122. It lies between the Wateree R. in the E. and Broad R. in the W., and is drained by their affluents, Sandy Cr., Fishing Cr., and Rocky Cr. The surface is hilly and the soil fertile. The Charlotte & South Carolina R. R. intersects the district from N. to S., and the King's Mountain R. R. branches off from it at Chester Court House, the co. seat, in a northerly direction. Agr. productions in 1870: Wheat, 33,210 bush.; rye, 7 bush.; Indian-corn, 169,379 bush.; oats, 22,496 bush.; Irish pot's, 4,921 bush.; sweet pot's, 13,464 bush.; cotton, 7,042 bales; butter, 96,207 lbs. Cash value of farms, $1,449,799. Total, estimated, value of all farm productions, including additions to stock, etc., $1,060,860. Value of manufactures, $268,429.

It lies near the Black Hills; was settled in 1867, and is now a prosperous place with 1,450 inhabitants. In the vicinity coal and iron are found, and the mountains supply lumber. The city may be reached by the Denver Pacific R. R., by which it is 427 mls. W. of Kansas City, Mo. Three newspapers.
Cheyney, p. v. in Delaware co., Pa., 6¼ mls. E. of West Chester.
Chibalis, co., in Wash. Ter.
***Chicago,** city, port of entry and the co. seat of Cook co., Ill.; is the metropolis of the state and of the north-western part of the Union. It lies on the S. W. coast of Lake Michigan, in 42° N. lat., and 87° 37′ W. long. The first white man who visited the spot where the city now stands was Father Marquette, the devoted French missionary. In 1795 the United States government obtained from the Indians 6 acres of ground for the erection of a stockade fort, which was to afford protection to the fur traders. In 1812 the fort was burnt down by the Indians, and the garrison massacred, though safe conduct had been promised. Subsequently another fort was erected on the same spot, which was known as Fort Dearborn. During the Black Hawk war (in 1832) General Scott came with troops and some traders, and settlers followed him. The first white child was born in 1832. In 1837 Chicago was incorporated as a city with 4,170 inhabitants. Since then the growth has been most rapid, and far exceeded that of any other city in the country. In 1850 the population was 29,963; in 1860, 112,172, and in 1870, 298,977, of whom 295,281 were white, and 3,691 colored. With regard to nativity the ninth census report gives the following statistics. The natives of the United States numbered 154,420, and of foreign countries, 144,557. The last sum includes 52,316 Germans, 39,988 Irishmen, 10,026 Englishmen, 4,195 Scotchmen, 1,418 Frenchmen, and 8,936 Canadians.

The site of the city is a low, slightly inclined plane. During the years 1856 to 1858 the entire business portion was raised from 3 to 8 feet above its former level, in order to secure better drainage. The Chicago R. is formed by two branches (the one flowing from N. to S. and the other from S. to N., which unite within the city), and empties into Lake Michigan after a course of but half a mile. As the river has scarcely any fall, and receives all the sewers from the city, its waters became so impure and offensive that the health of the people living near it was seriously imperilled. To remedy this evil the Illinois & Michigan Canal, which connects the southern branch of the river with the Illinois R., is now being deepened and widened, so as to secure an outlet for the river into the canal, and even to cause a constant flow of pure lake water in the same direction. Chicago is supplied with drinking water from the lake by means of the Lake Michigan Tunnel, which was commenced in March, 1864, and completed in December, 1866. The depth of the shore-shaft is 69 feet, and of the lake-shaft 64 feet. The lake terminus of the tunnel, known as the "Crib," is composed of timber, and upon its top a permanent light-house and dwelling for the keeper have been erected. The tunnel, two miles in length, is circular, being 5 ft. 2 in. high and 5 ft. wide. It is inclosed in brick masonry 8 inches thick, and conducts the clear water from the lake-shaft to the shore-shaft, whence it is lifted by steam pumps into the reservoir. The whole is one of the most colossal engineering works of this or any other country. Highly interesting objects are the artesian wells, which were bored 3½ mls. W. of the Court House, and are respectively 911 and 694 feet deep, yielding a daily flow of water of 1,200,000 gallons.

The streets of Chicago are generally 80 feet wide, and cross each other at right angles. State street is the great retail business avenue and corresponds to the Broadway of New York, while Michigan avenue, Wabash avenue, Prairie avenue and South Park avenue are noted for the magnificence of the mansions and residences of the wealthy citizens. The great conflagration of October (8th to 9th), 1871, destroyed all that portion of the city N. of Harrison street and E. of the North and South branches of the Chicago R., representing an area of nearly 3,000 acres in extent, and embracing all the business and much of the residence portion of the city. The total loss is estimated at $190,526,500 ($52,000,000 in buildings and $138,526,500 in personal property). But such is the energy of the people, that this unparalleled calamity did not check the enterprize and the progress of the city. The rebuilding of the destroyed blocks and streets was commenced at once, and already Chicago is what it was before, the "Queen City of the West."

In regard to occupations, the census report

contains the following statistics: There were engaged in agriculture, 533 persons; in professional and personal services, 42,063; in trade and transportation, 29,806; in manufactures and mechanical trades, 40,558. The number of clergymen was 254; of journalists, 175; of lawyers, 629; of physicians and surgeons, 649; of teachers, 958; of domestic servants, 12,279; of laborers, 17,717; of traders and dealers, 7,466; of clerks, salesmen and accountants in stores, 7,835; of railroad employes and officials, 2,711; of carmen and teamsters, 2,996; of sailors and steamboatmen, 1,959; of bakers 647; of blacksmiths, 1,571, of boot and shoe-makers, 1,752; of masons and stone-cutters, 2,077; of butchers, 1,107; of cabinet-makers and upholsterers, 1,134; of carriage and wagon-makers, 517; of carpenters and joiners, 6,210; of coopers, 656; of cotton and woolen mill operatives, 378; of tanners and leather finishers, 380; of harness and saddle-makers, 312; of iron and steel-workers, 889; of machinists, 1,336; of milliners and dress-makers, 1,924; of painters and varnishers, 2,295; of plumbers and gas-fitters, 512; of printers, 1,326; of tailors and seamstresses, 4,236; of tinners, 613, and of wheel-wrights, 75.

Although Chicago has numerous manufacturing establishments, as rolling mills, iron foundries, tanneries, etc., it is preëminent as a commercial city. It is the greatest lumber market in the Union; it far exceeds Cincinnati in pork-packing; and its commerce in grain exceeds that of any city in the world. In 1838 Chicago shipped 78 bushels of grain; in 1858, 20,040,178; in 1860, 31,109,059; in 1862, 56,477,110 and in 1863, 54,741,839. Immense grain elevators have been built along the river banks and near the railroad depots, facilitating the handling and moving of these enormous quantities of grain.

The annual report of the Board of Trade for 1872 contains the following statistics: Receipts of flour, 1,532,014 barrels; shipments, 1,361,324 barrels; receipts of corn, 47,366,087 bush.; of rye, 1,129,086 bush.; of barley, 5,251,750 bush.; cattle receipts, 684,075 head against 543,505 head in 1871; hay, receipts, 3,428,528 tons. Total value of live stock received during the year, $75,475,000. Total amount of duties collected at the custom house on foreign importations, $2,114,764. Value of domestic produce exported to Canada by lake, $5,250,000; receipts of lumber, 11,183,659,283 feet; of shingles, 610,824,420. Altogether the trade of the city for 1872 largely exceeded that of any previous year.

Chicago is the great railroad center of the west. The lines terminating here are the Michigan Central R. R.; the Chicago & Michigan Lake Shore R. R.; the Indianapolis, Peru & Chicago R. R.; the Lake Shore & Michigan Southern R. R.; the Pittsburgh, Fort Wayne & Chicago R. R.; the Pittsburgh Cincinnati & St. Louis R. R.; the Louisville, New Albany & Chicago R. R.; the Chicago, Danville & Vincennes R. R.; the Illinois Central R. R.; the Chicago & Alton R. R.; the Chicago, Burlington & Quincy R. R.; the Chicago & Iowa R. R.; the Chicago, Rock Island & Pacific R. R.; and eight lines of the Chicago & North-western R. R.; Chicago is 468 mls. from Pittsburgh, Pa.; 161 mls. from Indianapolis, Ind.; 958 mls. from New York; 493 mls. from Omaha, and 2,407 mls. from San Francisco, Cal.

The communications of Chicago by water surpass those of any interior city. By means of the great lakes, the Erie Canal and the Hudson R., it is connected with New York; and the Illinois and Michigan Canal affords an easy access to the Mississippi Valley and an uninterrupted water-way to the Gulf of Mexico. Lines of steamboats ply between Chicago and the principal ports on the lakes, and the commercial intercourse with Canada is extensive. In the year ended June 30, 1873, the number of vessels entered into the port from Canada was 174, with 50,838 tons; and of vessels cleared for Canada, 383, with 110,373 tons. In the same year the number of enrolled vessels was 640 and of licensed vessels 26, making a total of 666 vessels with 93,919 tons. This total included 339 sailing vessels, 95 steam-vessels, 8 barges and 225 Canal-boats.

Chicago is noted for the excellence of its schools and literary establishments. It had, in 1871, one normal school with 23 teachers and 587 pupils; six evening schools with 48 teachers and 1,232 pupils; 23 grammar schools with 428 teachers and 21,581 pupils, and 15 primary schools with 123 teachers and 6,593 pupils. The number of children of school-age was 80,280; of children enrolled in schools, 40,832, and the average attendance was 28,174.

The University of Chicago was first opened for instruction in 1858, and had, in 1871, 14 instructors and 277 students. The building it occupies is one of the most elegant and commodious in the west. The Dearborn Observatory, which is connected with the university, contains the Clarke telescope, one of the largest and best constructed instruments extant. The Chicago Theological Seminary has a fine chapel, library and lecture rooms, and is a flourishing institution. The Baptists and Presbyterians have each a theological seminary. It also contains three medical colleges: the Rush Medical College, the Chicago Medical College, and the Hahneman Medical College (homeopathic). The Academy of Sciences was organized in 1853 and incorporated in 1865. It has a large building and fine natural historical collections. The Historical Society, which was organized in 1856, has a fine library of nearly 100,000 volumes, and a collection of many valuable public and private works or documents. The library of the Young Men's Institution contains over 10,000 volumes, and that of the Law Institute 7,000 volumes.

There are 105 newspapers and periodicals published in the city, of which the following are the most important dailes and weeklies combined: "Inter Ocean," "Times," "Tribune," "Post," "Journal," "Illinois Staats-Zeitung," "Freie Presse," "Union," "Mail" and "Skandinavenog America." The leading weeklies, aside from the dailies, are the "Advance," "Interior," "Journal of Commerce," "Amerikanaren," "N. W. C. Advocate," "Prairie Farmer," "Fireside Friend," "Standard," "Western Rural." There are several monthlies with large circulations and proportionate influence, as "Lake Side," "Bureau," "Gem of the West," "Little Corporal" and "National Sunday School Teacher." The entire press of the city is spirited, well sustained, and of large influence in the West.

The principal parks and public squares are: the South Parks, which cover an area of 1,000 acres, and consist of several detached parks, connected by broad boulevards; the West Side Parks, which will include, when completed, 200 acres; Lincoln Park, 230 acres; Union Park; Lake Park; Dearborn Park; Jefferson Park; Ogden Park, and many others of smaller dimensions.

No city in the country, New York alone excepted, offers more or better entertainments than Chicago. McVicker's Theatre has a seating capacity of from 1,800, to 2,500, and is devoted to dramatic representations of the highest order. The Academy of Music and the Globe Theatre, though smaller than McVicker's, always give first-class entertainments.

Of the many magnificent hotels which were the pride of Chicago before the great fire, but two or three escaped destruction. Their re-erection is now in progress, and their value,

when completed, is estimated at $13,000,000. The number of arrivals registered in the principal hotels the of city, during 5 months of 1872, was 86,604.

Chippewa, co. in Mich., forming the E. extremity of the upper peninsula. Pop., 1,689; in 1860, 1,603. It borders on Lake Superior in the N., the Strait of Mackinaw in the S., and St. Mary R. in the E. The surface is broken, and in some parts rocky. Extensive tracts are covered with pine forests. The Toquamenaw R. and Manistee R. are the principal streams. Sault de Ste Marie is the co. seat. Agr. productions in 1870: Wheat, 300 bush.; oats, 2,005 bush.; Irish pot's, 1,227 bush.; wool, 190 lbs.; butter, 3,674 lbs.; has, 940 tons. Cash value of farms, $59,858. Total, estimated, value of all farm productions, including additions to stock, etc., $50,485. Value of manufactures, $20,330.

Chippewa, co. in Minn., W. part. Area, 720 sq. mls. Pop., 1,467. It has an undulating surface, and lies in the mean about 800 ft. above the sea level. The Chippewa R., a tributary of the Minnesota, flows through the N. W. part of the co. Montevideo is the co. seat. Agr. productions in 1870: Wheat, 9,318 bush.; Indian-corn, 3,550 bush.; oats, 2,465 bush.; Irish pot's, 158 bush.; butter, 64,030 lbs.; hay, 4,993 tons. Cash value of farms, $45,365. Total, estimated, value of all farm productions, including additions to stock, etc., $57,088.

Chippewa, co. in Wis., N. W. part. Area, 4,104 sq. mls. Pop., 8,311; in 1860, 1,895. The surface is rolling, and in some parts hilly. The co. has a general slope from N. N. E. to S. S. W. The largest stream which traverses it is the Chippewa R. The numerous tributaries which it receives mostly issue from small lakes in the N. part of the state, as Flambeau R., etc. Chippewa Falls is the co. seat. Agr. productions in 1870: Wheat, 131,505 bush.; rye, 6,216 bush.; Indian-corn, 32,751 bush.; oats, 166,944 bush.; Irish pot's, 67,890 bush.; butter, 51,436 lbs.; hay, 8,255 tons. Cash value of farms, $740,047. Total, estimated, value of all farm productions, including additions to stock, etc., $336,763. Value of manufactures, $1,419,314.

Choctaw, co. in Ala., W. part. Area about 900 sq. mls. Pop., 12,676; in 1860, 13,877. The surface is undulating and in some parts level. Extensive tracts are covered with the long-leaved southern pine. The Tombigby R. forms the E. boundary, and several of its tributaries flow through the co. from W. to E. Butler is the co. seat. Agr. productions in 1870: Indian-corn, 227,715 bush.; oats, 1,495 bush.; Irish pot's, 4,133 bush.; sweet pot's, 47,626 bush.; cotton, 6,439 bales; butter, 29,146 lbs. Cash value of farms, $946,850. Total, estimated, value of all farm productions, including additions to stock, etc., $908,562. Value of manufactures, $56,592.

Choctaw, co. in Miss., N. central part. Area, 900 sq. mls. Pop., 16,988; in 1860, 15,722. The surface is level and the soil very productive. The greater part of it is covered with heavy forests. The Big Black R. rises in the N. E. part of the co., and flows through it in a S. W. direction. Greensborough is the co. seat. Agr. productions in 1870: Wheat, 7,844 bush.; Indian-corn, 432,751 bush.; oats, 13,217 bush.; Irish pot's, 253 bush.; sweet pot's, 9,534 bush.; cotton, 5,637 bales; butter, 97,283 lbs. Cash value of farms, $511,163. Total, estimated, value of all farm productions, including additions to stock, etc., $1,130,930. Value of manufactures, $81,473.

Choteau Creek, p. o. in Bon Homme co., Dak.

Chouteau, co. in Mont., N. part, bordering on the British Possessions. Area nearly 25,000 sq. mls. Pop., 517. This large co. is traversed by the Missouri R. from the Great Falls to below Fort Hawley, and its tributaries, Maries R., Teton R., Milk R., Smith R., Arrow R. and Judith R. The surface consists of extensive and mostly barren plains, averaging from 3,000 to 4,000 feet in elevation, and isolated mountain chains, trending in different directions. The Little Rocky and Bear Paw Mts. occupy the region between Milk and Missouri Rs. The Belt Mts. and Judith Mts. are south of the Missouri. The soil in the river valleys is fertile, and produces good crops of wheat and fruits wherever irrigation is applicable. The North Pacific R. R. will pass through the co. along the Milk R., the Bear Paw Mts. and the upper Missouri. Fort Benton is the co. seat. Agr. productions in 1870: Butter, 600 lbs.; hay, 70 tons. Cash value of farms, $9,000. Total, estimated, value of all farm productions, including additions to stock, etc., $1,647. Value of manufactures, $3,000.

Chowan, co. in N. C., N. E. part. Area about 250 sq. mls. Pop., 6,450; in 1860, 6,842. It borders in the S. on Albemarle Sound, and in the W. on the Chowan R. The surface is low and level, and the soil mostly sandy, though productive. Edenton is the co. seat. Agr. productions in 1870: Wheat, 9,176 bush.; Indian-corn, 137,647 bush.; oats, 9,730 bush.; Irish pot's, 4,740 bush.; sweet pot's, 41,130 bush.; cotton, 1,331 bales; butter, 5,932 lbs. Cash value of farms, $542,278. Total, estimated, value of all farm productions, including additions to stock, etc., $410,458. Value of manufactures, $42,385.

Chowan River, in N. C., is formed by the confluence of the Meherrin and Nottoway Rs., which unite in Hertford co; has a southeasterly course, and empties into the western part of Albemarle Sound. It is about 55 mls. long, and is navigable throughout its entire length.

Chowchilla River, a tributary of the San Joaquin R., in California, rises in the Sierra Nevada of Mariposa co., and forms the boundary between Fresno and Merced cos.

Chrisman, p. o. in Edgar co., Ill.

Christian, co. in Ill., central part. Area, 675 sq. mls. Pop., 20,363; in 1860, 10,490. It bounds in the N. on the Sangamon R. and is drained by its tributaries. The South Fork of this river flows through the co. from E. to W. The surface is level and in some parts slightly undulating, consisting of prairies with interspersed tracts of woodland. The soil is very fertile. The Illinois Central R. R. passes through the eastern part of the co. from N. to S. Taylorville is the co. seat. Agr. productions in 1870: Wheat, 522,401 bush.; rye, 10,722 bush.; oats, 383,821 bush.; Indian-corn, 1,883,336 bush.; Irish pot's, 86,161 bush.; sweet pot's, 3,632 bush.; butter, 193,572 lbs.; hay, 22,-964 tons. Cash value of farms, $10,769,555. Total, estimated, value of all farm productions, including additions to stock, etc., $2,195,504. Value of manufactures, $934,019.

Christian, co. in Ky., S. W. part; borders on

Tenn. Area about 700 sq. mls. Pop., 23,227; in 1860, 21,627. The northern part has a hilly and elevated surface, and contains iron and coal in great abundance; the southern part is low and mostly level. The co. is underlaid by limestone, which contains numerous caves. Little R., a tributary of the Tennessee, rises in this co. and flows through the central part in a tortuous but generally south-westerly direction. Tradewater Cr. rises in the N. W. part, and the Pearl R. forms the N. E. boundary. The Evansville, Henderson & Nashville R. R. intersects the co. from S. to N. Hopkinsville is the co. seat. Agr. productions in 1870: Wheat, 242,980 bush.; rye, 2,881 bush.; Indian-corn, 778,533 bush.; oats, 65,577 bush.; Irish pot's, 19,042 bush.; sweet pot's, 22,800 bush.; tobacco, 5,384,137 lbs.; butter, 155,735 lbs.; hay, 2,353 tons. Cash value of farms, $5,528,778. Total, estimated, value of all farm productions, including additions to stock, etc., $1,701,015. Value of manufactures, $384,300.

Christian, co. in Mo., S. part. Area about 520 sq. mls. Pop., 6,707; in 1860, 5,491. The eastern part is hilly and belongs to the elevations known as the Ozark Mts., the western is undulating. Prairies cover the greater part of the co. The soil of the valleys is productive. James R. and its affluent, Finley Cr., intersects the western section; Bull Cr., Swan R. and Beaver Cr. the eastern. Ozark is the co. seat. Agr. productions in 1870: Wheat, 56,571 bush.; rye, 978 bush.; Indian-corn, 216,185 bush.; oats, 45,260 bush.; Irish pot's, 9,958 bush; sweet pot's, 2,606 bush.; tobacco, 16,132 lbs.; butter, 7,910 lbs.; hay, 240 tons. Cash value of farms, $1,127,415. Total, estimated, value of all farm productions, including additions to stock, etc., $388,750. Value of manufactures, $225,394.

***Cincinnati,** city, port of entry and co. seat of Hamilton co., Ohio, is situated on the Ohio R. 466 mls. below Pittsburgh, and 591 mls. above Cairo, Ill. The first settlement was made in 1788, and 12 years later it had 750 inhabitants. In 1819 Cincinnati was incorporated as a city; in 1830 the Miami Canal was built, which greatly increased the prosperity of the city. In 1840 the Little Miami R. R., the first of the many lines now centering here, was constructed and gave a new impulse to the growth of the city. In 1850 the population was 115,434; in 1860, 161,144 and in 1870, 216,239. This number included the following nationalities: 136,627 natives of the United States; 554 Austrians; 49,446 Germans; 3,524 Englishmen; 18,624 Irishmen; 787 Scotchmen; 2,093 Frenchmen, and 1,175 British Americans.

The site of the city is a semi-circular bottom rising in two terraces, respectively 50 ft. and 108 ft. above the river, and surrounded on the E., N. and W. by the steep slopes or bluffs of the uplands, over 400 ft. high. These hills are now covered with splendid villas and gardens, which afford very beautiful views upon the city in the valley. The river front is 10 mls. long. The streets are laid out with great regularity and intersect each other at right angles. The business portion of the city is compactly built and occupies the part nearest the river. It contains many blocks of uniformly handsome structures, built in various architectural styles, of much purity and elegance of design. The drab-colored freestone generally used for building purposes is quarried some 20 mls. above Cincinnati, near the river banks.

The Ohio R. is spanned by the great suspension bridge, which connects Cincinnati with Covington, Ky. It was designed and built by John A. Roebling, a prominent German engineer, and is suspended between two massive towers 200 feet high and 1,057 feet distant from each other. The entire length of the bridge is 2,252 feet. The railroad bridge unites Butler street in Cincinnati with Saratoga street in Newport, Ky., and rests upon 8 piers.

Cincinnati has many fine churches, though none of such grandeur as to call for a special description. The most prominent public buildings are: The Court House, on Main street; the House of Refuge, in Mill Creek Valley; the City Buildings, which, with the grounds attached, occupy an entire square, fronting on Plum street; the City Hospital, one of the finest structures of its kind in the country, and the Masonic Temple, on Third and Walnut streets. The Custom House and Post-office occupy a handsome stone edifice on Vine and Fourth streets, which belongs to the national government.

One of the most beautiful works of art in Cincinnati is the Davidson Fountain, which was purchased in Germany and presented to the city by the late Tyler Davidson. It consists of a circular basin surrounded by several groups of allegorical figures, and surmounted by a graceful female figure. It has been placed on Fifth street, between Vine and Walnut streets, and when throwing its gracefully arranged jets of water attracts numerous admirers. It consists of bronze, and was cast in Munich, Bavaria.

On the high hill to the E. of the city is the famous Eden Park, which commands magnificent views of the city, the river and the Kentucky shores, with the two cities of Covington and Newport. It contains 160 acres and includes the water-works. When completed it will rival the Central Park of New York in picturesque beauty. Washington Park is an attractive spot on the N. side of Twelfth street, and Lincoln Park, on Freeman street, with its fine avenues, its lake and island, is a favorite pleasure ground.

Cincinnati has numerous charitable institutions and associations, bearing witness of the great liberality of the citizens. The following may be mentioned: The City Hospital, on Twelfth street, completed in 1869; St. Luke's Hospital, on Franklin street and Broadway; Hospital of the Good Samaritan, on Lock and Sixth streets; St. Mary's Hospital, on Bett's and Linn streets; the Jewish Hospital, on Baum and Third streets; the City Infirmary, a large and handsome establishment, over 8 mls. N. of the city; the Cincinnati Orphan Asylum, on Auburn Hill. The Union Bethel is a prominent benevolent institution, embracing several departments: the Widows' Home; the Home for the Friendless; the Women's Christian Association, and the Young Men's Christian Association, including a free reading-room, music-room and conversation-room.

The progress in manufacturing has been steady, and Cincinnati ranks in this respect with the great cities of the world. The census statistics, inclusive of Hamilton co., contain the following branches exceeding $1,000,000 in value: Boots and shoes, $1,444,340; men's clothing, $8,599,075; furniture, $3,584,782; forged and rolled iron, $1,844,640; iron-castings, $1,602,228; leather, $2,053,949; distilled liquors, $2,714,114; malt liquors, $3,299,400; machinery, $1,612,377; engines and boilers, $1,550,116; packed pork, $9,172,280; animal oil, $1,544,843; printing and publishing, $2,366,100; soap and candles, $2,502,539; tin, copper and sheet-iron ware, $1,188,947, and cigars, $1,378,484.

Cincinnati is one of the great commercial centers in the United States. The Ohio R. connects it with the largest cities of the interior, and affords an uninterrupted water communication with New Orleans and the Gulf of Mexico, while the Miami Canal connects it with Lake Erie, and further on with New York. In 1871 it had 113 steamboats, with 35,953 tons; 111 barges, with 27,773 tons, and 199 canal boats, with 10,822 tons, making a total of 423 vessels, with 74,549 tons.

It is the northern terminus of the Kentucky Central R. R.; the north-eastern terminus of the Cincinnati & Louisville R. R.; the eastern terminus of the Ohio & Mississippi R. R.; the southern terminus of the Indianapolis, Cincinnati & Lafayette R. R.; of the Cincinnati & Indianapolis Junction R. R.; of the Fort Wayne, Muncie & Cincinnati R. R.; of the Cincinnati, Hamilton & Dayton R. R.; of the Dayton & Michigan R. R.; of the Cleveland, Columbus, Cincinnati & Indianapolis R. R.; of the Miami Division of the Pittsburgh, Cincinnati & St. Louis R. R., and of the Cincinnati & Muskingum Valley R. R.; and the western terminus of the Marietta & Cincinnati R. R., and of the Atlantic & Great Western R. R.

The educational and literary institutions of the city are numerous, and have attained a high degree of excellence. In 1871 it had 15 primary schools, with 175 teachers and 7,951 pupils; 3 grammar schools, with 58 teachers and 2,216 pupils; 2 high schools, with 10 teachers and 224 pupils; one evening school, with 2 teachers and 55 pupils, and one normal school, with 4 teachers and 34 pupils, making a grand total of 38 public schools, with 536 teachers and 22,134 pupils. The number of children of

school age was 112,125, of whom but 29,670 were enrolled in the public schools. The average attendance was 22,134. The following are the higher schools: Cincinnati College, which was founded as a regular college, but is now a law school; the Medical College of Ohio; the Miami Medical College; Lane Theological Seminary; St. Xavier College (Jesuit); the Wesleyan Female College, and the German Catholic Institute.

There are 61 newspapers and periodicals published here, of which the following publish daily and weekly editions: "Gazette," "Commercial," "Times & Chronicle," "Enquirer," "Star," "Courier," "Volksblatt" and "Volksfreund." The weekly press, aside from the dailies, is largely represented, the principal publications being the "W. C. Advocate," "C. Standard," "Herald & Presbyter," "Catholic Telegraph," "Journal & Messenger," "Star in the West," "Christian World" and "American C. Review." The "Ladies' Repository" and "Golden Hours" are among the successful monthlies.

The suburbs of Cincinnati extend far into the country, and contain numerous elegant private residences. Mount Auburn occupies the high hill N. of the city; Clifton is several mls. further N., and is a most beautiful collection of imposing mansions, surrounded by gardens and parks. Beyond Clifton is the Spring Grove Cemetery, lying in the valley of Mill Creek. It embraces 450 acres of ground, and is a master piece of landscape gardening.

Clackamas, co. in Oreg., N. part. Area, 1,925 sq. mls. Pop., 5,993; in 1860, 3,466. It extends from the crest of the lofty Cascade Mts. in the E. to the valley of the Willamette R., and hence rapidly slopes toward the W. The larger part of the co. is occupied with the spurs of the Cascade Mts.; the eastern part only is a level and very low plain. This portion, which belongs to the Willamette R., is very fertile, but subject to inundations. Clackamas is the co. seat. Agr. productions in 1870: Wheat, 48,650 bush.; rye, 380 bush.; Indian-corn, 200 bush.; oats, 58,017 bush.; Irish pot's, 34,613 bush.; sweet pot's, 1,817 bush.; wool, 15,628 lbs.; butter, 46 935 lbs.; hay, 2,716 tons. Cash value of farms, $1,143,900. Total, estimated, value of all farm productions, including additions to stock, etc., $319,556. Value of manufactures, $638,070.

Clackamas, p. v. and the co. seat of Clackamas co. Oreg., on the Oregon & California R. R., 11 mls. from Portland.

Clackamas River, tributary of the Willamette R., in N. Oreg.; rises in the Cascade Mts. in Clackamas co., and empties into the Willamette near Oregon City.

Clagett, p. o. in Jefferson co., Mont.

Claiborne, parish in La., N. part, bordering on Ark. Area, 1,100 sq. mls. Pop., 20,240; in 1860, 16,848. The surface is undulating, and consists of prairies and pine forests. The soil is moderately productive. The E. part is drained by several forks of the Bayou d' Arbonne. The Bayou Dorcheat forms the W. boundary, and its tributaries drain the W. part of the co. Homer is the co. seat. Agr. productions in 1870: Indian-corn, 475,374 bush.; Irish pot's, 3,270 bush.; sweet pot's, 95,914 bush.; cotton, 14,900 bales; butter, 20,835 lbs. Cash value of farms, $1,494,346. Total, estimated, value of all farm productions including additions to stock, etc., $1,986,546. Value of manufactures, $268,315.

Claiborne, co. in Miss., W. part; borders on La. Area, 740 sq. mls. Pop., 13,386; in 1860, 15,679. The surface is rolling, and descends in steep bluffs to the bottom-lands of the Mississippi R., which washes the W. border. The Big Black R. forms the N. W. boundary, and the Bayou R., an affluent of the Mississippi R., flows through the co. from W. to E. Port Gibson is the co. seat. Agr. productions in 1870: Indian-corn, 179,187 bush.; Irish pot's, 10,206 bush.; sweet pot's, 18,330 bush.; cotton, 14,776 bales; butter, 20,193 lbs. Cash value of farms, $1,638,551. Total, estimated, value of all farm productions, including additions to stock, etc., $1,436,167.

Claiborne, co. in Tenn., N. E. part, bordering on Va. Area about 250 sq. mls. Pop., 9,321; in 1860, 9,643. The surface is elevated throughout. The S. E. part is occupied by several mountain ranges, among which Walden's Ridge and Chestnut Ridge may be mentioned. The W. and N. part is level and forms a section of the wide and fertile valley of Powell's R., which partly traverses this co. and partly bounds it on the S.; the Clinch R. bounds it on the S. E. Rich iron mines are in operation. Tazewell is the co. seat. Agr. productions in 1870: Wheat 33,901 bush.; rye, 1,125 bush.; Indian-corn, 204,840 bush.; oats, 59,039 bush.; Irish pot's, 11,301 bush.; sweet pot's, 3,150 bush.; butter, 94,007 lbs.; hay, 399 tons. Cash value of farms, $979,459. Total, estimated, value of all farm productions, including additions to stock, etc., $254,175. Value of manufactures, $92,543.

Clark, tn. in Union co., N. J. Pop., 331.

Clark, tn. in Brown co., Ohio. Pop., 1,691.

Clark, co. in Ohio, S. W. part. Area about 330 sq. mls. Pop., 32,070; in 1860, 25,300. The surface is hilly and the soil very productive. Mad R., the largest stream of the co., flows through the center from N. to S. The eastern part is drained by the head streams of the Little Miami R. Several lines of R. R. intersect at Springfield, connecting this place with Sandusky, Cleveland, Cincinnati, Dayton, Columbus and Delaware. The Columbus & Xenia R. R. intersects the S. E. corner of the co. Springfield is the co. seat. Agr. productions in 1870: Wheat, 600,732 bush.; rye, 18,295 bush.; Indian-corn, 1,204,559 bush.; oats, 227,994 bush.; Irish pot's, 94,539 bush.; sweet pot's, 7,400 bush.; butter 449 334 lbs.; hay, 23,561 tons. Cash value of farms, $15,432,266. Total, estimated, value of all farm productions, including additions to stock, etc., $2,798,833. Value of manufactures, $4,152,035.

Clark, p. v. in Mercer co., Pa., on the Beaver & Erie Canal and the Shenango R., 1 mle. E. of the Erie & Pittsburg R. R.

Clark, tn. in Harrison co., W. Va. Pop., 2,085.

Clark, tn. in Randolph co., W. Va. Pop., 469.

Clark, co. in Wis., W. part. Area, 1,585 sq. mls. Pop., 3,450; in 1860, 789. It has an uneven and rolling surface, and a soil very productive in many parts. The western part is drained by tributaries of the Mississippi, as Black R., Au Claire R. and Yellow R.; the western part is drained by affluents of the Wisconsin R. Neilsville is the co. seat. Agr. productions in 1870: Wheat, 12,103 bush.; rye, 670 bush.; Indian-corn, 9,511 bush.; oats, 34,997 bush.; Irish pot's, 17,317 bush.; butter, 74,876 lbs.; hay, 3,846 tons. Cash value of farms, $645,460. Total, estimated, value of all farm productions, including additions to stock, etc., $227,185. Value of manufactures, $124,040.

Clark Centre, p. o. in Clark co., Ill.

Clarke, co. in Ala., S. W. part. Area about 1,200 sq. mls. Pop., 14,663; in 1860, 15,049. The surface of the N. part is undulating; of the S. part, level and low. The Tombigbee and the Alabama Rs. form the western and eastern boundaries, and unite at its southern extremity, forming the Mobile R. There is much poor, sandy soil in the co., though some parts of it are quite fertile. Large portions are covered with pine forests. Grove Hill is the co. seat. Agr. productions in 1870: Indian-corn, 227,031 bush.; oats, 490 bush.; sweet pot's, 49,550 bush.; cotton, 5,713 bales; butter, 9,780 lbs.; hay, 60 tons. Cash value of farms, $156,165. Total, estimated, value of all farm productions, including additions to stock, etc., $840,160. Value of manufactures, $32,795.

Clarke, co. in Ga., N. central part. Area, 373 sq. mls. Pop., 12,941; in 1860, 11,218. The Apalachee R. forms the south-western boundary; the North Fork and Middle Fork of the Oconee R. traverse the co. and join near its center. The surface is undulating and the soil productive. Watkinsville is the co. seat. Agr. productions in 1870: Wheat, 18,103 bush.; rye, 230 bush.; Indian-corn, 134,951 bush.; oats, 27,335 bush.; Irish pot's, 2,516 bush.; sweet pot's, 16,112 bush.; cotton, 3,069 bales; butter, 50,831 lbs.; hay, 12 tons. Cash value of farms, $871,100. Total, estimated, value of all farm productions, including additions to stock, etc., $601,369. Value of manufactures, $860,720.

Clarke, co. in Ind., S. part. Area about 400 sq. mls. Pop., 24,116; in 1860, 20,502. The surface is mostly level, and the soil very fertile. In the western part there is a line of low hills. The co. borders in the S. E. on the Ohio R., and is drained by Big Cr. and Silver Cr. Iron ore of a good quality, limestone, hydraulic cement and excellent sandstone, much used for building purposes, are its mineral treasures. Two branches of the Jeffersonville, Madison & Indianapolis R. R. pass through the co. from S. to N., terminating at Jeffersonville, opposite Louisville. Charlestown is the co. seat. Agr. productions in 1870: Wheat, 119,368 bush.; rye, 3,111 bush.; Indian-corn, 612,192 bush.; oats, 136,295 bush.; Irish pot's, 103,206 bush.; sweet pot's, 4,010 bush.; butter, 224,376 lbs.; hay, 9,020 tons. Cash value of farms, $5,986,128. Total, estimated, value of all farm productions, including additions, to stock, etc., $1,101,173. Value of manufactures, $3,635,300.

Clarke, p. o. in Randolph co., Ind.

Clarke, co. in Iowa, S. part. Area, 432 sq. mls. Pop., 8,735; in 1860, 5,427. The surface is undulating and consists mainly of prairies. The soil is fertile. South R., Squaw Cr., White

Breast R., tributaries of the Des Moines, and Chariton R., rise in this co. and have a northwesterly and westerly course. Osceola is the co. seat. Agr. productions in 1870: Wheat, 125,312 bush.; rye, 1,646 bush.; Indian-corn, 374,588 bush.; oats, 129,595 bush.; Irish pot's 31,863 bush.; sweet pot's, 63 bush.; wool, 37,209 lbs.; butter, 203,170 lbs.; hay, 14,889 tons. Cash value of farms, $2,214,869. Total, estimated, value of all farm productions, including additions to stock, etc., $717,255. Value of manufactures, $211,070.

Clarke, co. in Ky., E. central part. Area, 210 sq. mls. Pop., 10,882; in 1860, 11,484. The surface is hilly and broken, with deep ravines and valleys. The Kentucky R. (navigable here) and its tributary, the Red R., form the southern boundary: Howard's Cr. and Stoner's Cr. rise in the northern part. Winchester is the co. seat. Agr. productions in 1870: Wheat, 38,692 bush.; rye, 36,636 bush.; Indian-corn, 774,210 bush.; oats, 38,810 bush.; Irish pot's, 20,161 bush.; sweet pot's, 3,230 bush.; butter, 137,150 lbs.; hay, 3,495 tons. Cash value of farms, $7,292,615. Total, estimated, value of all farm productions, including additions to stock, etc., $1,528,664. Value of manufactures, $222,179.

Clarke, co. in Mo., forms the N. E. corner of the state. Area, 525 sq. mls. Pop., 13,667; in 1860, 11,684. It borders in the W. on the Mississippi R. and in the N. W. on the Des Moines R. The Fox & Wyaconda Rs. flow through it from N. W. to S. E., and the N. Fabius R. intersects the S. W. corner. The surface is undulating and becomes more level toward the Mississippi and Des Moines. The bottom-lands of the streams are heavily timbered; the uplands consist of prairies. Waterloo is the co. seat. Agr. productions in 1870: Wheat, 90,159 bush.; rye, 55,336 bush.; Indian-corn, 505,152 bush.; oats, 239,298 bush.; Irish pot's, 33,815 bush.; sweet pot's, 412 bush.; butter, 181,507 lbs.; hay, 12,352 tons. Cash value of farms, $3,627,710. Total, estimated, value of all farm productions, including additions to stock, etc., $746,619. Value of manufactures, $95,446.

Clarke, co. in Va. N. E. part. Area, 210 sq. mls. Pop., 6,670, in 1860, 7,146. It is bounded on the E. by the Blue Ridge and on the W. by the Opequan R., tributary of the Potomac. The Shenandoah R. flows through the E. part from S. S. W. to N. N. E., near the western base of the Blue Ridge. This co. includes a part of the Great, or Shenandoah, Valley, one of the principal features of the state. The soil is very productive. The R. R. from Harper's Ferry to Winchester intersects the N. W. corner of the co. Berryville is the co. seat. Agr. productions in 1870: Wheat, 234,858 bush.; rye, 6,151 bush.; Indian-corn, 211,028 bush.; oats, 59,618 bush.; Irish pot's, 8,139 bush.; sweet pot's, 45 bush.; butter, 85,339 lbs.; hay, 2,233 tons. Cash value of farms, $4,014,970. Total, estimated, value of all farm productions, including additions to stock, etc., 590,764. Value of manufactures, $230,612.

Clarke, co. in Wash. Ter., S. part. Area, 1,862 sq. mls. Pop., 3,081; in 1860, 2,384. The Columbia R. washes the southern and in part the western boundary, receiving the entire drainage of the co., as Washookal R., Cathlapootle R., Coweman R. and Toutle R. The two last named are tributaries of the Cowlitz, which joins the Columbia W. of this co. The S. W. part has a low and level surface; the N. E. part is mountainous and hilly. Vancouver is the co. seat. Agr. productions in 1870: Wheat, 16,735 bush.; rye, 288 bush.; oats, 36,387 bush.; Indian-corn, 1,720 bush.; Irish pot's, 30,222 bush.; butter, 86,303 lbs.; hay, 5,862 tons. Cash value of farms, $589,850. Total, estimated, value of all farm productions, including additions to stock, etc., $181,361. Value of manufactures, $49,684.

Clay, tn. in Wayne co., Iowa. Pop., 473.

Clay, co. in Kans., central part. Area, 700 sq. mls. Pop., 2,942, in 1860, 163. The surface is undulating and consists of fertile prairies. The largest stream is the Republican R., which intersects the co. from N. N. W. to S. S. E. and receives numerous small affluents. Clay Centre, on the Republican R., is the co. seat. Agr. productions in 1870: Wheat, 36,704 bush.; rye, 45 bush.; Indian-corn, 95,145 bush.; oats, 6,090 bush.; Irish pot's, 13,335 bush.; sweet pot's, 171 bush.; butter, 30,070 lbs.; hay, 5,356 tons. Cash value of farms, $624,990. Total, estimated, value of all farm productions, including additions to stock, etc., $188,725. Value of manufactures, $26,690.

Clay, co. in Ky., S. E. part. Area about 300 sq. mls. Pop., 8,297; in 1860, 6,652. The co. is traversed by several ranges of mountains and hills. Coal and iron are abundant. The South Fork of the Kentucky R. rises near the S. E. corner and flows through the co. in a north-westerly direction. It receives Goose Cr. and Sextons Cr. A large portion of the co. is still covered with fine timber. Manchester is the co. seat. Agr. productions in 1870: Wheat, 7,853 bush.; rye 988 bush.; Indian-corn, 281,499 bush.; oats, 25,138 bush.; Irish pot's, 17,774 bush.; sweet pot's, 4,843 bush.; butter, 67,984 lbs.; hay, 295 tons. Cash value of farms, $653,570. Total, estimated, value of all farm productions, including additions to stock, etc., $364,519. Value of manufactures, $38,204.

Clay, p. o. in Webster co., Ky.

Clay, tn. in St. Clair co., Mich. Pop., 1,475.

Clay, co. in Minn., W. part; borders on Dakota. Area about 1,080 sq. mls. Pop., 92. The surface is nearly level, as the co. forms part of the alluvial plain which is traversed by the Red R. of the North. This river forms the W. boundary and receives the Buffalo R., which, with its two branches, the South Fork and the North Fork, drains the co. The soil is very fertile and capable of producing heavy crops of wheat and other grains. Agr. productions in 1870: Irish pot's, 300 bush.; butter, 300 lbs. Cash value of farms, $1,598. Total, estimated, value of all farm productions, including additions to stock, etc., $1,105.

Clay, co. in Mo., W. part. Area, 420 sq. mls. Pop., 15,564; in 1860, 13,023. The surface is undulating and slopes toward the bottom-land on the Missouri R., which forms the southern boundary of the co. Smith's Fork, a tributary of the Little Platte R., drains the northwestern part; Fishing Cr. the eastern. The larger portion of the co. is heavily timbered. A branch of the Hannibal & St. Joseph R. R. intersects the co. Liberty is the co. seat. Agr. productions in 1870: Wheat, 197,214 bush.; rye, 2,985 bush.; Indian-corn, 1,844,270 bush.; oats, 199,604 bush.; Irish pot's, 83,277 bush.; sweet pot's, 5,617 bush.; tobacco, 31,040 lbs.; butter, 253,805 lbs.; hay, 5,961 tons. Cash value of farms, $7,168,052. Total, estimated, value of all farm productions, including additions to stock, etc., $2,032,770. Value of manufactures, $76,730.

Clearfield, co. in Pa., central part. Area about 1,100 sq. mls. Pop., 25,741; in 1850, 18,759. The West Branch of the Susquehanna R. enters the co. from the S., flows through it to the N. E., and lastly forms part of the E. boundary, together with its tributary, Mushanon Cr. The Susquehanna receives Chest Cr. and Clearfield Cr. from the S., and Anderson's Cr., Chinkelamoose Run, Trout Run and Sandy Run from the N. The surface is rolling and hilly, particularly in the E. part, where the streams have cut out deep furrows and ravines. The soil is fertile. Extensive forests yield valuable pine, oak, etc., timber. Iron ore and coal are abundant. Grazing is an important branch of industry. Clearfield is the co. seat. Agr. productions in 1870: Wheat, 68,724 bush.; rye, 52,117 bush.; oats, 375,053 bush.; Indian-corn, 245,269 bush.; Irish pot's, 62,059 bush.; sweet pot's, 45 bush.; butter, 451,942 lbs.; hay, 19,928 tons. Cash value of farms, $5,931,360. Total, estimated, value of all farm productions, including additions to stock, etc., $1,889,767. Value of manufactures, $1,109,405.

***Cleveland,** city, port of entry and the co. seat of Cuyahoga co., Ohio, on the mouth of the Cuyahoga R., on Lake Erie, and on the Lake Shore & Michigan Central R. R., 608 mls. from New York and 180 mls. from Buffalo; is the north-eastern terminus of the Cleveland, Columbus & Cincinnati R. R., the north-western terminus of the Mahoning Division of the Atlantic & Great Western R. R.; and the northern terminus of the Cleveland & Pittsburgh R. R. The Ohio Canal connects it with Portsmouth, on the Ohio R.

Cleveland is the second city in size in the State and one of the most beautiful in the United States. It lies on a plain from 80 to 100 feet above the lake and has wide and regular streets, intersecting each other mostly at right angles. The shipping, produce and wholesale business is done on River and Merwin streets, on the E. bank of the river. Superior street has the elegant retail stores, the banks, newspaper offices, etc. Monument Square, in the centre of the city, is intersected by Superior and Ontario streets, and in it stands a fine marble statue of Commodore O. H. Perry, the hero of the battle of Lake Erie. Euclid avenue, a wide street 3 mls. long, and lined with stately maples, is one of the handsomest streets in the country. It is composed entirely of magnificent private residences, standing in open parks and lawns. The principal public buildings are the Cleveland Medical College; the Marine Hospital; Case Hall, which contains the collection of books

of the Cleveland Library Association, numbering over 20,000 volumes; the U. S. Post-office, and the Union Railroad Depot, one of the largest structures of its kind in the world.

Cleveland was laid out in 1796. In 1850 it had 17,034 inhabitants; in 1860, 43,417; and in 1870, 92,829. It has numerous manufacturing establishments, as iron-foundries, rolling-mills, coal-oil refineries, pork-packing houses, and cooper shops. The commerce of Cleveland is extensive, and largely consists in exchanging the products of the west, especially wool, grain, flour, pork and coal-oil with the manufactures of the East.

The city affords excellent educational facilities. In 1871 it had 15 primary schools with 175 teachers, and 7,951 pupils, and one high school, with two teachers and 50 pupils, besides several excellent private schools. The number of children of school-age was 32,177, of whom 13,184 were enrolled in the public schools. The average number attending school was 8,175.

The leading newspapers are the "Cleveland Herald"; the "Cleveland Leader"; the "Cleveland Plaindealer"; the "Evening News"; and the "Waechter am Erie' (German.)

Colfax, co. in Nebr., E. central part. Area, 396 sq. mls. Pop., 1,424. The surface is undulating and consists generally of prairies. The co. borders in the S. on the Platte R., and is drained by Maple Cr., Shell Cr. and other small streams. The soil is productive. The Union Pacific R. R. intersects the southern part of the co. Schuyler is the co. seat. Agr. productions in 1870: Wheat, 13,529 bush.; rye, 1,770 bush.; Indian-corn, 27,164 bush.; oats, 15,017 bush.; Irish pot's, 8,354 bush.; butter, 20,350 lbs.; hay, 2 203 tons. Cash value of farms, $104,127. Total, estimated, value of all farm productions, including additions to stock, etc., $68,256. Value of manufactures, $56,997.
Colfax, co. in N. Mex., N. E. part. Area about 5,600 sq. mls. Pop., 1,992. The central and eastern portions of the co. consist of level and arid plains, while the western is occupied by the Rocky Mts. The principal streams are tributaries of the Canadian R. Mining is the principal occupation of the inhabitants. Elizabethtown is the co. seat. Agr. productions in 1870: Wheat 5,491 bush.; oats, 14,398 bush.; Indian-corn, 11,000 bush.; Irish pot's, 160 bush.; butter, 4,520 lbs.; hay, 836 tons. Cash value of farms, $67,200. Total, estimated, value of all farm productions, including additions to stock, etc., $79,965. Value of manufactures, $265,150.

COLORADO, one of the western territories, extends from 37° to 41¼° N. lat. and from 102° to 109° long. W. of Greenwich. It has an area of 104,500 sq. mls., or 66,860,000 acres, and is nearly thirteen times as large as Mass.

Surface.—The W. portion of the territory, embracing about 4-7 of the area, is occupied by the principal chains of the Rocky Mts. and numerous subordinate ranges; the eastern consists of rolling plains, gradually rising toward the W., where they are bounded by the foot hills of the Rocky Mts. in about 105° W. long. The Rocky Mts. inclose elevated plains or valleys of different areas, which are known as the North Park, Middle Park, South Park and San Luis Park. The North Park lies between the main range of the Rocky Mts. and the southern part of the Medicine Bow Mts., and owing to its northern situation and cold climate has thus far been less explored and settled than the others. The Middle Park is S. of the North Park, from which it is separated by a transverse chain. Some of the loftiest peaks of the Rocky Mts. rise upon its rim, as Long's Peak, 14,050 feet high, about 18 mls. N. of the 40th parallel; Parry's Peak, 13,133 feet, and Flora's Peak, 12,878 feet, standing near together; Gray's Peak, 14,145 feet, 6 mls. W. of Denver; Mt. Guyot, 13,323 feet, about 23 mls. N. of the 39th parallel; Mt. Silverheels, from 2 to 3 mls. S. W. of Mt. Guyot and 13,650 feet high, and Mt. Lincoln, 14,123 feet, a few mls. W. N. W. of Mt. Silverheels. The Middle Park is drained by the sources of the Blue R., one of the confluents of the Grand R., and its surface is covered by magnificent forests and broad, open meadows. Directly S. of it lies South Park, the most picturesque of the series. The continental divide bounds it on the W. and separates it from the deep valley of the upper course of the Arkansas R. The lofty peaks rising on its south-western margin are Mt. Yale, 14,078 feet, and Mt. Harvard, 14,270 feet. The San Luis Park, in the southern part of the territory, and separated from the South Park by the valley of the Arkansas, is by far the largest, and has an area of nearly 18,000 sq. mls. It is surrounded by the San Juan Mts. and the Sierra Mimbres, which form a magnificent panorama of snowy peaks and ranges. Thirty-five streams, descending from the encircling snowy crests, water the park. Nineteen of these streams empty into the beautiful San Luis Lake, while the others join the Rio Grande, which traverses the park from N. to S. There are other parks of smaller area and lying E. or W. of those above described. Huerfano Park is on the north-eastern side of the San Luis Park, and is bounded by the Wet Mts. Uncompahgre, in the south-western part of the territory, is traversed by the Uncompahgre R., a tributary of the Grand R., and has the Sierra de la Plata for its southern margin. The ranges, which branch off from the Rocky Mts. toward the W. are thus far but imperfectly explored. They separate the valleys of the tributaries of the Colorado R., and gradually decrease in elevation toward this great river. The maps prepared in the Engineer's Department exhibit the Elk Head Range in the N., the Roan, or Book Mts. further S., the Elk Mts. nearly W. of the sources of the Arkansas, and lastly the Uncompahgre Mts., Sierra de la Plata and Sierra de San Miguel. The Spanish Peaks form a small group of lofty mountains rising E. of the San Luis Park, and S. of them are the Raton, or Rat, Mts., which inclose some of the most beautiful and fertile valleys of the territory.

Rivers.— The continental divide traverses Colorado in a general N. and S. direction, and the drainage of the eastern part of the territory is carried into the Mississippi, while that of the western part finds its way into the great Colorado R. The North Platte R. drains the North Park, the South Platte rises in the South Park, and both streams then unite and intersect the north-eastern part of the territory The Platte receives the Cache a Poudre Cr. Pawnee Cr. and Beaver Cr. The Arkansas R. rises due W. of Mt. Lincoln, flows S., and turning W. intersects the southern part of the territory. It receives the Boiling Fountain Cr., the Huerfano R., which rises in the park of the same name, the Anista R. and the Purgatory R. This stream rises in the Raton Mts., and flows through a beautiful canyon.

The N. W. corner of the territory is intersected by the Yampah, or Snake, R., a tributary of the Green R. White R., further S., rises in the mountain rim of the Middle Park, and also empties into the Green R. The Tunkara R., a branch of the Grand R., rises within Middle Park, receives numerous affluents, and joins the Green R. to form the Colorado.

Climate—The climate of the territory resembles that of the eastern states in the same latitude, except that the air is much drier and the range of temperature between the extremes much smaller. Rain falls almost exclusively from May to July; the other months are dry. Frost appears about the middle of September, and continues until the opening of spring, which usually occurs a month earlier than in the east.

Vegetation.—The plains of the eastern part of Colorado are covered with nutritious grasses, and offer excellent inducements to the grazier and stock raiser. In the mountainous part there are extensive forests. Summit co., in the N. W., including an area of nearly 20,000 sq. mls., is well watered and timbered with oak, pine and poplar woods. The parks also abound with extensive forests, which will prove of great value in the future development of the country.

Population.—Colorado was organized as a territory by act of February 28, 1861. The census for 1870 returns a population of 39,864 (or 0.38 inhabitants to the sq. mle.), of whom 33,265 were natives of the United States, including 32 natives of Colorado. The foreign-born population numbers 6,599, of whom 663 were Canadians, 1,465 Germans, 1,358 Englishmen, and 1,685 Irishmen. Of the 17,583 persons who were engaged in different occupations and business pursuits, 6,462 were agriculturists, 3,625 were engaged in professional and personal services, 2,815 in trade and transportation, and 4,681 in manufactures and mechanical or mining industries.

Agriculture has but recently received attention. The climate renders irrigation necessary. But wherever this has been applied the results have been exceedingly favorable. The cereals and fruits produce large crops of superior quality, wherever properly cultivated and irrigated. Orchards have been planted in the valley of the South Platte and the upper Arkansas Rs., and promise to be entirely successful. The planting of forest trees on the arid plains has engaged the attention of but few settlers thus far; but its feasibility has been demonstrated in the fine grove of cottonwood now growing luxuriantly in the city of Denver. The soil of the valleys, on the plateaux and along the streams, is generally rich. Some of the finest agricultural lands, including about 800,000 acres, is found on the upper tributaries of the South Platte. The census returns 1,738 farms, of which 166 had less than 10 acres; 263, from 10 to 20 acres; 671, from 20 to 50 acres; 371, from 50 to 100 acres; 258, from 100 to 500 acres; 6, from 500 to 1,000 acres, and 3 over 1,000 acres. The improved land in farms embraced 95,594 acres. The cash value of farms was $3,385,748, and the total estimated value of all farm productions was $416,236, and of live stock, $252,394. Colo. produced 255,939 bush. of spring wheat; 2,535 bush. of winter wheat; 5,235 bush. of rye; 231,903 bush. of corn; 332,940 bush. of oats; 890 lbs. of tobacco; 204,925 lbs. of wool; 121,442 bush. of Irish pot's, and 19,787 tons of hay. The increased facilities of transportation greatly stimulate stock raising. A few

years ago beef cattle were driven from Cal. to Colo. to find a market. Since the completion of the Pacific R. Rs. large shipments of cattle have been made from Colo. to Cal. In 1870 Colo. had 6,446 horses; 1,173 mules and asses; 20,017 milch cows; 5,556 working oxen; 40,153 other cattle; 120,928 sheep, and 5,509 swine.

Mining operations date as far back as 1858, when gold was taken from placers near the site where now stands the city of Denver. Afterward followed the discovery of the rich deposits of gold, silver, copper, lead and zinc in various portions of the mountain region. Mining is now carried on chiefly in the cos. of Gilpin, Park, Clear Cr., Summit, Lake and Boulder. Gold is mostly found intermixed with silver, and silver with copper and lead. The value of precious minerals, obtained during 1870, has been estimated at about $4,000,000, of which $1,500,000 were yielded by the placers, and the remainder by quartz veins. The census reports the value at only $359,374. Copper pyrites occur in the gold and silver mining districts, and silver-bearing galena (lead) is also found. Coal beds have been discovered in the mountainous districts and in the parks, and will, doubtless, aid materially in the development of the mining and industrial interests. Salt occurs near Fair Play in South Park, but the cost of furnace evaporation has been found too great to leave a profit. In several localities, however, dry and comparatively pure salt is found. Mineral springs are very abundant in the territory, particularly such as contain sulphur. Those in the Middle Park range in temperature from 100° to 116° Fahr., and are found to be efficacious in rheumatic and scrofulous diseases. In the San Juan Mts., not far from the southern boundary of the territory, is the Pagora Spring, which has a temperature of 200°, and is reported to possess great curative power. Another large sulphur spring is situated near the Raton Pass, to the east of the San Luis Park.

Manufactures.—The manufacturing interests are as yet of limited importance. In 1870 there were 256 establisments (each producing over $500 worth of goods), which employed capital of $1,593,380 and 876 hands. The products had a value of $2,852,820, and consisted of flour, meal, lumber and cast-iron.

Education.—Colo. has 135 schools and 145 teachers. The total population over 5 and below 21 years of age was, in 1870, 8,593, of which number 5,345 persons were enrolled in the public schools. The receipts for school purposes ($98,105) were mostly received from taxation. The number of newspapers and journals published in the territory was, in 1870, fourteen, and in 1873, thirty-one.

Wealth and Taxation. — The total assessed wealth of the territory was, according to the last census, $17,338,101, of which sum $8,840,811 were real estate, and $8,497,290 personal estate. The total taxation (not national) was $362,197. The territory has no bonded debt.

Government.—The constitution of Colo. was framed by a convention on August 12, 1865, and adopted by the people September 5th of the same year. The capital was formerly at Golden City, but is now at Denver. The legislature consists of a council of 13 members, and a house of representatives of 26 members. The general election is on the 1st Tuesday of October.

Colo. is divided into the following 21 cos: Arapahoe, Bent, Boulder, Clear Cr., Conejos, Costilla, Douglas, El Paso, Fremont, Gilpin, Greenwood, Huerfano, Jefferson, Lake, Larimer, Las Animas, Park, Pueblo, Saquache, Summit, Weld.

Colorado, co. in Tex., E. central part. Area about 1,015 sq. mls. Pop., 8,326; in 1860, 7,885. This co. extends on both sides of the Colorado R., from which it derives its name, and includes a portion of its valley. The latter is a low alluvial and very productive plain; the higher tracts on both sides of it are undulating and consist mostly of prairies. The southern part of the co. is drained by Sandy Cr., a tributary of the Lavaca R. Columbus is the co. seat. Agr. productions in 1870: Rye, 51 bush.; Indian-corn, 130,423 bush.; Irish pot's, 2,648 bush.; sweet pot's, 14,442 bush.; cotton, 2,796 bales; butter, 40,165 lbs.; hay, 530 tons. Cash value of farms, $493,890. Total, estimated, value of all farm productions, including additions to stock, etc., $335,115. Value of manufactures, $69,948.

Colorado, p. o. in Lincoln co., Kans.

Colorado, p. o. in Schuylkill co., Pa.

Colorado City, p. v. and the co. seat of El Paso co., Colo., 60 mls. S. of Denver. It lies on Fountain-qui-bout Cr., where it emerges from the Rocky Mts.

Colorado River, large stream in Tex., rises on the Llano Estacado in the N. W. part of the state, and intersects the latter from N. W. to S. E., emptying into Matagorda B., near the village. Matagorda, Austin, Bastrop, La Grange and Columbus lie upon its banks. It is navigable as high up as Austin, about 300 mls. above its mouth.

Colorado River, also called the **Colorado of the West,** to distinguish it from the several Colorado or Red Rs. of our country, notably from the Colorado R. of Tex., the Red R. of the N., etc.; is formed by the confluence of the Green R. and the Grand R. The Green R. rises on the W. slope of the Wind River Mts. of Wyo., near Fremont's Peak. Its sources are not far from those of the Wind R., Yellow Stone R. and Snake R. At first it flows S. through the desert plateau of southern Wyo., which lies between the Wahsatch Mts. and the Wind River Mts. Arriving near the northern base of the Uintah Mts. it turns E. and then resumes a southerly course through the narrow valley or cañon which separates the Uintah Mts. and numerous extensions of the Wahsatch Mts. from the Sierra Escalante and other ranges, until it joins the Grand R. in lat. 38° 27'. The principal tributaries of the Green R. are the Bear R. and White R. from the E., and the Muddy Fork, the Uintah R., another White R. and Akanaquint Cr. from the W. The Grand R. rises in the Rocky Mts., a range of which separates its sources from those of the Arkansas R. Its course lies entirely between lofty mountains, and its principal tributary, the Bunkara R., rises in the Middle Park, and flows between the Roan and Elk Mts. The head waters of the Bunkara, which drain the Middle Park, are the Gilpin R., James R., Bangs R., Milk R. and Blue R. From the junction of the Green and Grand Rs. the Colorado flows S. W. through Utah and northern Ariz., until it is joined by the Little Colorado, or Flax, R., when it abruptly turns N. W., which course it pursues as far as the little town of Callville. From this point it follows a southerly course, until it empties into the northern angle of the Gulf of California in lat. 31° 50'. It receives several important tributaries from the E. and S. E., as the San Juan R., the Flax R., Bill Williams Fork and the Gila R. Small steamboats ascend the Colorado R. to Callville. From the junction of the Green and Grand Rs. to Callville, a distance of over 350 mls., the Colorado R. flows through a series of tremendous chasms, known by the Spanish name of "cañons." They are rents or ravines in the lofty plateaux, as the White Mesa and others, which occupy southern-western Utah and northern Ariz. These cañons are hemmed in by nearly perpendicular rocky walls of immense height, often exceeding 5,000 or 6,000 feet, shutting out the light from the R., which flows through these somber depths. [See the Report of Lieut. Joseph C. Ives, upon the Colorado River of the West, published at Washington, 1861.]

Colorado Springs, p. v. in El Paso co., Colo., on the Denver & Rio Grande R. R., near Colorado city and Pikes Peak. Pop. about 2,000.
Colosse, p. v. in Oswego co., N. Y., 11 mls. S. of Pulaski.
Colquitt, co. in Ga., S. part. Area, 540 sq. mls. Pop., 1,654; in 1860, 1,316. Little River, a tributary of the Withlacachee, forms the eastern boundary. Ocopilca and Ochlokonee Rs. intersect the co. The surface is low and level, and consists partly of unproductive sand and partly of fertile "hummock" land. Moultrie is the co. seat. Agr. productions in 1870: Indian-corn, 24,132 bush.; oats, 6,801 bush.; sweet pot's, 11,834 bush.; cotton, 327 bales; rice, 9,150 lbs.; butter, 6,430 lbs. Cash value of farms, $77,912. Total, estimated, value of all farm productions, including additions to stock, etc., $109,059.
Colquit, p. v. and co. seat of Miller co., Ga., on Spring Cr., a tributary of the Flint R., and 20 mls. N. W. of Bainbridge. Cotton and sugar cane are raised in the vicinity. Pop., 420. One newspaper.
Coltharp's, p. o. in Houston co., Tex.

Columbia, tn. in Lorain co., Ohio. Pop., 892.

Columbia, tn. in Meigs co., Ohio. Pop., 1,286.

Columbia, co. in Oreg., N. part. Area about 730 sq. mls. Pop., 863; in 1860, 535. It is bounded on the N. and E. by the Columbia R. The surface is hilly in the western part, low and level in the eastern and northern. The Kloskamine R. and the Seapoose R., tributaries of the Columbia, are the principal streams. Saint Helen is the co. seat. Agr. productions in 1870: Wheat, 1,619 bush.; Indian-corn, 1,169 bush.; oats, 2,260 bush.; Irish pot's, 10,337 bush.; wool, 4,382 lbs.; butter, 25,195 lbs.; hay, 1,850 tons. Cash value of farms, $194,160. Total, estimated, value of all farm productions, including additions to stock, etc., $72,244. Value of manufactures, $76,433.

Columbia, co. in Pa., central part. Area about 400 sq. mls. Pop., 28,766; in 1860, 25,065. The Alleghany Mts. trend along the N. boundary. The East Branch of the Susquehanna R. flows through the co. from E. to W. North of its valley are Knob Mts., Montours Ridge and other ranges of the great Appalachian System, and S. of it Long Mt., McCauley's Mt. and Little Mt. The Susquehanna receives Fishing Cr. from the N., and Catawissa Cr. and Roaring Cr. from the S. Shamokin Cr. rises in the southern part. The soil of the valleys is very fertile, that of the mountains unproductive. Iron and limestone are abundant. The co. is intersected by the Lackawanna & Bloomsburgh R. R., and the Catawissa R. R. Bloomsburgh is the co. seat. Agr. productions in 1870: Wheat, 240,759 bush.; rye, 50,616 bush.; oats, 406,031 bush.; Indian-corn, 589,472 bush.; Irish pot's, 182,124 bush.; sweet pot's, 29 bush.; butter, 468,398 lbs.; hay, 22,132 tons. Cash value of farms, $9,015,460. Total, estimated, value of all farm productions, including additions to stock, etc., $1,840,189. Value of manufactures, $2,706,290.

Columbia, tn. in Bradford co., Pa. Pop., 1,521.

***Columbia,** p. borough in Lancaster co., Pa.; lies on the E. bank of the Susquehanna R., at the E. terminus of the Reading & Columbia R. R., and on the Pennsylvania Central R. R., 12 mls. W. of Lancaster, the co. seat, and 46 mls. S. W. of Reading. It contains an academy, several rolling mills, blast furnaces and grist mills. Pop., 6,461. Three newspapers.

Columbia, v. in Venango co., Pa., on the Oil Creek & Alleghany River R. R., 6 mls. E. of Oil City.

***Columbia,** city and co. seat of Richland co., and state capital of S. C.; situated at the head of navigation of the Congaree R., immediately below the junction of the Saluda and Broad Rs.; is the E. terminus of the Greenville & Columbia R. R.; the north-western terminus of the South Carolina R. R., and a station on the Charlotte, Columbia & Augusta R. R., 89 mls. N. W. of Augusta, Ga., 130 mls. N. W. of Charleston, and 195 mls. W. of Wilmington, N. C.

The city is picturesquely situated and beautifully laid out. The streets are wide and mostly lined with shade trees. The gardens and plantations in and near the city are noted for their trim appearance and careful cultivation. The State Capitol, when completed, will be one of the finest edifices in the Union. South Carolina College, founded in 1804, is a famous institution, and had, before the late war, a valuable library of over 20,000 volumes. The Presbyterian Theological College and the Roman Catholic College are also worthy of notice. In 1865 (Feb. 17th) General Sherman passed through the city on his famous "march to the sea," and found it in flames, which destroyed a large part of it. Columbia has recovered from this calamity, and will soon attain to its former prosperity. Its commerce is considerable, as it is the shipping center for the agricultural products of a large portion of the state. The river affords immense water-power, which will make the city a great manufacturing place when fully utilized. Northern capitalists have of late made investments here with this view. Twelve newspapers and periodicals are published in Columbia.

***Columbia,** p. v. and co. seat of Maury co., Tenn., on Duck R. and the Nashville & Decatur R. R., 46 mls. S. S. W. of Nashville; is the seat of Jackson College, and has two female colleges and other excellent schools. The vicinity is wealthy and populous, agriculture being the principal business. Pop., 2,550. One newspaper.

Columbia, p. v. in Brazoria co., Tex., on the Brazos R. and the Houston & Brazoria R. R., 50 mls. S. of Houston. Pop., 725.

Columbia, tn. in Fluvanna co., Va. Pop., 2,331.

Columbia, p. v. in Fluvanna co., Va., at the junction of the Rivanna and James Rs., and on the James River Canal, 53 mls. W. by N. of Richmond.

Columbia, co. in Wis., central part. Area about 790 sq. mls. Pop., 28,802; in 1860, 24,441. The surface is pleasantly undulating and the soil fertile. The principal stream is the Wisconsin R. At the sharp curve on which Portage City is situated it is but 1¼ mle. distant from the Neenah R., a tributary of the Fox R., which empties into Green B. A canal has here been constructed, which thus completes a water communication from Lake Michigan to the Mississippi R. Several branches of the Milwaukee & St. Paul R. R. intersect the co. and join at Portage City, the co. seat. Agr. productions in 1870: Wheat, 1,517,332 bush.; rye, 40,844 bush.; Indian-corn, 528,541 bush.; oats, 678,907 bush.; Irish pot's, 202,068 bush.; sweet pot's, 160 bush.; butter, 706,516 lbs.; hay, 44,184 tons. Cash value of farms, $10,422,097. Total, estimated, value of all farm productions, including additions to stock, etc., $2,913,397. Value of manufactures, $713,139.

Columbia Centre, p. v. in Licking co., Ohio, on the Ohio Division of the Baltimore & Ohio R. R., 16 mls. W. by S. of Newark. Pop., 205.

***Columbia City,** city and co. seat of Whitley co., Ind., on the Eel R. and the Pittsburgh, Fort Wayne & Chicago R. R., 19 mls. W. by N. of Fort Wayne. It is surrounded by a rich agricultural district. Pop., 1,665. Three newspapers.

Columbian Grove, tn. in Lunenburgh co., Va. Pop., 1,422.

Columbiana, co. in Ohio, E. part; borders on Pa. Area nearly 500 sq. mls. Pop., 38,299; in 1860, 32,836. The surface is hilly and undulating, particularly in the S. E. part. The largest stream is the Ohio R., which forms the S. E. boundary. It receives Little R., Yellow Cr. and Sandy Cr. The soil is very productive. Coal and iron ore are abundant. The northern part of the co. is intersected by the Pittsburgh, Fort Wayne & Chicago R. R., the southern by the Cincinnati & Pittsburgh. New Lisbon is the co. seat. Agr. productions in 1870: Wheat, 270,190 bush.; rye, 25,175 bush.;

Indian-corn, 566,242 bush.; oats, 653,001 bush.; Irish pot's, 163,484 bush.; sweet pot's, 1,135 bush.; butter, 848,882 lbs.; hay, 45,301 tons. Cash value of farms, $17,419,789. Total, estimated, value of all farm productions including additions to stock, etc., $2,623,912. Value of manufactures, $2,807,947.

Columbiana, p. v. and co. seat of Shelby co., Ala., on the Selma, Rome & Dalton R. R., 37 mls. S. W. of Talladega.

***Columbiana,** p. v. in Columbiana co., Ohio, on the Pittsburgh, Fort Wayne & Chicago R. R., 60 mls. N. W. of Pittsburgh. Pop., 870.

Columbia Grove, p. o. in Lunenburgh co., Va.

Columbia River rises in the Rocky Mts., British Columbia, and empties into the Pacific Ocean. Its source is a small lake in 50° N. lat. and 116° W. long. The river at first flows N. W. along the base of the Rocky Mts. In 52° 30′ N. lat. it turns S. and pursues this course to about 46° N. lat., and thence it flows W., forming the boundary between Oreg. and Wash. Ter. It breaks through the Cascade Mts. in deep gorges, forming cascades and rapids. It is navigable from its mouth to the foot of the Cascade Mts. for about 150 mls., and again above its passage through this range to Fort Walla Walla. Its principal affluents from the right are the Okinabaw R., Wenatshapan R., the Upper Yakima R., the Wenass R., the Yakima R., the Cath-a-poote R. and the Cowlitz R. The tributaries entering on its left bank are larger than those mentioned, as the Kootanie R., Clarks Fork, which drains Lake Pend d'Oreille, the Spokane R., the Snake R., or Lewis Fork, all rising in the Rocky Mts. and receiving the drainage from their western slopes. Below the Snake R., the Columbia receives the Walla Walla R., Umatilla R. and John Days R., all rising in the Blue Mts. The Des Chutes R. rises in the Cascade Mts. and flows along their eastern base, and the Willamette R. traverses a rich valley in Oreg., between the Cascade and the Coast Mts. The first exploration of the Columbia and the country which it intersects was made by Captains Lewis and Clark, in 1804–5.

Columbia Station, p. v. in Lorain co., Ohio, on the Cleveland, Columbus, Cincinnati & Indianapolis R. R. 19 mls. S. W. of Cleveland.

Columbiaville, p. v. in Lapeer co., Mich., 11 mls. from Lapeer.

Columbus, co. in N. C., S. part; borders on S. C. Area about 530 sq. mls. Pop., 8,474; in 1860, 8,537. It is bounded on the W. by the Little Pedee R., on the E. by the Waccamaw R., and on the N. by Slade Cr. Many of the water-courses flow through broad swamps and marshes. The surface is level. Whitesville is the co. seat. Agr. productions in 1870: Wheat, 97 bush.; rye, 1,013 bush.; Indian-corn, 65,972 bush.; oats 209 bush.; Irish pot's, 1,791 bush; sweet pot's, 79,307 bush.; butter, 4,719 lbs. Cash value of farms, $161,127. Total, estimated, value of all farm productions, including additions to stock, etc., $691,123. Value of manufactures, $253,680.

Columbus, p. v. in Hempstead co., Ark., 10 mls. W. of Washington, the co. seat.

***Columbus,** city and the co. seat of Muscogee co., Ga., on the Chattahoochie R.; is the terminus of the Southwestern Georgia R. R., and is 100 mls. W. by S. of Macon, and 292 mls. from Savannah. It lies opposite Girard, Ala., whence two railroad lines branch off to Mobile and to Opelika. Thus Columbus is connected by railroad with the principal southern cities. The Chattahoochee R. is navigable from Columbus to its mouth. It is surrounded by a rich and populous agricultural district, but it owes its prosperity chiefly to the shipping of cotton, for which it is admirably located. It has also some manufacturing establishments producing cotton goods, cotton gins, woollen goods, iron and agricultural implements. Pop., 7,401; in 1860, 9,621; in 1850, 5,942. Four newspapers.

Columbus, tn. in Adams co., Ill. Pop., 975.

Columbus, p. v. in the above tn., 3 mls. from Coalsburg.

Columbus, tn. in Bartholomew co., Ind. Pop., 5,187.

***Columbus,** p. v. in the above tn. and the co. seat, on the Blue R., below the mouth of Flat Rock Cr., and at the intersection of the Jeffersonville, Madison & Indianapolis R. R. with the Madison Division, 24 mls. S. of Shelbyville and 41 mls. S. S. E. of Indianapolis. It has a woollen factory, flouring mills, tanneries, etc. Pop., 3,359. Two newspapers.

***Columbus,** p. v. and the co. seat of Cherokee co., Kans., on the Missouri R. and the Fort Scott & Gulf R. R., 50 mls. S. of Fort Scott. Pop., 402. It lies in a good farming region, and has one newspaper.

***Columbus,** p. v. in Hickman co., Ky., on the Mississippi R.; is the terminus of the Mobile & Ohio R. R., 472 mls. from Mobile, Ala., and 7 mls. N. of Clinton. It has much river trade, especially in lumber. Pop., 1,574. One newspaper.

Columbus, tn. in St. Clair co., Mich. Pop., 1,218.

Columbus, p. v. in the above tn., 11 mls. W. of St. Clair.

Columbus, tn. in Anoka co., Minn. Pop., 71.

***Columbus,** city and co. seat of Lowndes co., Miss., near the Tombigby R.; is the terminus of a branch R. R. 14 mls. long, connecting it with Artesia on the Mobile & Ohio R. R. It is surrounded by a rich farming district, and ships much cotton. The river is navigable at all seasons. Pop., 4,812. Six newspapers.

Columbus, p. v. in the above tn., 12 mls. from Warrensburg. Pop., 168.

***Columbus,** p. v. in Platte co., Nebr.; on the Union Pacific R. R., 92 mls. W. of Omaha. Pop., 526. It is the center of commerce for a fertile farming region. One newspaper.

Columbus, p. o. in Esmeralda co., Nev.

Columbus, p. v. in Burlington co., N. J., 8 mls. E. of Burlington.

Columbus, tn. in Chenango co., N. Y. Pop., 1,197.

Columbus, p. v. in the above tn., 7 mls. E. of Sherburne.

***Columbus,** p. v. and the co. seat of Polk co., N. C., near the base of the Blue Ridge and 37 mls. N. W. of Spartansburg, S. C.

***Columbus,** city, co. seat of Franklin co., and capital of the state of Ohio, on the Scioto R., 90 mls. above its mouth; is the western terminus of the Central Ohio Division of the Baltimore & Ohio R. R; the southern terminus of the Columbus Division of the Cleveland, Columbus, Cincinnati & Indianapolis R. R.; the north-western terminus of the Columbus & Hocking Valley R. R., and a station on the Pittsburgh, Cincinnati & St. Louis R. R. It is 193 mls. W. by S. of Pittsburgh, Pa.; 138 mls. S. W. of Cleveland, and 120 mls. N. E. of Cincinnati.

The city was laid out in 1812; had 700 inhabitants in 1815; became the provisional seat of government in 1817; was incorporated in 1834, and was made the permanent capital in 1837. In 1850 it had 17,882 inhabitants; in 1860, 18,554; and in 1870, 31,274, of whom 23,663 were natives of the United States, and 7,611 foreigners.

The site of the city is level, and the streets are regularly laid out. The State Capital is a doric structure surmounted by a handsome cupola, and embellished with fine colonades. It stands in a square 10 acres large, which is tastefully arranged, and planted with stately elms. The City Hall, a gothic building, faces the Capitol Square. The United States Arsenal is in the north-eastern suburb, near

the railroad, and comprises numerous buildings, armory, store-houses, offices and quarters. The State Penitentiary, on the left bank of the river, the Central Ohio Lunatic Asylum, the Idiot Asylum, the Blind Asylum and the Deaf and Dumb Asylum are other public edifices, notable alike for size and beauty of design. High street, with the fine retail stores, hotels and business establishments, Town and Broad streets, with the elegant private residences, and Broadway, 120 feet wide and lined with four rows of trees, are the principal streets of the city. The Goodale Park, at the north end, and the City Park, at the south end of the city, embrace each about 40 acres of ground and are attractive resorts.

Columbus has iron foundries and other manufacturing establishments, and an extensive commerce in grain, wool and live stock. The Ohio Canal, which connects the city with Cleveland, on Lake Erie, and Portsmouth, on the Ohio R., is its only water communication for heavy freights.

The educational establishments are excellent. In 1871 the number of children of school age was 11,395, of whom 5,683 were enrolled in the public schools, while the average attendance was 4,003. The higher institutions of learning are: Starling Medical College, the Capital University, and the High School. There are 18 newspapers and periodicals published in Columbus, of which the following are the most prominent: "Ohio State Journal," "Ohio Statesman" (both daily and weekly), "Columbus Westbote" (German), weekly; and the "Odd Fellows' Companion," monthly.

Columbus, tn. in Warren co., Pa. Pop., 1,257.

Columbus, p. v. in the above tn., on the Atlantic & Great Western R. R., 3½ mls. N. E. of Corry.

***Columbus,** p. v. and co. seat of Colorado co., Tex., on the Colorado R., 95 mls. S. E. of Austin; lies in a very fertile alluvial valley, and is rapidly improving. One newspaper.

Columbus, p. o. in Klikitat co., Wash. Ter.

Columbus, tn. in Columbia co., Wis. Pop., 2,840.

***Columbus,** p. v. in the above tn., on the Crawfish R. and the Milwaukee & St. Paul R. R., 63 mls. from Milwaukee. Pop., 1,388. It is the business center for a fertile and prosperous agricultural region. Two newspapers.

Columbus City, tn. in Louisa co., Iowa. Pop., 2,344.

***Columbus City,** p. v. in the above tn., on the Southwestern Branch of the Chicago, Rock Island & Pacific R. R., 22 mls. S. W. of Muscatine and 2 mls. W. of Columbus Junction.

***Columbus Grove,** p. v. in Putnam co., Ohio, 7 mls. by railroad S. of Ottawa. Pop., 358.

Columbus Junction, p. v. in Louisa co., Iowa, at the intersection of the Southwestern Branch of the Chicago, Rock Island & Pacific R. R. with the Burlington, Cedar Rapids & Minnesota R. R., 20 mls. S. W. of Muscatine. Pop., 850.

Colusa, tn. in Colusa co., Cal. Pop., 2,193.

***Colusa,** p. v. in the above tn. and the co. seat, on the Sacramento R., 20 mls. W. of Yuba City. Pop., 1,051. It is engaged in agriculture and stock raising, and has one newspaper.

Colusa, co. in Cal., N. central part. Pop., 6,165; in 1860, 2,274. The western boundary is formed by the Sacramento R.; the eastern extends into and comprises a section of the Coast Ranges. The hills and mountains are covered with wild oats and a variety of grasses, affording abundant pasturage. The two-thirds of the co. which form part of the level plain of the Sacramento R. consist of rich alluvial and less fertile prairie lands. Considerable quantities of wheat, barley, oats, etc., are produced. Deposits of sulphur, cinnabar and copper occur among the foot-hills of the Coast Range. Colusa is the co. seat. Agr. productions in 1870: Wheat, 701,174 bush.; Indian-corn, 2,330 bush.; oats, 480 bush.; Irish pot's, 1,708 bush.; sweet pot's, 364 bush.; wool, 1,086,599 lbs.; butter, 37,577 lbs.; hay, 11,214 tons. Cash value of farms, $4,408,064. Total, estimated, value of all farm productions, including additions to stock, etc., $2,011,830. Value of manufactures, $252,743.

Comal, co. in Tex., central part. Area about 890 sq. mls. Pop., 5,283: in 1860, 4,030. It is bounded on the S. W. by the Rio Cibolo, a tributary of the St. Antonia R., and intersected by the Guadalupe R., with its affluent, the Comal R., from which the co. has derived its name. The surface is hilly and the soil productive, particularly that of the bottoms along the streams. New Braunfels is the co. seat. Agr. productions in 1870: Wheat, 1,968 bush.; rye, 3,972 bush.; Indian-corn, 169,250 bush.; oats, 150 bush.; Irish pot's, 106 bush.; sweet pot's, 8,913 bush.; cotton, 1,303 bales; butter, 69,305 lbs.; hay, 1,309 tons. Cash value of farms, $632,950. Total, estimated, value of all farm productions, including additions to stock, etc., $260,350. Value of manufactures, $180,026.

Comal Town, v. in Comal co., Tex., near New Braunfels.

Comanche, co. in Tex., N. part. Area, 1,080 sq. mls. Pop., 1,001; in 1860, 709. It lies between the Leon River Mts. and the Comanche Mts., and is intersected by the Leon R. from N. W. to S. E., which receives Colony Cr., Buckeye Cr., Rush Cr. and Mercer Cr. The surface is hilly and consists mostly of prairies. Wood is not abundant. Comanche is the co. seat. Agr. productions in 1870: Wheat, 3,368 bush.; Indian-corn, 39,292 bush.; oats, 1,432 bush.; Irish pot's, 84 bush.; sweet pot's, 1,722 bush. Cash value of farms, $40,595. Total, estimated, value of all farm productions, including additions to stock, etc., $28,326.

***Concord,** city, co. seat of Merrimack co., and state capital of N. H., on the right bank of the Merrimack R.; is the eastern terminus of the Concord, Claremont & Contocook R. R.; the western terminus of the Portsmouth R. R., and the southern terminus of the Boston, Concord, Montreal & White Mountains R. R. It is 18 mls. from Manchester and 73 mls. from Boston, Mass.

The city stands upon a level ground gradually rising from the river bank, and consists chiefly of two principal streets, extending two mls. long and parallel to the river. The State Capitol occupies an entire square of ground, and is built of the celebrated Concord granite. The other public buildings of interest are: the City Hall and Court House, on Main street; the State Prison, on State street, and the Asylum for the Insane, in the western part of the city. The population was, in 1850, 8,576; in 1860, 10,893; in 1870, 12,241, of whom 10,577 were natives of the United States, and 1,664 foreigners. The population is almost wholly white, there being but 36 colored persons.

It has numerous manufactories, producing agricultural implements, leather belting, carriages and wagons, men's clothing, cotton goods ($1,516,209), furniture, hosiery, leather, lumber, machinery, paper, sadlery and harness, silverware, woodenware and woollen goods.

Concord, like most New England cities, has excellent schools. In 1871 2,344 children were enrolled in the public schools, which numbered 49, and had 75 teachers. Six newspapers were published in 1873.

Conecuh, co. in Ala., S. part. Area, 1,425 sq. mls. Pop., 9,574; in 1860, 11,311. The surface is undulating and considerably diversified by ridges of drift. The soil is sandy and not very productive except that of the bottom-lands, which is sufficiently fertile for the cultivation of cotton and Indian-corn. Evergreen is the co. seat. Agr. productions in 1870: Wheat 15 bush.; rye, 5 bush.; Indian-corn, 92,177 bush.; oats, 815 bush.; Irish pot's, 73 bush.; sweet pot's, 12,550 bush.; cotton, 1,539 bales; butter, 800 lbs. Cash value of farms, $240,795. Total, estimated, value of all farm productions, including additions to stock, etc., $275,675. Value of manufactures, $46,677.

Conedogwinit Creek, tributary of the Susquehanna; traverses the Cumberland Valley of Franklin and Cumberland cos., Pa., in a N. E. direction.

Conejos, co. in Colo., S. W. part. Pop., 2,504. The Rio Grande forms the eastern and part of the northern boundary. The surface is mountainous. The Sierra de la Plata and the Sierra de San Juan, which bear peaks with perpetual snow upon their summits, occupy the northern and the central parts of this co. The eastern part extends into the San Luis Park. The western part is drained by the Rio Mancos, Rio de la Plata, Rio Animos and Rio Prinos, all tributaries of the Rio de Chaco, or de San Juan, an affluent of the Colorado R. Conejos is the co. seat. Agr. productions in 1870: Wheat, 9,222 bush.; Indian-corn, 459 bush.; oats, 852 bush.; Irish pot's, 2,001 bush.; wool, 71,076 lbs.; butter, 800 lbs. Cash value of farms, $125,032. Total, estimated, value of all farm productions, including additions to stock, etc., $96,471. Value of manufactures, $8,960.

CONNECTICUT, one of the 13 original states of the Union, and the most south-western of the New England states, is bounded on the N. by Mass., on the E. by R. I., on the W. by N. Y., and on the S. by Long Island Sound. It extends from 41° to 42° 2¾′ N. lat., and from 71° 55′ to 73° 50′ W. long. The area is estimated at 4,730 sq. mls., or 3,027,200 acres.

Surface.—Conn. has no lofty mountains, but is pleasantly diversified by hills and valleys. It includes the southern extremities of the two great New England systems of elevations which are known in Vt. as the Green Mts. and in N. H. as the White Mts. The wide valley traversed by the Connecticut R. and the lower course of the Quinnipiak R. separates these two systems. The traveler coming from the banks of the Hudson R., in the W., first rises in Litchfield co. to the broad and undulating table-land which occupies the western part of the state, then gradually descends into the valley of the Connecticut R., and at last crosses the greatly diversified hilly region of Eastern Connecticut. Thus the state may be divided into three distinct sections. The western plateau, with its numerous ranges and ridges, is the culminating ground. It has a mean elevation of from 600 to 700 feet, while some of its superimposed hills exceed 1,200 feet; and is on the whole better adapted to grazing and dairying than to the

growth of cereals. It is intersected by the valleys of the Housatonic R. and its tributaries, and gradually descends in a southerly direction until it terminates with low hills near the shores of the sound. The Central or Connecticut River Valley is the best farming region of the state, and has an average width of over 20 mls. It is traversed by trap dykes, trending N. and S. Such are the Talcot Mts., W. of Hartford (890 feet high); the range which terminates with the Hanging Hills (995 feet), W. of Meriden; Mt. Carmel (800 feet), near Hamden; East Rock and West Rock, near New Haven. The Central Valley belongs to the red sandstone formation. The eastern portion of the state consists of numerous ranges of hills with gentle declivities, and contains in the valleys which intersect it much excellent farm land. One of these ranges trends in a south-westerly direction, terminating near New Haven, and is intersected below Middletown by the Connecticut R.

Rivers and Lakes.—The largest stream of the state is the Connecticut R. It flows due S. as far as Middletown through the Central Valley, and then turns S. E., emptying into Long Island Sound near Saybrook. During a former geological period it unquestionably followed the Central Valley into the B. of New Haven; but now it breaks through a range of hills, leaving the drainage of the lower part of its proper valley to the Quinnipiak and other small rivers. The largest tributary of the Connecticut is the Farmington R., which, coming from Mass., flows S. S. E. to the village of Farmington. Here it turns sharply northward, flowing along the valley W. of the Talcot Mt. At Tariffville it again changes its course, breaks through the trap mountains and empties into the Connecticut R. near Windsor. The Park R., Little R. and others also join this large stream from the W. Its eastern affluents are Scantic R., Podank R., Hockanum R., Roaring Brook and Salmon R. Steamboats ascend the Connecticut to Hartford. The eastern part of the state is drained by the Thames R., which empties into the sound near New London. It is formed by the confluence, near Norwich, of the Yantic and Quinebaug Rs. The former is but a small stream, while the latter rises in Mass. and traverses the entire width of the state. The largest of its numerous affluents is the Shetucket R., which is formed by the junction of the Willimantic and Natchaug Rs. Corresponding with the Thames in the E. is the Housatonic in the W., which rises among the highlands of Berkshire co., Mass., and flows S. S. W. through Litchfield co. to South Kent, where it changes its course to the S. E. to Derby. A few miles below this town it receives its largest tributary, the Naugatuck R., and then flows due S. to the sound. Its other tributaries are the Shepaug R., the Pomeraug R., and the Quasipaug R., which rise on the table-land of Litchfield co., and have southerly courses. Besides the three large rivers here mentioned, there are numerous smaller ones which empty into the sound. The Noraton, Norwalk and Saugatuck drain the S. W. part of the state. Into New Haven B. empty the West R., Mill R. and Quinnipiak R. The Mystic R. empties E. of the Thames and opposite Fisher's Island, and the Pawcatuck R. partly separates Conn. from R. I. Many of the principal streams of the state have in common the deviation of their lower courses toward the S. E., although the ranges of mountains and hills trend in a S. S. W. direction. Hence, each of these rivers, after flowing through a part of one valley, breaks through a range of hills and passes into another. The Connecticut, Farmington, Shetucket, Housatonic, Quinnipiak, and some others, have this feature.

Connecticut has no large lakes, but numerous small and often picturesque sheets of water are distributed over its surface. The following merit especial mention: Saltonstall Lake, near New Haven B.; Pokatapaug Lake, in Middlesex co.; Snipsick Pond and Narhapaug Lake in Tolland co., and Long Lake and Crooked Lake, in Litchfield co.

Bays and Harbors.—The most important of these is the B. of New Haven, situated at the southern terminus of the Central Valley. New London is at the mouth of the Thames; Stratford Harbor at the mouth of the Housatonic, and Saybrook Harbor at the mouth of the Connecticut. Besides these, at the mouths of the principal rivers there are convenient harbors at Greenwich, Stamford, Norwalk, Saugatuck, South Port, Bridgeport, Milford, Branford, Sachem's Head, Double Beach, Guilford, Niantic, Mystic and Stonington.

Minerals.—Foremost among the mineral treasures of Connecticut are building stones. Brown sandstone abounds in various localities. It is extensively quarried at Portland, on the Connecticut R., N. of Middletown. The Bolton stone, a micacious slate, which splits into thin plates, used for flagging, is quarried near Bolton, E. of Hartford. White marble is also quite abundant. Granite, gneiss and mica slate are largely shipped from the sea-coast to New York and other parts of the country. Near Bristol there are valuable copper mines, and near Middletown lead mines have been at various times in operation, though without adequate profit. A cobalt mine is in Chatham. Traces of gold and silver have been found, but not in paying quantities. In the E. part of Cheshire large quantities of barytes, or heavy spar, are obtained, which are used in the manufacture of paints. Hydraulic lime occurs near the trap dykes of Berlin and Southington. Bismuth is found near Monroe, and near Chatham are productive mines of cobalt and nickle. Feldspar, sufficiently pure for the manufacture of porcelain, is found near Middletown, and near Stafford is the most famous chalybeate spring of New England.

Climate.—The climate of Conn. is, like that of the other New England states, marked by great extremes and sudden changes. The winters are cold; the summers hot. The thermometer rises as high as 98 degrees and sinks as low as 15 or 20 degrees below zero, showing a difference between the summer maximum and winter maximum of over 118 degrees. The N. W. part of the state, including the Litchfield table-land, has the coolest climate; the districts bordering on the sea the warmest. In New London the mean monthly temperature was found to be, in 1856: Jan., 21.76°; Feb., 25.02°; March, 30.87°; Apr., 48.78°; May, 54.97°; June, 68.85°; July, 73.70°; Aug., 68.61°; Sept., 65.08°; Oct., 51.49°; Nov., 41.92°; Dec., 28.27°. The mean annual temperature was in the same place 47.41°; in Pomfret, 42.58°, and in Saybrook, 47.88°. Westerly winds prevail throughout the state largely in excess over all others. Thus at New London, of 1,098 observations there were: 779 of N. W., W. and S. W. winds; 24 E. winds; 77 N. winds; 77 S. winds, and 147 about equally divided between N. E. and S. E. winds. The amount of precipitation (rain and melted snow) was found to be at New London 41.67 inches, and at Pomfret, 47.69 inches.

The Population was formerly almost exclusively of English or Anglo-Saxon blood, but for some years past the foreign immigration, mostly Irish, has rapidly increased. The aggregate population was, in 1800, 251,002; 1810, 261,942; 1820, 275,148; 1830, 297,675; 1840, 309,978; 1850, 370,792; 1860, 460,147; 1870, 537,454. Of the last number there were 527,549 whites; 9,668 colored persons, and 235 Indians. Nearly four-fifths of the population were natives of the United States (423,815), and one-fifth born in foreign countries (113,639), including 820 Frenchmen 12,443 Germans, 12,992 Englishmen, 70,630 Irish men and 3,238 Scotchmen.

The number of persons engaged in some useful occupation was 193,421; of whom 43,653 were engaged in farming; 38,704 in professional and personal services; 24,720 in trade and transportation, and 86,344 in manufactures and mechanical and mining industries.

Agriculture.—The higher portions of Conn. are well adapted to stock raising, and cattle, butter and cheese form important articles of export. The rich valleys produce the cereals, fruits and vegetables of the Temperate zone in great abundance. The cultivation of tobacco has greatly increased of late, particularly in the valley of the Connecticut R. The last census gives the following statistics: Land in farms, 2,364,416 acres, or 78 per cent. of the area of the state. Of this amount 1,646,752 acres were improved and 577,333 acres woodland. The cash value of farms was $124,241,382, or $75 per acre of improved land. The estimated value of farm products, including betterments and additions to stock, was $26,482,150; of forest products, $1,224,107; of slaughtered animals, $4,881,858; of live stock, $17,545,038. The productions were: Wheat, 38,144 bush.; rye, 289,057 bush.; Indian-corn, 1,570,364 bush.; oats, 1,114,594 bush.; buckwheat, 148,155 bush.; Irish pot's, 2,789,894 bush.; tobacco, 8,328,798 lbs.; wool, 254,129 lbs.; cheese, 2,031,194 lbs.; butter, 6,716,007 lbs.; wine, 27,414 gallons; hay, 563,238 tons. The live stock included 34,935 horses; 190 mules and asses; 98,889 milch cows; 39,739 working oxen; 79,485 head of other cattle; 83,485 sheep, and 51,983 swine.

Manufactures.—Conn. is one of the first manufacturing states of the Union, and the great majority of the inhabitants are directly or indirectly interested in some one branch of this pursuit. In 1870 the total value of products was $161,065,474, or nearly $300 per inhabitant, and seven times as much as the value of farm productions. The capital invested was $86,419,579; the number of establishments, 5,128; employing 25,979 horse-power in steam-engines; 54,395 horse-power in water-wheels, and 89,523 operatives, who received $38,987,187 wages. The most important articles produced were: Agricultural implements, $1,183,947; boots and shoes, $2,319,595; brass ware, $1,331,013; carpets, $2,027,136; carriages and wagons, $4,164,480; clocks, $2,245,043; clothing, $4,120,190; cotton goods, $14,026,334; cutlery, $2,099,895; drugs and chemicals, $1,289,845; fire-arms, $2,222,873; flour and meal, $3,966,328; hardware, $12,111,034; hats and caps, $3,740,871; hosiery, $1,251,742; India-rubber goods, $1,239,329; iron manufactures, $7,552,825; leather, morocco, etc., $1,317,030; lumber, $2,123,118; machinery, $5,010,379; paper, $4,874,291; plated-ware, $4,066,806; saddlery and harness, $1,055,350; sewing machines, $3,619,000; silk goods, $3,138,620; tin, copper and sheet-iron ware, $1,625,774; cigars, $1,133,665; woollen goods, $17,365,148.

Commerce and Railroads.— The direct commerce with foreign countries was formerly far more important than it is at present, and is being absorbed more and more by New York. During the year ending June 30, 1871, the imports had a value of $1,128,909, and the exports of domestic goods of $661,091. The number of vessels entering the ports of the state was 187, of 35,391 tons burden, and the number of vessels which cleared from those ports was 474, with 538,652 tons. The number of registered vessels belonging to the state was 42, with 11,523 tons; of enrolled vessels, 483, with 64,296 tons, and of licensed vessels, 189, with 2,536 tons.

Conn. is well provided with railroads, which have a total length of 820 mls. against 630 mls. in 1862; 496 mls. in 1852, and 176 mls. in 1842. The principal roads are the New York & New Haven R. R.; the New Haven, Hartford & Springfield R. R.; the Shore Line R. R., connecting New Haven with Providence, R. I.; the Connecticut Valley R. R.; the Danbury & Norwalk R. R.; the Housatonic R. R.; the Naugatuck R. R.; the New London Northern R. R.; the New Haven & Northampton R. R.; the Norwich & Worcester R. R., and the Derby R. R.

Wealth. Taxation and Debt.— The assessed value of real estate, according to the last census, was $204,110,509, and of personal property, $321,322,728; while the estimated value of both real and personal estate was $774,631,524, or $1,442 per head of population. It thus appears that Conn. is one of the wealthiest states of the Union. The total taxation, not national, reached the high figure of $6,064,843, of which $1,875,024 were state taxation, $20,113 co. taxation, and $4,169,706 town and city taxation. The general balance of the treasurer shows the receipts from all sources and cash on hand to to have been, for the year ending April 1, 1872, $3,216,325.04, and the payments $2,370,530.90, leaving a balance of cash of $845,794.14. The payments included $1,978,596.74 for civil list; $203,218 for principal of the school fund; interest on this fund $131,915.10, and various smaller sums. The amount of state debt on April 1, 1872, was $4,923,505.85 against $5,804,610.93 the preceding year; of co., tn. and city debt, $9,813,01[illegible] (which is supposed to have increased by $2,000,000 since that time), making the indebtedness of the people $14,736,515.80 or $27.44 per head of population.

Education, etc.—The schools of Conn. enjoy a well-deserved reputation. In 1872 there were 1,630 public schools, with 2,420 teachers, at a cost, all told, of $1,496,989.95. The number of children between the ages of four and sixteen was 131,748; of whom 113,588 attended the public schools, and 8,754 the private schools, leaving a balance of 11,947 registered as attending no school at all.

There are three colleges in the state: Yale College, at New Haven; Trinity College, at Hartford (Episcopal), and the Wesleyan University, at Middletown (Methodist). With Yale College there are connected a Theological Seminary, a Law School, a Medical School, and the Sheffield Scientific School. By an act of the legislature the latter has been constituted the college for the promotion of agriculture and mechanic arts, and has received the land appropriation bestowed by congress for this purpose.

The other professional schools are: The Theological Institute of Connecticut (Congregational), at Hartford; the Berkeley Divinity School (Episcopal), at Middletown; the Episcopal Academy, at Cheshire, and the Connecticut Literary Institute at Suffield. There are 25 incorporated academies in successful operation. Seven cities and many villages support high schools.

The charitable institutions were: 1. American Asylum for the Deaf and Dumb, at Hartford, the oldest in the Union, opened in 1817; 2. Retreat for the Insane, at Hartford; 3. General Hospital for the Insane, at Middletown; 4. State Reform School, at West Meriden; 5. School for Imbeciles, at Lakeville; 6. Industrial School for Girls, at Middletown; 7 and 8. Hospitals at Hartford and New Haven; 9 and 10. Soldiers' Orphans Homes, at Mansfield and Darien.

The State Prison is located at Wethersfield, and in each of the counties there is one jail.

Government.—The Governor, Lieutenant-Governor, Secretary of State and Controller are chosen annually and hold office from the first Wednesday in May. The Senate consists of 21 members, chosen by districts; the House of Representatives of 237 members. The senators and representatives are chosen annually. The Commissioner of the School Fund is appointed by the legislature. Every male citizen of the United States, who shall have attained the age of 21 years, who shall have resided one year in the state, and six months in the town where he offers to vote, and who is able to read any article of the Constitution, is entitled to the privileges of an elector, upon taking the oath prescribed by law.

The Supreme Court of Errors consists of one

Chief Judge and three Associate Judges, who also are judges of the Superior Court. This court has final and conclusive jurisdiction of all matters brought by way of error from the judgment or decrees of any Superior Court.

The Superior Court consists of six judges, exclusive of those who are judges of the Supreme Court. It has jurisdiction of all causes which may be brought before it. The judges of both courts are appointed by concurrent vote of the Senate and House of Representatives, and hold office for eight years, but are disqualified when 70 years of age.

The state is divided into the following eight counties: Fairfield, Hartford, Litchfield, Middlesex, New Haven, New London, Tolland and Windham. There were, up to 1873, two capitals, Hartford and New Haven, the legislature meeting alternately in each, but now Hartford is the only capital.

Connecticut Lake, p. v. in Coos co., N. H., 35 mls. from New Stratford Station.

Connecticut River, the largest stream of New England, rises in the Heights of Land which separate the United States from Canada; flows S. between Vt. and N. H.; intersects Mass. and Conn. and empties into Long Island Sound near Saybrook. The river is over 400 mls. long, and its width in Conn. and Mass. varies from 500 to 1,050 feet. The principal tributaries from the W. are the Passumpsic R., the White R., the Deerfield and Westfield Rs. in Mass., and the Farmington R. in Conn. The tributaries from the E. are the Ammonoosuc R. in N. H., Miller's R. and the Chicopee R. in Mass., and several small creeks in Conn. The valley of the Connecticut is exceedingly fertile, and in its lower or Connecticut portion large quantities of tobacco are raised. At Middletown, Conn., the river turns to the S. E. and breaks through a range of hills. In Mass. it passes by Mt. Holyoke and Mt. Tom. The scenery of the valley, which in the mean is from 35 to 40 mls. wide, is famous for its beauty. The Green Mts. and their extensions bound it on the W.; the White Mts., and numerous lesser elevations, in Mass. and Conn. on the E. The river is navigable as far as Hartford. A line of steamers plies during the summer season between this city and New York. The name is derived from the Indian appellation of the stream, Quonektacut, which is said to mean Long R.

Contra Costa, co. in Cal. A ea about 780 sq. mls. Pop., 8,461; in 1860, 5,328. It is bounded on the W. by the B. of San Francisco, on the N. by the San Pablo and Suisun Bs., and on the E. by the San Joaquin R. The Monte Diablo Range and other chains occupy a considerable area and trend from the N. W. to the S. E., being separated by fertile valleys. The finest of these is the San Ramon or Pacheco Valley; farther W. lies the Hambre Valley. The Contra Costa hills extend along the coast of the B. of San Francisco. Agriculture is the chief pursuit of the inhabitants, and large crops of cereals, fruits and vegetables are produced. There are many fine vineyards in the co. Martinez is the co. seat. Agr. productions in 1870: Wheat, 925,054 bush.; rye, 40 bush.; Indian-corn, 280 bush.; oats, 67,025 bush.; Irish pot's, 1,020 bush.; wool, 58,800 lbs.; butter, 153,936 lbs.; hay, 18,658 tons. Cash value of farms, $4,936,655. Total, estimated, value of all farm productions, including additions to stock, etc., $1,421,895. Value of manufactures, $107,835.

Coos, co. in N. H., forms the northern extremity of the state. Area about 1,975 sq. mls. Pop., 14,932; in 1860, 13,161. It is bounded on the N. by the culminating heights which form the water-shed between the Atlantic Ocean and the St. Lawrence R. The Connecticut R., and one of its head streams, the Hall, form the W. boundary. The Moose Branch, the Ammonoosuc R. and Johns R. are tributaries of the Connecticut, which drain the western part of the co. The Androscoggin R. drains the eastern part. Umbagog Lake is intersected by the E. boundary. The S. part of the co. includes the highest portion of the White Mts., with Mt. Washington, Mt. Adams and other lofty peaks, and also with the sources of the Saco R. The climate is cool, the soil unproductive, except in some parts of the river valleys. The Grand Trunk R. R. passes through the co. from S. E. to N. W. Lancaster is the co. seat. Agr. productions in 1870: Wheat, 15,708 bush.; rye, 2,284 bush.; oats, 185,674 bush.; Indian-corn, 19,227 bush.; Irish pot's, 811,569 bush.; butter, 419,462 lbs.; hay, 40,795 tons. Cash value of farms, $3,647,955. Total, estimated, value of all farm productions, including additions to stock, etc., $1,395,063. Value of manufactures, $1,368,767.

Coos, p. v. in Coos co., N. H., on the Connecticut R., and the Grand Trunk R. R., 12 mls. N. N. W. of Groveton.

Coos, co. in Oreg., S. W. part, bordering on the Pacific Ocean. Area about 1,440 sq. mls. Pop., 1,644; in 1860, 445. The eastern boundary is formed by the Umpqua Mt., one of the Coast Ranges of the Pacific. The co. has a general slope from E. to W. and is drained by the Coos R., and the Coquille R., which rise in the Umpqua Mts. and empty into the Pacific. A large part of the co. is covered with magnificent forests. Coal and lumber are largely exported. Empire City is the co. seat. Agr. productions in 1870: Wheat, 2,802 bush.; Indian-corn, 1,859 bush.; oats, 3,386 bush.; Irish pot's, 19,165 bush.; butter, 22,130 lbs.; hay, 644 tons. Cash value of farms, $203,350. Total, estimated, value of all farm productions, including additions to stock, etc., $163,102. Value of manufactures, $197,041.

Coosa, co. in Ala., central part. Area, 860 sq. mls. Pop., 11,945; in 1860, 19,273. It is bounded on the E. by the Coosa R., from which it derives its name, and drained by the Hatchee Cr. and other affluents of the Coosa. The surface is very uneven, though not mountainous. The valleys of the rivers and creeks are deeply cut into the high ground, and in some localities expand into level flats of fertile alluvium. Near the village of Bradford is found a very fine gray granite, which is extensively quarried, and excellent statuary marble occurs in the northern part of the co. Grazing and grain growing are the principal pursuits of the inhabitants. Rockford is the co. seat. Agr. productions in 1870: Wheat, 36,066 bush.; rye, 248 bush.; Indian-corn, 268,683 bush.; oats, 20,513 bush.; Irish pot's, 1,687 bush.; sweet pot's, 30,508 bush.; cotton, 3,893; butter, 91,961 lbs.; hay, 2 tons. Cash value of farms, $610,853. Total, estimated, value of all farm productions, including additions to stock, etc., $1,040,736. Value of manufactures, $108,950.

Covington, co. in Ala., S. part. Area, 1,240 sq. mls. Pop., 4,868; in 1860, 6,469. The surface is undulating, and consists chiefly of sandy soil with ridges of drift. The soil is not productive. Extensive tracts are covered with the long-leaved southern pine. The Conecuh R. flows through the N. E. part; the Yellow Water R. through the center; both in a southeasterly direction. Lumbering is the chief source of wealth. Andalusia is the co. seat. Agr. productions in 1870: Indian-corn, 63,389 bush.; oats, 465 bush.; Irish pot's, 210 bush.; sweet pot's, 16,264 bush.; cotton, 689 bales. Cash value of farms, $123,443. Total, estimated, value of all farm productions, including additions to stock, etc., $315,418.

Covington, co. in Miss., S. part. Area, 680 sq. mls. Pop., 4,753; in 1860, 4,408. The surface is level, and the sandy soil which forms the greater part of it is but moderately productive. The co is drained by the Bouee R. and Sun Cr., which empty into Leaf R. Williamsburgh is the co. seat. Agr. productions in 1870: Indian-corn, 109,813 bush.; oats, 9,683 Irish pot's, 18,040 bush.; sweet pot's, 28,042 bush.; cotton, 1,605 bales; butter, 13,702 lbs. Cash value of farms, $145,670. Total, estimated, value of all farm productions, including additions to stock, etc., $347,152. Value of manufactures, $24,276.

Covington, p. v. and the co. seat of Newton co., Ga., on the Georgia R. R., 54 mls. W. of Union Point, and 130 mls. W. of Augusta. It has an academy. Pop., 1,121. One newspaper.

***Covington,** p. v. and the co. seat of Fountain co., Ind., on the Wabash R., where it is crossed by the Indianapolis, Bloomington & Western R. R., 72 mls. W. of Indianapolis. It also lies on the Wabash & Erie Canal, by which large quantities of grain are shipped here. Coal and iron are very abundant in the neighborhood. Pop., 1,888. Two newspapers.

***Covington,** city and the co. seat of Kenton co., Ky.; lies on the Ohio R., below the junction of the Licking R. and opposite Cincinnati, Ohio. It is the northern terminus of the Kentucky Central R. R. and the Louisville, Cincinnati & Lexington R. R. The former extends to Nicholasville (112 mls.), the latter to Louisville (107 mls.). It is a flourishing place, and has an extensive commerce. The manufactories produce cotton goods, tobacco, silk goods, etc. Large quantities of pork and beef are packed here, and several extensive rolling mills are in operation. The Western Theological College is a richly endowed institution, under the direction of the Baptists. Covington is connected with Cincinnati by a magnificent suspension bridge. Pop., 24,505. One newspaper.

Craven, co. in N. C., E. part. Area about 950

sq. mls. Pop., 20,516; in 1860, 16,268. It borders on Pamlico Sound and includes the broad estuary and lower course of the Neuse R., which receives Swift Cr. and Trent R. The surface is low and level and includes extensive swamps. The higher tracts are covered with pitch-pine forests. New Berne is the co. seat. Agr. productions in 1870: Wheat, 3,310 bush.; rye, 1,017 bush.; Indian-corn, 241,034 bush.; oats, 5,966 bush.; Irish pot's, 5,254 bush.; sweet pot's, 112,217 bush.; cotton, 3,809 bales; butter, 7,251 lbs; hay, 620 tons. Cash value of farms, $844,404. Total, estimated, value of all farm productions, including additions to stock, etc., $821,567. Value of manufactures, $501,872.

Crawford, p. v. in Russell co., Ala., 12 mls. from Girard.

Crawford, co. in Ark., W. part, bordering on the Ind. Ter. Area, 585 sq. mls. Pop., 8,957; in 1860, 7,850. It is bounded on the S. by the Ark. R., which here has broad and fertile bottom-lands. The greater part of the co. is hilly and broken. The Boston Mts., the height of which is estimated at 2,000 feet above the sea level, traverse the northern part. The principal rivers are the Frog Bayou & Lees Cr. Van Buren is the co. seat. Agr. productions in 1870: Wheat, 9,746 bush.; Indian-corn, 237,702 bush.; oats, 16,090 bush.; Irish pot's, 13,448 bush.; sweet pot's, 12,634 bush.; tobacco, 3,302 lbs.; cotton, 2,366 bales. Cash value of farms, $748,524. Total, estimated, value of all farm productions, including additions to stock, etc., $921,921. Value of manufactures, $63,518.

Crawford, tn. in Yell co., Ark. Pop., 211.

Crawford, co. in Ga., W. central part. Area, 435 sq. mls. Pop., 7,557; in 1860, 7,693. It extends from the Flint R., in the S. W., to the Ochaconnee Cr., in the N. E. The surface is level and the soil generally productive. Knoxville is the co. seat. Agr. productions in 1870: Wheat, 5,406 bush.; Indian-corn, 116,326 bush.; oats, 3,558 bush.; sweet pot's, 15,896 bush.; cotton, 4,720 bales; butter, 24,627 lbs. Cash value of farms, $546,555. Total, estimated, value of all farm productions, including additions to stock, etc., $679,373. Value of manufactures, $66,450.

Crawford, p. v. in Oglethorpe co., Ga., on the Athens Branch of the Ga. R. R., 23 mls. N. of Union Point.

Crawford, co. in Ill., E. part, bordering on Ind. Area, 530 sq. mls. Pop., 13,889: in 1860, 11,551. The surface is undulating and for the most part consists of fertile prairies. There is but little forest land in the co. It borders in the E. on the Wabash R., which receives within it several small creeks. The Embarras R. flows through the south-western part and the North Fork of the Embarras through the western. Robinson is the co. seat. Agr. productions in 1870: Wheat, 212,984 bush.; rye, 15,497 bush.; Indian-corn, 581,964 bush.; oats, 136,255 bush.; Irish pot's, 26,841 bush.; sweet pot's, 1,617 bush.; butter, 164,193 lbs.; hay, 11,697 tons. Cash value of farms, $3,420,349. Total, estimated, value of all farm productions, including additions to stock, etc., $1,157,358. Value of manufactures, $263,385.

Crawford, co. in Ind., S. part. Area, 280 sq. mls. Pop., 9,852; in 1860, 8,226. It is bounded on the S. by the Ohio R. and on the E. by the Great Blue R. The Little Blue R. flows through the center from N. to S. and then forms a part of its S. W. boundary. The surface is rolling and broken. The bottom-lands along the water-courses, and particularly the Ohio, are the most fertile parts of the co. The higher ground is not very productive. Leavenworth is the co. seat. Agr. productions in 1870: Wheat, 64,437 bush.; rye, 695 bush.; Indian-corn, 234,458 bush.; oats, 63,699 bush.; Irish pot's, 29,631 bush.; sweet pot's, 2,162 bush.; butter, 82,419 lbs.; hay, 3,744 tons. Cash value of farms, $1,501,154. Total, estimated, value of all farm productions, including additions to stock, etc., $472,597. Value of manufactures, $158,594.

Crawford, co. in Iowa, W. part. Area, 720 sq. mls. Pop., 2,530; in 1860, 383. The co. has a rolling surface and consists mostly of open prairies. The largest stream is Boyer R., which intersects it from N. E. to S. W., and receives within its limits numerous affluents. The Iowa Division of the Chicago & Northwestern R. R. passes through the co. Denison is the co. seat. Agr. productions in 1870: Wheat, 78,538 bush.; rye, 24 bush.; Indian-corn, 131,635 bush.; oats, 35,431 bush.; Irish pot's, 13,236 bush.; sweet pot's, 24 bush.; wool, 9,918 lbs.; butter, 50,139 lbs.; hay, 6,468 tons. Cash value of farms, $986,740. Total, estimated, value of all farm productions, including additions to stock, etc., $236,555. Value of manufactures, $58,883.

Crawford, tn. in Madison co., Iowa. Pop., 739.

Crawford, tn. in Pottawattamie co., Iowa.

Crawford, tn. in Washington co., Iowa. Pop., 1,317.

Crawford, co. in Kans., S. E. part; borders on the State of Mo. Area about 570 sq. mls. Pop., 8,160. It has an undulating surface and consists chiefly of fertile prairies, with belts of timber skirting the water-courses. The eastern portion is drained by Wills Cr.; the western by several smaller creeks, emptying into the Neosho R., which flows near the western border through Neosho co. The Missouri River, Fort Scott & Gulf R. R. passes through the co. from N. to S. Girard is the co. seat. Agr. productions in 1870: Wheat, 34,382 bush.; rye, 213 bush.; Indian-corn, 285,500 bush.; oats, 55,785 bush.; Irish pot's, 33,368 sweet pot's, 689 bush.; butter, 130,319 lbs.; hay, 14,745 tons. Cash value of farms, $2,676,500. Total, estimated, value of all farm productions, including additions to stock, etc., $709,767. Value of manufactures, $93,217.

Crawford, tn. in Cherokee co., Kans. Pop., 593.

Crawford, tn. in Crawford co., Kans. Pop., 1,535.

Cumberland, co. in Ky., S. part; borders on Tenn. Area about 350 sq. mls. Pop., 7,690; in 1860, 7,340. The surface is hilly, and the valleys are inclosed by hills of considerable height. The Cumberland R. flows through the co. from N. E. to S. W. with a very tortuous course. It is navigable for small boats. Burkesville is the co. seat. Agr. productions in 1870: Wheat, 20,523 bush.; rye, 969 bush.; Indian-corn, 243,840 bush.; oats, 43,300 bush.; Irish pot's, 6,321 bush.; sweet pot's, 5,440 bush.; tobacco, 1,304,366 lbs.; butter, 64,948 lbs.; hay, 699 tons. Cash value of farms, $933,691. Total, estimated, value of all farm productions, including additions to stock, etc., $447,332. Value of manufactures, $55,760.
Cumberland, co. in Me., S. W. part. Area about 995 sq. mls. Pop., 82,021; in 1860, 75,591. The surface is rolling and the soil moderately fertile. The co. borders on the Atlantic Ocean, and its rock-bound coast is deeply indented by Casco B. Near the center is Sebago L., and in the northern part are several long and narrow ponds. The Saco R. forms part of the S. W. boundary. The Sappo R. enters the Sebago Lake from the N. Several lines of railroad traverse the co. from S. W. to N. E. and center in Portland, the co. seat. The Grand Trunk R. R. connects Portland with the principal cities of Canada. Agr. productions in 1870: Wheat, 11,719 bush.; rye, 3,767 bush.; Indian-corn, 154,360 bush.; oats, 77,406 bush.; Irish pot's, 510,007 bush.; sweet pot's, 42 bush.; butter, 1,060,811 lbs.; hay, 88,461 tons. Cash value of farms, $13,029,330. Total, esti-

mated, value of all farm productions, including additions to stock, etc., $3,016,347. Value of manufactures, $16,557,581.

Cumberland, p. v. in Cumberland co., Me., on the Portland & Kennebec R. R., 12 mls. N. E. of Portland.

Cumberland, tn. in Cumberland co., Me. Pop., 1,627.

***Cumberland,** city and the co. seat of Alleghany co., Md., on the Potomac R. and the Baltimore & Ohio R. R., 179 mls. from Baltimore. It lies in the beautiful and fertile valley W. of the Blue Mts. and has considerable trade. The coal mines in the neighborhood are very rich. Pop., 8,056. Four newspapers.

Cumberland, p. o. in Choctaw co., Miss.

Cumberland, co. in N. J., S. part. Area, 516 sq. mls. Pop., 34,665; in 1860, 22,605. It is bounded on the S. by Delaware B., and on the E. by Tuckahoe Cr. The largest streams are Maurice R., which receives the Manumuskin R. and Menantico Cr.; Dividing Cr. and Cohansey Cr. The surface is low and level; the soil productive. Marl occurs in the W. part of the co., and is extensively used as a fertilizer. The co. is intersected by the Cape May & Millville R. R. Bridgeton is the co. seat. Agr. productions in 1870: Wheat, 140,549 bush.; rye, 4,314 bush.; oats, 98,079 bush; Indian-corn, 507,539 bush.; Irish pot's, 203,886 bush.; sweet pot's, 216,987 bush.; butter, 209,140 lbs.; hay, 27,712 tons. Cash value of farms, $9,515,930. Total, estimated, value of all farm productions, including additions to stock, etc., $2,254,906. Value of manufactures, $6,314,577.

Cumberland, co. in N. C., central part. Area about 950 sq. mls. Pop., 17,035; in 1860, 16,369. It is bounded on the E. by South R., a tributary of the Cape Fear R., which intersects the co. from N. to S., and receives Rockfish Cr. and Little R. The western part is undulating; the eastern, which belongs to the tide-water section of the state, is low and level. The soil is productive; forests of pitch pine yield lumber and turpentine. A railroad passes through the co. from Fayetteville, the co. seat, to the N. W. Agr. productions in 1870: Wheat, 1,283 bush.; rye, 3,075 bush.; Indian-corn, 142,203 bush.; oats, 13,491 bush; Irish pot's, 1,146 bush.; sweet pot's, 57,361 bush.; butter, 6,128 lbs.; hay, 852 tons. Cash value of farms, $637,362. Total, estimated, value of all farm productions, including additions to stock, etc., $536,984. Value of manufactures, $828,715.

Cumberland, p. v. in Guernsey co., Ohio, 16 mls. S. of Cambridge. Pop., 316.

Cumberland, co. in Pa., S. part. Area about 550 sq. mls. Pop., 43,912; in 1860, 40,098. It is bounded on the N. E. by the Susquehanna R., and on the N. W. by the Blue Mts., and on the S. by the South Mts. It consists mainly of a wide and very fertile valley between the two mountain chains just named, and is traversed by affluents of the Susquehanna, the Conedowinit Cr., and Yellow Breeches Cr. The valley is commonly called the Cumberland Valley. Limestone and iron ore are abundant. The co. is intersected by the Cumberland Valley R. R. Carlisle is the co. seat. Agr. productions in 1870: Wheat, 809,046 bush.; rye, 43,851 bush.; oats, 1,131,724 bush.; Indian-corn, 1,106,633 bush.; Irish pot's, 160,688 bush.; sweet pot's, 7,034 bush.; butter, 853, 471 lbs.; hay, 57,761 tons. Cash value of farms, $22,474,577. Total, estimated, value of all farm productions, including additions to stock, etc., $1,008,307. Value of manufactures, $3,249,032.

Cumberland, tn. in Adams co., Pa., Pop., 1,455.

Cumberland, tn. in Greene co., Pa. Pop., 1,768.

Cumberland, tn. in Providence co., R. I. Pop., 3,882.

Cumberland, co. in Tenn., E. part. Area about 450 sq. mls. Pop., 3,461; in 1860, 3,460. The co. forms part of the Cumberland Plateau, and its surface varies from 1,200 to 1,800 feet in elevation. The soil is moderately fertile. Daddy's Cr. and Obeys Cr. rise in the co. and flow through it in opposite directions; the former to the W., the latter to the E. Crossville is the co. seat. Agr. productions in 1870: Wheat, 1,585 bush.; rye, 2,241 bush.; Indian-corn, 42,377 bush.; oats, 9,115 bush.; Irish pot's, 52,317 bush.; sweet pot's, 2,367 bush.; butter, 57,679 lbs.; tobacco, 13,098 lbs.; hay, 542 tons. Cash value of farms, $414,455. Total, estimated, value of all farm productions, including additions to stock, etc., $227,074. Value of manufactures, $35,093.

Cumberland, co. in Va., S. central part. Area, 310 sq. mls. Pop., 8,142; in 1860, 9,961. It extends from the Appomattox R. on the S. to the James R. on the N., and is drained by Willis R. and Deep Cr., affluents of the latter. The surface is undulating. The soil was formerly productive, but has greatly deteriorated in many parts from long continued injudicious farming. Cumberland Court House is the co. seat. Agr. productions in 1870: Wheat, 72,082 bush.; Indian-corn, 64,257 bush.; oats, 42,945 bush.; Irish pot's, 3,369 bush.; sweet pot's, 2,598 bush.; tobacco, 955,855 lbs.; butter, 34,652 lbs.; hay, 259 tons. Cash value of farms, $1,170,312. Total, estimated, value of all farm productions, including additions to stock, etc., $338,062. Value of manufactures, $34,533.

Dade, co. in Fla., S. part. Area, 1,025 sq. mls. Pop., 85; in 1860, 83. The surface is generally level. The Everglades, a large expanse of shallow water surrounding thousands of small islands, occupy most of the surface. The county is bounded on the E. by the Atlantic Ocean, on the S. by Florida B., and on the W. by Gulf of Mexico. Biscayne is the co. seat.

Dade, co. in Ga., N. W. part. Area, 235 sq. mls. Pop., 3,033; in 1860, 3,069. It forms the N. W. extremity of the state, and borders on Tenn. and Ala. The surface is mountainous. The eastern part is occupied by the Lookout Mt., the western by the Raccoon Mts. Between the two ranges extends a fertile valley, through which the Alabama & Chattanooga R. R. passes. There are valuable coal mines in the co. Trenton is the co. seat. Agr. productions in 1870: Wheat, 26,637 bush.; rye, 119 bush.; Indian-corn, 6,488 bush.; oats, 3,673 bush.; Irish pot's, 2,946 bush.; sweet pot's, 2,375 bush.; butter, 27,703 lbs.; hay, 244 tons. Cash value of farms, $496,307. Total, estimated, value of all farm productions, including additions to stock, etc.; $53,863. Value of manufactures, $55,882.

Dade, co. in Mo., S. W. part. Pop., 8,683; in 1860, 7,072. The surface is rolling and in some parts broken. Some parts are well timbered, others consist of prairies. The climate is salubrious and the soil productive, well adapted either to farming or stock raising. Coal, iron, some lead and copper are found. Greenfield is the co. seat. Agr. productions in 1870: Wheat, 78,016 bush.; rye, 762 bush.; Indian-corn, 416,307 bush.; oats, 109,553 bush.; Irish pot's, 17,898 bush.; sweet pot's, 3,430 bush.; tobacco, 22,004 lbs.; butter, 92,688 lbs.; hay, 2,265 tons. Cash value of farms, $1,933,005. Total, estimated, value of all farm productions, including additions to stock, etc., $614,210. Value of manufactures, $168,362.

DAKOTA extends from 43° to 49° N. lat. and from 96° 22′ 30″ to 104° W. long. It is bounded on the N. by British America, on the E. by Minn. and Iowa, on the S. by Nebr., and on the W. by Wyo. and Mont. The greatest length is 414 mls. and the greatest width 360 mls.; the area, 150,932 sq. mls., or 96,596,480 acres. The southern boundary is formed by the Missouri R., the Niobrara R. and the Keya Paha R.; the eastern by the Big Sioux R.; Big Stone Lake, Lake Traverse and the Red R. of the North.

Surface.—The territory forms a gently undulating prairie, rising very gradually from the E. to the W. Near its south-western corner are the Black Hills, the only mountain group of the region, which rises over 7,000 feet above the sea. The "Plateau du Coteau du Missouri," or Missouri Hills, occupy the eastern shores of the great river, and the "Plateau du Coteau des Prairies," or Prairie Hills, a table-land which nowhere exceeds 1,500 feet in elevation, extend for 200 mls. along the the eastern border of the territory.

Rivers and Lakes.—The Missouri R. intersects Dakota from the N. W. to the S. E., and receives within its boundaries numerous tributaries. Those joining the main stream from the W. are the Little Missouri, the Big Knife, the Heart, the Cannon Ball, the Ree or Grande, the Shyenne, formed by two forks, which receive the drainage of the Black Hills, the White and the Niobrara Rs. From the E. the Missouri receives the numerous small creeks which rise in the Missouri Hills; the Dakota R., a large stream which traverses the territory from N. to S.; the Vermillion R.; the Brulé Cr. and the Big Sioux R. The Red R. of the North passes northward for a distance of 200 mls. along the eastern boundary of the territory. It receives the Shyenne-Oyu R., which drains the Mini Wakan or Devil Lake. The Pembina R. intersects the north-eastern part of the territory, and the Souris, or Mouse, R. the northern.

Climate.—The climate is more genial and mild than the high latitude would seem to warrant. The annual rain-fall averages 20 inches, and the fact that it mostly occurs during the warm season is favorable to vegetation. Although Dakota is mainly a prairie region, forests are not wanting. The margins of the rivers, lakes and brooks are generally fringed with groves of cottonwood, oak, ash, elm and maple. The prairies of southern Dakota are covered with myriads of beautiful wild flowers from April to October.

Population.—Dakota was organized as a territory on the 2d of March, 1861. The first white settlements were made in 1858-9 at Sioux Falls, Vermillion and Yankton. In 1870 the population was 14,181, or 0.09 persons to the sq. mle. There were 9,366 natives (including 92 colored and 999 Indians), and 4,815 foreign-born persons. Of the total number of persons engaged in all classes of occupations (5,727), 2,522 were engaged in agriculture, 2,704 in professional and personal services, 204 in trade and transportation, and 457 in manufactures and mining.

Agriculture.—Dakota has much excellent soil,

of which thus far but little is settled and cultivated. The valley of the Big Sioux R., as high up as Stone Lake, is one of the finest bodies of agricultural land in the territory, and will, at no distant day, be improved. West of it is another valley of great fertility on Brulé Cr. This is one of the most attractive and most densely populated districts of Dakota. The Vermillion Valley, still further W., is noted for its great natural beauty and fertility of soil, and is being rapidly settled. The Dakota R. Valley is thus far but little known, but contains extensive tracts of the very best farming lands. Along the Missouri R., from the mouth of the Big Sioux to Fort Thompson, extends a broad, fertile plain, well supplied with heavy timber, and accessible to markets.

Of the land in farms, 42,645 acres were improved, 22,605 acres woodland, and 237,126 acres unimproved. The number of farms was 1,720, of which 455 included from 3 to 10 acres; 414 from 10 to 20 acres; 642 from 20 to 50 acres; 166 from 50 to 100 acres, and 43 from 100 to 500 acres. The total cash value of farms was $2,085,265, and the estimated value of farm productions $495,657; and of all live stock, $779,952. The principal productions were: 170,460 bush of spring wheat; 133,140 corn; 114,327 oats; 4 118 barley; 50,177 pot's; 8,810 lbs. ot wool; 209,735 butter; 13,347 tons of hay, and 1,230 lbs. of sorghum molasses. Dakota had 2,514 horses; 225 mules, and asses; 4,151 milch cows; 2,125 working oxen; 6,191 other cattle; 1,961 sheep, and 2,033 swine.

Manufactures.—The total value of manufactures was $178,570, and the principal products were lumber, flour and meal. The Northern Pacific R. R. will intersect this territory from E. to W.

Education.—There were 34 public schools of all classes in Dakota, with 48 teachers and 1,223 pupils. The school income amounted to $8,364, which was raised entirely by taxation. Three weekly newspapers were published, with a total circulation of 1,652 copies.

Wealth and Taxation.—The total assessed value of real estate was $1,695,723, and of personal estate, $1,228,766. The estimated value of real and personal estate amounted to $5,599,752. Dakota had no state debt. The county debt was but $5,761, and the taxation (not national) was $13,867.

Government.—The Governor and Secretary are appointed by the President. The Auditor, Treasurer, and Superintendent of Public Instruction are chosen by the qualified electors. The judicial power is vested in a Supreme Court, District Courts, and Probate Courts. The Supreme Court is composed of one Chief Justice and two Associate Justices.

The following counties are organized: Bonhomme, Buffalo, Charles Mix, Clay, Deuel, Hutchinson, Jayne, Lincoln, Minnehaha, Pembina, Shyenne, Todd, Union, Yankton.

The capital of the territory is Yankton.

Dakota, co. in Minn., S. E. part. Area, 550 sq. mls. Pop., 16,312; in 1860, 9,093. The surface is undulating, the soil productive. The Mississippi R. separates the co. from Wis. on the E. and the Mississippi, together with the Minnesota R., forms the N. boundary. Canon R. forms most of the S. boundary. The Milwaukee & St. Paul R. R. intersects the W. part from N. to S., and the St. Paul & Sioux City R. R. passes through the N. part. Hastings is the co. seat. Agr. productions in 1870: Wheat, 1,435,874 bush.; rye, 4,664 bush.; Indian-corn, 210,286 bush.; oats, 634,806 bush.; Irish pot's, 93,387 bush.; butter, 457,400 lbs.; hay, 22,744 tons. Cash value of farms, $5,226,820. Total, estimated, value of all farm productions, including additions to stock, etc., $2,509,758. Value of manufactures, $641,873.

Dakota, co. in Nebr., N. E. part. Pop., 2,040; in 1860, 819. It is bounded on the N. E. and E. by the Missouri R., which separates it from Dak. and Iowa, and receives several small affluents. The surface consists of rolling prairies with well timbered bottom-lands along the streams. The bottoms are very productive, while the uplands are excellent for grazing purposes. Dakota is the co. seat. Agr. productions in 1870: Wheat, 56,510 bush.; rye, 397 bush.; Indian-corn, 66,255 bush.; oats, 25,835 bush.; Irish pot's, 27,450 bush.; sweet pot's, 2 bush.; butter, 69,950 lbs.; hay, 11,635 tons. Cash value of farms, $777,285. Total, estimated, value of all farm productions, including additions to stock, etc., $253,587. Value of manufactures, $236,810.

Dallas, co. in Ala., W. central part. Area about 900 sq. mls. Pop., 40,705; in 1860, 33,625. The Alabama R. intersects the co. in a very winding course from N. E. to S. W., and divides it into two nearly equal parts. It re-

ceives the Cahawba R. and numerous smaller affluents. The surface is undulating and the soil very productive. Selma is the co. seat. Agr. productions in 1870: Wheat, 1,287 bush.; rye, 55 bush.; Indian-corn, 436,701 bush.; oats, 18,101 bush.; Irish pot's, 5,567 bush.; sweet pot's, 35,968 bush.; cotton, 24,819 bales; butter, 63,122 lbs.; hay, 366 tons. Cash value of farms, $3,112,373. Total, estimated, value of all farm productions, including additions to stock, etc., $2,753,591. Value of manufactures, $247,493.

Dallas, co. in Ark., S. central part. Area about 850 sq. mls. Pop., 5,707; in 1860, 8,283. It lies between the Saline R. on the E. and the Washita R. on the W., and is drained by the Bayou Tulip and Moro R. The surface is undulating or level, and the soil productive. Princeton is the co. seat. Agr. productions in 1870: Wheat, 620 bush.; Indian-corn, 124,449 bush.; oats, 355 bush.; Irish pot's, 560 bush.; sweet pot's, 14,575 bush.; tobacco, 390 lbs.; cotton, 2,555 bales. Cash value of farms, $358,559. Total, estimated, value of all farm productions, including additions to stock, etc., $482,556. Value of manufactures, $29,837.

Dallas, co. in Iowa, central part. Area, 575 sq. mls. Pop., 12,019; in 1860, 5,244. It is watered by the Racoon R. and its tributaries. The surface is rolling and the soil productive. Adel is the co. seat. Agr. productions in 1870: Wheat, 240,004 bush.; rye, 117 bush.; Indian-corn, 939,609 bush.; oats, 91,884 bush.; Irish pot's, 38,012 bush.; sweet pot's, 1,510 bush.; wool, 32,196 lbs.; butter, 201,368 lbs.; hay, 16,724 tons. Cash value of farms, $3,579,844. Total, estimated, value of all farm productions, including additions to stock, etc., $953,829. Value of manufactures, $145,695.

Dallas, co. in Mo., S. W. central part. Pop., 8,383; in 1860, 5,892. The surface is broken and rocky slopes are not rare; but the river valleys have a very productive soil. The co. is intersected from S. to N. by the Niangua R. and drained by its numerous affluents. Bryois Spring, in the eastern part, discharges nearly 11,000,000 cubic feet of water per day. Lead ore is found. Buffalo is the co. seat. Agr. productions in 1870: Wheat, 57,659 bush.; rye, 544 bush.; Indian-corn, 290,388 bush.; oats, 79,698 bush.; Irish pot's, 14,810 bush.; sweet pot's, 1,947 bush.; tobacco, 14,990 lbs.; butter, 66,894 lbs.; hay, 1,628 tons. Cash value of farms, $775,056. Total, estimated, value of all farm productions, including additions to stock, etc., $400,849. Value of manufactures, $109,-698.

Dallas, co. in Tex., N. part. Area about 500 sq. mls. Pop., 13,314; in 1860, 8,665. The surface is generally level, the soil fertile. It is intersected by Trinity R. from N. W. to S. E., and also drained by Rowlet's Cr. Dallas is the co. seat. ***Dayton,** city and the co. seat of Montgomery co., Ohio, at the junction of the Great Miami and Mad Rs.; on the Miami Canal, and on the Pittsburgh, Cincinnati & St. Louis R. R., and the Cleveland, Columbus, Cincinnati & Indianapolis R. R.; is the northern terminus of the Cincinnati, Hamilton & Dayton R. R.; the southern terminus of the Dayton & Michigan R. R., and of the Cincinnati, Sandusky & Cleveland R. R.; the south-western terminus of the Atlantic & Great Western R. R.; and the south-eastern terminus of the Dayton & Union R. R. Dayton is 60 mls. from Cincinnati and 188 mls. from Cleveland.

The immense water-power furnished by Mad R. is improved and fully utilized in numerous manufacturing establishments, producing agricultural implements, carriages, freight and passenger cars, clothing, cotton goods, flour and meal, furniture, iron castings and hollow ware, distilled and malt liquors, engines and boilers, paper, etc. Dayton has an extensive inland commerce, and is one of the most prosperous cities of the west. In 1850 the population was 10,977; in 1860, 20,081; and in 1870, 30,473, of whom 23,050 were natives of the United States and 7,423 foreigners. The white population numbered 29,925 and the colored only 548.

Dayton is a handsome city and has numer-

ous elegant public buildings and private residences. The Court House is one of the finest in the state, being a successful copy of the Parthenon. The Central National Soldiers' Home, four miles from the city, consists of several large buildings, giving room to the finest hospital in the country, a library, headquarters, reading hall, music hall, etc., standing on a plot of ground of 640 acres, handsomely laid out with avenues, artificial lakes, flower beds and groups of trees and shrubbery.

The schools of Dayton are noted for their superior appointments. Besides the public schools, there is the Cooper Female Academy, a well-managed institution, and others of a high grade. Many of the church edifices are models of architectural beauty and elegance of design.

Sixteen papers are published in the city, two of which are dailies.

DELAWARE, one of the original thirteen states; is bounded on the N. by Pa., on the W. and S. by Md. and on the E. by the Delaware R. and B., and the Atlantic Ocean. It extends from 38° 28′ to 39° 50′ N. lat., and has an area of 2,120 sq. mls. or 1,356,800 acres.

Surface.—Delaware occupies the north-eastern portion of the peninsula which separates Delaware B. from Chesapeake B., and which forms a plain of but little elevation above the sea level. Through the center of this peninsula extends from N. to S. a broad swell of the ground, somewhat higher than the sea-coast, and covered with swampy tracts, from which the small streams issue. Delaware includes a portion of this higher ground and thus forms a plain gently inclining from the W. to the shores of Delaware B. on the E.

Rivers.—The rivers of Delaware are small, and with the one exception of the Delaware R., which forms the boundary, are not navigable. Into this large stream empty the following: Brandywine Cr., rising in Chester co., Pa., traversing a wild and romantic valley, and joined near Wilmington by Christiana Cr.; Duck Cr. forming the boundary between Kent and Newcastle cos.; Mispillion R., forming the boundary between Kent and Sussex cos.; Broadhill Cr. and Indian R., both in Sussex co. The Choptank and Nanticoke Rs. rise in the western part of the state and empty into Chesapeake B.

Climate.—The climate of Delaware is mild, being tempered by the vicinity of the ocean. The mean annual temperature at Newark is between 52 and 53 deg. Fahr. The northern part of the state has much excellent farm land, but the southern part is on the whole sandy and but little productive.

Population.—The first settlements in Delaware were made by Swedes in 1627. In 1655 it became a dependency of the Dutch colony of New Amsterdam, and together with this colony fell into the hands of the English in 1664. In 1682 the English government made it a part of the William Penn grant; but in 1701 it was separated from Pennsylvania, though subject to the same governor down to the war of independence. The number of inhabitants was, in 1790, 59,096; in 1810, 72,674; in 1840, 78,075; in 1860, 112,216, and in 1870, 125,015, which includes 115,879 natives and 9,135 foreign born persons. Among the natives were 93,101 whites and 22,778 colored; and among the foreign born, 1,141 Germans; 1,419 Englishmen, and 5,907 Irishmen.

In all classes of occupations were engaged 40,313 persons, of whom 15,973 were engaged in agriculture; 11,389 in professional and personal services; 3,437 in trade and transportation, and 9,514 in manufactories and mechanical industries.

Agriculture.—The number of acres of improved land was 698,115; of woodland, 295,162, and of unimproved land in farms, 59,045. The cash value of farms was $45,712,870, and the estimated value of farm productions, including betterments, was $8,171,667. There were produced 835,340 bush. winter wheat; 10,222 bush. rye; 3,010,390 bush. Indian-corn; 554,388 bush. oats; 362,724 bush. Irish pot's; 85,309 bush. sweet pot's; 58,316 lbs. wool; 1,171,963 lbs. butter; 41,890 tons hay; 65,908 gallons of sorghum molasses, and 33,151 lbs. of honey. Delaware produces large quantities of fine fruits and vegetables. The peach orchards are justly famous and partly supply the markets of Philadelphia, New York and even Boston. The value of orchard products in 1870 was $1,226,893, and of market gardens, $198,675. The value of all live stock was $4,257,323. Delaware had 16,779 horses; 3,584 mules and asses; 24,082 milch cows; 6,888 working oxen; 22,714 sheep and 39,818 swine. The number of farms was 7,615, and of these 349 had from 3 to 10 acres; 453 from 10 to 20 acres; 1,531 from 20 to 50 acres; 2,398 from 50 to 100 acres; 2,832 from 100 to 500 acres; 40 from 500 to 1,000, and 3 over 1,000.

Manufactures.—The manufacturing industry of Delaware is of great importance, and mostly carried on in the northern part of the state and the city of Wilmington. According to the last census there were 800 manufacturing establishments in the state, employing 4,313 horse-power of steam-engines, 4,220 horse-power of water-wheels, and 9,710 hands. The capital invested was $10,839,093. The raw materials consumed had a value of $10,206,398, and the manufactured products, $16,791,382. The state had 6 cotton factories with 771 looms and 18,634 spindles, which employed 726 hands, consumed 2,587,615 lbs. of raw cotton, and produced 2,396,000 yds. of shirting and sheeting; 1,475,600 lbs. of yarn; 171,428 lbs. of bats, and 420,400 lbs. of other goods. The value of all cotton manufactures amounted to $1,060,898. Eleven establishments manufactured woollen goods, employing 399 hands and producing 276,332 yds. of cloth, etc., of the value of $576,067. In 18 iron foundries were cast 40,000 car wheels, 3,000 feet of railing, 350 stoves, 79 tons of agricultural castings, and 4,448 miscellaneous castings. The value of all cast-iron products was $1,085,557. Machinery to the value of $639,438 was produced in 8 establishments. Eighty saw mills produced 100,000 laths, 18,858 m. feet of lumber and $56,356 worth of staves. All the sawed lumber products had a value of $405,041. Eighteen tanneries produced 36,454 sides of leather and 81,425 skins, of $244,993 in value. Flour is a prominent article in the list of Delaware manufactures. In 1860 the total value of flour and meal produced was $1,849,537 and in 1870, $2,067,401. Ten establishments turned out agricultural implements to the value of $41,325.

Commerce.—Although the state borders on navigable waters, its maritime commerce is not extensive. During the fiscal year ending June 30, 1871, Delaware imported commodities of $2,245 in value, and exported domestic goods of $82,144 in value. It had but two registered vessels of 771 tons; 130 enrolled vessels of 15,231 tons, and 28 licensed vessels of 324 tons. Of these 160 vessels, 17 were steamboats and had a tonnage of 6,826. Delaware is well supplied with railroads. The total mileage was, in 1871, 227. The northern extremity of the state is intersected by the Philadelphia, Wilmington & Baltimore R. R. Branch roads extend from Wilmington to New Castle and Frenchtown and traverse the state from N. to S., and the Wilmington & Reading R. R. extends from Wilmington to Birdsboro, Pa. The Chesapeake & Delaware Canal crosses the state from E. to W., and connects the bays of the same name, forming an important link in the line of navigation between Baltimore & Philadelphia.

Education.—The state has three colleges. Delaware College, located at Newark, has a scientific department and an agricultural college. St. Mary's College is at Wilmington, and Brandywine College at Brandywine. In 1870 Delaware had 326 public schools with 388 teachers and 16,835 pupils; 11 classical and professional schools with 63 teachers and 859 pupils; and 38 other schools, not public, with 59 teachers and

1,881 pupils. The 17 newspapers, published within the state had a circulation of 20,860 copies.

Wealth and Taxation.—The total assessed valuation in 1870 was $64,787,223, which included $48,744,783 for real estate and $16,042,440 for personal estate. The estimated valuation for personal and real estate was $97,180,833. Delaware has no state debt. The total amount of county, town and city debt amounted in 1870 to $526,126. The total (not national) taxes, levied in the same year, were $118,092; of which $83,666 were state taxes.

Government.—The Governor is elected by the people for a term of four years, and he appoints the Secretary of State and the Attorney-General. The Treasurer and Auditor are elected by the legislature for two years. The Senate consists of nine members and the House of twenty-one, elected for two years.

The judicial power is vested in a Court of Errors and Appeals, a Superior Court, a Court of Chancery, an Orphans' Court, a Court of Oyer and Terminer, a Register's Court and Justices of the Peace. Dover is the capital. The state is divided into three counties, viz.: Kent, New Castle and Sussex.

Des Moines, tn. in Van Buren co., Iowa. Pop., 1,078.
***Des Moines,** city, co. seat of Polk co. and capital of Iowa, at the junction of the Raccoon and Des Moines Rs., and on the Chicago, Rock Island & Pacific R. R., 174 mls. from Davenport and 357 mls. from Chicago. The city has a beautiful location on rising ground, so as to afford fine residence sites. The principal public buildings are the United States Court House, Post-office and State House. The foundation has been laid for a new State House, which will cost $3,000,000. It has an active commerce and several extensive manufactories, as machine shops, a paper mill, iron foundries, etc.

In 1850 it had 502 inhabitants; in 1860, 3,965, and in 1870, 12,035, of whom 9,357 were natives of the United States, and 2,478 of foreign countries. It has excellent educational establishments, including five high schools and an academy.

The number of papers published is fourteen, of which the "Iowa State Register" and the "Des Moines State Leader" are the most important dailies.
Des Moines, tn. in Jackson co., Minn. Pop., 548.
Des Moines, tn. in Clarke co., Mo. Pop., 1,235.
Des Moines River, a tributary of the Mississippi R.; rises in Murray co., Minn., and flowing S. E., intersects the state of Iowa, emptying near Keokuk. It is at present not navigable, but may be made so for about 200 mls. by the removal of the obstructions in its bed. Its upper course passes through rolling prairies; but below Des Moines it flows in a deep valley of erosion, with high precipitous sides. Its principal tributaries are the East Fork, Skunk Cr. and Indian Cr., entering from the N., and Raccoon R., North R. and Middle R. from the W.
De Soto, v. in Floyd co., Ga.
De Soto, tn. in Jackson co., Ill. Pop., 1,433.

Detroit, p. v. in the above tn., on the Illinois R., 8 mls. S. by E. of Griggsville.
***Detroit,** p. v. in Dickinson co., Kans., on the Kansas Pacific R. R., 90 mls. W. of Topeka, in a rich farming and stock-raising region.
Detroit, tn. in Somerset co., Me. Pop., 690.
Detroit, p. v. in the above tn., near the Maine Central R. R., 31 mls. W. of Bangor.
***Detroit,** city, port of entry and the co. seat of Wayne co., Mich., on the Detroit R., 7 mls. below Lake St. Clair, and 18 mls. above Lake Erie; is the eastern terminus of the Michigan Central R. R., and the Detroit & Milwaukee R. R., the northern terminus of the Lake Shore & Michigan Southern R. R., and the western terminus of the Grand Trunk R. R. of Canada. It is 284 mls. E. of Chicago and 361 mls. W. of Buffalo.

The city extends along the river for about 3 mls., and is built up for about 2¼ mls. from its banks. The streets are wide and lined with shade trees. Several broad avennes radiate from the Grand Circus as from a common center, while other streets intersect each other at right angles. This double plan produces a number of small triangular parks, which give a picturesque appearance to many localities. D. has many beautiful churches, handsome private residences, which are often surrounded by gardens and parks, and splendid stores. The chief public buildings are the U. S. Custom House, in which is also the Post-office; the Board of Trade building, and the Freight Depot of the Michigan Central R. R., an enormous structure 1,250 feet long, and 102 feet wide, forming a single room without partitions or pillars.

Detroit was founded by the French in 1670. In 1830 it had a population of 2,222; in 1840, of 9,102; in 1850 of 21,019; in 1860 of 45,619, and in 1870 of 79,577, of whom 44,196 were natives and 35,381 foreigners. The latter included 7,724 natives of British America; 760 of France; 12,647 of Germany; 3,282 of England; 6,970 of Ireland, and 1,637 of Scotland.

It is a city of great commercial importance, and ships immense quantities of grain, wool, pork and other products of the state; also copper ore from the mines in the northern peninsula. The number of enrolled and licensed vessels in 1871 was 361, which had a tonnage of 78,014. The number of clearances (coastwise) was 1,196 steamers with 698,897 tons, and 1,675 sailing vessels with 205,881 tons; and the

number of entries was 1,078 steamers with 653,179 tons, and 1,353 sailing vessels with 169,790 tons.

The manufactures of Detroit are highly important, and include lumber, cars and carriages, clothing, melted copper, flour and meal, sawed lumber, tobacco and cigars.

The school system is excellent, and the school edifices justly famous. There were 112 schools in 23 buildings, with 143 teachers and 11,252 enrolled pupils, out of a total school population of 26,641.

Thirty newspapers and periodicals are published in Detroit, of which the following have the most extensive circulation: "Tribune," "Free Press," "Post," "Union," and "Michigan Journal."

Detroit City, p. v. in Becker co., Minn., 29 mls. N. W. of Otter Tail City. One newspaper.

Detroit River is the outlet of Lake St. Clair and empties into Lake Erie. (See Lake Erie.)

***Devall's Bluff,** p. v. and the co. seat of Prairie co., Ark., on the White R. and the Memphis & Little Rock R. R., 48 mls. E. of Little Rock and 87 mls. from Memphis. It is the center of trade for a cotton growing district, and has two newspapers.

DISTRICT OF COLUMBIA.—In 1790 Md. and Va. ceded a square tract of land, 10 mls.

long and wide, to the United States, as a site for the national capital. This tract was named the District of Columbia. In 1845 that part of the District which lies S. of the Potomac R. was retroceded to Va., and since then the northern, or Md., portion, forms the national district, including the capital of the country (the city of Washington), and also the city of Georgetown. In its present extent it has an area of 64 sq. mls., and is bounded on the S. by the Potomac R., and on the N. W. and N. E. by the state of Maryland. The eastern portion of it is low and level, the western hilly and elevated. The East Potomac R., and Rock Cr. which separates the municipalities of Washington and Georgetown from each other, are the only streams of importance which traverse the District, and empty into the Potomac.

The population of the District was, in 1800, 14,093; in 1810, 24,023; in 1820, 33,039; in 1830, 39,834; in 1840, 43,712; in 1850, 51,687; in 1860, 75,080, and in 1870, 131,700. The last number includes 88,278 whites; 43,404 colored persons, 3 Chinese and 15 Indians.

The white population consisted of 72,107 natives of the United States; 705 of British America; 231 of France; 4,918 of Germany; 1,418 of England; 8,218 of Ireland; 351 of Scotland, etc.

The soil of the District is productive, and in 1870 the farms included 8,266 acres of improved land; 2,428 acres of woodland, and 983 acres of unimproved land. The cash value of farms was $3,800,230; of agricultural implements, $39,450; of farm productions, including additions to stock, $319,517; and of all live stock, $114,916. The principal farm productions were 3,782 bush. of winter wheat; 3,724 bush. of rye; 28,020 bush. of Indian-corn; 8,500 bush. of oats; 27,357 bush. of Irish pot's.; 5,790 bush. of sweet pot's.; 4,495 lbs. of butter, and 2,019 tons of hay.

The number of manufacturing establishments was 952, which employed steam-engines of 789 horse-power; water-wheels of 1,100 horse-power, and 4,685 operators. The capital invested was $5,021,925; the wages paid, $2,007,600; the cost of raw materials consumed, $4,754,883, and the total value of products, $9,292,173. The principal articles produced were: Flour and meal, $1,543,576; iron castings, $131,405; leather, $134,475; malt liquor, $168,950; planed lumber, $177,000; machinery, $157,250; tin, copper and sheet-iron ware, $246,157, and printed publications, $568,830.

An act of Congress, approved in February, 1871, provided a territorial government for the District, consisting of a Governor and a Council of eleven members, appointed by the President for four years, and a House of Delegates, consisting of twenty-two members, elected by the people. The judiciary consists of the Supreme Court of the District of Columbia, which was established in 1863, and is composed of four justices, who are appointed by the President of the United States. This court has general jurisdiction in law and equity and appellate jurisdiction in all judgments of the justices of the peace of the District. It holds three general terms annually at Washington.

The entire District constitutes the co. of Washington, of which the city of Washington is the co. seat.

El Dorado, co. in Cal., E. part. Area, 1,950 sq. mls. Pop., 10,309; in 1860, 20,562. The co. has a general slope from E. to W., as the eastern part extends across the principle crest of the Sierra Nevada, and the western into the low plain of the Sacramento R. The Middle Fork of the American R. forms the northern boundary and the South Fork drains it. Three-fourths, embracing the mountainous portion, are heavily timbered, while the most westerly section is destitute of trees. Nearly all the cereals, fruits and vegetables are cultivated in the valleys and on the alluvial flats, and the wine grown on the hill sides ranks among the best of California. The gold mines are the chief source of wealth. Valuable marble quarries are found in several localities. Placerville is the co. seat. Agr. productions in 1870: Wheat, 3,099 bush.; rye, 567 bush.; Indian-corn, 58 bush.; oats, 265 bush.; Irish pot's, 4,693 bush.; wool, 50,095 lbs.; butter, 215,530 lbs.; hay, 6,235 tons. Cash value of farms, $672,285. Total, estimated, value of all farm productions, including additions to stock, etc., $498,443. Value of manufactures, $452,876.

***Erie,** city and the co. seat of Erie co., Pa., on Lake Erie and near the Lake Shore R. R., 88 mls. S. W. of Buffalo. It is the terminus of the Philadelphia & Erie R. R., 288 mls. N. W. of Philadelphia. The harbor is one of the best on the lake, with a depth from 9 to 25 feet, and is protected by fortifications. It is con-

nected by the Erie Canal with Beaver on the Ohio R., and has an extensive commerce. Pop., 19,646. Seven newspapers.

Erie, p. o. in Loudon co., Tenn.

Erie, one of the great lakes, drained by the St. Lawrence R.; extends from 41° 25′ to 42° 55′ N. lat., and from 78° 55′ to 83° 34′ W. long. Its greatest length is about 250 mls., the greatest width nearly 60 mls., and it covers an area of about 10,000 sq. mls. The length of its shores is about 660 mls. This lake has much less depth than any other of this chain; not exceeding, in the mean, 125 feet, while the greatest depth measured is only 204 feet. The surface of the lake is 565 feet above the sea level and 334 above Lake Ontario. The outlet of Lake Erie is the Niagara R., and its chief affluent the Detroit R., through which it receives the drainage of the upper lakes (St. Clair, Huron, Michigan and Superior). The largest of its other tributaries are Maumee R., Sandusky R., Cuyahoga R., Grand R., Huron R. and Raisin R. The principal harbors on its shores are Buffalo and Dunkirk, N. Y.; Erie, Pa.; Cleveland Sandusky and Toledo, Ohio.

Essex, co in N. J., N. E. part. Area, 124¾ sq. mls. Pop., 143,839; in 1860, 98,877. The E. boundary is formed by Newark B. and the Passaic R. The Passaic R. also forms part of the W. boundary. In the western part of the co. are two ranges of mountains, known as the First and Second Mts., which trend in a N. E. and S. W. direction. The remainder has a level surface. The soil is highly productive. Farming, gardening and manufacturing are the principal occupations of the inhabitants. The co. is intersected by the Camden & Amboy R. R., the Morris & Essex R. R. and the New Jersey Central R. R. Newark is the co. seat. Agr. productions in 1870: Wheat, 7,579 bush.; rye, 6,249 bush.; oats, 22,107 bush.; Indian-corn, 66,192 bush.; Irish pot's, 73,060 bush.; sweet pot's, 20 bush.; butter, 125,213 lbs.; hay, 11,328 tons. Cash value of farms, $8,810,100. Total, estimated, value of all farm productions, including additions to stock, etc., $806,638. The principle products of industry are: Boots and shoes, $1,946,585; wagons, $756,805; men's clothing, $1,648,388; copper (rolled) $500,000; cotton thread, twine, etc., $1,113,900; flour and meal, $991,875; hardware, $1,225,310; hats and caps, $4,970,570; jewelry, $2,822,820; leather, $8,604,181; beer, $2,587,795; machinery, $713,045; engines and boilers, $600,000; paints, $686,440; saddlery and harness, $1,324,778; sash, doors and blinds, $798,198; trunks and valises, $3,793,000; varnish, $682,419; woollen goods, $835,500; glassware, $520,000 and flour meal, $45,604. Total value of manufactures, $52,108,958.

Essex, co. in N. Y., N. E. part. Area, about 1,650 sq. mls. Pop., 29,041; in 1860, 28,214. Lake Champlain forms the eastern boundary, and the Au Sable R., which rises in the co., forms part of the northern. Other tributaries of Lake Champlain drain the northern part, while the Hudson R., which intersects the S. W. corner with its affluents, Boreas Cr., Schroon R. and others, drains the southern. The country along the lake is generally level; the remainder of the co. is traversed by the loftiest ranges of the Adirondack Mts., which here attain their culminating height in Mt. Marcy, or Taharwas. The soil of the valleys is good, Elizabethtown is the co. seat. Agr. productions in 1870: Wheat, 49,850 bush.; rye, 11,726 bush.; Indian-corn, 100,662 bush.; oats, 317,790 bush.; Irish pot's, 406,122 bush.; sweet pot's, 200 bush.; wool, 260,80, lbs.; cheese, 46,998 lbs.; butter, 993,974 lbs.; hay, 69,211 tons. Cash value of farms, $6,843,040. Total, estimated, value of all farm productions, including additions to stock, etc., $1,835,568. The principal products of industry are: Iron blooms, $523,326; pig iron, $947,815; forged and rolled iron, $203,942; tanned leather, $320,230. Total value of manufactures, $3,349,835.

Essex, tn. in Essex co., N. Y. Pop., 1,600.

***Essex,** p. v. in the above tn., on Lake Champlain, 51 mls. N. of Whitehall.

Essex, co. in Vt., forming the N. E. extremity of the state. Area, 790 sq. mls. Pop., 6,811; in 1860, 5,786. It borders in the E. on the Connecticut R., which receives Nuthegan and Clyde Crs. The southern part is drained by Moose Cr., an affluent of the Passumpsic R. The surface is broken and hilly, being partly occupied by the eastern spurs of the Green Mts. The soil is not very productive, except the bottom-lands of the streams. Guildhall is the co. seat. Agr. productions in 1870: Wheat, 6,103 bush.; rye, 1,746 bush; Indian-corn, 13,613 bush.; oats, 107,598 bush.; Irish pot's, 229,941 bush.; wool, 24,132 lbs.; butter 233,285 lbs.; hay, 18,809 tons. Cash value of farms, $1,873,965. Total, estimated, value of all farm productions, including additions to stock, etc., $791,092. Value of manufactures, $734,739.

Essex, co. in Va., E. part. Area, about 290 sq. mls. Pop., 9,927; in 1860, 10,469. It borders in the N. E. on the Rappahannock R., which is navigable for small vessels along the border of the co. The surface is mostly level; the N. W. corner only is hilly. Much of the soil is sandy and but moderately productive. Tappahannock is the co. seat. Agr. productions in 1870: Wheat, 47,577 bush.; rye, 3,252 bush.; Indian-corn, 264,605 bush.; oats, 14,757 bush.; Irish pot's, 1,670 bush.; sweet pot's, 360 bush.; butter, 27,340 lbs.; hay, 847 tons. Cash value of farms, $1,652,972. Total, estimated, value of all farm productions, including additions to stock, etc., $325,096. Value of manufactures, $92,060.
